Table of Contents

Preface

Chapter 1: Cross-Sectional Technologies

Low Budget Experimental Setup for Harmonic Detection and Correction
R. Böhm, M. Paulsburg, T. Hamann and J. Franke 3

Model of a Power-to-Gas System with Fuel Cell in a Mixed Integer Linear Program for the Energy Supply of Residential and Commercial Buildings
N. Ebell, A. Bott, T. Beck, J. Bürner, J. Praß and J. Franke 11

Time-Discrete Modelling of Industrial Compressed Air Systems Based on Equivalent Circuits
R. Böhm, F. Wurmer, T. Schreiner, Y. Zhang and J. Franke 20

Enhancement of Production Planning and Scheduling by Aspects of Compressed Air Demand and Cost
R. Böhm, C. Oezkurt, F. Diehm, H. Schnieders and J. Franke 27

Simulation-Based Development and Validation of Energy Management Concepts
E. Zizler, M. Wenk and B. Bräutigam 36

A Quick Reaction System Using Energy, Process and Quality Data for Process Characterization and Holistic Monitoring of Large Scale Assembly Lines
C. Sand, F. Renz, A.C. Aslanpinar and J. Franke 44

Potentials for Error Detection and Quality Improvement in Assembly Lines Using FFT, Clustering and Dynamic Envelope Curve
C. Sand, S. Kawan, T. Lechler, M. Neher, D. Schweigert and J. Franke 52

Virtual Process Data Linkage of Assembly Stations in High Variance Workshop Production
C. Sand, D. Manke and J. Franke 60

Semantic Meta Model for the Description of Resource and Energy Data in the Energy Data Management Cycle
M. Brandmeier, M. Brossog and J. Franke 69

Production Process Modeling for Demand Side Management
S. Kabelitz and S. Kolomiichuk 77

Choosing Identification Technologies for Implementation of Traceability in order to Increase Overall Equipment Effectiveness
L. Baier, F. Hüttel, A. Haintl, P. Schuderer and J. Franke 87

E|Flow II - Infrastructural Sensor Concepts to Digitize the Workspace for Sustainable and Resource Efficient Intralogistics
M. Scholz, S. Venkataraman Rmasubramanian, A. Blank, S. Kreitlein and J. Franke 97

Study on Energy Efficiency and Flexibility in Machinery and Production
M. Brugger, G. Götz, C. Richter and G. Reinhart 103

Decision Procedure for Efficient Data Acquisition for Distinct Energy Prognosis Models
M. Süße, J. Stoldt, A. Schlegel and M. Putz 115

Cost-Efficient Energy Monitoring of Manufacturing Machines Based on Nonintrusive Load Monitoring
C. Gebbe, J. Glasschröder and G. Reinhart 125

Chapter 2: Process-Specific Technologies

Efficient near Net-Shape Production of High Energy Rare Earth Magnets by Laser Beam Melting
N. Urban, A. Meyer, S. Kreitlein, F. Leicht and J. Franke 137

Crossbench and Evaluation of Additive Manufacturing Processes in Strategy of Sustainable and Energy Efficient Production
S. Kreitlein, V. Gerter, N. Urban and J. Franke 145

Evaluation and Assessment of Additive Manufacturing Processes Based on the Least Energy Demand in Application for Sustainable Production
S. Kreitlein, V. Gerter, N. Urban and J. Franke 153

Coupled Thermal and Fluid Mechanical Modeling of a High Speed Motor Spindle
L. Koch, J. Müller, G. Michos, J. Paulus, M. Hubert and J. Franke 161

Theoretical Investigation of the Influence of Different Chamber Geometries on the Agglomeration Capacity of Carbon Dioxide
D. Gross, N. Ferguson, S. Amon and N. Hanenkamp 169

Key Figures for Production Control in Non-Ferrous Melting and Die-Casting Plants Based on the Assessment of the Operating State
W. Schlüter, J. Schmidt, M. Henninger and J. Krieg 176

Automatization of the Cable-Routing-Process within the Automated Production of Wiring Systems
P. Heisler, P. Steinmetz, I.S. Yoo and J. Franke 186

The Impact of the Model Support Design on the Flow Field of Supersonic Wind Tunnels
M. Steppert, P. Epple and M. Steber 193

Experimental Study on Laser Beam Sealing for Increased Format-Flexibility of Packaging Machines
G. Götz, M. Brugger, N. Amthor, C. Richter and G. Reinhart 199

Heuristical Solution for Scheduling Single Stage Parallel Machines Production of Calcium Silicate Masonry Units with Sequence-Dependent Changeover Times to Improve Energy Efficiency
L. Baier, T. Donhauser, P. Schuderer and J. Franke 208

Verification of Torricelli's Efflux Equation with the Analytical Momentum Equation and with Numerical CFD Computations
P. Epple, M. Steppert, L. Wunder and M. Steber 220

Recycled Plastic Beads Sorting Machine for Polypropylene and Acrylonitrile Butadiene Styrene Type with Difference of Density
U. Wangrakdiskul, P. Teammoke and W. Laoharatanahirun 230

Circulatory Flow Characteristics in Side Channel Blowers
S. Münsterjohann, T. Heinemann and S. Becker 237

Investigation of Drag Reduction due to Dimpled Surfaces in Narrow Channels by Means of Flow Simulations
J. Praß, J. Franke and S. Becker 244

Numerical Evaluation of Heat Transfer from Rotating Discs Separated by Sealing Elements
J. Praß, M. Reinelt, J. Franke and S. Becker 252

Increasing the Automation Degree in Wiring Harness Assembly by Extending the Standard Crimping Machines by Developed Assembly Concept
P. Heisler, S. Hoessle and J. Franke 262

Resource Efficiency Assessment of Alternative Composite Curing Processes
J. Jahn, J. Kastl, M. Klein and R. Steinhilper 267

Combining Optical Metrology and Additive Manufacturing for Efficient Manufacturing of Carbon Fiber Reinforced Plastic Orthopedics: A Case Study
J. Jahn, B. Thorenz, M. Kafara and R. Steinhilper 275
