

Table of Contents

Preface**Committees****Sponsors**

Chapter 1: Fluid Mechanics

Theoretical and Experimental Analysis of Turbulent Liquid Film Flowing down a Vertical Surface

S. Sinkunas, J. Gyllys and A. Kiela 3

Study of Flow over a Step Cylinder

C. Morton, S. Yarusevych and I. Carvajal-Mariscal 9

Experimental Study of Water Filtering Using Textiles as in Traditional Methods

H. Saidani-Scott, M. Tierney and F. Sánchez-Silva 15

Laminar Flow through a Rectangular Horizontal Channel with Asymmetrical Contraction

O.A. Morales-Contreras, J.G. Barbosa, J.A. Jiménez-Bernal and C.d.C. Gutiérrez Torres 21

Influence of the Alignment of Two Airfoils in the Losses Generation

L.A. Moreno-Pacheco, G.E. Valle-Meléndez, C.d.C. Gutiérrez Torres, J.A. Jiménez-Bernal and M. Toledo-Velázquez 27

Chapter 2: Heat Transfer

Inverse Heat Transfer Using Levenberg-Marquardt and Particle Swarm Optimization**Methods for Heat Source Estimation**
O. Cortés, G. Urquiza and J.A. Hernández 35**Effect of Maximum Temperature and Heating-Cooling Repeated Cycles on Thermal Contact Resistance of a Composite Tube**

I. Carvajal-Mariscal, F. Sánchez-Silva, G. Polupan and J.A. Basualdo-Rojo 41

Chapter 3: Biomechanics and Design of Mechanisms

Pneumatic Artificial Mini-Muscles Conception: Medical Robotics Applications

S. Díaz-Zagal, C. Gutiérrez-Estrada, E. Rendón-Lara, I. Abundez-Barrera and J.H. Pacheco-Sánchez 49

Synthesis Optimization of Planar Mechanisms

E. Lugo-González, E.A. Merchán-Cruz and L.H. Hernández-Gómez 55

Resolution of a 3 RRR Planar Parallel Mechanism

R. Yáñez-Valdez, M. Ruiz-Torres, E. Morales-Sánchez, E. Castillo-Castañeda and J.A. Briones-León 61

Synthesis of 4C Mechanism for Generation of a Dual Mathematic Function

I. García-Ríos, C. Palacios-Montufar, J.A. Flores Campos and R. Osorio-Saucedo 67

Trajectory Generation of Robot Manipulators Using an Artificial Potential Function and Genetic Algorithms

J. Ramírez-Gordillo, J.J. Muñoz-César, A. Gómez-Terán, A. Valencia-Lazcano and A.L. Soria-Moya 73

Chapter 4: Mechanical Vibrations

Stress and Vibration Analysis of a Lathe Bed Made of Aluminum-Copper Alloy for High Speed Machining

R. Torres-Martínez, G. Urriolagoitia-Calderón, G. Urriolagoitia-Sosa and R. Espinoza-Bustos 81

Model Derivation and Numerical Simulation for a Pivoted Rigid Rotor-Bearing System

J.C. Gómez-Mancilla, J.A. Meda-Campaña, S.G. Torres-Cedillo and V.R. Nossov 89

Algorithm for Estimating Natural Frequencies and Mode Shapes of Cantilever MEMS Microbeams

L.A. Flores-Herrera, E.A. Merchán-Cruz, A.T. Velázquez-Sánchez and R. Rivera-Blas

95

Chapter 5: Testing Materials

Tensile Strength of Fibers Extracted from the Leaves of the *angustifolia Haw* Agave in Function of their Length

L. Silva-Santos, L.H. Hernández-Gómez, M. Caballero-Caballero and I. López-Hernández

103

Assessment of the Crack Compliance Method and the Introduction of Residual Stresses by Shot Peening Using the Finite Element Method

G. Urriolagoitia-Sosa, E. Zaldivar-González, J.M. Sandoval Pineda and J. García-Lira

109

Chapter 6: Fractal Analysis

Fractal Analysis of the Solar Radiation in Mexico City

J.E. Urbano-Noriega, O. Morales-Matamoros and C. Hernández-Aguilar

117

Fractal Analysis of Tissue Biocompatible Neuroreservoir

T. López, M. Patiño-Ortiz, A.S. Balankin and R.D. González

121

Fractal Analysis of EEG Signals in the Brain of Epileptic Rats, with and without Biocompatible Implanted Neuroreservoirs

T. López, C.L. Martínez-González, J. Manjarrez, N. Plascencia and A.S. Balankin

127

Chapter 7: Numerical Analysis

Parametric Analysis of Perfect Matched Layer Model of Finite Difference Time Domain Method

M. Benavides-Cruz, M. Nieto-Rodríguez, M. Enciso-Aguilar, M. Galaz-Larios and J. Sosa-Pedroza

139
