

Table of Contents

Preface and Conference Organization

Chapter 1: Computer-Aided Design and Research in Mechanical Engineering

Finite Element Modeling for the Locomotive Traction Gears X.C. Shi, W.D. He and J.H. Bao	3
The Modeling Design of Plastic Ashtray Technology and Rapid Prototyping Technology Based on Reverse Engineering Z.Y. Li, X.M. Wang, Y. Zhu, M.Y. Huang and H.J. Ni	9
Modeling and Rapid Prototyping for Toy Aircraft Based on Pro/Engineering H.J. Ni, Y. Pei, S.S. Lv, L.F. Chen, Z.Y. Li, M.Y. Huang and Y. Zhu	14
3D Parametric Design and Performance Test of Precision Cam Divider N.F. Xu and W. He	22
3D Geometrical Details Transfer with Cubic B-Spline Wavelet W. Liu, X.H. Zhou and Q. Niu	28
Biarc Approximations Tool-Path Generation for Polyhedral Models E.T. Yuan and B. Shao	32
Visual C++-Based Algorithm Research and Software Development for Cold-Formed Thin-Wall Steel Sectional Properties of Arbitrary Section M.Q. Zhang, Q.L. Zhang and Z.G. Chang	37
Modeling, Validation and Optimization of Car Side Impact Y.Y. Xing, B. Yu and F.Q. Yang	43
Dynamic Simulation Research on the Sorting Machine Induction Based on the Virtual Prototyping W. Chen, Q.X. Jia, H.X. Sun and S.C. Nian	48
The CAE Analysis for Thin-Walled Plastic Parts Vacuum Casting H. Guo and Y.T. Zhou	52
Finite Element Analysis of Static and Dynamic Characteristics of High-Speed Horizontal Machining Center Bed P. Wang, Y.R. Zuo, L.N. Ren and D.D. Song	58
Modal Analysis of Oversize Ball Mill Tube Based on ANSYS L.T. Chen, Y.J. Xue, Y. Liu and J.S. Li	62
ANSYS-Based Finite Element Analysis on TBM Disc Cutter K. Zhang, Z.N. Wang, H. Sun, J. Sun and Y.H. Wu	66
The Parameterization Design of Standard Parts Based on UG Part Families and Excel Database H. Yan, H.B. Liu and L. Wu	74
Research on Cutting Force Simulation for Francis Hydro Turbine's Blade Based on VERICUT L. Wu, Y.C. Yin, Z. Xiong and Y.L. Yan	78
Cone Crusher Simulation Based on PFC^{3D} G.Y. Yang and B.J. Wang	82
The Optimization and Improvement of Truck Brake Caliper Bracket Based on the Finite Element Method M.X. Lei, Q. Cao, Y. Wang and P.F. Xia	86
Numerical Simulation on Guide Plates in Coal-Fired Power Plant Flue Pipe Bend with Inner Supports X.K. Guo, Y. Geng, G.D. Yuan, B.B. Yan, Z.W. Long, Z.J. Guo and L.Y. Zheng	92
Based on ANSYS Workbench Gantry Structure Improvement Z. Yang and D.M. Sun	97
Multi-Objective Optimization of the FOFAS Based on the Workbench/Exploration L. Xiao, M. Feng, Y. Ge and W. Wang	101

The Optimization Design of Wind Turbine Gearbox Based on Improved Genetic Algorithm and Feasibility Analysis J.M. Tian and X. Tan	107
Reverse Design from Virtual Manufacturing S.H. Wang, D.Q. Vu, G.G. Wu and V.M. Tran	113
Quadruple-Arc Gear Tooth Profile Parameterize Optimization Based on ANSYS Z.Y. Ren	119
Application of Advertising Based on Computer Aided Visual Design W. Xiao	125
Finite Element Analysis and Multi-Objective Optimization of the Precision Horizontal Machining Center Bed X.Y. Li, W.T. Niu, J.Q. Wang and L.J. Xue	130
Calculation of the Scattering Coefficient of Large Scale Periodic Structure H.T. Wang, X.Y. Zeng and Y.S. Liu	135
FEA and Contrast Test of Slender Shaft Turning T.L. Wang and Z.X. Xi	140
A Study of the Interfacial Pressure in Cable Joint Based on Finite Element Method C. Li and H. Qin	144
Modal Analysis of Concrete Pump Truck Boom K.L. Mao	148
Analysis of a Missile's Initial Disturbance X.L. Wei and Y. Jiang	152
Investigating the Performance of Hyperelastic Constitutive Models in Predicting Dynamic Characteristics of Elastomeric Components K. Jahani and H. Mahmoodzade	156
Sound Pressure Distribution and Acoustic Parameters Estimation by Simulation X. Zhou, Y. Gao and Z.J. Shu	161
The Effect of Thrust Eccentric and Erection Cylinder Anchor Position on the Initial Disturbances M. Chen and Y. Jiang	165
Simulation and Analysis of Attitude of Non-Spherical Particles in Drum Granulation L.M. Chen, Q. Lin and Z.Z. Zhu	170
Numerical Investigation on Coal-Fired Power Plant Flue Pipe with Ash Deposition Y.F. Pei, G.D. Yuan, Y. Geng, B.B. Yan, Z.W. Long, Y.F. Yao and L.Y. Zheng	174
Finite Element Strength Analysis on 12V280 Diesel Engine Connecting Rod M.H. Li and L. Ni	179
A Simple Numerical Solution Procedure for Equations of Nonlinear Finite Element Method S.B. Cai, D.Z. Li, C.W. Kim and P.S. Shen	187

Chapter 2: Research and Design Solutions in Machinery Industry

Innovative Design of LED Curved Taxiway Center Line Lights Based on TRIZ T. Li, J.H. Yang and L. Li	193
Redesign Method of Hydraulic Press's Moving Beam J. Zhong, K. Zhao, Z.F. Liu and H. Bao	198
Research of Design Method in Light Bus Cab H Point R. Zhou, W.D. Luo and Y.H. Li	203
A Method for the ORU Division of Manned Spacecraft X. Luo, Y.M. Yang, Z.X. Ge and Z.M. Lu	208
Innovative Design of the Portable Manually-Steered Folding Bicycle H.W. Niu, Y.C. Yin, J.S. Zhao and X.P. Chen	212
Application of Seawater Burning Technique to Ship Anti-Piracy Y.N. Liu, L.A. Jin and X.G. Liu	217
Study of Fatigue Test Loading Spectrum for Wind Turbine Blade G.H. Liao, J.Z. Wu and Y.J. Yu	221
Curve Form Design of Accelerated Loading Track X.Y. Guo, P. Zhang and J.X. Feng	225

A Kind of Shimming Method for MRI X.B. Zhang	230
Study on the Process Optimization of Fully-Mechanized Hard Top-Coal Caving with Large Inclination Angle Y. Zhang, J.K. Liu, Q. Li, J.J. Zhao and Y. Ma	234
Numerical Simulation on Coal-Fired Power Plant Flue Pipe with Different Kinds of Inner Supports L.Y. Zheng, Y. Geng, G.D. Yuan, B.B. Yan, Z.W. Long, F. Sun and X.K. Guo	241
Automatic Cleaning Window's Solar Structure Design and Motion Simulation Y. Tang, Y.F. Liu and B.Z. Ji	246
Analysis of an Engine Front Baffle Fatigue Cracking C.J. Liu, X.L. Liu and K. Zhao	250
Radial Deformation Analysis of Complex Parts with Centrifugal Force and Heat Effect L.L. Yue, P. Liao, P. Wang and Y.S. Wu	254
Simulation and Analysis of Speed Accessory Based on DYNAFORM J.R. Zhou, Y.H. Peng and J.P. Hu	262
Optimization Design for the Diaphragm Spring of Automobile Clutch C.X. Guo and H.Z. Zhang	268
A Wing Structure Design Based on Topology Optimization G. Tong, T.F. Liu and Y.C. Deng	272
Lightweight Design of Rear Axle Housing Based on FEM G.Z. Jia, Y. Yuan and S.H. Wang	277
Simulation Analysis of Boring Finishing Process for a Thermal Power Unit's Valve Body L.L. Zeng, L.P. Zhou and X.Y. Liu	282
Worm Shaving Cutter Tooth Stress and Deformation Analysis Z.H. Ma, Y.J. Wang, S.L. Cai and Z.Z. Zhang	288
The Development of the TBM Disc Cutter Test Device for Cutting Rock Y.M. Xia, T. Ouyang, L.J. Xie, Q. Tan, C.L. Luo, H.M. Zhao and Z. Chen	292
Motor Current-Based Cutting Force Induced Error Detection and Modeling for CNC Milling Machine M.W. Shen, K.G. Fan and J.G. Yang	297
Design of Automatic Buckle Machine for Double Bag Packaging Line Y.C. Deng, M. Yu and H. Chen	303
CFD Analysis of the EGR Cooler's Heat Transfer Performance Z. Liu and Y. Xu	309
Temperature Field Analysis and Thermal Error Testing for CNC Machine Tool's Headstock Y.M. Zhang, Y. Chen and H. Li	316
The Study of the Effects of Refrigerant Fraction on Auto-Cascade Refrigeration System of Evaporation Temperature D.Y. Zheng, D. Li, J. Zheng, L.P. Gao and Y.M. Zhang	321
Research on Improving Manufacture Reliability of Spindle Boxes Based on Manufacture Error Correlativity Z. Tan, Z.J. Yang, G.F. Li, C.G. Yang, S. Wang and G. Zhu	325
Modern Industrial Plant Electrical Grounding System Design and Installation L.J. Zhu and Y.M. Gao	332
Resistance Characteristics of Underwater Supercavity D.X. Zhang, G. Liu, J.M. Guo, W.L. Yang and Z.G. Zhao	336
Study on the Pressure and Temperature Distribution of Solid-Plug Conveying Element on Centrifugal Extruder J. Zhao, H.J. Wang and S.J. Wang	341
Study on Distribution Performance of a New Oil-Air Distributor in Oil-Air Lubrication System Q.G. Sun, Z.H. Zhou, H.B. Lv and Y.F. Wang	352
The Characteristics of the Annular Flow through the Sudden-Expansion Pipe of the Oil-Air Lubrication System Q.G. Sun, X.S. Wang, Y. Wang and Z.H. Li	358

Simulation Analysis of Hydraulic System of Air Tightness Measurement Equipment for Tubeless Wheel Based on Automation Studio P. Xu, J.Y. Han and H. Cao	363
Velocities Effects on the Void Fraction Distribution in a Vertical Gas-Liquid Two-Phase Flow Channel M.Z. Zainon, M.A. Zubir and R. Ramli	369
Influence of Finite Tip Clearance on the Tip Flow Characteristics of Ducted Propeller H.L. Ni, J.W. Zhou and D.Z. Wang	374
Design of Hydraulic Station of Crawler Hydraulic Drilling Rig Z. Liu, P. Fang, D. Wu and D. Li	380
Simulation Research on the Basic Performance of a Single Piston Hydraulic Free-Piston Engine S.Y. Li, Z.C. Yuan, J.Y. Ma and Q. Zhu	385
Study on the Motion Characteristics of a Hydraulic Free-Piston Engine S.Y. Li, Z.C. Yuan and J.Y. Ma	390
Analysis of Sealing Device Failure of HTM Pump and its Countermeasure M. Zhou, W.H. Wang, Y. Shi and H.B. Wen	394
Design of a New Type of Soilless Cultivation Vegetable's Barrel W.H. Zhou	400
Study on Passive Sprinkler Dust Car Underground J.Z. Zhang, F. Yang and L. Zhao	404
Gas Suction Turnip Seed Suction Nozzle Design and Experimental Research Y.C. Deng and Y.H. Qu	408
The Design of Decontamination Unit for Wire Rope Auto Cleaning and Detecting System C. Fu, H. Wang and L. Tang	413
Thermal Analysis of Desktop Computer Based on Icepak T. Wang, P. Xu and X. Cheng	417
Benefit Estimation of Automatic Braking System Based on Real-World Pedestrian Accidents C.Y. Kong, X.B. Gao, J. Nie, F.H. Mo and J.K. Yang	421
Considering Load Characteristics Harmonic Penetration in Zhengzhou Converter Station Nearly X.P. Yu, B. Zhang, J.Z. Yang, S.Y. Dai and Z.Q. Dai	425
Searching the Cause and Elimination Method of the Tripping of Traction Power Supply Y.H. Guo	429
Study on the Relationships between the Optical Printing Density Based on the Offset Overprint Trapping and Ink Film Thickness Y.G. Yang and Q.Z. Gao	433
An Auto Flip Delivery Mechanism of the Paper Laminating Machine J.F. Xin, J.F. Cai and N.K. Zhu	437
Reliability Analysis and Experimental Research on Cutting Tool of Vertical Shearing Machine S.L. Zou, Y.P. Xie, K. Wang and D.W. Tang	441
Dynamic Characteristics and Load Coefficient Analysis of Involute Spline Couplings X.Z. Xue and S.M. Wang	450
Vibration and Noise Damping Treatment for an Excavator Cab Y.Z. Mi, Y.Q. Zhou and L. Wang	455
Dynamics Simulation Analysis on Hydraulic Excavator Working Mechanism Based on Rigid-Flexible Coupled Modeling H.S. Shi, L.H. Wang, Z. Yang and P.C. Wang	459
Kinematics Analysis of the New Type of Offset Radial Piston Motor S.M. Luo, W. Liu, F.F. Luo, W.W. Yu and Z.H. Ma	463
Research on Topology Optimization Design Based on Finite Unit Analysis of the Flywheel Hub P.Y. He and J. Yang	467
Research and Analysis of the CDV Internal-Combustion Engine Gas Distribution Phase in the Low Temperature Start Process L.M. Shi, L.G. Mei, Z.H. Wang and Y.M. Shao	474

Experiment on Static Characteristics of the Braking Signal Transmitter P. Zhang, L.N. Zhang, H.Z. Liu and D.C. Fu	479
Dynamic Analysis for Articulated-Tracked Robot Climbing Stairs W. Rao, J.D. Shi and J.Z. Wang	483
Analysis and Simulation on Drive Characteristic of High-Strength Water Hydraulic Artificial Muscle Z.M. Zhang, J.Y. Hou, Z.W. Sun, Y.J. Gong and J. Miao	488
Experimental Study on the Stability of Pneumatic Cut Tobacco Feeding System W.M. Chen, G.A. Yuan, X.Y. Peng and S.S. Xiao	493
Experimental Research on Conductor's Ice Accretion and Aerodynamic Characteristics H.J. Huang and X.M. Li	497
Effect of Piston Motion on Combustion of CNG Free Piston Engine (FPE) N.X. Yin, Z.P. Xu, S.Q. Chang and J.M. Lin	501
Meshing Analysis of Quadruple-Arc Profile Bevel Gears in the Process of Cutting Tooth Z.Y. Ren	507
The Effect of Meshing Transmission of Arc Gear by Central Distance Error Z.Y. Ren	513
Simulation of Crossing Threaded Planetary Roller Screw Engagement Y.Q. Liu and J.S. Wang	518
Finite Element Application of Gear Tooth Analysis V. Balambica, T.J. Prabhu and R.V. Babu	527
Analysis and Calculation of Transmission Ratio of Simpson Planetary Gear Mechanism Based on Velocity Graphic Method Y.S. Zhang	532
Research on the Faults due to Bearing-Gear Mismatching in Gearbox of Wind Turbine Generator C.Z. Zeng, D.Y. Tang and Y. Gao	537
The Simulation of the Real-Time Adjustment of Cutting Edge Inclination of CNC Turret S. Zhang and X.F. Du	542
Motion Performance Analysis of Deep Water Pipe-Laying Vessel in Regular Wave Y.F. Zan, Z.H. Dong, L.H. Yuan and B.T. Wang	546
Research of Marine Simulator Cables' Mathematical Models X. Liu, W. Ren, Q. Zhang and S.H. Zhang	551
Influence Factors Comparison and Analysis of Axial Contact Stiffness between Single-Nut and Double-Nut Ball Screws X.R. Xu, X.C. Song, H.K. Jiang and Y.F. Li	555
Fractal Approach to Bubble Rising Dynamics in Non-Newtonian Fluids W.Y. Fan and X.H. Yin	559
Extraction Shafting Oscillation Characteristic of Hydro Turbine Generating Sets Based on Prony Algorithm Z. Wu, Y. Zeng, Y.Y. Zeng and S.G. Yu	563

Chapter 3: Mathematical Modeling and Optimization in Engineering Sciences

Estimation on Unknown Function of a Class of Generalized Nonlinear Volterra-Fredholm Type Difference Inequality W.S. Wang	571
Symmetric Fusion Frames with Several Generators J.Z. Li and X.Q. Yang	575
Two Iterative Discrete Inequalities Y.S. Lu and W.S. Wang	579
Multidimensional Waveform Encoding for Oil Spoil Detection D.J. Xu and J.K. Zeng	583
Simulation and Optimized Analysis of Channel for Injection Molding of Bottle Cap Based on Moldflow C. Zhang, L.L. Han, D. Yang and H.M. Zhang	587

FTA^e – Fault Tree Analysis in Microsoft Excel R. Kuracina, D. Šandor and K. Balog	591
Structural Topology Optimization Using Turing Model K. Rahman, A. Halik, K. Samsak and N. Helil	595
New Algorithms for Solving Minimum Path Sets of Fault Tree Analysis and its Applications Z.Y. Dai	600
Multi-Objective Model and Heuristic Algorithm for Billet Stacking Problem in Steel Production C.T. Shi, G.J. Dong and Y.W. Ma	606
Using Mathematical Programming Optimization Work Exchange Networks R.J. Shen, W.W. Zhang and L. Wang	612
SVM Classification Model Parameters Optimized by Improved Genetic Algorithm Q.H. Mao, H.W. Ma and X.H. Zhang	617
A New Heuristic Topology Optimization Method Based on Bone Remodeling Model K. Rahman, K. Samsak, A. Halik and N. Helil	622
The Traveling Wave Solutions of Nonlinear Beam Equations by Tanh-Function Method J. Chang, X. Zhao, L.H. Liu and X. Liang	628
Research on Impulsive Lurie Systems with Time-Delay X.J. Li	633
Loader Fatigue Correlation Analysis on the Lab Conditions and Theoretical Calculation H.J. Lin and S.F. Lin	637
Numerical Simulation Study of Concrete Beam with Bonding Steel Plates Bending Failure L. Song, S.P. Wei, L. Gu and C. Fan	645

Chapter 4: Technology of Measurement and Signal Processing

Calibration Technology and Axial Error Correction Method H.F. Li, W.K. Zhu, G.H. Xue, X.C. Xu and L.P. Di	653
Analyses on Target Tracking under Quantized Communication H.X. Peng, W.K. Wang and B. Liu	658
Pseudo Two-Hop Distributed Consensus with Adaptive Quantization H.X. Peng, W.K. Wang and B. Liu	662
Feature Extraction of Faulty Rolling Element Bearing Based on Time Synchronous Average and Cepstrum Edit Z.T. Li, Y. Gao, X. Zhou and Y. Guo	666
Research and Design of Remote Surveillance System Based on the Internet of Things J.J. Yang, C.H. Fu and Z.Q. Dong	671
Analysis of Elements of Large Intercity Bus Operating Conditions Based on Reliability Research J.X. Yi, L. Zhang, W.L. Li and W. Zhou	676
Remote Fault Diagnosis System Based on EMD and SVM for Heavy Rolling-Mills J.F. Liu, M. Chen, J.Y. Gu and L. Cheng	681
A Study on Obstructive Sleep Apnea by Using MindSet Platform D.Y. Qiao, Y.J. Guo, B. Lin, H.H. Zeng, Q.X. Qiu and J.Y. Wu	687
Research on the On-Line Monitoring and Control System of Lithium Battery Pole Piece Surface Density G.D. Zhu, X. Sun and C.S. Ai	691
Base on Double Thermocouple the Casting Powder Crystallization Measurement Q. Ma and D. Xie	695
Modeling Based on T-S Model for Thermal Process in Metallurgical Performance Testing D. Xie, M. Wang, J.L. Shi, D.J. Xu and H.B. Wang	699
Design of Side Line Short Circuit Detection Device Load of Low Voltage Circuit Breaker before Closing X.F. Meng and Z.C. Li	703
Design and Application of New Type PCT Measuring System for Hydrogen Storage Alloy Z.F. Guo, J.H. Hu, L. Xu and C.M. Xia	707

Vibration Frequency Spectrum Measurement on a Hydraulic Turbine Runner Chamber for a Large Bulb Hydraulic Generator Set C.Z. Huang, J. Li and Z.C. Yang	712
Development and Research on Gear Noise Test System F.Y. Dai, Z.Y. Shi and J.C. Lin	718
Research of Defect Detection Method Noise for Bevel Gear F.Y. Dai, Z.Y. Shi and J.C. Lin	722
The Measurement and Analysis System Development of 3D Roll Forming Machine Dynamic Characteristics Based on Virtual Instrument Y.S. Hu, Q. Li and Y.Z. Guan	726
The Study on Measurement Method of Glass Melts' Surface Tension at High Temperature Y.L. Tian, S.G. Guo and D.L. Wu	732
Real-Time Temperature Monitoring System Design Based on MATLAB GUI F. Xue, Y.L. Yang and F.T. Dong	737
Research on Low-Voltage Series Arc Fault Detection Based on Higher-Order Cumulants K. Yang, R.C. Zhang, J.H. Yang and X.M. Wu	741
An Automatic Paperless Velocity Measuring and Recording System J.S. Cao, W.J. Zhang and X.H. Zeng	745
Study on Phase Shifting Algorithm and System of White Light Interference L.J. Deng, Y.X. Fu, X.Y. Cai, Y. Li, L.H. Lei and D. Zhao	749
Research on MWD Mud Pulse Signal Extraction Algorithm G.Y. Zhang, B. Tu and T.X. Zhan	755
Application of Empirical Mode Decomposition to ACFM Signal Y.T. Gao, L.H. Wang, X.J. Miao and J.C. Leng	761
The Denoising Method Based on Wavelet Transform in Signal Dynamic Detection B. Huang, P.J. Sun and X.M. Wang	766
Analysis of an Air Borne Acoustic Signatures from Welding Process Using Empirical Mode Decomposition M.F.M. Yusof, Mahadzir, M.F. Ghazali and M.R. Islam	770
Wavelet Based Noise Reduction for Magnetic Anomaly Signal Contaminated by 1/f Noise X.H. Nie, Z.M. Pan and W.N. Zhang	776
Application of a New Kind of Wavelet Threshold De-Noising Method in Partial Discharge Signals C.L. Xu, H. Yu, B.Q. Du, J. Li, Z.K. Liu and Y.H. He	780
Error Compensation Method for Mine's Automatic Light Rail Weight-Bridge C.X. Zheng and J. Chen	786
Research on Parameters of SVRM in Time Series Prediction L.Y. Wang, Q. Wang, M.J. Zhang and X.L. Wang	790
De-Noising and Analyzing for Non-Stationary Signal Based on MATLAB X. Cheng and W.M. Dong	795
Application of an Improved Wavelet Threshold Denoising Method for Vibration Signal Processing Z.J. Xie, B.Y. Song, Y. Zhang and F. Zhang	799

Chapter 5: Sensor Technology

Passive Strain Transfer Analysis of Wireless SAW Torque Sensor L.J. Wang, Y.T. Zhang and X.P. Li	809
Study of Anti-Radiation Sensor Technology for Fault Diagnosis System of Nuclear Facilities F.W. Yuan, Q. Deng and Y.L. Wang	813
Modeling and Simulation of Airflow Omnibearing Posture Sensor Q.R. Yang, L.H. Piao and W.J. Tian	817
Research of Micro Airstream Gyroscope Sensitive Mechanism Q.R. Yang, L.H. Piao and W.J. Tian	821
Application of Improved BP Neural Networks Based on LM Algorithm in Characteristic Curve Fitting of Fiber-Optic Micro-Bend Sensor S. Ding and X.H. Chang	825

Design and Application on Bluetooth-Based Wireless Sensor Network Debris Flow Mountain Health Monitoring System H. Ma	829
Research and Design of Gardon Heat Flux Sensor J. Yu, X.Z. Bu and X.G. Chu	833
Modeling and Simulation of Airflow Level Posture Sensor Q.R. Yang, L.H. Piao and W.J. Tian	838

Chapter 6: Microelectronics, Circuit Technology and Embedded Systems

Realization of 4~20mA Current A/D Conversion Module in the Water Pollution Source Online Monitoring Instrument under the Remote Metrology Y.B. Sha, H. He and J.W. Shao	845
Model-Based Design and it's Application in Power Window S.H. Hu, B.P. Zhang, T.S. Sun and W. Yu	850
Implementation of RLC Layer in the Terminal Side of TD-LTE F.T. Chen and M. Zhu	856
Experiment and Technical Research on Underwater Sonic Device Emitted by Electric Sparks with High Energy and Large Bandwidth H. Su, Y.Z. Wang, R.B. Zhang and W.M. Wu	861

Chapter 6: Microelectronics, Circuit Technology and Embedded Systems

The Implementation of In-Band FM Based on Fractional-N PLL Y. Han and K.Y. Qin	869
Data Parallel Implementation of Geometric Operations G. Wang	875
Design of Chirp Signal Based on NIOS L.G. Zeng, S.L. Yang and X.X. Mu	881
Four Bit Priority Resolution Network Using Current Mode Winner Take all Circuit W.Q. Cao, H.Y. Zhu and G.P. Tu	886

Chapter 7: Mechatronics and Control

Design of a Giant Magnetostrictive Actuator and Research on the Effect of Water Cooling System R.G. Yan, L.H. Zhu and X.X. Dong	893
Analysis of Electromagnetic Field in a Modular Joint L. Li and B.L. Feng	897
Design of Lifting System in Seals of the Hydraulic Support Eccentric Loading Test Bench Based on PLC and Stepper Motor X. Zhang, D.L. Wang, X.X. Liu, M. Yu, P. Xia and Y.Y. Wang	902
Software and Hardware Design of Signal Acquisition System about Electro-Hydraulic Control System of Hydraulic Support X. Zhang, P. Xia, Y.B. Cui, Y.Q. Liu, X.X. Liu and Y.Y. Wang	906
Double-Loop D.C.Speed Regulation System Design Basd on OCC H.X. Tian, P.L. Jiang and M.S. Sun	911
Research of the Giant Magnetostrictive Fule Injector R.G. Yan, Z.J. Wang and L.H. Zhu	916
Fuzzy Logic Control of the Marine Permanent Magnet Synchronous Propulsion Motor with Direct Torque Control System C.Y. Zhang, J.N. Zhang and C.Q. Sun	920
Design of Acceleration Slip Regulation System Based on Vehicle Test Platform S.Y. Hou, Z.Y. Li and Z.F. Yang	925

Study on Intelligence Fault Diagnosis Approach Based on Digraph Model and Application to Satellite Battery	
Z.Q. Cui, M.Q. Xu and R.X. Wang	929
HIL Simulation of Electric Bus Self-Adaptive Differential Technology	
L.Q. Jin, G. He and F. Deng	933
Forward Kinematic Modeling and Simulation of Ionic Polymer Metal Composites (IPMC) Actuators for Bionic Knee Joint	
M. Farid, Z. Gang, T.L. Khuong and Z.Z. Sun	938
Design and Establishment of HIL Testing Bench for Electromagnetic and Hydraulic Hybrid Brake System	
X.J. Liu, R. He, C.X. Liu and E.L. Zhang	942
Modeling and Simulation of Brushless DC Motor Speed Control System Based on SPWM	
S. Wu and G.J. Ma	947
Constant Value Adjusting Method Based on Characteristic Parameters of Process	
D.G. Sun, Z.D. Liu, Y.J. Huang and J.C. Zhang	951
Driver Model Based on Controller with Open and Close Loop	
H.M. Chen	958
Research on the Dynamic Model and ECU HIL Simulation System of Electronic-Controlled Engine	
J.W. Li, H.G. Dong, Y. Wang, S. Zhang and Z.F. Xu	962
Research on Modeling and Parameter Identification of Electro-Hydraulic Servo Loading System	
S. Wang, C.G. Yang, F. Chen, Z.J. Yang, Z. Tan and G. Zhu	970
Difference Inequalities and Application to Discrete-Time Control Systems	
Z.Y. Hou and W.S. Wang	978
An Intelligent Control System for LED Headlamp	
Y.J. Ai and T.C. Gao	982
A Machinery Arm System Controlled by EEG	
Y.Z. Wang, G.H. Liang and J. Zhang	987
Study on Analog Control Experimental Training Using PLC	
X.N. Song	994
Simulation and Experimental of Shifting Performance of Construction Machinery	
F. Ren, X.H. Liu, J.S. Chen, P. Zeng and B.L. Liu	998
Thermal Error Measurement, Modeling and Compensation for Motorized Spindle and the Research on Compensation Effect Validation	
Y.Q. Fu, W.G. Gao, J.Y. Yang, Q. Zhang and D.W. Zhang	1003
A STEP Compliant Framework for Cutting Force Prediction for NC Turning Operations	
R.L. Liu and H.G. Zhu	1009
Research on the Stiffness Error Compensation of the Floor Type Boring-Milling Machining Centre	
J.E. Wang and Z.D. Zhou	1014
The Digital Design and Simulation of Chain Tool Changer for Large Gantry Machine	
L. Wu, Y.C. Yin, Z. Xiong and Y.L. Yan	1018
Research of Automatic and Security Ignition Device for Vanadium Iron Smelting Furnace	
B. Yang, W.J. Ding and X.Y. Zhang	1022

Chapter 8: Technologies of Machine Vision and Identification

Region Weighted Wavelet Fusion Method for Partial Focusing Image	
D. Wu, L. Dai, X.W. Bai, Z.Q. Wang and Y.Y. Zhang	1029
Research on the Automatic Sorting System of Domestic Ceramic Products Based on Machine Visual Inspection	
T.J. Guo, H.G. Huang and F.B. He	1034
Study on Internal and External Parameters' Calibration of Camera Based on Hyperchaos Least Square Method	
K. Xia, M. Yang and L. Liu	1038
Correction and Extraction of the Encoder Grating Image Full-Barcode	
Y.W. Wang, C. Feng, X.L. Liu, Y.L. Liao and H. Mei	1042

Evaluation of Material Surface Corrosion Based on Image Recognition X.W. Zhang	1048
Gray Image Composition Method for Measurement Based on Multi-Software Cooperation F. Hao, S.Q. Zhu and H.T. Gao	1052
Efficient Feature Representation for Human Action Recognition in DS&SP R.F. Li, L.L. Wang and T.F. Zhang	1057
Kernel Null Space Marginal Fisher Analysis for Face Recognition Y. Lin, X.Z. Liang and H.P. Zhou	1065
Comparison and Evaluation of Edge Detection Segmentation Techniques Y.B. Dong, M.J. Li and H.Y. Wang	1069
Band Selection for Hyperspectral Image Classification Based on Improved Particle Swarm Optimization Algorithm C.M. Li, Y. Wang, H.M. Gao and L.L. Zhang	1073
The Application of DPSO - BP Neural Network in GIS Partial Discharge Typical Defects Recognition Z.K. Liu, H. Yu, T.Q. Guo, C.L. Xu and Z.W. Cheng	1078
Triangulation Algorithm of Depth Images Based on Self-Adaptive Quadrangle L.L. Zeng	1085
A New Enhancement Model Combined Anisotropic Diffusion and Shock Filter J. Zhao, Y.M. Qi and J.Y. Pei	1089
Research on TV Goniometer Object Extraction Algorithm Based on Threshold Segmentation H. Chen, N. Li, T.C. Huang and R.X. Duan	1093
A Median Filtering Algorithm Based on Extremum Detection L. Yan, G. Yan and Q.X. Zhao	1099
Image Fusion Based on Shearlet and Multi-Decision X. Zheng and A.P. Cai	1103
Detecting Thread Features Based on Digital Image Processing Techniques H.M. Cai, P.Y. Wang and X.M. Song	1107
Multiple Features Image Fusion Based on Visual Dictionary Y. Ting	1111

Chapter 9: Industrial Robotics and Automated Manufacturing

A Global Path Planning Algorithm for AGV Based on the Shapefile Vectorgraph L.F. Song, M.R. Tang and N. Li	1117
A Control System Based on ARM and Motion Controller for Arc Welding Machine Q. Wu and J. Wu	1121
The Location Optimization of the Mission Space Based on the Stiffness of Robot Y.G. Zhang, W.Z. Liu, J.G. Gao and C.R. Liu	1126
Robotic Additive Manufacturing System of GMAW Constrained by Electromagnetism F.J. Meng, D.M. Ba, F.L. Yin and J. Du	1132
Industrial Robot Kinematics Parameter Identification Y.G. Zhang, C.R. Liu and P. Liu	1136
Study on Robot Automatic Drilling of Carbon Fiber Reinforced Plastics (CFRP) L. Jin, X. Shi, H.Y. Dong and P.J. Feng	1144
Detecting Robot Weak Vibration Signal Based on Stochastic Resonance and Chaotic Oscillator B. Zhang	1150
Study on Digital Implementation for Manufacturing and Repairing Parts of Single Equipment K.P. Yu, G. Chen, L.M. Hu and D.X. Zhang	1155
The Design of the Quadruped Robot J.R. Shi	1159
Kinematics Analysis of Abrasive Belt Grinding Robot for Aero-Engine Blade and its Simulation Z. Huang, X. Ke, S.H. Cheng and F.Q. Heng	1165

Ct-SELECTOR: A Web Application for Cutting-Tool Selection in a CNC Machining Workshop	
P.L. Sun, P.Y. Jiang, B.Q. Chen and L. Zhang	1170
Space Trajectory Research on Manipulator for Appliance Performance Testing	
C.X. Wu, J. Liu, J.L. Qu, X.F. Wang and B.G. Shi	1174
A Hybrid Genetic Algorithm for Flexible Job-Shop Scheduling Problem	
S.X. Wang, C.Y. Zhang and L.L. Jin	1179
Sequencing and Scheduling for Setting up a Flexible Tobacco Production Line	
Z.K. Li, Z.Y. Zhou, Y.S. Zou, M.Y. Wu and G.Y. Liu	1185
A Similarity Measure of Schedules and Robustness Evaluation of Priority Rules	
H. Matsuura, A. Asada and Y.Y. Sato	1189
Synthetical Evaluation Model Based on Integer Programming for Arranging Single Round Robin Schedule	
J.G. Dong and J.P. Cai	1203
Research on DBR Production Scheduling System Application Based on Simulation	
G.E. Sun, Z.L. Guan, L. Yue, Z.M. Zheng and H. Lin	1207
Manufacturing Management and Control System Based on Self-Management and Self-Scheduling	
Q.H. Zhang, D. Zhang, G.Q. Cheng and Z. Wang	1213
Cooperation and Key Technologies in Command and Control of Maritime Formation Combat	
H.Y. Wang, W.K. Xiao, Z.S. Shi and J.P. Lin	1217
Research on the Command Mode of Ship Formation Cooperative Engagement under the Network Condition	
W.K. Xiao, H.Y. Wang and Z.S. Shi	1222
Analysis and Simulation of One Worker with Multi-Machine Mode	
J.F. Liu, M. Chen and X.L. Qi	1227
Dynamic Quality Prediction of Manufacturing Process Based on Extreme Learning Machine	
J. Guo, Y.B. Li and B.G. Du	1231
Research on Multi-Task Control Model of PLC	
X. Tang, H.J. Li, Y.T. Chen and D.G. Han	1236
Fabricating Complexity - A Performance Based Methodology through Parametric Optimization	
P.F. Yuan, T. Xiao and P. Devadass	1240
An Obstacle Avoidance Algorithm for Path Planning Based on Inspection MBD Model	
Z.Y. Liu, Y.X. Fang, E.F. Liu, F.S. Huang, J.Y. Jin and J.C. Zhao	1246
Implementation of System for Conveyor Tracking Based on Labview	
X.L. Zhu and W.H. Qiu	1251

Chapter 10: Applied Information Technologies

Research on Performance of Two Real-Time Simulation Environments: RTWT and xPC Target	
Y.H. Bai and C. Liu	1257
Building Self-Service Printing System on College Educational Administration	
C.F. Shi	1262
A Heuristic Peephole Diversifier for Software Security	
R.Z. Chen	1266
A Study of a Two-Directional Vector Multivariate Wavelet Wraps and Applications in Engineering Materials	
J.S. Feng and Q.J. Chen	1270
An Approach to Developing Information System for the Small and Medium Companies	
K.H. Jang and J.I. Park	1275
Computer Network Fault Detection Based on Neural Network	
Y. Chen and G.B. Ren	1279
Design of Notification System Illegal Parking Vehicles on Campus	
G.X. Li and J.W. Lu	1284

Research on Development Mode of E-Commerce Based on Cloud Computing L.H. Huang and X.Q. Zhang	1288
Research on the Computer Simulation System and Security Model J.G. Tang	1292
System Design of E-Government Office Automation A. Wang and X.Q. Zhang	1297
Analysis and Design of Library Office Automation System Based on Workflow L. Du and Z.F. Jiang	1301
Mobi-POSP: A Web-Based Mobile Producing and Outsourcing Service Platform for Industrial Equipment Manufacturing C. Liu, J.W. Leng, K. Ding, C.Y. Zhang, W. Cao and P.Y. Jiang	1306
Design for Efficient Query of Optimized Model Algorithm S.Z. Guo	1310
QoVS Prediction of Vehicle Service in Internet of Vehicles J.B. Li	1315
Study on Counties Agricultural Economic Intelligent Decision-Making Support System (IDSS) Based on GIS and Knowledge H.L. Yue, Y.P. Zhu, Y. Xue and J. Zhang	1319
The Method of Web Image Annotation Classification Automatic X. Zheng and A.P. Cai	1323

Chapter 11: Construction Technologies, Structural Strength and Reliability

Roof Structure of Western Sichuan Dwelling Houses and its Aesthetic Appreciation W.Y. Dong and Q.F. Ding	1329
Architecture Design of Building Integrated Solar Collector Y. Fu, K. Chen, F.Y. Fu and X.B. Wang	1333
Multi-Objective Optimizing Selection Method for Supporting Structure of Deep Foundation Excavation Q. Feng, N. Zhu and Y. Zhang	1337
Application of Building Energy-Saving Technology - Student Accommodation in Shandong Jianzhu University Y.B. Xue and Y.R. Lan	1343
A Study on the Calculation Model of Rock Soil Thermal Conductivity in the Design of the Ground Source Heat Pump System H.W. Jin and Q.S. Fang	1347
The Confirmation of Heat Insulation Parameters of Building Envelop under Different Heat Environment J. Ye	1353
Effects of Transverse Prestressed Tendons (TPTS) on the Mechanical Performance of Hollow Slab Bridge D. Liang and P.F. Li	1358
The Study on Roadway Layout in Coordination of Mining Coal Seams Base on Failure of Floor Strata Y. Zhang, C.L. Zhang, C.C. Wei, Y.D. Liu, S.Q. Zhang and J.J. Zhao	1362
System Reliability Analysis for a Conveying Pipeline with GO Methodology E. Liu, S.W. Yuan, G.W. Cui, K. Zeng, X.C. He and Y.F. Ding	1375
Research on Analyzing Earth Rockfill Dam Seepage and Slope Stability C. Tong, X.B. Liu and Y.Z. Zeng	1379
Research on the Deformation Monitoring of Deep Foundation Pit Engineering Y.J. Yin, X.L. Liu and Y.M. Qian	1383
Energy Consumption Performance Study of New T-Shaped Hysteretic Damper C. Xu, Y.F. Niu and Y.X. Zhao	1388
Numerical Analysis and Experimental Study on Consolidation of the Squeezed Branch Pile Y.J. Yin, G.H. Xu and Y.M. Qian	1392

Dynamic Response of Thin-Walled Structures to Thermal Loadings and Random Acoustic Excitations	
F.T. Zhao, Y.D. Sha, X.C. Luan and L. Zhu	1398
Finite Element Analysis of the Shell of GIS Busbar Tube	
M.J. Jian, G.C. Zhang and D.Q. Zhang	1406
Research on the Vehicle Effects of the Assembled Bridge by Influence Surface	
D. Liang, Z.S. Li and H.C. Shen	1410
Numerical Simulation on Effect of Shield Tunnel Construction on Pipelines with 45° Skew Angle and Tunnel	
D.L. Guo and D.S. Zhao	1414
Analysis of Aseismic Mechanism of Wooden Architecture of Ancient Chinese	
Z.R. Guo and Z.F. Yang	1417
Impact and Safety Assessment of a Double-Tube Parallel Tunnel Excavation on Adjacent Pipelines	
D.L. Guo and D.S. Zhao	1421
Study on Mechanical Properties of the Continuous U-Shaped Beam	
X. Ye, J. Zhang, M. Ying and X.D. Han	1425
Damaged and Healthy Ignimbrites from the Surroundings of Morelia, Mexico; Uses for Restoration of the Colonial Inheritance	
W. Martínez-Molina, E.M. Alonso Guzmán, H.L. Chávez-García, J.C. Arteaga-Arcos, A.A. Torres-Acosta, C.L. Gómez, J.A. Bedolla-Arroyo and F.A. Velasco-Avalos	1431
Experimental Study on Earthquake-Damaged RC Frame Columns Repaired with Sprayed Basalt FRP	
M.B. Getahun, Q. Gu, B. Li and C.F. Sun	1438
Calculation of Crack Width of Steel-Concrete Composite Beam Prestressed with Internal Tendons	
S. Jiang, L.L. Bai and W.C. Xue	1445
Experimental Study on Tensile and Shear Behaviors of the Channel Type Embedded Parts in Concrete Beam	
Q. Tan, Y.M. Li and C.G. Jia	1450
The Constructive Measurements for Achieving Two-Direction Effects of Concrete Compositing Slab	
Y. Xu and L. Chen	1457

Chapter 12: Product Design

Design Research of Novel Self-Propelled Air Railcar	
Q.L. Du and L.A. Pan	1463
PLM Oriented Quality Information Model and Management System for Optoelectronic Product	
Y.B. Li, Z.W. Zhang and J. Guo	1467
Research on Conceptual Design of Product Service System Oriented on CNC Machine Tools	
H.T. Fan and Z.Q. Sheng	1471
Design Evaluation Method for Universal Product Development	
J.I. Park	1481
Design of Car Vacuum Cleaner *	
H.Y. Jin and Z.W. Zhu	1485
Introduction to the Interactive Features of Product Design	
W.Y. Jin and L.L. Liu	1489
Improvement in Design of Household Necessities Based on Classification Tree Model	
Y.Q. Feng, Y. Yin, L.Y. Zeng and X.R. Zhang	1493
The Study of Creative Green Fabric Design in Apparel	
Y.T. Zuo and Y. Chen	1497

Chapter 13: Operations and Production Management

Metal Industry Supply Chain Buyback Contract Coordination and Income Distribution Based on Trade Credit	1503
L.P. Yu, C. Wang and X.Y. Li	
Modeling of Order Lifecycle Information in Discrete Manufacturing Enterprise	1507
Z. Peng, B.G. Du and Y.B. Li	
The Prediction and Analysis of the Demand Gap of Basic Products of Advanced Coal Chemical Industry	1511
L. Chen, L. Li and Y. Zhang	
Analysis of Material Management in the Construction Site	1524
P. Li	
Effective Cost Estimation Model for Injection Mold Design Base on Time Schedule & Management System	1528
W. Liu, X.H. Zhou and Q. Niu	
Profit Planning and Control in the Machining Industry Based on the Contribution Margin Concept	1532
E.A. Baptista, W.C. Lucato, N.L. Coppini, E.M. de Souza and A.A.M. Carvalho	
Research on the Modern Circulation Equipment and Technology Integrated Mode of the Freshwater Fish	1540
H.M. Wu, F.J. Lu and G.Y. Wang	
Application of Production Site Management in Project of Improving Cutting Bed Productivity	1547
W.W. Chen and Y. Chen	
Research on Power-Grid Crisis Management and Online Intelligent Decision-Making System of Power-Grid Security	1551
S.H. Li	
Research on the Online Intelligent Decision-Making System of Power-Grid Security Based on Power Grid Crisis Management	1555
S.H. Li	
Power Machinery Maintenance Process and its Economic Analysis	1559
M. Jung and J.I. Park	
A Genetic Algorithm to Determine Production Schedule in an Imperfect Manufacturing System with Time-Vary Unit Cost	1563
B.C. Ouyang and Y.C. Lin	
Research on Prediction Model of Car Sales Based on Grey Neural Network	1569
S.Q. Cao and Y.W. Zhu	
Economic Analysis for Steam-Driven Induced Draft Fans and Application Characteristics of Different Units	1574
Q.S. Xu, G.C. Liu, J. Wu, X.Q. Ma, Y.X. Yu and Z. Wang	
Layout of Nanotechnology Patents in Global Market	1578
J. Zheng	
Risk Assessment Model and Empirical Research of Industrial Clusters	1585
Y.H. Fang and T. Wang	

Chapter 14: Environmental Engineering

<i>Canalisporium</i> in Freshwater Habitats	1593
H. Zhang, D.Q. Zhou and M. Wang	
Study on Environmental Pollution Problems in the Copper Industry	1600
S. Chen and W.B. Wang	
Comprehensive Evaluation of Sludge Treatment Schemes Based on Projection Pursuit Model	1604
G. Gao	
Study on Harmonious Development of Design and Environment	1609
Y. Gu	
The Study of Modified Straw Carbon and Absorbing Phenol in Wastewater	1613
J.L. Yang, M.L. Du and W. Yan	
Rational Analysis of Sewage Treatment	1617
B.Y. Liu and Y.R. Liu	

Relation between Sulfate Reducing Bacterium and Environmental Factors in Petroleum Hydrocarbon-Contaminated Site H. Lv, X.S. Su and Y.L. Zhang	1621
The Applications of Neural Network Filter to Estimation of Oil Spoil in Sea Y.M. Tong, D.J. Xu, J.L. Shi and J.K. Zeng	1625
An Optimal Model for Maximizing Return on Investment of Ecological Restoration L. Sun and Z.S. Zhu	1630
Research on the Relationship of Surface Temperature and Urban Heat Island Using the Thermal Infrared Remote Sensing Image L.J. Zhang, X.P. Wen, J. Wang and Y. Zhou	1634
The Sensitivity Analysis of Wellbore Heat Transfer during the CO₂ Injection Process Y. Zhang, T.T. Li, Y.C. Song, D. Li, Y.C. Zhan, W.W. Jian and W.L. Xing	1638
Green Campus Construction Based on the Environmental Factors Control H.S. Luo	1644
Vertical Thermal Distribution at the near Dam Region of the Three Gorges Reservoir in the Initial Impoundment Period L.Q. Dai, H.C. Dai and B.W. Wang	1649
The Integration and Development of Heritage Resources Based on RMP Analysis - A Case Study of Songshan World Geopark J.H. Sun	1653
A Decision Model for Harvesting <i>Eichhornia crassipes</i> Once a Week L. Sun and Z.S. Zhu	1660

Chapter 15: Multidisciplinary Engineering Education

The Application of MATLAB in Higher Vocational Engineering Mechanics Teaching D. Huang	1667
Research on Cultivating of Engineering Capability Based on Course X.G. Zhang and Y. Chu	1672
Exploration in Playing a Leading Role of Undergraduate Specialized Teacher in the College and Institution of Engineering B. Gao and Y. Chu	1676
Discussion about Excellence Engineers Education and Training Program of Materials Science and Engineering L. Li, N. Wang, L.F. Zhang and L.H. He	1680
Professional Course Reforms According North American University Teaching L.Y. Hu, Y. Xin, Y.N. Zou, C.Q. Li and S.P. Xu	1684
Construction and Development of Maritime Culture in Maritime Colleges X. Liu, W. Ren, F.Y. Kong and J. Yu	1688
The Construction of Excellent Course Website in University Based on Wordpress Y.C. Xie, H.Q. Sheng, Y.C. Li and Z.B. Feng	1692
C Language Animation Design Teaching Methods Analysis for Engineering Applications C.F. Liu, Y.B. Sun and L.M. Wang	1696
Dynamic Teaching on the Deflection Determining of Beams M.H. Hsu, T.S. Weng and D.C. Yang	1700
Interdisciplinary Conceptual Cluster in Mathematics and Physics on the Basis of a Graph Model of Interdisciplinary Links T.N. Gnitetskaya and E.B. Ivanova	1704
On the Establishment of the Informational Educational Space in the Asia-Pacific Region B.L. Reznik and T.N. Gnitetskaya	1708
The Role and Place of Achievement Motive in Modular Technology of Teaching Physics to Future Engineers T.N. Gnitetskaya, N.A. Almaev and E.B. Ivanova	1712
The Study of Improving the Quality of Petroleum Geology Undergraduate Course Graduation Design G.J. Fan, Y.J. Zhao and H.J. Wen	1716
Application of the Contrasting Method in Lecturing the Steam Power Cycle P.R. Wang, H.Y. Ma and Y.R. Wang	1721

Oven Model Making

L.T. Huo, Y.L. Wang, X.W. Xie, X.H. Zhang and G.P. Li

1725

The Application of Matrix Compression Algorithm in Network Education Platform for the User Security Authentication

N. Zheng

1730
