

Table of Contents

Characterization of Bio-Sorbent from the Pyrolysis of Patchouli Dregs to Remove Methylene Blue Dyes Z. Fazira, M. Hasyim, E. Putra, W. Pratama, S. Suraiya, S. Muchtar, A. Gani and F. Mulana	1
Advancing Environmental Protection: Monolithic Bentonite and Zeolite-Clay Adsorbents for Fe²⁺ Ion Removal D. Darmadi, M. Zaki, A. Adisalamun and A. Chairunnisak	13
Recyclability and Carbonization Regeneration of Oil Adsorbing Materials Based on Commercial Expandable Graphite C.M. Li	23
Binary Adsorption Kinetics of Tetracycline and Doxycycline on HKUST-1: Modification Pseudo First and Second Order Models E.M. Denesa, T. Laysandra, F.E. Soetaredjo, W. Irawaty, S. Ismadji, J.N. Putro and S.P. Santoso	31
Efficient Removal of Aqueous Copper (II) Ions Using EDTA-Modified Graphene Oxide: An Adsorption Study G. Ongayo and P.A. Magallanes	41
Characteristics Serpentine Aceh: Morphology and Chemical Compositions Studied by SEM-EDS and XRF A.A. Reza, M. Mahidin, Y. Yunardi, A. Gani and S. Wardani	57
Determination of the Optimum Composition of Chitosan-Grafted Cellulose/TiO₂ Films Using the Box Behnken Design Method H. Fathana, S. Lubis, M. Adlim and R. Rahmi	65
The Application of the HSV Color Model for Accurate Digital Colorimetric Analysis of Fluoride Detection Using a Thiourea Receptor N.D. Effendhy, R. Roto and D. Siswanta	75
