

# Table of Contents

## Preface, Committees

## Chapter 1: Shock Processing and Shock Production of Materials

<b>Experimental Study on the Shock Consolidation of Ti+Si Powders</b> N.F. Cui, P.W. Chen and C.X. Xu	3
<b>Wire Mesh/Ceramic Particle Reinforced Aluminium Based Composite Using Explosive Cladding</b> L.G. Robin, K. Raghukandan and S. Saravanan	9
<b>Metallurgical and Mechanical Properties of Wire-Mesh Reinforced Dissimilar Explosive Cladding</b> S. Saravanan and K. Raghukandan	14
<b>Comparison between Simple Seam Welding and Adjacent Parallel Seam Welding by Magnetic Pulse Sheet-Welding Method</b> T. Aizawa and K. Matsuzawa	19
<b>Impact Joining of Similar and Dissimilar Metal Plates at their Edges</b> M. Yamashita, Y. Tokushige and M. Nikawa	25
<b>Detonation Synthesis of <math>TiO_2/Na_2Ti_6O_{13}</math> Powders</b> T.J. Zhao, H. Yan, X.J. Li and Y. Wang	31
<b>Effect of Post Weld Heat Treatment on Al 5052-SS 316 Explosive Cladding with Copper Interlayer</b> E. Elango, S. Saravanan and K. Raghukandan	35
<b>Production of Wire Mesh Reinforced Aluminium Composites through Explosive Compaction</b> K. Raghukandan and S. Saravanan	41
<b>Production of AlN Nanopowders by Electrical Wire Explosion in Liquid Nitrogen</b> X. Gao, P.W. Chen, X.G. Wang, C.X. Xu, Q.Z. Song and H. Yin	46
<b>Experimental Study on the Explosive Welding of Thin Al/Cu Composite Plates</b> Y. Yuan, P.W. Chen, E.F. An and J.R. Feng	52
<b>Advanced Manufacturing from Macro- to Nanoscale: Impact and Shock Loading</b> A.G. Mamalis	58

## Chapter 2: Numerical Simulation of Explosion and Impact

<b>Investigation on Microvoid Nucleation of High Temperature Nickel Based Superalloy under Thermal Shock</b> X.C. Shang, Y.T. Xu and P.F. Wu	67
<b>Numerical Simulation of Electrical Discharge Characteristics Induced by Underwater Wire Explosion</b> R. Henzan, Y. Higa, O. Higa, K. Shimojima and S. Itoh	72
<b>Blast Wave Mitigation from the Straight Tube by Using Water Part II - Numerical Simulation</b> Y. Sugiyama, T. Homae, K. Wakabayashi, T. Matsumura and Y. Nakayama	78
<b>A Basic Study on Shock Resistant Design for Explosion Pit</b> T. Yamamoto, M. Nishi, M. Katayama and K. Hokamoto	84
<b>Basic Research on Explosive Forming of Magnesium Alloy Plate</b> M. Nishi, H. Sakaguchi, H. Iyama, L.Q. Ruan and M. Fujita	90
<b>Numerical Analysis of Behavior on Opposing Unsteady Supersonic Jets in a Flow Field with Shields</b> T. Kinoshita, H. Fukuoka and I. Umez	96
<b>Projectile Impact Testing Aluminum Corrugated Core Composite Sandwiches Using Aluminum Corrugated Projectiles: Experimental and Numerical Investigation</b> K. Odaci, C. Kılıçaslan, A. Taşdemirci, A.G. Mamalis and M. Güden	102

## **Chapter 3: Dynamic Behavior of Materials at High Strain Rates**

<b>Bending Collapse Behavior of Tubular Structure under Impact</b>	
M. Yamashita, N. Kunieda and M. Nikawa	111
<b>Influence of Axial Length on Axially Compressed Aluminum Polygonal Tube</b>	
K. Yokoya, M. Miyazaki and Y. Tojo	117
<b>Effect of Graphene Nanoplatelets Content on Dynamic Mechanical Property of GNPs/Ti Composites</b>	
X.N. Mu, H.N. Cai, H.M. Zhang, Q.B. Fan and Y. Wu	123
<b>Damage Characteristics of Dynamically Induced Incipient Spall in Ultrapure Aluminum</b>	
H. Peng, X.Y. Pei, J.D. Yu, M.L. Qi, J.S. Bai, H.L. He and P. Li	130
<b>Study of Interaction between Unsteady Supersonic Jet and Vortex Rings Discharged from Elliptical Cell</b>	
K. Kitazono, H. Fukuoka, N. Kuniyoshi, M. Yaga, E. Ueno, N. Fukuda and T. Takiya	137
<b>Observation of Supersonic Jet Using Small Volume High-Pressure Shock Tube</b>	
R. Takemura, H. Fukuoka, S. Enoki, S. Nakamura and K. Hiro	143
<b>Blast Wave Mitigation from the Straight Tube by Using Water Part I - Small Scale Experiment</b>	
T. Homae, Y. Sugiyama, K. Wakabayashi, T. Matsumura and Y. Nakayama	149
<b>Effect of Heat Treatment on the Microstructure and Dynamic Behavior of Ti-10V-2Fe-3Al Alloy</b>	
A.J. Liu, L. Wang and H.X. Dai	155
<b>Dynamic Response Analysis of Mortar Block under Blast Loading Using Digital Image Correlation</b>	
T. Saburi, T. Takahashi, S. Kubota and Y. Ogata	161

## **Chapter 4: Processing of Food by Shock Waves**

<b>Using Underwater Shockwaves for the Development of Processing Devices for Plant Materials</b>	
A. Yasuda, O. Higa, E. Kuraya, Y. Higa, K. Shimojima, K. Hokamoto and S. Itoh	169
<b>Experimental Verification of the Softening of the Pork Using Underwater Shock Waves Generated by Wire Electrical Discharges</b>	
K. Shimojima, O. Higa, Y. Higa, A. Takemoto, H. Iyama, A. Yasuda, T. Watanabe, S. Tanaka, R. Fukami, M. Vesenjak, Z. Ren and S. Itoh	176
