

Table of Contents

Preface

Chapter 1: Energy Efficient Buildings

Analysis of Energy and Internal Environment Improvements in a Single Family House M. Kamenský, A. Vaskova and M. Vertal'	3
Application of BIM Process by the Evaluation of Building Energy Sustainability M. Jašek, J. Česelský, P. Vlček, M. Černíková and E.W. Berankova	7
Comparison of Simulated and Actual Energy Use of a Hospital Building in Austria N. Saipi, M. Schuss, U. Pont and A. Mahdavi	11
Energy Consumption and CO₂ Emission of Buildings Built with Industrialized Technology: The Case of Debrecen and Future Trends T. Csoknyai	16
Evaluation of Energy Efficiency in Retrofitting Residential Buildings with Large-Panel Structures E. Megyesi and M. Brumaru	24
Exergy Quality of Buildings F. Kalmár	30
Indoor Environment and Energy Performance of Office Buildings Equipped with a Low Temperature Heating / High Temperature Cooling System D. Petráš, M. Krajčík, J. Bugán and E. Ďurišová	36
House in Passive Standard - Thermal Bridges M. Palko	42
Interaction of New Physical-Energy Quantification of Buildings and Renewable Energy Sources as a Dominant Production Technology of Natural Capital M. Bielek, B. Bielek and J. Hřeš	46
Nearly Zero-Energy Requirements and the Reference Buildings A. Zöld and Z. Szalay	52
The Effects of the Soils Thermal Field onto the Energy Performance of Buildings P. Kacálek, T. Petricek and R. Smolka	58
Thermal Bridges Minimizing through Typical Details in Low Energy Designing R. Ingeli, B. Vavrovič and M. Čekon	62
Thermal Bridges Minimizing through Window Jamb in Low Energy Buildings R. Ingeli, B. Vavrovič, M. Čekon and L. Paulovičová	66
Thermal Comfort in a Refurbished Low-Energy House: The OEKOHAUS Case Study L. Skoruppa, U. Pont, M. Schuss and A. Mahdavi	70
Total Solar Energy Transmittance vs. Dynamic Thermal Characteristics of Non-Transparent Building Components R. Rabenseifer	77
Transformation Determinants of Existing Urban Hotels while Taking into Account all Aspects of Sustainable Development Z. Tóthová	83
Cost Optimality and/or Sustainability in our Building's Life K. Severnyak	87
Optimization of Building Envelope Components Based on Life Cycle Environmental Impacts and Costs P. Medgyasszay and Z. Szalay	93
Building Sector & Climate Change: The Case of Hungary A. Talamon	99

Chapter 2: Heat Storage and Energy Savings

Alternative Way of Thermal Protection by Thermal Barrier M. Doležel	107
Determination of Linear Thermal Transmittance for Curved Detail F. Vlach and P. Jelínek	112
Determining Cumulative Room Temperature under <i>In Situ</i> Conditions Using Combined Method M. Flimel	116
Energy Design by Evolution: Applying Evolutionary Computing to Energy Efficient Architectural Design B. Sommer and U. Pont	120
Experimental Measurements and Numerical Simulations of Dynamic Thermal Performance of External Timber Frame Wall I. Skotnicova, Z. Galda, P. Tymova and L. Lausova	126
Hot Water Temperature Drop in a Pipe as a Parameter in Order to Define Operation Time of a Circulation Loop in Domestic Hot Water Distribution System K. Knizova and M. Kovac	131
Impact of Facade Colouring on Temperature and Light Conditions of Buildings, Housing Estates, and Environment J. Pašek and D. Bošová	135
Improvements of Energy Balance of Existing Residential Buildings M. Budiaková	139
Low Energy Source Synthetic Thermal Energy Storage (STES) V. Sipkova, J. Labudek and O. Galas	143
Numerical Analysis and Measurement Results of a Window Sill D. Katunský, M. Zozulák, K. Kondáš and J. Šimiček	147
Optimization of Swimming Pool Hall's Envelope with Respect to Thermal and Moisture Design P. Jelínek, J. Krupicová and T. Petricek	151
Possibilities of Simulations in the Planning of the Retrofit of Historical Double Skin Windows D. Bakonyi and G. Becker	155
The Impact of the Choice of Computational Methods on the Results of Simulations of Specific Heat Consumption for Heating a Family House L. Šteffek, P. Jelínek, J. Kalánek and M. Ostrý	161
The Influence of Construction Fillings of Building on Airtightness M. Kraus and D. Kubečková	166
The Influence of the Position of Windows on ΔU Value R. Mend'an and M. Pavčeková	170
The Natural Physical Cavity Energy Regime of Double-Skin Facade B. Bielek, M. Bielek and D. Szabó	174
Thermal and Moisture Problems of Wooden Windows A. Palková and M. Palko	180
Windows in Buildings - Diagnostics of Selected Properties after Time of Using P. Oravec	184
Wooden Window Structure and its Thermo-Humid Mode L. Kamenický	188
Thermal Properties of Wooden Buildings in Relation to Computer Software L. Kučerová, M. Černíková and B. Hrubá	193

Chapter 3: Integration of Renewable Energy Sources

A Software Optimization of the Solar Energy System Performance L. Skalík and O. Lulkovičová	199
Comparison of Modelled Distribution of Thermal Fields at Seasonal Ground Storage Segments R. Partika and M. Kalousek	205

Construction in the Trend of Sustainability_ Wooden Houses with Integrated Photovoltaic Systems	
E. Oravcová	209
Electricity Storage in Passive House in Central Europe Region	
L. Chuchma and M. Kalousek	213
Evaluation of Possible Use of Foliage as a Fuel for Small Combustion Equipment	
L. Martiník, V. Drastichová, J. Horák, Z. Jankovská and P. Kubesa	218
Photovoltaic Arrays on Flat Roofs – An Aspect of Yearly Energy Production	
A. Zöld and M. Seprődi-Egeresi	222

Chapter 4: Effective Ventilation

A New Type of Heat Exchanger for Ventilation in Buildings with Nearly-Zero Energy Consumption	
P. Horák, A. Pavel and I. Ambrožová	231
CFD Model of an Underfloor Air Cavity Created from Special Fittings and its Verification Using a Laboratory Model	
T. Renčko and A. Sedláková	235
Comparison of the Impact of the Ventilation Ducts on Thermal Properties of the Exterior Walls	
H. Sevcikova, E. Rykalová and R. Fabian	241
Experimental Verification of Air Quality in Primary Schools	
M. Javorček	245
Impact of the Installed Inlet Vent Flaps in the Window Structure on the Overall Aerodynamic Properties of the Window	
V. Majšniar, B. Bielek and D. Szabó	250
Natural Ventilation and Forced Warm Air Ventilation in Offices	
M. Budiaková	256
The Effect of Air Condition on Reduction of CO₂ Concentration in Buildings in Family Houses	
L. Michnová, M. Černíková and B. Hrubá	260

Chapter 5: Quality of Indoor Environment

Analysis of Summer Overheating in Elementary School Building	
M. Kamenský, M. Lopusniak and D. Katunský	269
Architecture and the Internal Environment in the Current Office Buildings - Environmental Aspects	
P. Nahálka	273
Case Study of Light Pollution in Urbanized Area of Slovakia	
P. Fulop, P. Hanuliak and L. Mankova	277
Colour of External Shading Obstacles and Circadian Stimulus of Indoor Daylighting	
J. Hraška and P. Hartman	283
Comparative Study of Window Glazing Systems Influence on Melatonin Secretion in Patients in the Hospital Wards	
J. Hraška, P. Hanuliak, P. Hartman, M. Zeman and K. Stebelová	288
Design as a Tool for Environmental Therapy in the Fight against Lifestyle Diseases	
A. Hofbauerová	294
Design of Balcony from the Point of View of Daylighting	
L. Gábrová	298
Design of School Environment in the 21st Century	
D. Končerková and L. Rollová	302
EN Criteria for Evaluation of Daylight in Interiors	
S. Darula, R. Kittler and M. Malikova	307
Evaluation of Thermal Environment and Indoor Air Quality in University Libraries in Vienna	
G. Adam, U. Pont and A. Mahdavi	315

Impact of the New CEN Minimum Illuminance Criterion on the Working Plane Size M. Fabian and S. Darula	321
Influence of Instantaneous Measured Data on Evaluation Interval of Daylighting L. Janečková, S. Darula and D. Bošová	328
Interior Environment of the Buildings Hit by Floods J. Pašek, T. Tribulová and J. Frankl	332
Shading by Surrounding Obstacles M. Hlásková	338
Sunlight Penetration through Sloped Window Apertures K. Kondáš, S. Darula and M. Zozulák	342
Thermal Stability of the Summer Period in Schoolrooms I. Svatošová and L. Michnová	346
Assessment of Daylighting Design Tools Against Test Cases Included in CIE's 171:2006 Report F. Vajkay and L. Zizka	352
Exploring the Contact Comfort within Complex Well-Being in Microenvironment V. Kotradyová and A. Teischinger	356

Chapter 6: Natural and Environmental Friendly Building Materials

Air-Tightness and Acoustic Properties of SuperAdobe System J. Teslík, N. Zdražilová and M. Vodičková	365
Building Physical, Energetical and Hygrothermal Analysis of Earth-Sheltered Building Constructions A. Dudás and L. Farkas	369
Calculation and Experimental Evaluation of the Thermal Resistance of a Structure with Reflective Insulation J. Kalánek, L. Šteffek and M. Ostrý	374
Comparison of the Thermal Properties of Different Insulating Materials A. Lakatos	381
Controlling and Testing of the Uneven Wall Surface M. Nič and J. Nováčiková	387
Correlation Relationships between Properties of Brick Body and their Use in Building Practice M. Šveda and R. Sokolař	393
Impact of Concrete Recycled Materials on some Properties of Concrete M. Ledererová	399
Improving the Thermal Insulation Properties of Brick Products Using Chemical Additive Vuppor M. Šveda	403
Influence of Fluidized Fly Ash on the Selected Physical-Mechanical Properties of the Autoclaved Aerated Concrete A. Struhárová, S. Unčík, S. Balkovic and M. Hlavinková	409
Microclimatic Effects of Green Facades in Urban Environment F. Szkordilisz	415
Microorganism on the Fasades of Residential Panel Housing D. Kubečková	421
Possibilities of Thermal Analysis for the Evaluation of Construction Materials P. Mec, T. Murínová and K. Kubečka	425
Risk Analysis of Asbestos Structures and their Impact on the Internal Environment of Buildings P. Vlček, K. Kubečka, H. Vaculikova, D. Kubečková and V. Sojkova	431
Study of the Properties of the Environmentally Friendly Insulation Materials J. Zach and J. Hroudová	435
The Assessment of the Refurbished Reinforced Concrete Buildings in Point of the Climate Change S. Hrabovszky-Horváth	440

The Transition of the Water Steam through the Composition of the Diffusive Closed Circumferential Wall of the Wooden House with the Proper and Improper Realization of Vapor Barrier	
M. Uvizlová and T. Bečkovská	446
Thermal Properties of Selected Lightweight Wooden Walls and Windows in the Regime of Long Time Testing	
P. Ďurica, M. Ďuriníková, R. Ponechal, D. Štaffenová and M. Štůňová	450
Timber as Renewable Building Material and its Use in Modern Architecture	
P. Korček	457
Timber - Traditional Material History or Vision in Architectural Design	
T. Varga and P. Pauliny	460
Transient Pulse Method for Measuring of Heat Conductivity of Autoclaved Aerated Concrete	
M. Vertaľ, D. Katunský and J. Šimiček	466
Ultra Thin Glass Membranes for Advanced Glazing of nZEB	
I. Chmúrny	470
Use of Multi-Criteria Optimization for Selection of Building Materials for Reconstruction	
M. Haliřová and E. Rykalová	474
Application of Phase Change Materials to Reduce the Risk of Overheating of Building Interior	
T. Klubal, M. Ostrý and R. Brzoň	479

Chapter 7: Acoustic Design and Noise Protection

Door Bottom Joint Design and its Influence on Sound Transmission of the Door	
D. Dlhý and K. Minarovičová	487
Effect of Acoustic Pads' Different Dynamic Stiffness on the Reduction of Impact Sound Level	
L. Autratová and P. Hlavsa	491
Influence of Double Transparent Facades on Acoustic Comfort at the Workplace	
D. Urbán, D. Dlhý, P. Tomašovič and P. Zat'ko	495
Mockup Investigation of Lightweight Timber Floor	
J. Medved', B. Ingeleare and L. de Geetere	499
Simulation of Different Acoustic Lecture Room Designs	
K. Komínková, M. Papranec and L. Šteffek	505
Sound Insulation Properties of the Facade Elements - The Influence of Filling Cavities of Facade Elements on the Values of Laboratory Airborne Sound Insulation	
Z. Kolářová and L. Kalousek	509
The Dispersion of Acoustic Energy in the Dissemination from the Source	
D. Dlhý and A. Pernišová	513
The Assessment of Sports Halls – The Analysis of Reverberation Time, Strength and Clarity	
M. Jedovnický and P. Tomašovič	517

Chapter 8: Fire Protection, Risk Analysis

A Case Study of the Fire-Resistance of Traditional Brick Vaults	
M. Fehér and G. Dobszay	525
Application of Risk Analysis by the Evaluation of Buildings Indoor Environment	
H. Vaculíková, P. Vlček, K. Kubečka, J. Česelský and M. Nič	531
Assessment and Damage for Building Structures Risk Analysis Methods	
K. Kubečka, P. Vlček and D. Kubečková	535
Effects of Smoke on Evacuation	
M. Lopusniak	539
Fire Protection Aspects of Low-Energy Buildings	
L.G. Takács	543
Fire Risk in Relation to BIM	
J. Fridrich and K. Kubečka	552

Instruments for Risk Analysis as an Alternative Decision-Making Method in the Forensic Sciences	
K. Kubečka, S. Dobiášová, J. Fridrich, P. Vlček and M. Nič	556
Internal Surface Temperatures Short-Term Measurement in the Selected Living Room with Fireplace	
R. Ponechal	560
Risk Analysis of Steel Construction Projects Documentation Blast Furnaces	
S. Dobiášová and K. Kubečka	564
Utilization of Risk Analysis Methods in Decision-Making Process on Fitness of Rehabilitation	
K. Kubečka, P. Vlček, D. Kubečková and D. Pieszka	568

Chapter 9: Information Technologies in Building

BRESET - Remote Sensing Technology for Building Physics Research of Structures	
D. Bečkovský and F. Vajkay	575
BIM - The Process of Modern Civil Engineering	
J. Fridrich and K. Kubečka	579
Possibilities and Problems in Applying Decision Support Systems for Special Challenges in the Design of Building Constructions	
G. Kapovits and G. Dobszay	583
SEMERGY: Performance-Guided Building Design and Refurbishment within a Semantically Augmented Optimization Environment	
D. Włosiuk, N. Ghaissi, U. Pont, F. Shayeganfar, A. Mahdavi, S. Fenz, J. Heurix, A. Anjomshoaa and A.M. Tjoa	589

Chapter 10: Sustainable Development and Project Management in Building

An Expert System for the Cost-Optimal Refurbishment of Buildings	
A. Csik	599
Multi-Purpose Utilisation of Historic Building Glass Atrium — Case Study of the Slovak Philharmonic	
B. Polomová, A. Vargová, V. Chmelík and D. Urbán	605
The Concept of Minimalism in Sustainable Residential Buildings	
Ľ. Selcová	611
The Idea of Modularity and Small Prefabrication of Low-Cost Housing Concepts	
D. Mikušková	615
Utilization of the Construction Waste	
K. Prokopčáková and L. Prokopčák	619
