

Table of Contents

Preface, Committees and Sponsors

Chapter 1: Stress Analysis in Metal and Composites

Study of Residual Stress Surface Distribution on Laser Welded Steel Sheets Z. Pala, K. Kolařík, N. Ganey and J. Čapek	3
Non-Destructive Inspection of Surface Integrity in Milled Turbine Blades of Inconel 738LC K. Kolařík, Z. Pala, L. Beranek, J. Čapek, Z. Vyskocil and N. Ganey	9
Mathematical Model of the Experimental Drilled Hole Imperfections Influence on the Stress State Identification for the "Hole Drilling Strain-Gauge Method" Application K. Vitek	16
Distribution of Stress around the Graphitic Particles in Cast Iron Microstructure J. Vavro, J. Vavro and P. Kováčiková	20
Implementation of Correction Coefficients Relevant for Photoelastic Coatings into the PhotoStress Software P. Frankovský, F. Trebuňa, J. Jadlovisky, M. Pástor and M. Kenderova	26
Method of Investigation of the Stress-Strain State of Surface Layer of Machine Elements from a Sintered Nonuniform Material V.V. Kuzin and S.N. Grigoriev	32
The Use of Modan 3D in Experimental Modal Analysis R. Huňady, F. Trebuňa, M. Hagara and M. Schrötter	36
Investigation of Long-Term Mechanical Response of Rubber J. Heczko, R. Kottner and L. Fukala	42
Memorization and other Transient Effects of ST52 Steel and its FE Description R. Halama, F. Fojtik and A. Markopoulos	48
An Effect of Surface Laser Hardening on Deformations and Fatigue Properties of 42CrMo4 Steel Specimens I. Černý and J. Sís	54
Monitoring of Internal Damage of Glass Fibre Reinforced Composite Components Using Strain Measurements with Strain Gauges and Fibre Optic Sensors I. Černý	58
Adaptive Control of the Belt Conveyor Preloading J. Mrázek, V. Dynybyl and F. Starý	62
Deformation Properties of Laminated Glass Subjected to Increased Temperature T. Bittner, P. Tej, P. Bouška, M. Špaček and M. Vokáč	66
Wear Behavior of Hard Dental Tissues and Restorative Materials R. Čtvrtlík and J. Tomaščík	72
Experimental Tests of the UHPC in Triaxial Compression F. Vogel, R. Sovják and M. Jogl	78
Mechanical Resistance of Triple Glass Facade Panels P. Bouška, R. Pukl, M. Špaček, M. Vokáč and T. Bittner	84
Determination of the Necessary Geometric Parameters of the Specimen in Ring-Core Method F. Menda, F. Trebuňa and P. Šarga	90
Temperature and Stress Field Measurement at Friction-Stir Welding of an Aluminum Alloy Probe P. Élesztős, R. Jančo, L. Écsi and G. Izrael	96
The Use of Fiber Bragg Grating Sensors during the Static Load Test of a Composite Wing Structure M. Dvorak, M. Kabrt and M. Růžička	102
Understanding of the Dynamical Properties of Machines Based on the Interpretation of Spectral Measurements and FRF V. Dekýš, A. Sapietova and O. Stevka	106

Verification of Deformation and Loading of a Mould during Manipulation A. Lufinka and A. Potěšil	113
The Numerical Analysis of Influence of the Shape of the Anchor Head on the Headed Stud's Tensile Capacity J. Fornůsek and P. Konvalinka	117
Strain Gage Measurements for Accurate Yield Point Determination J. Janoušek and M. Balda	123
Possibility of Application of the Simulation Based Reliability Assessment Method in Modeling of Structures P. Kesi and F. Plánička	129
QUALISYS System Applied to Industrial Testing P. Malý and F. Lopot	135
The Knowledge Acquired by Using of Optical Methods by Strain Fields Investigation M. Hagara, F. Šimčák and M. Kalina	141
Residual Stress Investigations of Electron Beam Welds on Samples Prepared by Reconstitution Method P. Mikula and M. Vrána	147
Determine Parameters for Double-K Model at Three-Point Bending by Application of Acoustic Emission Method L. Pazdera, L. Topolář, H. Šimonová, P. Fojtu, J. Smutny, I. Havlíková, Z. Keršner and V. Rodriguezova	151
Numerical and Experimental Research of Design Optimization of Baths for the Production of Nanofibers by the Electrospinning M. Petru, O. Novák, L. Ševčík and P. Lepšík	157
Analysis of a Dynamic Response of a Car Door Impact into the Lock A. Potěšil, P. Horník and M. Hušek	163
Time Progress of Compressive Strength of High Performance Concrete O. Holčápek, F. Vogel, T. Vavříník and M. Keppert	167
Measurement of Torque Moment of Aircraft Electric Drive Unit J. Rosa and J. Cagán	173
High-Pressure Pipelines Repaired by Steel Sleeve and Epoxy Composition P. Novák, M. Žmindák and Z. Pelagić	181
The Experimental Observation of the Prestress Forces in the Structural Elements of a Tension Fabric Structure P. Fajman, M. Polak, J. Maca and T. Plachy	189
Experimental Verification of the Properties of Fibres for the Mechanisms Based on Parallel Kinematic Structures J. Václavík and P. Polach	195
Influence of Copper Ions on Mechanical Properties of PVA-Based Nanofiber Textiles Z. Ráková, P. Ryparová, R. Hlaváč, P. Tesárek and V. Nežerka	201
Experimental Identification of Material Properties of Piezoelectric Patch Transducer Z. Lašová and R. Zemcik	205
Moment Capacity of FRP Reinforced Concrete Beam Assessment Based on Centerline Geometry J. Zatloukal and P. Konvalinka	211
Analysis and Measurement of the Charge Intensity of the Selected Electrospinning Electrodes M. Petru, O. Novák and P. Lepšík	217
Wrapping Machine with Integrated Manipulator F. Starý, V. Dynybyl and J. Mrázek	223
New Specimen for Determination of the State of Plane Stress V. Goga	227
Modal Parameter Estimation for Underdamped Linear Dynamic Systems F.N. Nangolo	233
Numerical Verification of Model Multibody Systems M. Svoboda	239
Evaluation of Operational Testing of Agricultural Trailer R. Uhlíř, P. Mossóczy and P. Malý	245

Constitutive Modelling and Histology of <i>Vena saphena</i> J. Vesely, D. Hadraba, H. Chlup, L. Horny, T. Adamek and R. Žitný	249
Mechanical Response of the Cross-Linked Pericardial Tissue E. Gultova, L. Horny, H. Chlup, E. Filová, L. Staňková, J. Pirk, L. Bačáková and R. Žitný	255
System Inaccuracy Bolometric Components to Determine Elimination Procedures in the Process of Thermal Translocation Liver Living Biological Material L. Ďuricová	259

Chapter 2: Experimental Methods and Stress Analysis in Building Materials

Acoustic Emission Monitoring during Static Modulus Elasticity Test of Concrete Specimen L. Topolář, L. Pazdera and P. Cikrle	267
Turbine Blade Loading and Experimental Verification K. Doubrava and J. Kuželka	273
Methods of Testing Gearboxes of Rail Vehicles K. Petr and V. Dynybyl	277
Influence of Honeycomb Core Compression on the Mechanical Properties of the Sandwich Structure L. Fojtl, S. Rusnáková and M. Žaludek	283
Influence of Aggregate Stiffness on Fracture-Mechanical Properties of Lime-Based Mortars P. Tesárek, V. Nežerka, P. Padevět, J. Antoš and T. Plachy	289
Behaviour of Different Types of Concrete under Impact and Quasi-Static Loading P. Máca, P. Konvalinka and M. Curbach	295
Experimental Investigation of Projectile Impact Local Damage on Cementitious Composite Slabs T. Vavřínek and J. Zatloukal	301
Portable Device for Indirect Assessment of Strength in Tension of Building Materials and Problem of Boundary Condition S. Major, I. Jandajsek, J. Valach and D. Vavřík	307
Permeability and Basic Physical Properties of Concrete with Metakaolin Addition P. Reiterman, M. Keppert, M. Čáchová, O. Holčapek, F. Vogel, K. Kolář and P. Konvalinka	313
Influence of Water Content in the Hardened Cement Paste Mixtures with Different Proportion of Fly Ash on the Material and Mechanical Properties O. Zabal and P. Padevět	319
Utilization of Recycled Fine-Ground Concrete from Railway Sleepers for Production of Cement-Based Binder M. Lidmila, P. Tesárek, T. Plachy, Z. Rácová, P. Padevět, V. Nežerka and O. Zabal	323
Influence of Humidity on the Material Properties of Cement Paste with Fly Ash in the Mutual Relation 50/50 P. Padevět and O. Zabal	327
Experimental Testing of a Bridge J. Melcer	333
The Cement Paste Creep with Addition of Fly Ash in Time and Ratio of Parts 60/40 P. Padevět and P. Bittnar	341
Interpretation of Results of Penetration Tests Performed on Timber Structures in Bending L. Melzerová and M. Šejnoha	347
Influence of Freeze-Thaw Cycles on Mechanical Properties of Gypsum Determined Using the Impulse Excitation Method T. Plachy, P. Tesárek, R. Toupek, V. Nežerka and M. Polák	353
A Modified Strip Method to Speed up the Calculation of Normal Stress between Wheel and Rail T. Lack and J. Gerlici	359
A Modified Strip Method to Speed up the Tangential Stress between Wheel and Rail Calculation T. Lack and J. Gerlici	371
Rail Vehicles Brake Components Test Bench Utilisation J. Gerlici and T. Lack	379

Realistic Simulation of Railway Operation on the RAILBCOT Test Stand J. Gerlici, T. Lack and J. Harušinec	387
Modified HHT Method for Vehicle Vibration Analysis in Time Domain Utilisation J. Gerlici and T. Lack	396
High Temperature Composite of Aluminous Cement with Addition of Metakaolin and Ground Bricks Dust O. Holčapek, P. Reiterman and P. Konvalinka	406
