

Table of Contents

Delamination Criticality in Slender Compression-Loaded Composite Panels L.E. Asp and K. Nilsson	3
Fatigue Crack Growth Behaviour of an Alumina-Particle-Reinforced Aluminium Alloy G. Nicoletto, A. Pirondi and P. Scolari	17
A Rate-Dependent Model for Predicting Damage Accumulation in Viscoelastic Laminated Composites D.H. Allen	25
Fatigue Dissipation and Failure in Unidirectional and Angle-Ply Glass Fibre/Carbon Fibre Hybrid Laminates E. Kristofer Gamstedt, O. Redon and P. Brøndsted	35
Near-Threshold Fatigue Crack Propagation Analysis of a MMC Material by Means of Different Test Procedures M. Guagliano and E. Riva	49
Static and Fatigue Behaviour of Sandwich Composite Panels Joined by Blind Fasteners D. Biccari, K. Genovese and C. Pappalettere	61
Multiaxial Fatigue Behaviour of Composite Laminates M. Quaresimin and L. Susmel	71
Fatigue Characterization of Pultruded Composite Materials L. Vergani	81
Through-Thickness Tensile and Compressive Properties of Stitched CFRP Composites A.S. Nielsen, J. Ibsen and O.T. Thomsen	97
Effects of Manufacturing Techniques on the Mechanical Properties of Composite Laminates V. Carvelli, D. De Angelis, C. Poggi and R. Puoti	109
Static Notch Sensitivity of GFRP Composites M. Quaresimin and E. Guglielmino	121
Evaluation of Laminated Structures for Sports Mouthguards D. Patrick, R. Van Noort and M.S. Found	133
Composite Driving End Structures for Rail Applications S. Ingleton, M.S. Found and A.M. Robinson	145
On the Optimization of Single Lap Metal/Plastics Adhesive Joints G. Belingardi, L. Goglio and A. Tarditi	161
The Influence of Thermohumidity on Compression After-Impact Properties of Fibre Reinforced Epoxy Laminates J.F. Harper and R.A. Aziz	173
Modelling the Impact Behaviour of Thin CERP Panels M.S. Found, I.C. Howard and A.P. Paran	187
Prediction of the Dynamic Response of Impacted Composite Laminates F. Aymerich, P.F. Orrù and P. Priolo	197
FEM Simulation of the Mechanical Behaviour of Sandwich Materials for Aerospace Structures G. Allegri, U. Lecci, M. Marchetti and F. Poscente	209
Modeling of the Deformation Behavior of Polymer Composites at High Strain Rates and at Elevated Temperatures T. Vuoristo, V.T. Kuokkala and E. Keskinen	221
Probabilistic First-Ply Failure Analysis of a Symmetric-Equilibrate Laminate in Composite Material A. Zucchelli, G. Minak and F. Cesari	233
Stress-Strain Monitoring in Textile Composites by Means of Optical Fibers E. D'Amato	245
Physical Modelling of the Engineering Problems of Composites and Structures P.W.R. Beaumont and H. Sekine	255
Elastic and Creep Behaviour of Short-Fibre Composites with Weakened Interfaces J. Schjødt-Thomsen and R. Pyrz	267

The General 3D Hertzian Contact Problem for Anisotropic Materials M. Ciavarella, G. Demelio, M. Schino and J.J. Vlassak	281
An Elastic-Interface Model for Delamination Buckling in Laminated Plates S. Bennati and P.S. Valvo	293
Triple Junctions in Polycrystalline Silicon: A Numerical Study Based upon Atomistic Simulations L. Colombo and F. Cleri	307
Study of Adhesion in a Reinforced Particle Composite C.A. Sciammarella, B. Trentadue and F.M. Sciammarella	315
The Effect of Ply Lay-Up upon the Thermoelastic Response of Laminated Composites P.R. Cunningham, J.M. Dulieu-Barton, A.G. Dutton and R.A. Shenoi	325
Application of Digital Speckle Correlation for Strain Measurement in Composites G.B. Broggiato, G.M. Newaz and D. Amodio	337
Residual Stress Analysis in Graphite/PEEK Composite Laminates R. Ambu and F. Ginesu	347
Heterogeneous Deformation by Microscopic Moiré Interferometry G. Nicoletto and A. Malfatto	355
Determination of Elastic Constants of Anisotropic Plates by Phase Stepping Speckle Interferometry L. Bruno, F. Furgiuele, L. Pagnotta and A. Poggialini	363
Impact Damage Detection in Composite Structures Using Active Acousto-Ultrasonic Sensors W.J. Staszewski and M.S. Found	375
Impact Damage Detection in Composite Structures Using Passive Acousto-Ultrasonic Sensors W.J. Staszewski, C. Biemans, C. Boller and G.R. Tomlinson	389
Weight Percent of Glass Fibres in SMC Components Determined by Means of Experimental Techniques F. Curà, G. Curti and R. Sesana	401
