|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Effect of Feature Selection on Data-Driven Prediction of Catalyst Performance: A Case Study on Methanol Formation from Thermocatalytic CO<sub>2</sub> Hydrogenation on Cu-Based Catalysts</b><br>N.N. Hidayat, U. Sudibyo, A.W. Kurniawan, F.H. Arvianto, M. Naufal, W.A.E. Prabowo, H.A. Azies and M. Akrom | 1   |
| <b>Microkinetic Comparison of CO<sub>2</sub> Hydrogenation to Methanol over Unsupported and Supported Subnanometer Pd<sub>x</sub> Clusters</b><br>D.A. Syaifullah, M.A. Nuruzzahran, A.P. Wijaya, A. Ikhtiarudin, R. Budiantono, M.H. Mahyuddin and A.G. Saputro                                                | 7   |
| <b>Exploring the Spontaneous Dissociation of Inorganic Salts: Thermodynamic Analysis and Reaction Kinetics in an Exothermic System</b><br>W.R. Abdullah and A.A. Mahmood                                                                                                                                        | 15  |
| <b>Theoretical and Experimental Study Using Hyperchem-8 and Gaussian Computer Program to Study the Stability, Binding Energies, and Electrical Characteristics of Triazole-Based Metal Complexes in the Gas Phase</b><br>J.H. Abdulameer, A.I. Mohammed, M.F. Alias and M.A. Reishaan                           | 23  |
| <b>Enhanced Humidity Sensing Properties of Sn-Doped ZnO Nanostructures on AZO/PET Substrates via Sol-Gel Immersion Method</b><br>S. Ahmad Kamal, N.D. Md. Sin, M.H. Mamat, M.Z. Hussin, F.K. Abd Hamid, M.H. Abdullah and N.A. Asli                                                                             | 39  |
| <b>Review of Mechanical and Physicochemical Pretreatments in Essential Oil Extraction: Mass-Transfer Enhancement and Yield Optimization</b><br>D.S. Ramadhan, V.O. Azzahra, S. Kanza, D. Wardana and R. Mustofa                                                                                                 | 51  |
| <b>Sustainable Biochar Production from Palm Kernel Shell through Slow Pyrolysis: A Life Cycle Assessment of Its Application as an Eco-Friendly Fertilizer</b><br>A. Fikarda, M.R. Rahman, Y. Bindar and L.D. Kasmiarno                                                                                          | 69  |
| <b>Optimizing Co-Firing Ratio of RDF MSW and Coal in a Fluidized Bed Reactor</b><br>I.M.A. Putrawan, I.N.S. Winaya, I.N. Simpen, I.B.A. Swamardika, I.M. Rajendra, W.G. Ariastina, I.P.A.Y. Pratama and I.G.N.P. Tenaya                                                                                         | 83  |
| <b>Simulation of Hydrogen Gas Production Process from Oil Palm Empty Fruit Bunch (OPEFB) Combine with Carbon Capture Based on Aspen Plus Software</b><br>R.M. Rachman, A.Y. Gautama and F. Nurrahman                                                                                                            | 93  |
| <b>A Comparison Study between Steady-State and Dynamic Operation Models on the HTPS Performance</b><br>Z.Y. Al-Moosawi, A.A. Ateeq and M.T. Al Shamkhani                                                                                                                                                        | 105 |
| <b>Novel Design of Vertical Undivided Electrochemical Cell with Concentric Electrodes for Continuous Production of Sodium Hypochlorite</b><br>S.A. Jafar, Z.A. Abdel-Rahman, A.A. Younes, L.I. Saeed and J.I. Humadi                                                                                            | 119 |
