

# Table of Contents

## Preface and Scientific Committee

## Chapter 1: Fatigue of Materials

### The Influence of the Ferrite and Pearlite Grain Size on the S-N Fatigue Characteristics of Steel

S. Kamiński, M. Szymaniec and T. Łagoda 3

### Experimental Investigation of Fatigue Damage Accumulation in En295 Steel

K. Gołoś 9

### Multiaxial Fatigue Life Assessment Method Based on the Mean Value of Modified Second Invariant of the Deviatoric Stress

Ł. Pejkowski and D. Skibicki 15

### Fatigue Characteristic of S355J2 Steel after Surface Frictional-Mechanical Treatment in Corrosive Environment

D. Kocańda, A. Górką, K. Grzelak, J. Torzewski, E. Łunarska, H. Nykyforchyn and V. Kyryliv 21

### Analysis of Strain Distribution in Notch Zone in Aluminium FSW Joints for Irregular Fatigue Loading Conditions

D. Boroński, R. Sołtysiak and Z. Lutowski 27

### Comparison of C45 Steel Fatigue Characteristics Carried out at Controlled Stress and Energy Parameter, Subjected to Fully Reversed Bending

E. Marcisz, D. Rozumek and Z. Marciniak 33

### Accumulation of Fatigue Damages for Block-Type Loads with Use of Material Memory Function

E. Böhm, M. Kurek and T. Łagoda 39

### Influence of Stresses below the Fatigue Limit on Fatigue Life

G. Szala 45

### Cumulative Energy of Fatigue Cracking under Variable Amplitude Loading on the Example of C45 Steel

B. Ligaj 51

### Fatigue Life of CrMoV Steel after Long Term Service

S. Mroziński, G. Golański and J. Ślania 57

### Accuracy of Analytical-Experimental Method for Determining the Fatigue Characteristics in a Limited Life Region

P. Strzelecki, J. Sempruch and K. Nowicki 63

### Formulation of a Direct Spectral Method for Counting of Cycles for Bi-Modal Stress History

M.S. Kozien and D. Smolarski 69

### Analysis of Size Effect in High-Cycle Fatigue for EN AW-6063

T. Tomaszewski and J. Sempruch 75

### Applicability of Empirical Formulae for the Fatigue Notch Factor to Estimate Riveted Lap Joint Fatigue Strength

T. Machniewicz, M. Skorupa, A. Skorupa and A. Korbel 81

### Thermo-Mechanical Fatigue of Thick-Walled Components of Power Devices

J. Okrajni and M. Twardawa 87

### Research on the Dependence between the Fatigue Life of X20CrMoV12.1 and P91 Steels under the Conditions of the Interactions of Thermo-Mechanical and Isothermal Low-Cycle Fatigue

A. Marek, J. Okrajni, G. Junak and M. Twardawa 93

### Structure and Mechanical Properties of 1.4539 Austenitic Steel Joints Made by TIG and Laser-Beam Welding

Z. Bogdanowicz, B. Nasiłowska, P. Jóźwik and D. Zasada 99

### Cast Steel Tests under Thermal Fatigue Conditions

A. Lipski and S. Mroziński 105

<b>Determination of Fatigue Life with the Use of Spectral Method on the Basis of Fatigue Strain Characteristics</b>	
M. Böhm and A. Niesłony	112
<b>Influence of Estimation Methods of Power Spectral Density Function on the Calculated Fatigue Life with Spectral Method</b>	
A. Niesłony, M. Böhm and A. Materac	118
<b>Analysis of the Fatigue Life of Sintered Porous 316L Steel with Different Density</b>	
A. Falkowska and A. Seweryn	124

## Chapter 2: Fracture Behaviour of Materials

<b>Crack Growth Path in Specimens with Rectangular Section under Bending with Torsion</b>	
S. Faszyńska, D. Rozumek and J. Lewandowski	133
<b>The Influence of In-Plane Constraint on Void Behavior in Front of a Crack in Plane Strain</b>	
J. Galkiewicz	139
<b>Method for Monitoring the Destruction Process of Materials Using a High-Speed Camera and a Catadioptric Stereo-Vision System</b>	
P. Garbacz, P. Czajka and B. Burski	145
<b>The Influence of Strain Conditions in Steel Samples on the Fatigue Crack Growth and Delay after Overload</b>	
K. Werner	151
<b>The Influence of the Out-of-Plane Constraint on Fracture Toughness of High Strength Steel at Low Temperatures</b>	
A. Neimitz, I. Dzioba, R. Pała and U. Janus	157
<b>Fracture Toughness of Hardox-400 Steel at the Ductile-to-Brittle Transition Temperature Range – The Influence of the In-Plane Constraint</b>	
A. Neimitz, T. Pala and I. Dzioba	167

## Chapter 3: Other Aspects of Material Strength

<b>The Usage of the Method of Fundamental Solution for Twisting Composite Rod as a Basis of the Local Analysis</b>	
P. Gorzelanczyk	175
<b>The Effect of the Detonation Velocity in Explosively Welded Steel-Zirconium Bimetal on the Residual Stresses Determined by the Hole-Drilling Method</b>	
A. Karolczuk, K. Kluger, M. Kowalski and M. Prażmowski	181
<b>The Influence of Modelling Material Zones on Strains and Stresses at Weld Toe Notch</b>	
K. Niklas and J. Kozak	187
<b>Experimental Study of Non-Uniform Distribution of Basic Mechanical Parameters in Steel-Titanium Bimetal</b>	
R. Sołtysiak, D. Boroński, A. Karolczuk and M. Kowalski	192
<b>Shear Strength Testing of Bonded Joints of Dental Materials</b>	
M. Wirwicki and T. Topoliński	198
<b>The Influence of Mesh Morphology on the Accuracy of FEM Analysis of Bar with a Ringed Notch under Tension</b>	
A. Cichański	204
<b>Performance of Bone Modelling Techniques in the Assessment of Bone Fragility</b>	
T. Topoliński, A. Cichański, A. Mazurkiewicz and K. Nowicki	210
<b>Investigation of Material Properties of Layered Al-Ti Material with the Use of Microspecimens</b>	
M. Kotyk and D. Boroński	216
<b>Experimental Validation of the Numerical Model of a Testing Platform Impact on a Road Mast</b>	
A. Cichański and M. Stopel	222
<b>The Development of an Experimental Research Plan Based on Local Strain-Life Method for an Air Handling Unit Subjected to Seismic Loads</b>	
M. Burak, D. Skibicki and M. Stopel	226

<b>Influence of Adhesive Layer on Mechanical Properties of Multilayer Pipes</b>	
M. Piotrowski and S. Mroziński	232
<b>Temperature Changes Induced by the Portevin-Le Châtelier (PLC) Effect during Tensile Test Based on the Example of CuZn37 Brass</b>	
A. Lipski and Z. Lis	238
<b>Modelling of Charpy Test Using the FEM Method in LS-DYNA Software</b>	
M. Stopel, M. Burak and D. Skibicki	244
<b>Application of Vibration for Energy and Data Transfer in Mechanical Constructions; Energy Harvesting</b>	
J. Kaleta, D. Lewandowski and P. Wiewiórski	249
<b>Analysis of the Local Phenomena during Riveting Process</b>	
J. Kaniowski, W. Wronicz and K. Pietrzak	255
<b>Evaluation of the Riveted Joint Load-Carrying Capacity Based on the Formed Rived Head Dimension</b>	
Z. Lis and A. Lipski	261
<b>Determination of Dynamic Characteristics of Welded Joints Made of Steel S460NL</b>	
W. Barnat and M. Kordys	267
<b>Numerical and Experimental Examination of Ballistic System Subjected to IED Explosion</b>	
P. Dybcio and W. Barnat	276
