

Table of Contents

Preface

Chapter 1: Construction Materials, Structures and Technologies

Effect of Electron Beam and Heat Treatment on the Reactivity of Aggregates and Mineral Additives towards Alkali-Silica Reaction in Portland Cement Compositions A.B. Brykov, S.V. Mjakin and M.M. Sychov	3
The Effectiveness of Using Bitumen Emulsion in the Technology of Dedusting Roads with a Transitional Type of Coating O.N. Burenina, M.E. Savvinova and A.V. Andreeva	9
The Effect of the Level of Pouring the Mixture on the Basic Properties of Aerated Concrete with Variotropic Properties P.P. Deryabin, M.A. Raschupkina and I.L. Chulkova	15
Disperse-Reinforced Polystyrene Concrete Modified by Silica-Containing Additive A.A. Pykin, N.P. Lukutsova and S.N. Golovin	20
Technological Formation Features of the Lightweight Concrete Cellular Structure S.M. Aksenova, M.A. Raschupkina, P.P. Deryabin and Y.S. Danilina	26
Influence of Crumb Rubber Vulcanization Degree on the Quality of Asphalt Concrete Used in Road Construction A.V. Karpenko, D.V. Karpenko and D.B. Solovev	31
Research of Possibility of Application of Hot Tool Flare Welding for Polyethylene Gas Pipelines Construction A.I. Gerasimov and E.V. Danzanova	36
Study of the Thermophysical Characteristics of Steel Fiber Reinforced Concrete I.L. Shubin, V.A. Dorf, R.O. Krasnovskij, D.E. Kapustin and P.S. Sulygova	41
Dome House Insulation Systems E. Shokodko, E.Y. Bobrova, E.A. Zinoveva and A.D. Zhukov	48
Prospects for the Development of Building Ceramics Based on Clays and Nickel Slags of Orenburg Region V.A. Gurieva, A.A. Ilyina and A.V. Doroshin	54
Influence of Class of Concrete on Oscillations of Thin-Wall Cylindrical Reinforced Concrete Shells K.Q. Qahorov, O.E. Sysoev and E.O. Sysoev	59
Insulation Systems of Frameless Buildings E.Y. Bobrova, K.A. Ter-Zakaryan, A.D. Zhukov, A.A. Medvedev and A.I. Poserenin	66
Cullet-Filled Concrete V.N. Shishkanova, M.V. Ivanko and A.Y. Kozlov	73
Study of the Transport Loads Influence on the Nature of Belite Sludge Hardening in Pavement A.A. Lytkin	79
Phase Transformations in Cement Matrix at Low Temperatures E. Potapova, I. Korchunov and S. Perepelitsyna	86
Influence of Ultrafine Addition Obtained from Pre-Hydrated Cement on Cement Paste S.V. Samchenko and E.S. Egorov	92
Mechanism of Interaction between Concrete Cement Matrix and Mineral Additive Particles S.M. Rakhimbaev, A.A. Logvinenko and M.I. Logvinenko	98
Improving the Efficiency of Slag Portland Cement by Reducing Shrinkage Deformations S.V. Samchenko and D.A. Zorin	104
Grip of Mature and Fresh Concrete with Heat Treatment in Winter Conditions V.V. Molodin, S.E. Sarafyan and D.S. Kasyanova	111
Reinforcement of Ice Crossings with Geosynthetic Materials M.O. Karpushko, I.L. Bartolomei, E.N. Karpushko, A.V. Zhidelev and A.A. Trapeznikov	118
High-Quality Cement-Mineral Suspensions Using Stone Crushing Waste E.A. Belyakova, R. Moskvina and V.S. Yurova	124

Studies of Heat Insulation Concrete M. Elesin, N.A. Mashkin, E.A. Bartenjeva, V. Larichkin and M. Nikolaeva	130
Experience of Using Self-Compacting Concrete Mixes in Transport Construction I. Pulyaev and S. Pulyaev	135
Modified Composition for Fixing Sandy Soils I.V. Kozlova, A.E. Besspalov and O.V. Zemskova	143
Experimental Investigation on Flexural Behavior of Cold Formed Beams with Lightweight Concrete A.Y.S. Ghareb, O.I. Alhashimi, A.V. Shevchenko and N.M. Shoja	149
Fine-Grained Concrete with Nanodispersed Silica Additive N.P. Lukutsova, E.G. Borovik and D.A. Pehenko	156
Improvement of Wood-Cement Composition Properties with Microsilica Additive E.Y. Gornostaeva, N.P. Lukutsova and D.I. Dryazgov	162
Effective Highly Dispersed Additive for Concretes on the Basis of Natural Mineral Raw Materials E.G. Karpikov, N.P. Lukutsova and E.A. Bondarenko	168
Effect of Colloidal Silicon Dioxide on the Properties of Building Ceramics S.V. Vasyunina, N.P. Lukutsova and V.O. Momot	173
The Method of Estimating the Durability of Structural Materials from the Effects of Cyclic Loads E.A. Kuznetsov, O.E. Sysoev and P.H. Kyaw	178
How Formula and Technology Affect the Generation and Improvement in the Porous Structure of Foam Concrete S.M. Aksenova	184
Work Head for 3D Printing of Insulated Walls from One-Stage Polystyrene Concrete V.V. Molodin, E.V. Vasenkov and P.L. Timin	194
Features of the Formation of Properties of Stone-Mastic Asphalt Concrete Based on a Warm Polymer Modified Binder S.Y. Shekhovtsova	200
Winter Concreting of Wall Fragments on Previously Constructed Floor Slabs with Unconventional Methods of Concrete Heat Treatment G.G. Turantaev, A.E. Mestnikov and V.I. Fedorov	206
Processing Methods Used to Create High-Quality Porous Structure of Aerated Concrete L.A. Suleymanova, A.S. Kolomatsky and M.V. Marushko	212
Non-Autoclaved Aerated Concrete Porosity and Factors Affecting it L.A. Suleymanova, I.A. Pogorelova and K.A. Kara	218
The Study of Cement Concrete with Improved Properties Based on the Use of Activated Silica Fume E. Tkach, V. Soloviev, R. Temirkanov and D.B. Solovev	228
Influence of Carbon Nanomodifier on the Structure and Properties of the Modified Gypsum Binder L.Y. Matveeva, D.G. Letenko and M.V. Mokrova	233
Improving the Bitumen Quality through the Comprehensive Polymer-Based Modification V.V. Yadykina, S.N. Navolokina and A.M. Gridchin	238
Warm Asphalt Mixes Based on Polymer-Bitumen Binders V.V. Yadykina and M.V. Chichigin	243
Influence of Thermally Processed Zeolite on Properties of Composite Gypsum Binder A.D. Egorova, Z.V. Emelianova and M.N. Diyakonova	248
Ceramic Composition Material with Mullite Crystals Obtained from the Clayey Raw Material of Yakutia M.P. Lebedev, V.N. Tagrov and E.S. Lukin	253
Analysis of the Structure of Cellulose Fibers Using the Imagej Program and Fibercement Properties on their Basis A.E. Mestnikov and V.I. Fedorov	259
Firing of Cellular Ceramics from Granulated Foam-Glass O.A. Fomina and A.Y. Stolboushkin	265
Processes of the Foaming Mixture' Components Interaction during the Foam Glass Synthesis B.M. Goltsman, L.A. Yatsenko and E.A. Yatsenko	271

Activation of Diatomaceous Earth Low-Temperature Plasma M. Bruyako and L. Grigoryeva	277
--	-----

Chapter 2: Polymers and Composites

Study of the Impact Viscosity of the Epoxy Composite Modified Technical Carbon S.V. Vasiliev, Y.Y. Fedorov and A.V. Savvina	285
Study of the Destructive Properties of Biodegradable Wood-Filled Composite Material N.R. Galyavetdinov, G.A. Talipova and R.R. Safin	290
Technology of Production of Diamond-Abrasive Composites with Metal Matrix S.P. Yakovleva, S.N. Makharova and M.I. Vasilyeva	296
The Study of Heat and Mass-Exchange Processes during the Drying of Granulate of Hydrophobic Polymers Y.A. Geller, Y.V. Shatskikh and I.S. Antanenkova	301
Mechanical Properties of Superconcentrates Based on Ethylene-Vinyl Acetate Copolymer and Microcrystalline Cellulose P.G. Shelenkov, P.V. Pantyukhov and A.A. Popov	306
Synthesis of Poly(Ethylene 2,5-Furanoate): I. Kinetics of 2,5-Dimethyl Ester of Furandicarboxylic Acid Transesterification T.A. Molodtsova, E.V. Boldyreva and V.A. Klushin	311
Studies of Microwave Electromagnetic Field Influence on Adhesion Strength of the “Matrix-Fiber” Contact Zone on the Example of the Elementary Cell of a Certified Polymeric Composite Material I.V. Zlobina, N.V. Bekrenev and G. Muldasheva	317
Studying the Effect of Temperature, Static Load and Nanodimensional Defects on the Mechanical Properties of Polyethylene Film at Uniaxial Extension A.I. Kupchishin, M.N. Niyazov and B.G. Taipova	325
Destruction of Epoxy-Based Composite Materials under the Influence of Impact Load V.A. Gafarova and I.R. Kuzeev	331
Formation of the Structure and Properties of Epoxy-Based Composite Materials V.A. Gafarova, J.V. Bazrova and L.Z. Teltsova	336
Improving the Energy Efficiency of Autoclave Equipment by Optimizing the Technology of Manufacturing Parts from Polymer Composite Materials I.V. Zaychenko, V.V. Bazheryanu and S.A. Gordin	341
Local Repair of Parts from Polymer Composite Material with the Use of Portable Hot Bonder Control Systems V.V. Bazheryanu, I.V. Zaychenko and E.P. Zharikova	347
Investigation of the Effect of Mechanical Activation of Powder Components on the Properties of Polyimide Composites N.I. Cherkashina, O.V. Kuprieva and N.V. Kashibadze	353
About Communication of the Comparative Properties Plasticized PVC Compositions and Quantities of Additives Used A.R. Maskova, G.U. Yarmuhametova and Y.N. Savicheva	359
Thermophysical Properties of Syntactic Foams Based on Polymethylphenylsiloxane Resin and Hollow Glass Microspheres E.E. Mastalygina, K. Smirnov and V.Y. Chukhlanov	364
Microstructure of Filled Biocomposites Based on Polyolefin Blends E.E. Mastalygina, A. Anpilova and A.A. Popov	369
Structure and Properties of Fibrous Materials Based on Poly(-3-Hydroxybutyrate) A.A. Olkhov, P.M. Tyubaeva and A.L. Iordansky	375
High-Performance Polyesters: Synthesis, Characterization, and Properties of Poly(P-Oxybenzoate) A.I. Akhmetshina, L.K. Karimova and R.Y. Deberdeev	380
High-Performance Liquid Crystalline Polyesters: Influence of the Synthetic Pathway on the Thermal Properties T.R. Deberdeev, L.K. Karimova and A.I. Akhmetshina	386

Analysis of Technological Capabilities and Peculiarities of Fuse Welding of Products Made of Metal-Matrix Composite Materials Based on Aluminum Alloy Produced by Internal Oxidation	
E.A. Chernyshov, N.A. Kulinchenko and P.L. Zhilin	392
Development of Multifunctional Composites Based on Ultrahigh Molecular Weight Polyethylene	
O.V. Gogoleva, P.N. Petrova and E.S. Kolesova	398
The Effect of Radiation Sterilization on the Stress-Strain Properties of Non-Woven Materials -Based on Polypropylene	
E.R. Rakhmatullina, M.S. Lisanevich, R.Y. Galimzyanova and Y.N. Khakimullin	403
Investigation of the Climatic Stability of Sealing Rubbers Used in the Technology of the North	
M.D. Sokolova, A.F. Fedorova and M.L. Davydova	409
Regulation of Mechanical Properties of Advanced PCM Products with the Aid of Catalysts	
I.V. Zaychenko, V.V. Bazheryanu and A.G. Kim	415
Volume Distribution of Reinforce Particles in a Metal Matrix	
A.A. Fedotov, M.N. Safonova and A.S. Syromiatnikova	421
Microwave Electromagnetic Field Influence on the Stability of Reinforced Carbon Plastics with Built-In Lightning Protective Coating during Dynamic Loads Action	
I.V. Zlobina and N.V. Bekrenev	427
Influence of Shungite Modifier on Technological Properties of Polymeric Glue Based on Urea-Formaldehyde Resin	
N.G. Panov, S.B. Vasilyev and G.N. Kolesnikov	434
Treated Textile Electrostatic Properties Study	
I.V. Cherunova, S.S. Tashpulatov and S.V. Kurenova	439

Chapter 3: Steel and Alloys, Materials Processing Technologies

Friction Stir Welding in the Aircraft Production	
D.N. Kuritsyn, M.V. Siluyanov and V.V. Kuritsyna	447
The Study of Heat Exchange Process between High-Temperature Liquid Metal Coolant and Liquid Steel during Crystallization	
E. Neshporenko, S. Kartavtsev and S. Matveev	453
Research of 3D Printing Modes of Feedstock for Metal Injection Molding	
A.Y. Korotchenko, D.E. Khilkov, M.V. Tverskoy and A.A. Khilkova	461
The Effect of Yttrium on the Distributions of Elements in Different Phase Structures and Properties of Chromium White Cast Iron	
M.A. Ermakov, R. Khosen and V.V. Vorobev	467
Optimization of Technological Parameters of the Process for Obtaining a Strip by the Combined Method of Metal Casting and Deformation	
V.V. Chernomas, S.N. Khimukhin and T.S. Khimukhina	473
Impact Toughness of Low Alloy Steels Subjected to Heat Treatment and Equal-Channel Angular Pressing at Low Temperature	
A.M. Ivanov and E.S. Alexandrova	480
Investigation of the Structure and Distribution of Chemical Elements between the Phases of Hard Alloys of the $\text{Cr}_3\text{C}_2\text{-Ti}$ System, Obtained at Various Modes of Explosive Compaction	
V.O. Kharlamov, A.V. Krokhaev, S.V. Kuz'min and V.I. Lysak	487
Kinetics of Phase Transformations in $\text{FeAl}(\text{Cr},\text{Si}) / \text{Fe}_3\text{Al}(\text{Cr},\text{Si}) / \text{Fe}(\text{Al},\text{Cr},\text{Si})$ Laminated Coating on the Cr15Al5 Alloy	
V.G. Shmorgun, A.I. Bogdanov, V.P. Kulevich and V.O. Kharlamov	493
Development of Combined Machining Modes, Investigation of Mechanical Properties and Structure of Deformed Semi-Finished Products from Alloy 01417	
S. Sidelnikov, D. Voroshilov, M. Motkov, M. Voroshilova and V. Bespalov	498
Study of the Stress-Strain State of the Process of Drawing Wire from an Alloy of Palladium with Nickel	
S. Sidelnikov, V. Lopatin, M. Dobrovenko, E. Lopatina and R. Sokolov	504
The Effect of Tungsten Nanoparticles on the Hardness of Sintered Sn-Cu-Co-W Alloys	
E.G. Sokolov, A.V. Ozolin and S.A. Arefieva	511

The Regularities of Copper-Aluminum System Polymetallic Samples Manufacturing by the Additive Electron-Beam Technology K.N. Kalashnikov, K.S. Osipovich and T.A. Kalashnikova	517
Welding of Cold-Resistant Micro-Alloed Steels 10HSNDA and 15HSNDA in the Atmosphere of Carbon Monoxide (II) A.V. Ishkov, E.A. Ivanayskiy and V.I. Ivanov	523
Development of Ultra-Fluid Compositions of Feedstock for Metal Injection Molding A.Y. Korotchenko, D.E. Khilkov, M.V. Tverskoy and A.A. Khilkova	529
AlpHaset Process and Molding Sands in Russia V.A. Kukartsev, V.V. Kukartsev and V.S. Tynchenko	534
The Effect of Cathode Surface Treatment on the Properties of Electrodeposited Copper Powders Y.M. Berezhnoi, V.M. Lipkin, D.N. Kuznetsov and O.N. Romanova	540
Density and Surface Tension of Fe-Cu Melts V.V. Vyukhin, O.A. Chikova and K.Y. Shmakova	545
Analysis of Fractional Composition and Specific Surface of Silicone Dioxide Nanopowders O.N. Kravtsova, G.G. Vinokurov and N.F. Struchkov	551
Influence of the Salt Bath Deoxidation Degree on Change in Hard Alloys Properties during Heat Treatment S.I. Bogodukhov, E.S. Kozik and E.B. Shvidenko	556
The Assessment of the Possibility of Smelting a Cast Alloy for the Manufacture of Components and Parts of Arctic Technical Equipment Using Ore from the "Verkhnyaya Amga" Ore Occurrence A.D. Danilov, K.V. Stepanova and P.P. Petrov	561

Chapter 4: Tribology, Coatings and Surface Engineering

Estimation of Rheological Properties of Ash Silicate Paints V. Loganina and Y.B. Mazhitov	569
Providing of Operational Properties for Gas-Turbine Engine Parts and Assemblies Using Electrospark Deposition L.V. Denisov, A.G. Boytsov and M.V. Siluyanov	574
Protective Coating Based on Organic Silicon Polymer of Ladder Structure Nanostructured with Alkoxysilane V.Y. Chukhlanov, O.G. Selivanov and N.V. Chukhlanova	580
Possibility Justification of Application of the Mecanochemical Method during Preparation of the Metal Structures' Surfaces under Repair and Reconstruction V.E. Absimetov, E.V. Saltanova and D.B. Solovet	585
Laboratory Study of Tribological Characteristics of Innovative Lubricant Coolants S.M. Gaidar, A.V. Pydrin, M.Y. Karelina, M.S. Gaidar and A.V. Sukhodolya	590
Chemically Resistant Glass-Enamel Coating for the Protection of Steel Pipelines L.V. Klimova, A.V. Ryabova and V.V. Kerimova	598
Intumescent Type Fire Retardant Epoxy Coating L. Pestereva, N. Shakirov and O.G. Shakirova	605
Structural and Mechanical Aspects of Creating Coatings Based on Biopolymers E.I. Titov, A.Y. Sokolov and E.V. Litvinova	610
Rhenium as a Perspective Anodic Material in Materialogy of Surface at Electric Spark of Alloying V.I. Ivanov, L.A. Konevtsov and V.F. Aulov	615
Application of Complex Concentrate of Rare-Earth Elements for Obtaining Electrometallic Coatings N.F. Struchkov, G.G. Vinokurov and A.K. Kychkin	621
Elemental Distribution of Gas-Thermal Coatings with W and Ta Modifiers D.I. Lebedev	627
Heat-Resistant Sitall Coatings for High-Temperature Corrosion Protection of Nichrome Alloys E.A. Lazareva	633

Improving the Characteristics of Wear-Resistant Coatings Obtained by HDTV-Boration, their Modification by Intermetallic Compounds of Fe-Al and Ni-Al Systems V.V. Ivanaysky, N.T. Krivochurov and V.F. Aulov	640
Processing the Working Parts of Tools Used in Construction Industry Using High Energy Methods S.I. Bogodukhov, E.S. Kozik, E.B. Shvidenko and B.S. Garipov	647
Precipitation of Composite Wear-Resistant Nickel Ectrodeposits with Nanoparticles L.A. Degtyar, I.Y. Zhukova and V.I. Mishurov	652
The Impact Evaluation of Factors on the Adhesion of Modified Polytetrafluoroethylene Films in a Glow Discharge Non-Thermal Plasma M.A. Mokeev, L.A. Urkhanova, A.N. Khagleev and D.B. Solovev	658
Development of Technology of Robotized Laser Welding of Thin Wall Products from Heat-Resistant Alloys S.E. Krylova, V.A. Zavyalov and M.I. Goltapin	663
Structural-Phase State of the Interphase Boundary at Thermal Diffusion Metallization of Diamond Grains by Cr and Ti P.P. Sharin, M.P. Akimova and S.P. Yakovleva	670
Structural-Phase State of the Interphase Boundary at Thermal Diffusion Metallization of Diamond Grains by Fe, Ni and Co P.P. Sharin, M.P. Akimova and S.P. Yakovleva	676
Additive Influence of Carbon and Carbides of Vanadium and Chrome in Anodic Tungsten-Cobalt Materials on their Erosive Fragility and Formation of the Alloyed Layer at ESA of Steels 35 S.V. Nikolenko, L.A. Konevtsov and P.G. Chigrin	683
Application of Nickel Tablets in Hot-Dip Galvanizing for Silicon and Phosphorus Steel Reactivity Control O.S. Bondareva, A.M. Turovsky and Y.M. Turovsky	689
The Study of the Destruction of Pipelines, Subject to Stress Corrosion Cracking O.A. Nasibullina and R.G. Rizvanov	695
Improving the Efficiency of Protection of the Forest Fire Machine against Forest Fires with the Help of Composite Materials A. Ustinov and E. Pitukhin	700
Regularities of Changes in the Mechanical Characteristics and Electrical Properties of the Reaction Furnaces Coils Material during Operation E.A. Naumkin and J.N. Shermatov	706
Engineering Method for Assessing the Residual Life of Machines' Complex Metal Structures Based on Crack Resistance S.B. Budrin, Y.N. Gorchakov, V.V. Ovsyannikov and N.S. Pogotovkina	712
Research on Anticorrosive Effects of Larch Bark Extract with Addition of Collagen I.E. Kuzmina and A.I. Fedorova	718
The Influence of Physicochemical and Structural Properties of Polymetallorganosiloxanes on their Tribotechnical Characteristics N. Shapkin, L.B. Leontiev, I.G. Khal'chenko and V.N. Makarov	724
Polymeric Tribotechnical Composites on the Basis of Polytetrafluoroethylene and Complex Fillers T.A. Isakova and P.N. Petrova	733
Effects of Complex Fillers on the Mechanical and Tribological Properties of Polytetrafluoroethylene Composites A.P. Vasilev, T.S. Struchkova and A.A. Okhlopkova	739
Development of Antifriction Materials Based on Polytetrafluoroethylene with Carbon Fibers and Tungsten Disulfide A.P. Vasilev, T.S. Struchkova and A.G. Alekseev	745
Correlation of Barreling Effect with Boundary Friction Coefficient during Upsetting of Various Materials Workpieces under Processing Conditions V.V. Kukhar, E.S. Klimov, S.M. Chernenko and E.Y. Balalayeva	751

Chapter 5: Functional Materials

Spark Plasma Sintering of SiC Ceramics Based on Natural Renewable Raw Materials A. Zavjalov, N. Shapkin and E.K. Papynov	759
Obtaining Biologically Active Polypropylene Fibrous Materials S. Bordunov, O. Galtseva and I. Plotnikova	764
Prospects for Using Carbon Nanotubes in Precision Instrument Engineering A. Golikov, V. Pankratov and M. Barulina	770
Modifying the Metal Oxide Filler with a Silicon-Organic Oligomer in a Solution of an Organic Solvent R.N. Yastrebinsky, A.A. Karnauhov and A.V. Yastrebinskaya	775
Assessment of Applicability of the MPF-4 Magnesium Powder for Manufacturing Parts Using 3D Printing Technologies Y.N. Kulchin, A.I. Nikitin, P.A. Nikiforov, D.S. Pivovarov and D.S. Yatsko	780
Dry Adhesive Friction Process Regularities during Frictional Contact of Heterogeneous “Copper-Aluminum” System Materials T.A. Kalashnikova, A. Chumaevskii and A. Gusarova	785
Research of Physical and Chemical Properties of Powder Cellulose from Various Type of Raw Materials K.S. Momzyakova, T.R. Deberdeev, Z.T. Valishina, R.Y. Deberdeev, A.V. Ibragimov and A.V. Alexandrov	791
Composite Materials Based on Magnesium and Calcium Phosphate Compounds A.B. Podgorbunsky, O.O. Shichalin and S.V. Gnedenkov	796
Evaporation Rate Management Using Substrates with Graphene Nanoflakes Coating A. Dmitriev, N.F. Ivlev and P.G. Makarov	802
Preparation of Tungsten Based Metal-Ceramic Alloys by the Plasma Chemical Synthesis from the Mineral Concentrate Mined in the Far Eastern Region E.N. Kuzmichev, S.V. Nikolenko and P.G. Chigrin	809
New Energy-Consuming Carbon Materials Derived from Hydrolytic Lignin Y.M. Nikolenko, A.K. Tsvetnikov, A.Y. Ustinov, A. Sokolov and A.M. Ziatdinov	814

Chapter 6: Computational Procedures, Measurements, Modelling and Simulation in Materials Science

On the Theory of Determining the Transport Characteristics of Gas Mixtures I.V. Anisimova and A.V. Ignat'ev	823
Calculation of Residual Deformations of Granulated Materials from Exposure to Repeated Loads A.S. Aleksandrov, T.V. Semenova and N.P. Aleksandrova	828
Foam Concrete and Composite Fittings Cohesion Parameters: Experimental Result and Numerical Simulation K.S. Kotova and G.S. Slavcheva	836
Simulation of Nonlinear Pyroelectric Response of Ferroelectrics near Phase Transition: Fractional Differential Approach L. Moroz and A. Maslovskaya	843
Modeling of the Process of Deformation of Inhomogeneous Material in the Closed Die V.V. Chernomas, S.B. Maryin and P.W. Aung	849
Application of Experiment Planning Methods in Researching of Reinforced Concrete Constructions Corrosion Process A.A. Kuznetsov, A.S. Bryukhova and N.V. Volkova	857
Criteria of Mora-Coulomb with Three Parameters of Material A.S. Aleksandrov, G.V. Dolgih and A.L. Kalinin	863
A Mathematical Model of the Field of the Strain Tensor in Terms of Deformation of the Flat Shell Structures A.L. Grigorieva, Y.Y. Grigoriev, A.I. Khromov and E.P. Zharikova	870
Computer Modelling when Selecting the Activated Mineral Powders Compositions V.D. Galdina and N.S. Galdin	876
Modeling of the Rheological and Thermophysical Properties of Food Materials when Frying in a Deep Fryer I.A. Gaysin, A.D. Samigullin and I.H. Israfilov	883

The Effect of the Size of the Sample on Results of Indentation Tests Y. Astapov, M. Sokolova and D. Khristich	889
Mathematical Models Analysis of Combined Processing Methods of Parts K.K. Taysaev and L.G. Petrova	901
Modern Techniques for Automated Acquiring and Processing Data of Diffraction Electron Microscopy for Nano-Materials and Single-Crystals V. Sydorets, O. Berdnikova, Y. Polovetskyi, Y. Titkov and A. Bernatskyi	907
Experimental Evaluation of Thermal Protection Properties of Volume Textile Materials I.V. Cherunova, A.A. Kovaleva and E.V. Nazarenko	916
Development of a Mathematical Model of the Interrelation between the Technological Parameters of the Synthesis and Properties of Foamed Glass Materials L.A. Yatsenko, E.A. Yatsenko and B.M. Goltsman	922
On the Connection of Cascade-Probability Function on the Formation of Primary-Knocked on Atoms for Ions Taking into Account Energy Losses with a Boltzman Equation N.A. Voronova and A.I. Kupchishin	929
Dynamics of Plane Waves in a Semi-Bounded Electro-Magneto-Elastic Medium M.O. Levi	934
Modelling of Ultrasonic Concentrators for Processing of Volume Nanostructured Materials K.R. Sapozhnik, O.V. Bashkov, M.D. Borisenko and D.B. Solovev	940
Approximate Engineering Model of Ferritic-Pearlitic Steel Constructions Resource Evaluation K.A. Molokov, V.V. Novikov, N.P. Vasilchenko and G.P. Turmov	947
Physico-Chemical Foundations and Practical Significance of Unification of Metallic and Nonmetallic Substances and Materials within a Unified Model of Chemical Bond R.O. Sirotkin and O.S. Sirotkin	952
Investigation of Welded Joints Made of Construction Steel by the Barkhausen Noise Method E. Nikolaeva and A. Nikolaev	957
Damage Assessment of Specimens Made of Steel 09G2S Exposed to Low-Cycle Fatigue with the Help of Acoustic Emission Monitoring Method A.S. Valiev, G.R. Khalikova and I.R. Kuzeev	964
Control of Optical Homogeneity of Lithium Niobate Crystals with Admixtures of Rare-Earth Elements Gd, Er by Laser Conoscopy O. Pikoul, N.V. Sidorov and M.N. Palatnikov	971
Laser Conoscopy of Optically Active Crystals O. Pikoul	976
The Use of X-Ray Diffraction Peaks Profile Analysis to Define the Structural Condition of Elastically Stressed 09G2S Steel V.P. Gulyaev, P.P. Petrov and K.V. Stepanova	981
Strain-Energy Criteria for the Destruction of Ideal Rigid-Plastic Bodies O.V. Kozlova and A.I. Khromov	987
Changes in the Characteristics of the Profiles of X-Ray Diffraction Lines of Structural Steels in the Elastic Stress Field V.P. Gulyaev, P.P. Petrov and K.V. Stepanova	992
Theoretical Preconditions for Determination of the Elastic Modulus of Clt-Panels B.V. Labudin, A.V. Karelskiy and D.M. Lyapin	998
Evaluation Methods of Cohesive Strength of Coatings V.E. Arkhipov and M.S. Pugachev	1006
Investigation of Thermal Fields at Phase Boundaries in Powder Mixtures that are Subject to Melting and Chemical Transformation S.F. Dmitriev, V.N. Malikov and A.V. Ishkov	1011
A New Method for Studying the Anisotropy of HDPE Sleeved Films N.F. Efremov, A.V. Kanaiceva and A.A. Kadilova	1016
Optimization Problems Arising from the Design of Pipes Made of Composite Materials T. Bobyleva and A. Shamaev	1024
Failure Analysis of Polymer Blinder Using Acoustic Emission Method H. Khon, O.V. Bashkov, A.A. Bryansky and D.B. Solovev	1030
