

Table of Contents

Preface and Committees

Chapter 1: Near Zero Energy Buildings

Airtightness of Buildings in Slovakia D. Katunský, M. Nemec and M. Kamenský	3
Energy Concept Design of Zero Energy Buildings M. Budiaková	7
Impact of Internal Thermal Insulation Systems on Static Behaviour of Exterior Walls J. Pašek	11
The Evaluation of Nearly Zero Energy Buildings in the Czech Republic M. Kraus and F. Konečný	15
The Specifics of the Real Estate Market of the Low- and Passive Energy Buildings P. Ort and J. Pašek	19

Chapter 2: Quality of Indoor Environment

A New Building System Made of Glass Fiber Reinforced Mineral Matrix Composites G. Taranu, M. Budescu, R. Plesu and I.O. Toma	25
Aerodynamic Mode of Double-Skin Transparent Façade with Narrow Physical Cavity and its Influence on Indoor Environment in the Summer Season B. Bielek, M. Bielek, S. Mikle and J. Szabo	29
Effect of Air Heating System Distribution on Temperature Stratification in a Room D. Katunský, A. Vaskova and M. Lopušniak	33
Analysis of an Indoor Environment in Year-Round Operation D. Katunský, M. Bagoňa, M. Vertaľ, A. Vaskova, M. Kamenský and M. Nemec	37
Analysis of the Behavior of Glass Claddings E. Rykalová and R. Fabian	41
Analysis of the Influence of Geometrical Thermal Bridges and their Elimination by Using a Composite Material Based on Secondary Raw Materials L. Matějka, L. Matějka and J. Pěňčík	45
Comparing Methods for Calculating Thermal Stability of Rooms R. Slávik and M. Kalousek	49
Comparison of Temperatures in the Corner of Wall Footing through 2D and 3D Views T. Pospíšil and J. Pěňčík	53
Computer Simulations of Room Acoustics in Sporting Facilities Z. Kolářová, L. Šteffek and F. Vajkay	57
Differences U_g - Values of Glazing Measured <i>In Situ</i> with the Influence Factors of the Internal Environment M. Flimel	61
Effect of the Geometric Solution of Cladding on the Quality of the Indoor Microclimate R. Fabian, M. Kozakova, F. Čmiel and E. Rykalová	65
Envelope Structures of Low Energy Wooden Houses Considering Indoor Climate J. Štefko, D. Bebej and J. Bednár	69
Experimental Timber Frames House EXDR1 T. Kalábová, M. Horácková and F. Vajkay	73
Indoor Environment State of Classrooms Situated in the Loft Spaces of Civil Engineering Faculty TU in Kosice – Dynamic Analysis Using Design Builder M. Kovac and K. Knizova	77
Assessing the Risk Relative to Indoor Environment Quality in Education Buildings M.E.P. Codreanu, T. Hapurne, I. Baran and I. Bliuc	81

Measuring Methodology and Results of Heat-Air-Moisture Performances at Building Envelope Levels	
D. Katunský, M. Zozulák, M. Vertaľ, K. Kondáš and R. Balaz	85
Microscopic Filamentous Fungi in Buildings, Preventing their Occurrence and their Remediation Using Nanofibers	
Z. Rácová, R. Wasserbauer and P. Ryparová	89
New Materials and Assessment of Ventilation Efficiency Floors	
J. Jurka and J. Škramlík	93
Optimisation of the Design of Daylight Guidance Systems Including Measurement Methodology	
L. Janečková and D. Bošová	97
Perceived Loudness of Sound Transmitted through Light Weight and Heavy Weight Walls	
M. Rychtáriková, B. Roozen, H. Müllner, M. Stani, V. Chmelík and C. Glorieux	101
Problematic of Humidity Degradation of Plaster with Indoor Fresco Decoration in Romanesque Rotunda in Znojmo	
O. Hnilica and J. Plášek	105
Quasistationary and Dynamic Simulation of Summer Overheating of Passive Timber House	
M. Němeček and M. Kalousek	109
Regeneration of Precast Panel Buildings in Terms of its Effect on Daylight	
D. Bošová and L. Janečková	113
Selected Problems of Renovated Apartment Buildings Entrances in Slovakia	
K. Minarovičová and D. Dlhý	117
Simulation of Indoor Climate and Energy Consumption of Primary School	
K. Košútová	121
The Importance of a Fan Location in the Front Door in Measuring of the Air Permeability by the Blower Door Test	
B. Hrubá, M. Černíková, L. Kucerova and L. Martiník	125
Thermal Comfort Evaluation with Fireplace in Occupied Space	
R. Ponechal and S. Baďurová	129
Thermal Performance of Capillary Micro Tubes Integrated into the Sandwich Element Made of Concrete	
T. Mikeska and S. Svendsen	133

Chapter 3: Heat Storage and Energy Savings

Comparison of the Possibility of Using the Accumulation Underground Storage under Buildings	
R. Partika and M. Kalousek	139
Defects of Insulation Systems and their Negative Effect on the Accumulation and Energy Saving	
P. Vlček, K. Kubečka, D. Kubečková and H. Vaculíková	143
Development of Building Elements with Thermal Insulation Filler Based on Secondary Raw Materials	
J. Zach, M. Sedlmajer and J. Hroudová	147
Embodied Energy of Stabilized Rammed Earth	
C. Stone, D. Katunský and M. Bagoňa	151
Energy Solar Wall in Low-Energy Apartment House	
J. Labudek and P. Oravec	155
Including Sustainability Criteria in Architectural Completion: A Critical Case Study of Current Practices	
K. Kiesel, U. Pont and A. Mahdavi	159
Linear Thermal Transmittance of Holding Unit of Balcony Slab to External Wall	
A. Rybakova and M. Kalousek	163
Study of Behaviour of Advanced Silicate Materials for Thermal and Moisture Rehabilitation of Buildings	
J. Zach, A. Korjenic and J. Hroudová	167
Thermal Responses of Stabilized Rammed Earth for Colder Climatic Regions	
C. Stone and M. Bagoňa	171

Thermal Stability of Attic Spaces with Integrated PCMs during the Climatic Year D. Bečkovský, M. Ostrý, T. Kalábová and V. Tichomirov	175
Thermodynamic Properties of Reflective Coatings M. Čekon	179
Using Wind Farms as Green Energy Sources D.M. Pohrib	183

Chapter 4: Effective Ventilation

Effective Ventilation and Heating Systems in Office Buildings M. Budiaková	189
--	-----

Chapter 5: Integration of Renewable Energy Sources

Greywater and Rainwater Management in Buildings J. Raclavský, R. Biela, J. Vrána, P. Hlušík, J. Raček and A. Bartoník	195
Problems with Formation of Caverns in the Wells for Heat O. Galas, R. Kořínek, L. Michnová and L. Martiník	199
Six Points of Resistance for a Renewable Energy Based Architecture – A Case Study S.C. Petrea	203
Technology in Architecture – Low Energy Building versus Green and Sustainable Building M. Bielek, B. Bielek and J. Híreš	207
Two-Stage System for Utilization of Renewable Energy Sources with Application of Natural Physical Cavities M. Bielek, B. Bielek, J. Híreš and J. Szabo	211

Chapter 6: Natural and Environmental Friendly Building Materials

Analysis of a New Expansive Soils Stabilization Method Made from Eco-Cement and Fiber Reinforcement M. Aniculaesi, A. Stanciu and I. Lungu	217
Analysis of Environmental Impacts on Thermal Conductivity of Insulation Block from Secondary Raw Materials A. Kalužová, J. Pěňčík and L. Matějka	223
Buildings Built by Superadobe Technology and other Possibilities Use of Clay Plaster B. Kovářová	227
Development of New Materials for Construction Sector Obtained from Renewable Resources S.T. Aradoaei, M. Mosneagu, R. Darie and G. Constantinescu	231
Environmental Assessment of Structural Elements from Secondary Raw Materials K. Struhala, Z. Stránská and L. Matějka	236
Featuring Reclaimed Asphalt Pavement Integration in Warm Mix Asphalt towards Roads Sustainable Development A.M. Nicuță	242
Greening of Concrete Industry by Incorporating Gypsum-Based Industrial Wastes as Supplementary Cementitious Materials I.O. Toma, D. Covatariu, A.M. Toma, G. Taranu and M. Budescu	246
Mechanical and Physical Properties of Straw Bales P. Konečný, J. Teslík and M. Hamala	250
Modeling of Airport Rigid Pavement Structure Made of RCC and Recycled Cement Concrete for Complex Configuration of Landing Gears R. Cojocar, J.C. Pais, A. Radu and M. Budescu	254
The Comparative Analysis of External Walls in a Passive House with Respect to Environment and Energy S. Baďurová and R. Ponechal	258

Use of Recycled Materials in the Construction of Roller Compacted Concrete (RCC) Pavements	
M.T. Muscalu, A. Radu, M. Budescu, N. Țăranu and E. Florescu	262

Chapter 7: Noise Protection

Acoustic Properties of Timber Joist Ceilings with Respects to their Response onto the Effects of Dynamic Loads	
D. Donatřáková, J. Krupicová, Z. Kolářová and B. Straka	269
Acoustic Qualities of a Composite Timber - Concrete Ceiling Construction	
P. Oravec and M. Hamala	273
Ceiling Construction Low-Frequency Noise Issues	
P. Berková and P. Berka	277
Noise Perception in Residential Building Environment	
A. Vargová and M. Pavčeková	281

Chapter 8: Building Simulation

2D Model of Capillary Transport of Water in Aerated Concrete	
O. Sikula and M. Mohapl	287
Analysis of Local Moisture Increase of Timber Constructions on Ice Arena Roof	
A. Žák, O. Sikula and M. Trcala	291
Mathematical Model of Multi-Layer Wall with Phase Change Material and its Use in Optimal Design	
L. Klimes, P. Charvát and J. Stetina	295
Passive Infra Reflectors and its Simulation in Radiance Software	
D. Kopkáně and F. Vajkay	299
TRNSYS Software Model of Solar System with Long-Term Storage	
M. Kny and M. Urban	303
Utilization of Indirect Adiabatic Cooling in Heat Recovery Device	
O. Nehasil and D. Adamovský	307
