

Table of Contents

Preface

Chapter 1: Special and Functional Materials

Thermotropic Copolyesters Based on Polyethylene Terephthalate and 4-Hydroxybenzoic Acid for High Modulus Fibers T.R. Deberdeev, A.I. Akhmetshina and S.V. Grishin	3
Influence of Microwave on the Structure and Properties of Nanomodified Fluoroplastic D.O. Zavrashin, A.A. Chuprikova and J.S. Povetkina	10
Synthesis of 5-Hydroxymethylfurfural-Acetone Resins E.A. Shabliy, V. Klushin and N.V. Smirnova	17
Surface Carboxylation of a Boron-Carbon BC₅ Nanotube in the Development of Sensor Devices I.V. Zaporotskova, E.S. Dryuchkov and D.E. Vilkeeva	23
Special Features of Formation of the High Damping State in Bimetallic Structural Materials Obtained by Explosion Welding I.B. Chudakov, N.L. Fedotova and I.V. Saikov	28
Features of Glass Plate Hardening by the Ion Exchange Method D. Petrov, L. Bragina and L. Demydchuk	34
Development of Titanium Implants with a Rough Calcium Phosphate Surface to Control the Morphofunctional State of Stem Cells K.A. Yurova, I.A. Khlusov and L.S. Litvinova	40
Investigation of the Thermal State of Parts to Justify the Possibility of Additive Forming of Nitinol Blanks <i>In Situ</i> A.L. Goncharov, I.S. Chulkov and E.K. Titarev	46
Electrochemical Sensors Based on Noble Metal Nanoparticles in Voltammetry D. Perevezentseva and E.V. Gorchakov	54
Investigation of BaSO₄-KPO₃-Na₂B₄O₇ Low-Melting Glass System as a Basis for Synthesis of a Glass-Solder Material A.V. Stolbovsky and V. Vyatchina	60
Visualization of the Effect of an Impurity on the Optical Homogeneity of Lithium Niobate Doped with Boron Cations O. Pikoul, N.V. Sidorov and M.N. Palatnikov	65

Chapter 2: Polymers and Composites

Obtaining of Composite Alloys Based on Nickel Aluminides with Rare Metals S.N. Khimukhin, E.D. Kim and R. Khosen	73
Research Investigation of Deformation Characteristics of Thin Polymer Films at Different Doses of Electron Irradiation M.N. Niyazov, A.I. Kupchishin and B.G. Taipova	79
The Mechanism of Getting New Composite Polymer Materials with Improved Hardness Properties L.S. Elbakyan, I.V. Zaporotskova and D.E. Vilkeeva	85
Thermal Decomposition Characteristics of Poly((4-Vinylbenzyl) Trimethylammonium Bis (Trifluoromethanesulfonimide)) Studied by Pyrolysis-<i>GS</i> / <i>MS</i> A.A. Atlaskin, A.A. Andronova and O.V. Kazarina	91
Towards a Strategy for the Synthesis of Polymeric Ionic Liquids with a Bulk Anion in Various Reaction Media M.E. Atlaskina, A.E. Mochalova and V.M. Vorotyntsev	98
Development of Forming Method of Deployable Boom from Thermoplastic Polymer Composite A.M. Iuvshin, Y.S. Andreev and S.D. Tretyakov	105

Effect of Wood Filler Concentration on Physical and Mechanical Properties of PLA-Based Composites	
G.A. Sabirova, R.R. Safin and N.R. Galyavetdinov	110
Investigation of the Staging of Damage Accumulation in Polymer Composite Materials during Bending and Tensile Tests	
A.A. Bryansky, O.V. Bashkov, D.P. Malysheva and D.B. Solovev	116
Oxidative Degradation of Polyethylene Filled with Nanosized Crushed Shells of Sea Oysters	
Z. Akhmetshina, E.E. Mastalygina and P. Pantyukhov	123
Evaluation of the Influence of the Conditions of Catalytic Continuous Steam Explosive Activation of Wood on the Physical and Operational Properties of Wooded Composite Materials Based on Activated Fibers	
D.B. Prosvirnikov, R.R. Safin and R.R. Kozlov	129
Nanomodified Epoxy Materials with Improved Operating Characteristics	
D.O. Zavrazhin, T.A. Lutovinova and C.V. Zavrazhina	138
Physicochemical WPC Modification Techniques	
A.E. Shkuro, A.V. Artyomov and A.V. Savinovskikh	144
Testing of Carbon Nanotubes and their Influence on the Physical and Mechanical Characteristics of Polyester Resin	
S.G. Shuklin and I.M. Velm	151

Chapter 3: Materials and Technologies of Chemical Production

Fundamentally New Composite Materials of Fast Reactors Made on the Basis of Nanotechnology	
V.S. Okunev	159
Redox Behavior of Chelate Complexes Based on 8-Oxyquinoline Promising in OLED Display Technology	
A.A. Arutyunyants and N.A. Salamova	165
Purification of Zinc Oxide from Chlorides Using Microwave Radiation	
A.G. Ryazanov, A.V. Senin and D.M. Galimov	172
Direct Synthesis of Titanium Nanoparticles by Induction Flow Levitation Technique	
A.N. Markov, A.V. Vorotyntsev and A.A. Andronova	178
Polychelates Based on Magnesium, Aluminum, Iron, Zirconium, and Vanadyl Acetylacetonates - Synthesis, Structure and Properties	
N. Shapkin, E.A. Tokar, S.V. Gardionov, V.V. Korochentsev, V.G. Kuryavyi, E.K. Papynov and I.G. Khalchenko	184
Optimization of the Choice of Technological Methods for Nanomodification of Natural Aluminosilicates through the Parameters of the Element-Oxygen Chemical Bond	
O.S. Sirotkin and A.E. Buntin	201

Chapter 4: Properties and Processing Technologies of Steel and Alloys

Structure and Properties of Additive Hard Magnetic Alloys 25Cr15Co and Alnico	
A.S. Zhukov, V.N. Klimov and A.N. Skvortsova	209
Microstructure-Impact Toughness Relationships in Quenched and Tempered Low Carbon Low Alloy Steels	
M. Kantor, K. Vorkachev and K. Solntsev	216
Modern Technologies of Metal Processing in the Socio-Cultural Context	
T.V. Diaghileva, R.A. Sokolov, V.F. Novikov and M.V. Deneko	222
Mechanical and Corrosion Properties of VT6 Titanium Alloy after Irradiation with Helium and Aluminum Ions	
V.V. Ovchinnikov, S.V. Yakutina and N.V. Uchevatkina	229
Investigation of the Effect of Implantation of Aluminum Alloys by Gas and Metal Ions on the Structure and Phase Composition of the Implanted Layer	
V.V. Ovchinnikov, I.A. Kurbatova and E.V. Luk'yanenko	235
Research of Properties of Austenitic Steels	
A.A. Peregodov, S.A. Vologzhanina and A.F. Igolkin	242

Elasticity Modulus and Hardness of Bearing Steel after Laser Treatment V. Morozov, V.G. Gusev and D. Gavrilov	247
Amorphous Alloys Atomic Structure Investigation by Means of Electron Microscopy and Diffraction E.V. Pustovalov, A.N. Fedorets and V.V. Tkachev	254
Development of Combined Rolling-Extruding Modes for Producing Longish Deformed Semi-Finished Products from Aluminum Alloy with Low Cerium Content D. Voroshilov, S. Sidelnikov, V. Bespalov, A. Kovaleva and D. Nazarenko	262
Influence of Structure and Dispersivity of Copper on its Melting Features A.V. Korshunov	269
Features of Structural-Phase Transformations during Oxidation of Metals with Bulk Submicrocrystalline Structure and Fine Metal Powders A.V. Korshunov	275
Channel Angular Pressing of the Annular Metal Billet A.M. Ivanov and S.S. Vaschenko	281
Grinding of Titanium Alloys V.A. Nosenko, S.V. Nosenko and V.E. Puzirkova	287
Features of the Structure of the Material Formed from AK4-1 Powder Using Laser Energy Y.N. Kulchin, P.A. Nikiforov, D.S. Pivovarov, D.S. Yatsko and V.A. Timchenko	294
Experimental and Analytical Assessment of the Power Parameters of the Combined Rolling-Extruding Process Using a Round Billet from Alloy 01417 Obtained Using an Electromagnetic Mold S. Sidelnikov, D. Voroshilov, M. Motkov, V. Bespalov and M. Voroshilova	300

Chapter 5: Tribology, Coatings and Surface Engineering

Features of the Formation of Structure and Geometry during Direct Laser Deposition of 321L Stainless Steel on Complex Groove Using the LENS Method V. Bobyr, P. Kuznetsov, A. Zhukov and I. Shakirov	309
Study of the Impact of Protective Process Agents with Carbon Nanopowder Additives on Chip Forming Processes E.A. Petrovsky, K.A. Bashmur and V.S. Tynchenko	319
Kinetic Characteristics of Electrodeposition of Ni-Co-Al₂O₃ Composite Coating I.Y. Zhukova, L.A. Degtyar and I.G. Bobrikova	325
Chemical Processes in PEO Coatings Formation and Destruction on Titanium Alloy VT-1 M.V. Chizhevskaya, V.A. Mironova, A.V. Girm and E.V. Khodenkova	332
Improving the Tribological Properties of Ceramic Dies V. Alisin	339
Heat Treatment of the Surface of the ChS57 Alloy with Powerful Nanosecond Ultraviolet Laser Pulses Y.V. Khomich, S.I. Mikolutskiy, V.E. Rogalin, I.A. Kaplunov and A.I. Ivanova	345
Metallographic and Eddy Current Study of Boride Strengthening Coatings V.N. Malikov and A.V. Ishkov	351
The Effect of Surface Conditions on Corrosion Resistance of a Cobalt-Chromium Alloy A.A. Orlov, S.M. Sarychev and A.A. Orlov	358
On the Issue of Laser Selective Removal of Paint Coating from a Sample of Metal Plating of Aircraft Gliders M.V. Polonik and A.A. Mantsybor	364
Structural-Mechanical Properties of Polyurethane Surface after Carbon Ion Subplantation I.A. Morozov and A.S. Kamenetskikh	370
The Effect Covering on the Change in the Properties of Hard Alloys S.I. Bogodukhov, E.S. Kozik, E.V. Svidenko and V.S. Garipov	376
Impact of Nanodispersed Diamond Graphite Additive on Metal Cutting Temperature E.A. Petrovsky, K.A. Bashmur and V.S. Tynchenko	383
Precast Textured Tool and the Construction of an Intensive Grinding Process Based on It V.G. Gusev	389

Chapter 6: Materials and Technologies in Construction

Studies of the Influence of Graphite on the Physical Mechanical and Thermal Properties of Polyurethane Foams for Construction Applications L.N. Shafigullin, N.V. Romanova and G.R. Shafigullina	399
On the Durability of Concrete under the Action of Ultra-Low (up to -196 °C) Technological Temperatures V.N. Yarmakovskiy and D. Kadiev	406
Cement Building Materials with Powdered Optical Discs as a Filler V. Ezerskiy, N.V. Kuznetsova and A.D. Seleznev	415
Effective Fine Concrete Modified with a Highly Dispersed Wollastonite-Based Additive E.G. Karpikov, N.P. Lukutsova, T.P. Blagoder and E.A. Bondarenko	422
Modified Gypsum Binder for Plastering Systems M.O. Asamatdinov, I.I. Popov, S.P. Chernukhin and A.D. Zhukov	428
Thermal Changes in the Mass, Size and Density of Steel Fiber Concrete after Calefaction D.V. Zaitsev	434
Use of Bacterial Carbonatogenesis to Increase the Strength of Cement Solutions with the Help of Microorganisms V.A. Beregovoi, A.E. Kapustin and A.M. Beregovoi	440
Building Systems Based on Foamed Modified Polymers I.V. Bessonov, L.K. Bogomolova, A.D. Zhukov and E.A. Zinoveva	446
The Influence of Ferrous Metallurgy Waste in the Aktobe Region on the Frost Resistance of Ceramic Bricks Based on Low-Melting Clay A.K. Kairakbaev, E.S. Abdrakhimova and V.Z. Abdrakhimov	453
Assessment of the Impact of High Temperature on the Strength of Reinforced Concrete Structures during Operation V.I. Rimshin, V.I. Telichenko, A.L. Krishan, P.S. Truntov and G.S. Bykov	460
Investigation of the Rate of Vacuum-Conductive Drying of Wood-Particle Panels Based on Polyvinyl Alcohol R.R. Safin, L.V. Lyamina, A.V. Safina and S.R. Mukhametzyanov	466
Effect of Cement Paste Preparation Procedure and Cement Stone Age on its Phase Composition I.N. Maksimova, N.I. Makridin, A.V. Dergunova and Y.V. Babenkova	473
Unused Plant Waste and Thermal Insulation Composition Boards on their Basis T.N. Vachnina, I.V. Susoeva, A.A. Titunin and S.V. Tsybakin	480
Sulfide Technology Based on Sulfur Waste Product of Coke Production A.A. Yusupova, L.R. Baraeva and A.A. Bobrishev	487
Filled Heat Efficient Ceramics A.D. Zhukov, I.I. Popov, I.V. Bessonov and S.P. Chernukhin	493
Theoretical Assessment of the Prospects for the Use of Raw Materials in Ceramic Production V.A. Gurieva, A.A. Ilyina and A.V. Doroshin	499
Polymer-Bitumen Binders Compositions Selection by Using the Experimental Planning Method V.D. Galdina and N.S. Galdin	504
The Use of Waste from the Processing of Copper-Zinc Concentrates of the East Kazakhstan Region in the Production of Non-Fired Refractory Composites A.K. Kairakbaev, E.S. Abdrakhimova and V.Z. Abdrakhimov	511
Analysis of the Quality of Quartz-Feldspar Sand as a Component of a Composite Binder A.L. Popov, V.V. Strokova and A.E. Mestnikov	516
Influence of Fillers on Silicate Compositions Porization O.A. Miryuk	521
Research of Physical and Mechanical Properties of Fly Ash Ceramics with SiO₂ and Al₂O₃ Nanoparticles as Functional Addition V.A. Kalneus, D.A. Nemushchenko, V.V. Larichkin and A.A. Briutov	528
Extreme Modelling of Concrete Optimal Composition and Content of the Components N.P. Lukutsova, A.A. Pykin, S.N. Golovin and P.A. Artamonov	536

Determination of the Chemical Composition of Corrosion Defects on the Inner Surfaces of Hollow Reinforced Concrete Structures	
A.S. Bryukhova, N.V. Volkova, A.A. Kuznetsov and A.Y. Kuzmenko	542

Chapter 7: Computational Procedures, Modelling and Numerical Simulation in Materials Science

System Analysis and Control of the Influence of a Mixed Type of Chemical Bond in Substances and Materials on their Structure and Properties	
O.S. Sirotkin, R.O. Sirotkin and M.Y. Perukhin	551
Modeling of the Process of Drying and Coalescing Nanodispersion Spreading	
D.M. Mordasov and M.D. Mordasov	557
Finite-Element Simulation of Steckel Mill Rolling	
O.H. Kurpe, V.V. Kukhar and E.S. Klimov	564
Methodology for Calculating Heat Loss in the Study of Friction Stir Welding	
V. Statsenko, A. Sukhorada and N. Mikhailova	575
Investigation of Surface-Functionalized CNT-Based Array for Detection of Acetone Vapors	
I.V. Zaporotskova, D.E. Vilkeeva and L.S. Elbakyan	581
Evaluation of Pozzolan Activity of Metakaolin Chemometric Method According to the UV-VIS-NIR Spectroscopy	
R.A. Platova, V.A. Rassulov and Y.T. Platov	586
Effect of Initial Conditions and Numerical Investigation of Instability Developed during Synthesis of TiC via Vortex Combustion at Moderate Temperatures. Model of Vortex Combustion	
A.A. Markov and I.A. Filimonov	591
Statistical Model of a Thin Film Formation	
E.L. Kuleshov, V.S. Plotnikov, E.V. Pustovalov and T.S. Ostachenova	597
Finding the Specific Surface Area of an Organomineral Sorbent Produced by Electroplasma Treatment of Coal Flotation Waste	
A.S. Kondratenko, S.L. Buyantuev and S.Y. Shishulkin	603
Generalized Susceptibility of Mixed Dislocation in Ferroelastics near Structural Phase Transition	
V.V. Dezhin	610

Chapter 8: Deformation and Fracture Mechanics of Materials in Mechanical Engineering

The Influence of Technological and Operational Factors on the Durability of the Shafts of Air-Cooler Unit Electric Motors	
A.O. Taube, I.A. Trishkina and E.I. Storozheva	619
Calculated Model of Endurance Limit Estimation Based on Structural-Strain Analysis of the Critical Condition of Ferrite-Perlite Steels with Macrocracks in Ship Structures	
K.A. Molokov, V.V. Novikov, G.P. Turmov and Y.R. Domashevskaya	627
Shock Loading of Heteromodular Elastic Materials under Plane-Strain Condition	
O.V. Dudko and A.A. Mantsybora	634
The Problem of Stretching a Hollow Cylinder	
O.V. Kozlova, S.A. Gordin and I.V. Zaychenko	640
Investigation of Low-Cycle Fatigue on Structural Carbon Steel	
O.A. Nasibullina, R.G. Rizvanov and E.S. Gaysin	646
Relieving of Residual Stresses in Metal Workpieces at High and Low Temperatures	
M.V. Polonik	651
Designing of Thin Composite Panels with the Post-Buckling Behavior Considering Rigid Support and Loading with Shear Flows	
O. Mitrofanov and O. Mazen	657

Chapter 9: Deformation and Fracture of Materials and Structure Elements in Construction

The Construction of the Diagrammatic Deformation Model for Calculating the Core Reinforced-Concrete Structures in Finite Increments under Joint Action of Load Increments and Variable by Cross Sections Low and Ultra Low Subzero Temperatures N.I. Karpenko, S.N. Karpenko, D.Z. Kadiev and G.A. Moiseenko	665
Seismic Resistance of Nonlinearly Deformable Large-Span Spatial Structures, Taking into Account Changing Dynamic Stiffness S.R. Razzakov	672
Deformation of Steel-Reinforced Concrete Round Thin Slabs Taking into Account the Compliance of the Support Contour K.S. Razzokov	680
Behavior of Polygonal Shells of Complex Geometry, Taking into Account the History of a High Level of Loading J.S. Razzokov	691
Dynamic Parameters of Prestressed Hanging Systems N.S. Razzokov and U.S. Akhmadiyrov	698
On the Influence of Interlayer Nonuniformity on Contact Characteristics during the Interaction of a Pipe and a Rigid Cylindrical Insert K.E. Kazakov	706
Strain-Stress Distribution of Structural Components from Foam Concrete for Monolithic Construction M.V. Novikov, E.M. Chernyshov and E.E. Prokshits	711
Study of Nonlinear Stress-Strain Diagram of Concrete Based on Local Raw Materials in Central Yakutia A. Skryabin	718
