

Table of Contents

Preface and Committees

Chapter 1: Building Materials and Components

Analysis of the Building Materials in the Energy Efficient Buildings M. Kraus and D. Kubečková	3
Theoretical Calculation of Heat Losses of Heat Exchangers to Vicinity M. Kubín and J. Hirš	7
Hydraulic Diameter of Compact Design Tubes with Small Diameter M. Kubín and J. Hirš	11
Analysis of the Degradation of External Plasters in the Buildings with ETICS V. Kučeriková, M. Kraus and D. Kubečková	15
Technological Analysis of the Orientation of the Pitched Icelandic Turf Roof to the Cardinal Points and their Effect on the Stability of the Vegetative Layers P. Selnik, K. Necadova and M. Mohapl	19
Test of Adhesion and Cohesion of Silicone Sealants on Facade Cladding Materials within Extreme Weather Conditions B. Nečasová, P. Liška, M. Šimáčková and J. Šlanhof	23
Study of the Mechanical Behavior against Horizontal Forces of Self-Supporting Facades F. Cubel, J. Roldan, J. Vercher and E. Gil	27
Numerical Study of the Influence of Insect Grille on Airflow in Ventilated Facade Constructions E. Šagát and L. Matějka	31
Optimization of Lubricant Return in Refrigeration Systems P. Vlček and M. Formánek	35
Experimental Determination of Thermal Properties of Highly Viscous Liquids P. Vojkůvková and O. Sikula	39
Assessment of the Load Capacity of Multilayer Glasses Depending on their Total Thickness E. Rykalová and R. Fabian	43
Application of Multi-Criteria Optimization for Selection of Building Materials for New Buildings M. Haliřová, E. Rykalová, Z. Peřina and M. Wolfová	47
Comparison of Low-Energy Houses Selected Parameters Made by Traditional and Modern Methods of Construction M. Kozlovská, L. Kyjaková and D. Mačková	51
Settlement of Crushed Straw J. Teslík, J. Labudek, B. Valová and M. Vodičková	55
Non-Traditional Thermal-Insulating and Rehabilitation Materials and their Hygrothermal Behaviour J. Hroudová, J. Zach, M. Reif and A. Korjenic	59
Comparison of Measuring Instruments and Methods for Determining the Moisture Content of Wood L. Kalousek, R. Brzoň and Z. Fišarová	63
Studying of the Behavior of Thermal Insulation Materials Based on Natural Fibers for Incorporation into the Building Structure J. Zach, J. Hroudová and V. Novák	67
Single-Layer Mechanical Fastening Waterproofing Systems T. Petříček, P. Kacálek and R. Smolka	71
Usage of Hydrophilic Mineral Wool Panels in Green Roof Systems in Passive Houses P. Vacek and L. Matějka	75
New Structures for Transparent Roofs E. Vojteková, O. Ivánková and L. Konecna	79
Hempcrete – An Environmentally Friendly Material? H. Bedlivá and N. Isaacs	83

The Future of the Polystyrene as Thermal Insulation in Buildings J. Pašek	87
Hygro-Thermal Behaviour of Timber Frame Straw Bale Construction as an Energy Efficient Building Technology T. Bernard and A. Korjenic	92
Measurement of Physical Properties in Waste-Based Particle-Reinforced Polymer Composites (WPPC) D. Dostálová, M. Vacek, L. Matějka, J. Pěňčík, T. Pospíšil and R. Brzoň	96

Chapter 2: Energy Performance of Buildings

Possible Solutions for Ground Slabs of Energy Efficient Buildings A. Sedláková, P. Majdlen and L. Ťažký	105
Modelling of a Small Solar Collector Array and Comparison with Meteorological Data Using TRNSYS Energy Simulation Software K. Vyhlídalová and P. Horák	109
Determination of Linear Thermal Transmittance for Corners with Acute Angle F. Vlach	113
Behavior of Point Thermal Bridges from Mechanical Anchoring of Flat Roofs M. Bogárová	117
The Issue of Including the Influence of Thermal Bonds in the Passive House K. Kubenková and M. Jašek	121
Long-Term Monitoring of the Effectiveness of a Ground Source Heat Pump Borehole O. Rubinová, I. Ambrožová and P. Horák	125
Climate Data Processing for Needs of Energy Analysis D. Štaffenová, R. Ponechal, P. Ďurica and M. Cangár	129
Identification of a Percentage of Engagement of the Bivalent Source of the Earth–Water Type Heat Pump in Heating of the School Using the DDFPM Method P. Tymová, I. Skotnicova and Z. Galda	135
Heat Supply Optimization P. Komínek	139
Analysis and Quantification of the Influence of Thermal Properties of Building Envelope on the Energy Balance L. Šteffek, J. Kalánek and M. Ostrý	146
Evaluation of the Thermal Resistance of Structure with Reflective Insulation: Measurement under Non-Stationary Boundary Conditions J. Kalánek, L. Šteffek and M. Ostrý	150
The Comparison of the Probabilistic Calculation of Course of Temperatures in Peripheral Construction with Actual Measured Data D. Donová and N. Zdražilová	154
Comparison of Polysun Simulation with Direct Measurements of Solar Thermal System in Rapotice P. Jelínek, J. Sedlák and B. Lišková	158
Integration of Small Wind Energy Source for Optimization of Energy Efficiency in Residential Building R. Ingeli, E. Jankovichová, M.N. Tien and M. Čekon	162
Advanced Thermal Performance Analysis of Thermal Break Element Applied in Balcony Slab P. Buday, R. Ingeli and M. Čekon	167
Modeling of Details for Single-Layer Wall in a Passive House: The Case of Balcony Slab A. Rybakova and M. Kalousek	171
Influence of Window on Solar Gains and Daylight Level M. Kalousek and J. Mohelníková	175

Chapter 3: Retrofitting and Revitalization of Buildings

Numerical Simulation of Air Channel in Church Gemerský Jablonec L. Tažký and A. Sedláková	183
The Windows in the Modular Structure - Air Tightness and Quality of Installation Diagnostics P. Oravec, B. Hrubá and Z. Peřina	187
Revitalization of Facade Cladding with the Use of Bonded Joints P. Liška, J. Šlanhof and B. Nečasová	191
The Verification of Range of Chemical Grouting of Wet Masonry by Theoretical Modeling and by Using Infrared Camera M. Wolfová, B. Plšek and Z. Peřina	195
Underfloor Air Cavity Created from Special Shaped Units and Different Intensity of Outdoor Wind Flow T. Renčko and A. Sedláková	200
Improvement of Low Inner Surface Temperature with Use of Linear Heating Component A. Korjenic and T. Bernard	206
Making the Concept of Old Industrial Buildings in Terms of Sustainability in Architecture J. Ilkovič and Ľ. Ilkovičová	210

Chapter 4: Sustainable Building and Environmental Assessments

Environmental Benefits of Elementary School's Renovation K. Struhala, P. Jelínek, Z. Stránská and J. Sedlák	217
The Evaluation of Non-Renewable Primary Energy as Part of Energy Performance Certificates M. Kraus, K. Kubenková and D. Kubečková	222
Emissions of Nanoparticles from Small Combustion Equipment with Regard to the Combustion Mode and Wood Humidity V. Drastichová, L. Martiník, J. Horák, K. Krpec, F. Hopan and P. Kubesa	226
Sustainable Construction Technology Based on Building Modules M. Kozlovská, P. Kaleja and Z. Struková	231
Multi-Criteria Evaluation of Two Passive Houses in Terms of Sustainability R. Kolář	235
Roof Structure Evaluation in Climatic Chamber Module M. Bagoňa, S. Tóth and R. Baláž	239
Additional Insulation of Detached Dwelling Houses with Straw-Bale Elements P. Medgyasszay	243
The Use of Probability in Risk Assessment K. Kubečka and D. Pustka	247

Chapter 5: Hygrothermal Performance of Buildings

Analysis of the Icelandic Modified Pitched Green Roof K. Necadova and P. Selnik	253
Research of the Temperature Field Process in the Soil for a Home - Founded on a Foam Glass Granulate K. Kubenková, M. Jašek and V. Panovec	257
The Presence of Microscopic Algae and Funguses on the Facades of Buildings Equipped with Thermal Insulation Composite System (ETICS) V. Kučeriková, D. Donová, L. Kučerová, J. Winkler and D. Kubečková	261
Measurement and CFD Simulation of Wind-Driven Rain Using Eulerian Multiphase Model P. Juráš	265
Hygrothermal Loads of Building Components in Bathroom of Dwellings R. Slávik and M. Čekon	269
Hygrothermal Assessment of Timber Elements in Truss with Above-Rafter Thermal Insulation P. Soudek, L. Kalousek and A. Žák	273

Transient Numerical Simulation of Linear Thermal Transmittance in Software CalA J. Plášek and O. Sikula	277
Comparison of Approximate Soil Thermal Conductivity Calculations with Laboratory Measurements and New Estimation Methods for Sandy Clayey Silt B. Nagy	281
Design Properties of Log Walls with Respect to Building Physics P. Kacálek, R. Smolka and T. Petříček	288
Experimentally Measured Boundary and Initial Conditions for Simulations D. Katunský, M. Zozulák, M. Vertaľ and J. Šimiček	293
Use of EMW Radiation in the Building Industry M. Novotný, K. Šuhajda, J. Sobotka and J. Gintar	297
Maximum Temperatures of Roof Tiles during the Summer Period S. Svobodová and L. Matějka	303
Hygrothermal Microclimate of Reconstructed Residential Building M. Budiaková	307
Analysis of the Hygrothermal Performance of the Lightweight External Cladding I. Skotnicova, P. Tymová, Z. Galda and L. Lausova	311
Monitoring Thermal Parameters of Lightweight Wood-Based Perimeter Walls M. Šušťáková and P. Ďurica	315

Chapter 6: Indoor Climate, Thermal Comfort and Ventilation

Measurement and Calculation of Ventilation in the Floor of the Brewery Žirovnice J. Jurka and J. Škramlík	321
Impact of Building Refurbishment on the Operative Temperature and PMV F. Kalmár and T. Kalmar	325
Development and Experimental Verification of Ventilation Units for Under Pressure Ventilation System B. Bielek, D. Szabó and V. Majsnar	329
Design Issues of the Airconditioning Systems in the Spaces of Swimming Pool Halls A. Rubina, P. Blasinski and L. Frič	333
Microbes in the Interior of Schools P. Mocová	337
Analysis of Damage to the Historic Roof Truss in Terms of Internal Environment L. Sibilla, M. Vlček, K. Struhala and P. Kříž	341
Issues of Indoor Climate Discomfort in Light Wooden Low-Energy Houses J. Štefko	346
Integration of PCMs and Capillary Radiant Cooling/Heating to Ensure of Thermal Comfort T. Klubal and M. Ostrý	350
Microbiological Aspects of Energy-Efficient HVAC (Ventilation) Systems Houses J. Bernard, L. Frič, O. Rubinová, M. Počinková, A. Rubina and O. Jelínek	354
Influence of the Indoor Environment Quality on the Market Value of the Buildings J. Pašek	358
Wood as Material Suitable for Health Care and Therapeutic Facilities V. Kotradyová and B. Kaliňáková	362
Indoor Climate of Residential Interiors and Asymmetry of Radiation M. Budiaková	367
Wood-Burning Stoves in Well-Insulated Dwellings R. Ponechal and J. Leštach	371

Chapter 7: Daylighting and Insolation

Simple Conversion Method for Determination of the Global Illuminance from Satellite Images M. Fabian and S. Darula	377
------------------------------------------------------------------------------------------------------------------------------	-----

Investigation of Useful Daylighting during a Day S. Darula and M. Malikova	381
Daylighting: Prediction of Circadian Effects of Different Spectral Filters J. Hraška and P. Hartman	386
Evaluation of Illuminance of Rooms Oriented to Different Cardinal Points S. Darula and J. Mohelníková	390
Relation between the Light Transmission of the Glazing System and Daylight Factor K. Kondáš and S. Darula	395
Effect of Light Reflectance of External Surfaces on Daylight Factor L. Gábrová	399
Evaluation of Indoor Daylight Parameters during Long-Term Observations in the Rooms Equipped with Intensive Coloured Surfaces P. Hartman, P. Hanuliak and L. Maňková	403
Distribution of Daylight Factor in Classrooms M. Hlásková	408
Comparison of Two Coating Material Reflections of Hollow Light Guide Tube L. Janečková, S. Darula and D. Bošová	412

Chapter 8: Acoustics and Noise Protection

Construction Site Noise and its Influence on Protected Area of the Existing Buildings R. Kantová and V. Motyčka	419
Noise Motor Working Tools and their Measures for Noise Reduction during Construction of Buildings P. Řihák	424
Vibro-Acoustic Comfort Assessment Methodology of Residential Buildings in Urban Environment M. Flimel	428
Reducing the Negative Effects of City Railways on Houses in Ostrava L. Hudeček, J. Svoboda and J. Kramný	432
Comparison of Acoustic Properties of the Peripheral Walls of Energy Efficient Buildings - Natural and Artificial Materials N. Zdražilová, I. Skotnicova, D. Donová and J. Winkler	436
