

Table of Contents

Preface and Organizing Committee

Chapter 1: Materials Science and Processing

A Comprehensive Quantitative Evaluation Method of Emulsifying Properties Y. Zhang, H.L. Liu, Y.Y. Zhu, H. Yuan and J. Wu	3
Microstructural Characteristics of <i>Punica granatum</i> Fruit at Dynamic Temperature inside the Fibre Insulation Materials X.H. Li, L. Li, X. Liu, W. Wang and J.C. Han	8
The Development Situation of Selective Laser Melting Metal Powder Based on 3D Printing C.Y. Zhang, Y.P. Ren and X.S. Chen	12
A Feasibility Study of the Material Removal Rate of the Conical End-Face of the Optical Fiber under Polishing Y.C. Tsai, G.M. Huang, J.H. Chen and I.C. Her	19
Adsorptive Removal of Cr(VI) from Aqueous Solution over Material: Optimisation through Response Surface Methodology S.D. Wang, S. Cheng, J. Zhang, H.Y. Zhao, X.J. Ma and X.M. Zhu	25

Chapter 2: Experimental and Applied Mechanics

Theoretical and Experimental Investigation on Modal Characteristics of Rotating Flexible Beam under Dynamic Boundary Conditions H.B. Yin, Y.F. Li, Y. Zhao and P.J. Cui	33
Creep Analysis of Eccentric Compression RC Columns A.N. Qi, H.S. Zhu and D.H. Huang	41
Numerical Simulations of the Perforation in Metal Plates with Different Conical-Nosed Projectiles W.H. Sun, G.L. Ju and B.Q. Yang	47
Effect of FWD Testing Position on Modulus of Subgrade Reaction S.N. Shoukry, G.W. William, M.Y. Riad and J.C. Prucz	53
Nonlinear Dynamic Response of a Thin Plate in a Fractional Viscoelastic Medium under Internal Resonance 1:1:2 Y. Rossikhin and M. Shitikova	60
Dynamic Load Effects of PVA Tail Sand Cement Base Composite Materials W.B. Bao, S.F. Zhang, G.H. Di, W.W. Ji and L.H. Qu	66
Experimental Verification of Fatigue Resistance of Steel Expansion Anchors to Concrete Loaded by Cyclic Tensile Force with Regard to Particular Failure Modes M. Karmazínová	71
Experimental Verification of Atmospheric Physical Influence on Behaviour of Glass-Fibre-Concrete Facade Panels M. Karmazínová and J. Melcher	78
Microdamage in Composite Laminates: Experiments and Observation J. Varna and L. Asp	84
"E" Elastic Property of Metallic Materials Correlation between Standard and Penetration Tests S. Marini and G. di Francesco	90
The Reduction of Fuel Consumption on the Example of Ecological Hybrid Buses M. Bajerlein and L. Rymaniak	96
The Influence of Laser Treatment and the Application of Reduced Pressure Force Piston Rings on the Engine Exhaust Emissions under the Conditions of Engine Lubrication with Different Engine Oils J. Merkisz, J. Mizera, M. Bajerlein, L. Rymaniak and P. Maj	102

Modification of a Hybrid City Bus Powertrain in the Aspect of Lower Fuel Consumption and Exhaust Emissions	
M. Bajerlein, L. Rymaniak, P. Swiatek, A. Ziolkowski, P. Daszkiewicz and M. Dobrzynski	108
Exact Solutions for the Fractional Time-Dependent Oldroyd-B Fluid Model Subject to a Constantly Accelerated Shear Stress	
C.R. Li and L.C. Zheng	114
Analysis on Random Response of a Simply Supported Beam Subjected to Distributed Load	
X.J. Li	120
A New Inlet Boundary Conditon for LES	
Z. Liu	126
Dynamic Experimental Study on Highly Weathered Granite	
L. Niu, Q.J. Song, S. Xu and X.M. Guo	132
Research on Experimental Method for the Working Force between Packer Rubber and Casing Tube	
Z.C. Wang, F.X. Lv, M.Y. Cao, H.Z. Wen and Y. Xu	138
Residual Stress Study of Autofrettaged Barrel under Impulsive Loading	
P. Qu, Q. Li and S.F. Yang	144
Temperature Field and Thermal Stress Analysis of Large Caliber Gun Barrel	
P. Qu, Q. Li and S.F. Yang	150
Regression Model and Control in Experimental Mechanical Processes	
Â.M. Oliveira Sant'Anna and D.M. Filho	155
Relations of Lift and Drag Coefficients of Flow around Flat Plate	
H.B. Jiang, Y.R. Li and Z.Q. Cheng	161
The Numerical Simulation of Composite Explosive Energy Coupling in Underwater Explosion	
Q. Zhao and G.G. Xu	165
Experiment Study on Influence of Initial Stress in Concrete Filled Steel Tubular Latticed Columns under Axial Load	
F.Y. Huang, G. Yu, B.C. Chen and J.Z. Li	170
Performance of Earthquake Simulation Three Bi-Axial Shaking Tables	
F.Y. Huang, Z.M. Fang and J.Z. Li	178
Strength Evaluation of Unidirectional Composites Using Monte-Carlo Simulation	
Q.M. Wang, L. Tan and Z.Q. Liu	184
Three-Dimensional Finite Element Analysis of Implants with Different Crown-to-Root Ratio and Different High Thread	
Y.J. Duan, L. Chen, T. Xiong and X.H. Niu	190
Studying the Effects of Different Materials and Thickness of Titanium Layer to Implant Based on the Finite Element Method	
Y.Q. Ma, L. Chen, S.K. Wang and X.H. Niu	196
Disturbance Sampling Analysis in Sediment of the Yellow River Reservoir by Finite Element Method	
L. Zhang, Y. Yang, B. Zhang and J. Zheng	201
Study on the Hydrodynamics of a Single-Acting Pendulum Wave Energy Converter	
D.J. Wang, S.Q. Qiu and J.W. Ye	209
Manipulation of IDT-Actuated Piezoelectric Membrane Actuators by Silicon Clamping	
S. Zaehring, J. Purr and N. Schwesinger	215
Numerical Stimulation on the Seismic Wave Attenuation in Random Inhomogeneous Media	
N. Yang and X. Qian	220
Researching on the Mechanic Properties of Early-Strength Polyurethane Concrete and its Affecting Factors	
K. Jiang, Q. Su, H. Bai and X. Feng	225
Regular Hexagonal Grid Single-Layer Cylindrical Latticed Shell Parametric Design	
Q.S. Wang, X.Y. Lu and S.Y. Chen	231
A Research on Strength Criteria Based on Material Structure	
Z.H. Wei, M.S. Wang and D.L. Zhang	236
The Corrosion Behavior of Rebar in Stressed Mortars	
X.G. Feng, X.Y. Lu, Y.D. Liao and C.H. Jiang	244

Multi-Phase Dielectric Model of Blood and its Application G. Li	248
Impact Loading Analysis of Light Sport Aircraft Landing Gear P.W. Chen, S.H. Chang and C.M. Chen	252
Effect of Rotation Speed and Eccentricity on Dynamic Movement Characteristics of BTA Deep-Hole Boring Bar W. Zhao, C.F. Sun and Z.Q. Hu	258
An Improved Genetic Algorithm for Landing Gear Load Measurement by Eliminating Redundancy Y. Zhao, Z.R. Li and Q.D. Jiang	264
Rapid Defect Reconstruction Based on Genetic Algorithm and Similar Model in Remote Field Eddy Current Non-Destructive Testing X.J. Xu and W.L. Pei	269
Stress Analysis and Optimization Design of Pressure Vessel of Underwater Gamma Spectrometer F. Gao, J.G. Zhang and F.F. Yang	275
Study on Design and Construction of Reaction Mass of Earthquake Simulation Triple Shaking Tables F.Y. Huang, Z.M. Fang, J.Z. Li and Q.X. Wu	279
Principal Stress and Principal Strain Response in Thin-Walled Cylinder Y. Zhu and X.Y. Zhao	286
Multi-Level Linear Flexible Inverted Pendulum Modeling T. Xu and C.F. Zhang	290
Subjective and Objective Quantificational Description of Vehicle Interior Noise during Acceleration J.G. Jiang and Y. Zeng	297

Chapter 3: Information and Computer Technologies, Data Processing

Research on Offline Storage of Web Page W.T. Liu	305
Research of Speed Regulating System Based on New Fuzzy PI Control H. Wang, L.R. Wan and C.D. Wang	310
Extraction of Direction Features in Fingerprint Image L. Zhang	316
Multimedia Image Compression Algorithm Based on WBCT K. Geng	320
Safety and Reliability of Wireless Charging System for Electric Vehicles Based on the Yunnan Power Grid H.L. Wang, J. Liu, M. Cao, X.F. Chen, D.D. Wang and S.Q. Zhang	324
Sustainable and Inclusive Development Products Applied to Form Engineers in the Citizenship M.L.M. Okumura and O. Canciglieri	329
Sustainable Product Design: The Development of a Conceptual Model P.T. Fernandes and O. Canciglieri	335
New Application of Selection of Customized Lens Fitting in Optometry Services L.S. Chang and B.W. Wu	343
Monitoring Nonlinear Batch Process Using Statis-Based Method D.M. Filho, F.S. Fogliatto and L.P.L. de Oliveira	350
Empirical Likelihood Testing for Longitudinal Varying Coefficient Models C.Q. Liu	356
Research on Virtual Experiment Teaching Oriented to Innovative Ability Cultivation in Mechanical Engineering Curriculums J.G. Yi	361
Product Development Model Oriented for the R&D Projects of the Brazilian Electricity Sector J.A. Pereira and O. Canciglieri	366

Improved Binarization Method of QR Code Mobile Terminal S.F. Yuan and Z. Zhang	374
Design of the Electronic Waste Recycle Network System Based on GIS G.L. Zhou, Y.R. Zhu and L.N. Mao	381
