

Table of Contents

The Characteristic of the Concrete Technology in the Construction of Western China Z.F. Zhang, H. Ding, J. Wang and Z.M. Zhang	2
Ecological Environment and Concrete Technology in China N.Q. Feng, J.H. Yan and G.F. Peng	12
Exploitation of Particle Migration Mechanism to Promote Economy and Ecology in Concrete Technology P. Stroeven, J. Hu and M. Stroeven	19
A Development of the Research on High Performance Concrete Incorporated with High Volume Fly Ash F. Xing, X.Y. Guo, F.G. Leng and R.Y. Zhang	26
Ecological Impact and Economic Aspects of Advanced Concrete Technologies D. Rosignoli, G. Martinola and M. Bäuml	35
ECOCEMENT Innovative Cement for Contributing to Sustainable Society R. Tomita, H. Hirao, T. Tochigi and T. Tamashige	44
Vital Process of Concrete Based on Fuzzy Analytic Hierarchy Process and Evaluation Model of Compatibility with Environment B.M. Wang and L.J. Wang	55
Effect of Mineral Admixtures on Durability of Concrete Structure Subjected to Alkaline Saline Corrosions Q.L. Niu and N.Q. Feng	68
Inhibiting Effect of Mineral Powder on Sulfate Attack of Cement Mortar Q.L. Niu and N.Q. Feng	73
Investigations in the Factors Influence on the Accelerate Test Method for Assessing Sulfate Attack D.B. Yang and C.N. Shen	79
Effect of Low-Calcium Fly Ash on the Resistance of Cement Mortar to Sulfate Attack in the Form of Acid Rain J. Xiao and S.Q. Zhou	84
Research on Mechanism of Concrete Corrosion Subjected to Underground Acid Liquid T. Meng, X.Q. Qian and S.L. Zhan	91
Study on Long Term Performance of Concrete of Slag-Alkali Higher Calcium Fly Ash M. Tang and X. Li	98
Study and Application of Salt-Scaling Resistant Admixture in Concrete Y. Wang and B. Liu	105
Mechanism of Using Mineral Admixtures in Concrete to Suppress Alkali-Silica Reaction X.X. Feng and N.Q. Feng	111
Dry Shrinkage, Frost Resistance and Permeability of Rubber Included Concrete Y.M. Zhang, S. Chen, B. Chen and W. Sun	120
Study of Frost Resistance on Air-Entrained Concrete in Sulfated Medium G. Yong, Y. Jie, W.C. Yang and B.S. Zhang	125
Inspection and Analysis of Prestressed Concrete Girders Deteriorated by Alkali-Silica Reaction T.Y. Hao	131
Effect of High Temperature on Concrete: A Literature Review G.F. Peng, S.Y.N. Chan, Q.M. Song and Q.X. Yi	138
Influence of Mineral Admixtures on Crack Resistance of High Strength Concrete S.H. Liu, K.H. Fang and Z. Li	150
Study on Autogenous Deformation of Concrete Incorporating MgO as Expansive Agent S.H. Liu and K.H. Fang	155
Study on Pozzolanic Activity of Mineral Admixtures in Forms of Li-Salt Industrial Residue and Fly Ash C. Xia, B.J. Wang and Q.L. Song	162
Effect of Interfacial Transition Zone on Chloride Diffusion Coefficient J.J. Zheng, S.L. Xu and X.Z. Zhou	167

Study of Controlling ASR with Fly Ash D.Y. Wu, Z. Li, K.H. Fang and S.H. Liu	175
Study on the Chloride Permeability of Metakaolin Concrete L. Zou, F. Xing and C. Tan	180
Influence of Compound Additive upon the Freeze-Thaw Resistance of Concrete Q. Ma, G.F. Peng, Y.J. Xie and Y.F. Liu	184
Sulfate and Frost Resistance of Mass Hydraulic Concrete P.W. Gao, S.X. Wu, P.H. Lin, Z.R. Wu and M.S. Tang	191
Construction Technology of Durable Concrete in Permafrost District B. Du and Q.X. Yi	197
Study on Improvement of Concrete Durability by Using High Performance Cement N.Q. Feng, Q.L. Niu, J.W. Cai, C.Z. Li and R.C. Huang	204
Influence of Shrinkage Reduce Agent on Early Age Autogenous Shrinkage of Concrete X.Q. Qian, T. Meng, S.L. Zhan, M.H. Fang and K.L. Qian	211
Synthesis and Properties of Polycarboxylate-Type High Range Water-Reducer C.Z. Li, N.Q. Feng, X.F. Han and L. Lu	218
A Investigation on the Influence of Vitreous Slag Powders on Rheological Properties of Fresh Concrete Y.X. Shi, I. Matsui and N.Q. Feng	223
The Effect of Shrinkage-Reducing Admixture on Mechanical Properties and Volume Stability of Concrete J.G. Han and P.Y. Yan	230
Influence of Mixture Proportion and Curing Condition on Contribution of Fly Ash to Strength of Concrete F.-. Wu, Y. Masuda, S. Nakamura and S. Sato	235
Study on Fractal Characteristics and Performance of Ultrafine Slag Grains M. Tang and X. Li	242
Study on Abilities of Mineral Admixtures and Geopolymer to Restrain ASR K.L. Li, G.H. Huang, L.H. Jiang, Y.B. Cai, J. Chen and J.T. Ding	248
Integrated Utilization of Ultra-Fine Fly Ash—Fluoro Gypsum for Highway Repair Y.L. Gao, S.Q. Zhou and J. Yin	255
Research on Properties of Concrete Prepared with Artificial Sand Containing Stone Powder at High Content M.K. Zhou, J.W. Cai, J.L. Wang and B.X. Li	263
Use of Clayish Crushed Stone for Production of Aerated Concrete Y.Z. Chen, F.X. Li and B.B. Xu	269
Chemical Durability Investigation of Magnesium Phosphosilicate Cement Z. Ding, Z. Li and F. Xing	275
The Effects of Cement Content, Sand Percentage and Fly Ash Dosage on Lightweight Aggregate Concrete L. Wei, F. Xing and L. Han	282
Development and Subjects of Recycled Aggregate Concrete in Japan Y. Kasai	288
Recycling of Crushed Bricks from Demolished Buildings as Cement-Based Porous Materials G. Shimizu	301
Quality Improvement of Recycled Aggregate Concrete V.W.Y. Tam, X.F. Gao and C.M. Tam	308
Study on the Workability and Mechanical Properties of Recycled Aggregate Concrete Containing Ultra-Fine Fly Ash Y.J. Li, S.Q. Zhou, J. Yin and J. Li	314
Study on Pervious Road Brick Prepared by Recycled Aggregate Concrete H.D. Yan and G.H. Huang	321
Application of Molten Slag Fine Aggregate Concrete Using Superplasticizer S. Otsuka, Y. Nakata, T. Saito, H. Takahashi, K. Tobinai and T. Kemi	329
Effect of Soaking Time and Polymerization Temperature on Polymer Concrete C.H. Chen, S.H. Yeh, R. Huang, C.H. Chen and A. Cheng	339
Influence of Surface Treatment on Pore Structures of Cement-Based Materials C.H. Chen, M.C. Ho, S.H. Yeh and R. Huang	347

Research on Preparation of Ultra-High Strength & High Performance Concrete with Low Quality Fine Aggregate	
X.C. Pu, C. Wang, C.H. Yang and Z.Q. Wang	356
Method of Removing Graffiti from Surface of Concrete	
I. Matsui, A. Onda, S. Shinozaki, E. Kyo, K. Nagai and N. Yuasa	363
Microstructure and Mechanical Properties of Shale Ceramsite Concrete	
X.H. Zheng, B.S. Zhang, Y. Jie, X. Chi, Y.Z. Guo and L.J. Kong	371
Compressive Strength and Density of Fly-Ash Substituted Soil-Cement Concrete	
M. Kawamura and Y. Kasai	376
The Research and Application of Self-Compacting Concrete	
X.W. Yu, Y.H. Gao, D. Hao, S.Z. Li and L.Y. Wang	384
A Study on Supercritical Water Technology for Recycling of Building Materials	
K. Yamamoto, N. Yuasa, I. Matsui, T. Hiaki and S. Tanaka	391
Research of High Performance Artificial Reef for Breeding Abalone in Sea Water	
M. Tang, X. Li and T. Wang	398
Study on Preparation Technique for Low-Cost Green Reactive Powder Concrete	
F. Xing, L.D. Huang, Z.L. Cao and L.P. Deng	405
On Building Crumb Rubber Concrete Test Sites	
H. Zhu	411
Application of Polypropylene Fiber Concrete in Bridge Deck Pavement	
J.H. Shan, M.K. Zhou, B.X. Li, J.W. Cai and F. Xu	418
State-of-the-Art of Multifunctional and Smart Concrete	
L.L. Sui and T. Liu	424
Research and Applications of High-Anticorrosivity Concrete	
C.H. Chen, Y. Wang, J.H. Li and H.G. Jin	432
Influence of Polymer Impregnating on Mechanical Properties and Permeability of High Performance Concrete	
Y.F. Liu, G.F. Peng, H.Z. Jiao and S.H. Bian	438
Study on Energy-Saving Residential Building Structures of Multi-Ribbed Composite Walls with High Performance Concrete	
Y. Zhang, Q.F. Yao and Y.G. Ding	444
Study on Strength and Velocity of Longitudinal Wave of Low-Strength Concrete	
W.H. Chen	451
Study on Properties of Cement Lime-Fly-Ash Soil	
S.G. Bai and Y.F. Hou	457
Construction and Quality Control of Concrete Using Barite as Aggregate	
W.G. Wu, Q.X. Gu, J. Wang, T.M. Wu, H.L. Lin, K.P. Sun and Q. Li	462
High Performance Concrete with High Volume Fly Ash	
J.H. Wu, X.C. Pu, F. Liu and C. Wang	470
Proper Characterisation of Pore Size Distribution in Cementitious Materials	
J. Hu and P. Stroeven	479
Influence of Boundary Conditions on Pore Percolation in Model Cement Paste	
H.S. Chen, P. Stroeven, G. Ye and M. Stroeven	486
Logarithmic Decrement and Dynamic Modulus of Coated Cement Concrete	
M. Mayama and M. Harada	493
Study on Characterization of Hardened Concrete from Water Absorption-Time Curve	
E. Kyo and G. Shimizu	500
Strength of Roller Compacted Concrete	
Y. Shi and K.H. Fang	508
Study on Distribution Feature of Fracture Toughness of Interface between Coarse Aggregate and Hardened Cement Mortar in Concrete	
F. Xing, X.Y. Guo, F.G. Leng, K.H. Fang and R.Y. Zhang	514
Static Properties of Plain Reactive Powder Concrete Beams	
R. Gao, Z.M. Liu, L.Q. Zhang and P. Stroeven	521
Pore Structure and Chloride Ion Transport Mechanisms in Concrete	
C.J. Shi, D.H. Deng and Y.J. Xie	528
Experimental Study on Stress-Strain Relationship of New-Old Concrete	
J. Yin, Y.J. Li, X. Zhang and S.Q. Zhou	536

Properties and Microstructure of the New Phosphate Bonded Magnesia Cement Z. Ding, Z. Li and F. Xing	543
Effects of Styrene-Acrylate Emulsion on the Damping Ability and Hydration of Cement Matrix T. Liu and J.P. Ou	550
Static Loading Investigation on Well Cover of Reactive Powder Concrete F. Xing, L.P. Deng, Z.L. Cao and L.D. Huang	556
Study on Strength and Bond Characteristics of GGBS Concrete J. Xia, S.X. Wang, H.F. Chang, H. Peng, L. Jiang and P. Ding	561
Relationship between Test Results of the ACSIRO and ASTM C1202 Methods W.W. Li, F.G. Leng and X.Z. Yuan	567
Flexural Fatigue Behavior and Performance Characteristics of Polyacrylonitrile Fiber Reinforced Concrete Z.C. Deng, H.L. Deng, J.H. Li and G.D. Liu	572
Penetration Behavior of Chloride Ions into Concrete in Coastal Areas Y. Masuda, F.-. Wu, S. Nakamura and S. Sato	584
Analysis of a Sudden Failure of RC Roof Slabs in a Steel Mill T.Y. Hao and Y. Hui	591
Analysis of the Factors Affecting Crack Resistance of Dam Concrete G.X. Chen and F. Jiang	595
Effect of Cooling Regimes on Mechanical Properties of Fibre-Toughened High-Performance Concrete G.F. Peng, S.H. Bian, Z. Zhao and Q.X. Yi	603
Prediction of Crack Width of Chloride Contaminated Reinforced Concrete Structures J.J. Zheng, X.Z. Zhou and S.L. Xu	610
Effect of Various Moisture Contents, Variety and Dosage of Fibers on Explosive Spalling and Residual Compressive Strength of High Performance Concrete Subjected to High Temperatures S.H. Bian, G.F. Peng, Z. Zhao and Q.X. Yi	618
Damage of Concrete Dams and Its Simulation Calculation X.D. Wang, D.Y. Xu, W.X. Zhu, A.M. Deng and Z.B. Wang	624
Early-Age Concrete Cover Crack and Its Effects on Concrete Cover X.M. Huang and C.Y. Yang	630
Crack Resistance Analyses on RC Composite Floor Slab P. Chang, Q.F. Yao and A.P. Wang	637
Study on Hysteretic Model and Damage Model of Multi-Ribbed Composite Wall Q. Yuan, Q.F. Yao and Y.J. Jia	644
Long Term Load-Carrying Capacity of Eccentrically Compressed Concrete Filled Steel Tubular Members B. Han and Y.F. Wang	651
Elastic Solutions of Graded Piezoelectric Hollow Cylinders Z. Shi and T.T. Zhang	658
Research on Shear Resistant Capacity and Reliability of Multi-Ribbed Composite Wall in High-Rise Building Y.J. Jia, Q. Yuan and Q.F. Yao	669
Stress Analysis and Experimental Verification on Corroded Prestressed Concrete Beam E.Y. Zhu, C. Liu, L. He, H.W. Zhang and N. Xie	676
Double-Layered Piezothermoelastic Hollow Cylinder under Thermal Loading Y. Chen and Z. Shi	684
Age-Adjusted Effective Modulus Method for Creep of High-Performance Concrete B. Han and Y.F. Wang	693
Study on Dynamics Characteristics of Concrete Floating Slab Track in Urban Track G. Liang, K.M. Yin and G.Y. Zhang	700
Shear Strength Equation for High-Strength Concrete RC beams with High Strength Stirrup F. Xing, W.L. Wang and Z.L. Cao	706
Experimental Study and Finite Element Analysis on RPC Footwalk Braces Z.G. Yan and G.P. Yan	713

Ductility of Partially Prestressed Concrete Beam J.S. Du and X.L. Chang	720
Mechanical Characteristics of Concrete Ballastless Track on the Track Traffic of Linear Induction Motor G. Liang, K.M. Yin and Y. Hui	725
