### Preface

## CHAPTER 1: SMART MATERIALS, SENSORS/ACTUATORS AND MICROSYSTEMS

<b>Mechatronics - The Innovation Request</b> H. Irschik, M. Krommer, M. Nader and C. Zehetner	1
<b>Current Research Activities in Mechatronic Applications at AM-TUM - Case Studies</b> H. Ulbrich	11
<b>Piezoelectricity Experimentation, Modeling and Simulation: Common Practices and Realistic Considerations</b> A. Benjeddou	22
<b>Bio-Inspired Autonomic Structures</b> R.A. Shoureshi and S.W. Lim	32
<b>Software Development Modules for Microcontroller-Based System</b> M.C. Edmondson, L. Tang and A. Kern	45
<b>A Self-Sensing Wedge-Wave Ultrasonic Motor Using Modal Sensors</b> T.H. Yu and C.C. Yin	52
<b>Development of a Ferroelectric Shell Finite Element</b> W. Zouari, M. Elhadrouz and T. Ben Zineb	57
<b>Dynamic Displacement Tracking for Frame Structures with a Piezoelectric Patch Network Based on Plate Theory</b> D. Huber, M. Krommer and H. Irschik	64
<b>Ultrasonic Extension Sensing of Actuators Using Integrated Piezoelectric Transducer for Adaptive Optics</b> S.S. Kim, A.E. Uzgur, M. Strachan, J.F. Saillant and K. Kirk	70
<b>Microsystems Technologies for Use in Structures and Integrated Systems</b> A. Schönecker and S. Gebhardt	76
<b>Constitutive Model of Shape Memory Alloys: One-Dimensional Phase Transformation Model</b> T. Ikeda	84
<b>Damping by SMA in Civil Engineering Structures</b> F. Martorell, V. Torra, A. Isalgue, M.L. Perea, P. Terriault and F.C. Lovey	92
<b>Precision Motion Control of a Smart Structure Using an Enhanced Stick-Slip Model</b> M.G. Jang, C.H. Lee and S.B. Choi	98
<b>Experimental Investigation of Non-Linear Behaviour of PZT Piezoceramics at Low Temperatures</b> M. Nicolai, S. Uhlig, A. Schönecker and A. Michaelis	105
<b>A Self-Sensing Method for IPMC Actuator</b> B.G. Ko, H.C. Kwon and S.J. Lee	111
<b>Structure Formation and Strengthening of Hot Deformed Nitrogen-Containing Steels</b> V. Prokoshkina, L.M. Kaputkina, A.G. Svyazhin and J. Siwka	116
<b>Electroactive Pressure Sensors for Smart Structures</b> F. Martínez, E. Tynan, M. Arregui, G. Obieta and J. Aurrekoetxea	122

## CHAPTER 2: INTEGRATION TECHNOLOGIES

<b>Integrated Design of Smart Structures</b> G.P. Cimellaro, T.T. Soong and A.M. Reinhorn	127
<b>Adaptive Solution for Intelligent Cable Vibration Mitigation</b> L. Faravelli, C. Fuggini and F. Ubertini	137
<b>Optimal Simulation for Large Dynamic Systems</b> R.E. Skelton, F.M. Li and M. de Oliveira	147

<b>The Art of Control Algorithms Design and Implementation</b>	154
J. Rodellar, F. Ikhouane, F. Pozo, G. Pujol, L. Acho and J.M. Rossell	
<b>Control of Vibratory Energy Harvesting Systems with Optimized Passive Networks</b>	164
J.T. Scruggs	
<b>Integration of Piezoceramic Modules into Die Castings - Procedure and Functionalities</b>	170
M. Rübner, C. Körner and R.F. Singer	
<b>Performance Characteristics of a Jetting Dispenser Featuring Piezostack and Flexible Beam Mechanism</b>	176
Q.H. Nguyen, S.B. Choi and C.H. Lee	
<b>Control Algorithms for Semi-Active Structural Systems: Do they Really Matter?</b>	182
A. Occhiuzzi	
<b>Model Development and Control Design of Smart Functionally Graded Structures</b>	188
D. Marinova	
<b>Piezoelectric Sensor System for Structural Health Monitoring</b>	194
B.S. Kim and Y.R. Roh	

## **CHAPTER 3: SMART STRUCTURES AND INTEGRATED SYSTEMS**

<b>Monitoring Prestress Level in Seven Wire Prestressing Tendons by Inter Wire Ultrasonic Wave Propagation</b>	200
I. Bartoli, S. Salamone, R. Phillips, F. Lanza di Scalea, S. Coccia and C.S. Sikorsky	
<b>A Vibration Exciter for Evaluating Cable Damping of a Cable-Stayed Bridge</b>	206
J.M. Kim, J.J. Lee, S.S. Ahn and J.S. Choi	
<b>Response Control Performance Evaluation of MR Damper by Shaking Table Tests and Real-Time Hybrid Tests</b>	212
H. Fujitani, H. Sakae, M. Ito and T. Hiwatashi	
<b>A Reliability Assessment Model for MR Damper Components within a Smart Structural Control Scheme</b>	218
M.H.M. Hassan	
<b>Ride Comfort Analysis of a Full-Vehicle Featuring Magnetorheological Shock Absorbers</b>	225
K.G. Sung and S.B. Choi	
<b>Anti-Overturning Control of a Serially Connected Isolation System Using Piezo Electric and MR Tube Support</b>	231
Y.F. Du, Y.H. Liu and H. Li	
<b>On Behavior of Multi-Layered Bases- Foundations and Seismoisolators</b>	237
L.A. Aghaloyan and R.Z. Hovhannisyan	
<b>Fault Tolerant Neural Aided Controller for Multi Degree of Freedom Structures Experiencing Online Sensor Failure</b>	247
M. Contreras, S. Nagarajaiah and S. Narasimhan	
<b>Optimal Placement of MFC Actuators for Vibration Control of Cylindrical Shell Structure</b>	253
J.W. Sohn and S.B. Choi	
<b>Mitigation of Wind-Induced Vibration with Liquid Column Vibration Absorber</b>	259
H.J. Kim, W.J. Kim, S.G. Lee, J.S. Jo, D.K. Kim and K.J. Lee	
<b>Fundamental Study on Simple Quantitative Approach of Damping Performance for Variable Hydraulic Damper</b>	265
T. Hiwatashi and H. Fujitani	
<b>Experimental Assessment of Structural Control Devices Used to Protect Civil Buildings</b>	271
G. Magonette	
<b>Current Directions of Structural Health Monitoring and Control in USA</b>	277
S. Nagarajaiah, S. Dyke, J.P. Lynch, A. Smyth, A. Agrawal, M. Symans and E. Johnson	
<b>Examples of Future Potential Smart Civil Structures</b>	287
A.E. del Grosso	
<b>Chemical Monitoring of Composite Matrices Using Evanescent Wave Spectroscopy</b>	297
P.B.S. Bailey, S.A. Hayes, R.J. Hand and B. Zhang	
<b>Semi-Adaptive Modal Control of On-Board Electronic Boards Using Frequencies Identification Method</b>	303
B. Chomette, D. Rémond, S. Chesné and L. Gaudiller	

<b>An Experimental Study on the Use of Active Constrained Layer Damping for Thin Curved Smart Shell Structures</b>	309
P. Saini, A. Pandhi and A.K. Darpe	
<b>Verification of Robustness in Smart Composite Structures</b>	315
N. Kipnis, R. Tkach, E. Shpitzer and D. Kipnis	
<b>Control of Properties of Composite Structures with the Use of Multi-Functional Materials</b>	324
W.M. Ostachowicz, A. Zak, P. Malinowski and T. Wandowski	
<b>Design and Development of a Green Storage Tank for Thermo-Controlled Water Supply</b>	334
H.C. Tsai, H.J. Tsai and F.K. Hung	
<b>Remotely Controllable SHM System for a Concrete Box-Girder Bridge</b>	339
J.J. Lee, K.Y. Koo, J.Y. Hong and C.B. Yun	
<b>Some Advances in Energy Recycling Semiactive Vibration Suppression</b>	345
J. Onoda	
<b>Experimental Investigation of Effectiveness of Smart Passive System for Seismic Protection of Building Structures</b>	355
H.J. Jung, D.D. Jang, H.J. Lee and S.J. Moon	
<b>Amplification of Interstory Drift and Velocity for the Passive Control of Structural Vibrations</b>	363
M. Di Paola, F. Lo Iacono and G. Navarra	
<b>Modeling and Identification of a Large-Scale Magnetorheological Fluid Damper</b>	374
A. Rodriguez, N. Iwata, F. Ikhouane and J. Rodellar	
<b>Characterisation of Force-Deflection Behaviour of Piezoelectrically Actuated Bistable Composite Laminate under Two-Axis Constraint</b>	380
P.F. Giddings, C.R. Bowen and H.A. Kim	

## CHAPTER 4: STRUCTURAL MONITORING

<b>SHM System Integration and Supporting Algorithms</b>	386
A. Mita	
<b>Piezoelectric Impedance Sensor-Based Structural Health Monitoring for Critical Members of Civil Infrastructures</b>	395
C.B. Yun and S.H. Park	
<b>Damage Detection with Auxiliary Subsystem</b>	401
F. Vestroni, J. Ciambella, F. dell'Isola and S. Vidoli	
<b>Development of a Structural Health Monitoring System for Guangzhou New TV Tower</b>	414
Y.Q. Ni, Y. Xia, W.Y. Liao and P. Zhang	
<b>Wireless Sensing and Embedded Monitoring Algorithm for Damage Diagnosis in PSC Girders</b>	420
J.H. Park, D.S. Hong, J.T. Kim, K.Y. Koo, C.B. Yun and G. Park	
<b>Smart Nonlinear Acoustic Based Structural Health Monitoring System</b>	426
U. Polimeno, M. Meo and D.P. Almond	
<b>Strain Monitoring of FRP Elements Using an Embedded Fibre Optic Sensor</b>	435
G. Luyckx, E. Voet, W. De Waele, W. van Paepegem, J. Degrieck and J. Vlekken	
<b>High Strain Monitoring during Fatigue Loading of Thermoplastic Composites Using Imbedded Draw Tower Fibre Bragg Grating Sensors</b>	441
E. Voet, G. Luyckx, I. De Baere, J. Degrieck, J. Vlekken, E. Jacobs and H. Bartelt	
<b>Self-Detection of Delamination in Active Fiber Composites</b>	447
D.W. Wang, W.C. Tsai and C.C. Yin	
<b>Stochastic Vector Identification and Uncertain Modal Parameter Estimation for a Smart Composite Beam</b>	453
J.D. Hios and S.D. Fassois	
<b>Optimization of Signal Pre-Processing for the Integration of Cost-Effective Local Intelligence in Wireless Self-Powered Structural Health Monitoring</b>	459
T. Monnier, P. Guy, M. Lallart, L. Petit, D. Guyomar and C. Richard	
<b>Numerical Simulation for Concrete Structure Health Monitoring Based on Smart Piezoelectric Transducer Array</b>	469
S. Yan and W. Sun	
<b>Advanced Ultrasonic Structural Monitoring of Waveguides</b>	477
M. Cammarata, D. Dutta, H. Sohn, P. Rizzo and K.A. Harries	

<b>Damage Detection in Beam-Like Structures Using Deflections Obtained by Modal Flexibility Matrices</b>	483
K.Y. Koo, J.J. Lee, C.B. Yun and J.T. Kim	
<b>Development of a Structural Health Monitoring Benchmark Problem for High-Rise Slender Structures</b>	489
Y. Xia, Y.Q. Ni, J.M. Ko and H.B. Chen	
<b>Continuing Structural Health Monitoring after Repair: Starting from Scratch?</b>	495
J. Kullaa	
<b>Multivariate Statistical Analysis for Detection and Identification of Faulty Sensors Using Latent Variable Methods</b>	501
M.R. Hernandez-Garcia and S.F. Masri	
<b>A Numerical Method for the Dynamic Analysis of Buildings Provided with Viscoelastic Devices</b>	508
G. Muscolino and A. Palmeri	
<b>Optimization Algorithms for System Integration</b>	514
C. Papadimitriou and E. Ntotsios	
<b>Linking the Impact Force History with Residual Mechanical Characteristics and NDI - A Smart Way to Perform SHM in Composites</b>	524
N. Constantin, V. Anghel, M. Găvan and Ş. Sorohan	
<b>Embedding Intelligence for RTM Process Monitoring and Control</b>	530
R. Caponetto, G. Cicala, G. Dongola, F. Filippino and G. Recca	

## CHAPTER 5: ONGOING AND PERSPECTIVE APPLICATIONS

<b>Biologically Inspired Shape Changing Aerodynamic Profiles and their Effect on Flight Performance of Future Aircraft</b>	534
C. Boller, C.M. Kuo and N. Qin	
<b>Innovations in Smart Materials and Integrated Structural Health Monitoring in the Australian Defence Force</b>	545
M.E. Ibrahim and C.M. Scala	
<b>Vibration Damage Reduction of On-Board Electronic Boards Using Modal Active Control</b>	551
B. Chomette, S. Chesné, D. Rémond and L. Gaudiller	
<b>Monitoring Data for Retrofit Assessment</b>	557
S. Casciati, S. Floridia, N. Impollonia and E. Reale	
<b>Protection of Mediterranean Historical Structures against Earthquakes Using Fragility Curves</b>	563
C.A. Syrmakezis and M.T. Kosta	
<b>Wireless Sensor Node Development for Bridge Condition Assessment</b>	573
C.W. Kim, M. Kawatani, M. Tsukamoto and N. Fujita	
<b>Quantifying the Benefits of Smart Technologies in a Life-Cycle Context</b>	579
D.M. Frangopol and T.B. Messervey	
<b>Wing Mechanization Design and Wind Tunnel Testing for a Perching Micro Air Vehicle</b>	589
J.M. Lukens, G.W. Reich and B. Sanders	
<b>Dynamic Material Application for Architectural Purposes</b>	595
C. Lelieveld and L. Voorbij	
<b>Multifunctional Textiles for Protection against Natural Hazards</b>	601
D. Zangani	
<b>Adaptive Impact Absorption and Applications to Landing Devices</b>	609
J. Holnicki-Szulc, P. Pawłowski, M. Mikułowski and C. Graczykowski	
<b>Tunable Dielectric Resonator Antennas Using Voltage-Controlled Mechanical Deformation</b>	614
A. Mahanfar, C. Menon, R.G. Vaughan, F. Carpi, M. Parameswaran and K. Daheshpour
