PREFACE

Characterisation of Sandwich Composite Beams for Small Scale Wind Turbine Applications A. Nurra, M.S. Found and B. Picasso	3
The Behaviour of Polyphenylene Sulphide Carbon/Glass Hybrid Composites under Compressive Loading J.F. Harper and S.J. Michiels	17
The Effect of Thermal Spiking and Resultant Enhanced Moisture Absorption on the Mechanical and Viscoelastic Properties of Carbon Fibre Reinforced Epoxy Laminates J.A. Hough, Z.D. Xiang and F.R. Jones	27
Elastoplastic Behaviour of Composite Laminates S. Meili and P. Priolo	43
Impact Behaviour of FRP Composites M.S. Found	55
Impact Behaviour of Quasi-Isotropic Graphite-Peek Laminates F. Aymerich, A. Bucchioni and P. Priolo	63
Fragmentation of Composite Material Plates Submitted to Impact Loading: Comparison between Numerical and Experimental Results G. Belingardi, A. Gugliotta and R. Vadori	75
A Critical Review of Allowable Stresses in Fiber Reinforced Plastic Marine Structures C. Bertorello and A. Campanile	89
Structural Analysis and Design of Sailboats Built of Composite Materials A. Cortesi, A. Corvi and R. Pierandrei	105
A Comparison of Thermoelastic and Numerical Stress Results for Moulded Composites Plates M. Pinfold, G. Calvert, C. Garroch and P. Stanley	117
First Rheological and In-Mold Flowability SMC Characterization A. Balestrini, A. Momo, M. Revellino and L. Saggese	127
Experimental and Numerical Evaluation of Mechanical Stiffness of an SMC Bumper G. Almondo, L. Citran and R. Tovo	135
Experimental Analysis of a SMC Truck Bumper R. Ambu, F. Bertolino and F. Ginesu	145
Thermoelastic Analysis of Mechanical Elements in Composite Material G. Grasso, G. La Rosa, S.M. Oliveri and A. Risitano	155
Dynamic Behaviour of an SMC Bumper for Industrial Truck G. Curti and F. Curà	163
Characterization of an SMC Material for Bumper Applications F. Aymerich and P. Priolo	179
Numerical Simulation of SMC Component Moulding P. Lazzarin, G. Molina, L. Molinari and M. Quaresimin	191
Influence of Different Curing Agents on Fracture Behaviour and Mechanical Properties in Carboresin Composite Plates M. Marchetti, G. Maura, F. Polimeni, G. Rinaldi and D. Vahedi	203
Previsioning Model for the Fatigue Behaviour of Structures in Composite Materials M. Marchetti and A. Renzi	217
Prediction of Fatigue Strength of Composite Laminates by Means of Neural Networks F. Aymerich and M. Serra	231
Birefringent Behaviour of GRP Laminates M.S. Found, E.A. Patterson and E.F. Brading	243
Strain Measurement in Composite Materials Using Embedded Strain Gauges S. Aloisi, U. Galietti and C. Pappalettere	251
Characterisation of an X-Ray System with GaAs Detector for Composite Material Analysis F. Bertolino, G. Gatto, F. Ginesu and P. Randaccio	261
Structural Optimization of a Composite Underbody for Racing Cars M. Avalle	273

Modeling Texture Effects on Tensile Properties of Woven Fabric Composite Laminates G. Medri, G. Nicoletto and E. Riva	283
Numerical and Experimental Analyses of the Structural Behaviour of Braided Composite Materials E. D'Amato, F. Durante and G. Fedele	293
