

# Table of Contents

## Preface

<b>Bulk and Defect Electronic Structure of Magnetic Alloys</b> J. Kanamori and H. Akai	1
<b>Electronic Structure and Phase Stability of Alloys</b> D. de Fontaine	25
<b>Ab Initio Calculation of Phase Stability of Noble-Metal Alloys</b> K. Terakura, T. Mohri and T. Oguchi	39
<b>Positron-Annihilation 2D-Acar Studies of Disordered and Defected Alloys</b> A. Bansil, R. Prasad, L.C. Smedskjaer, R. Benedek and P.E. Mijnders	49
<b>Computer Simulation of the Deformation of Small Crystals</b> M. Doyama and R. Yamamoto	77
<b>Dynamical Optimization Techniques for the Calculation of Electronic Structure in Solids</b> R. Benedek, B.I. Min and J. Garner	87
<b>Electronic Theory of Dislocations and Grain Boundaries in Metals</b> K. Masuda-Jindo	97
<b>Fermi Surfaces in Hexagonal Transition Metals and Rare Earth Hexaborides Determined by Two Dimensional Angular Correlation of Annihilation Radiations (2D-Acar)</b> S. Tanigawa	111
<b>Low-Temperature Anomaly of Positron Trapping by Defects in Metals</b> Y. Shirai and J. Takamura	123
<b>Perturbed Angular Correlations Studies of Alloys</b> G.S. Collins	139
<b><sup>111</sup>Cd in In-Sn Alloys</b> S. Nasu, F.E. Fujita, Y. Kawase and S. Uehara	151
<b>Electronic Structure of Random Alloys and the Theory of Ordering Processes</b> G.M. Stocks, D.M. Nicholson, F.J. Pinsky, D.D. Johnson and A. Gonis	161
<b>Local Electronic Structure and Chemical Bonding around Fe-Vacancy Pair in Aluminium</b> H. Adachi, S. Nasu and F.E. Fujita	175
<b>Structural Stability of Intermetallic Compounds: A Computational Metallurgical Approach</b> A.J. Freeman	181
<b>Electronic States in a Quasicrystal</b> T. Ninomiya	193
<b>Theoretical Studies of Defects in Insulators within the Framework of the Local Density Approximation</b> M.R. Pederson and B.M. Klein	199
<b>A Fast KKR-CPA Method and Electronic Structure of Transition Metal Alloys</b> H. Akai	211
<b>The Calculation of the Equilibrium Interface Structure of Alloys</b> S.M. Foiles, M.I. Baskes and M.S. Daw	223
<b>Atomic and Electronic States of Carbon in Fe-C Martensite</b> F.E. Fujita and S. Nasu	235
<b>Defects and Diffusion in Amorphous NiZr</b> R.S. Averback and H.T. Hahn	245
<b>Lattice Defects in the Charge Density Wave System NbSe<sub>3</sub></b> A.C. Ehrlich, T.M. Tritt, D.J. Gillespie and G.X. Tessema	253
<b>High Temperature Superconductivity in Transition Metal Oxides: Electronic Structure and Charge Transfer Excitations</b> A.J. Freeman and J.J. Yu	267
<b>NMR Studies on the Interface Magnetism in Metallic Superlattices</b> H. Yasuoka	277
<b>The Electrical Resistivities of Metallic Multi-Layered Films, Mo/Cu and Mo/Al</b> R. Yamamoto	291
