Preface and Scientific Committee

Chapter 1: Fatigue of Materials

The Influence of the Ferrite and Pearlite Grain Size on the S-N Fatigue Characteristics of Steel S. Kamiński, M. Szymaniec and T. Łagoda	3
Experimental Investigation of Fatigue Damage Accumulation in En295 Steel K. Gołoś	9
Multiaxial Fatigue Life Assessment Method Based on the Mean Value of Modified Second Invariant of the Deviatoric Stress Ł. Pejkowski and D. Skibicki	15
Fatigue Characteristic of S355J2 Steel after Surface Frictional-Mechanical Treatment in Corrosive Environment D. Kocańda, A. Górka, K. Grzelak, J. Torzewski, E. Łunarska, H. Nykyforchyn and V. Kyrlyiv	21
Analysis of Strain Distribution in Notch Zone in Aluminium FSW Joints for Irregular Fatigue Loading Conditions D. Boroński, R. Sołtysiak and Z. Lutowski	27
Comparison of C45 Steel Fatigue Characteristics Carried out at Controlled Stress and Energy Parameter, Subjected to Fully Reversed Bending E. Marcisz, D. Rozumek and Z. Marciniak	33
Accumulation of Fatigue Damages for Block-Type Loads with Use of Material Memory Function E. Böhm, M. Kurek and T. Łagoda	39
Influence of Stresses below the Fatigue Limit on Fatigue Life G. Szala	45
Cumulative Energy of Fatigue Cracking under Variable Amplitude Loading on the Example of C45 Steel B. Ligaj	51
Fatigue Life of CrMoV Steel after Long Term Service S. Mroziński, G. Golański and J. Słania	57
Accuracy of Analytical-Experimental Method for Determining the Fatigue Characteristics in a Limited Life Region P. Strzelecki, J. Sempruch and K. Nowicki	63
Formulation of a Direct Spectral Method for Counting of Cycles for Bi-Modal Stress History M.S. Kozien and D. Smolarski	69
Analysis of Size Effect in High-Cycle Fatigue for EN AW-6063 T. Tomaszewski and J. Sempruch	75
Applicability of Empirical Formulae for the Fatigue Notch Factor to Estimate Riveted Lap Joint Fatigue Strength T. Machniewicz, M. Skorupa, A. Skorupa and A. Korbel	81
Thermo-Mechanical Fatigue of Thick-Walled Components of Power Devices J. Okrajni and M. Twardawa	87
Research on the Dependence between the Fatigue Life of X20CrMoV12.1 and P91 Steels under the Conditions of the Interactions of Thermo-Mechanical and Isothermal Low-Cycle Fatigue A. Marek, J. Okrajni, G. Junak and M. Twardawa	93
Structure and Mechanical Properties of 1.4539 Austenitic Steel Joints Made by TIG and Laser-Beam Welding Z. Bogdanowicz, B. Nasiłowska, P. Jóźwik and D. Zasada	99
Cast Steel Tests under Thermal Fatigue Conditions A. Lipski and S. Mroziński	105

Determination of Fatigue Life with the Use of Spectral Method on the Basis of Fatigue Strain Characteristics	
M. Böhm and A. Niesłony	112
Influence of Estimation Methods of Power Spectral Density Function on the Calculated Fatigue Life with Spectral Method	
A. Niesłony, M. Böhm and A. Materac	118
Analysis of the Fatigue Life of Sintered Porous 316L Steel with Different Density	
A. Falkowska and A. Seweryn	124

Chapter 2: Fracture Behaviour of Materials

Crack Growth Path in Specimens with Rectangular Section under Bending with Torsion	
S. Faszynka, D. Rozumek and J. Lewandowski	133
The Influence of In-Plane Constraint on Void Behavior in Front of a Crack in Plane Strain	
J. Galkiewicz	139
Method for Monitoring the Destruction Process of Materials Using a High-Speed Camera and a Catadioptric Stereo-Vision System	
P. Garbacz, P. Czajka and B. Burski	145
The Influence of Strain Conditions in Steel Samples on the Fatigue Crack Growth and Delay after Overload	
K. Werner	151
The Influence of the Out-of-Plane Constraint on Fracture Toughness of High Strength Steel at Low Temperatures	
A. Neimitz, I. Dzioba, R. Pała and U. Janus	157
Fracture Toughness of Hardox-400 Steel at the Ductile-to-Brittle Transition Temperature Range – The Influence of the In-Plane Constraint	
A. Neimitz, T. Pała and I. Dzioba	167

Chapter 3: Other Aspects of Material Strength

The Usage of the Method of Fundamental Solution for Twisting Composite Rod as a Basis of the Local Analysis	
P. Gorzelanczyk	175
The Effect of the Detonation Velocity in Explosively Welded Steel-Zirconium Bimetal on the Residual Stresses Determined by the Hole-Drilling Method	
A. Karolczuk, K. Kluger, M. Kowalski and M. Prażmowski	181
The Influence of Modelling Material Zones on Strains and Stresses at Weld Toe Notch	
K. Niklas and J. Kozak	187
Experimental Study of Non-Uniform Distribution of Basic Mechanical Parameters in Steel-Titanium Bimetal	
R. Sołtysiak, D. Boroński, A. Karolczuk and M. Kowalski	192
Shear Strength Testing of Bonded Joints of Dental Materials	
M. Wirwicki and T. Topoliński	198
The Influence of Mesh Morphology on the Accuracy of FEM Analysis of Bar with a Ringed Notch under Tension	
A. Cichański	204
Performance of Bone Modelling Techniques in the Assessment of Bone Fragility	
T. Topoliński, A. Cichański, A. Mazurkiewicz and K. Nowicki	210
Investigation of Material Properties of Layered Al-Ti Material with the Use of Microspecimens	
M. Kotyk and D. Boroński	216
Experimental Validation of the Numerical Model of a Testing Platform Impact on a Road Mast	
A. Cichański and M. Stopel	222
The Development of an Experimental Research Plan Based on Local Strain-Life Method for an Air Handling Unit Subjected to Seismic Loads	
M. Burak, D. Skibicki and M. Stopel	226

Influence of Adhesive Layer on Mechanical Properties of Multilayer Pipes M. Piotrowski and S. Mroziński	232
Temperature Changes Induced by the Portevin-Le Châtelier (PLC) Effect during Tensile Test Based on the Example of CuZn37 Brass A. Lipski and Z. Lis	238
Modelling of Charpy Test Using the FEM Method in LS-DYNA Software M. Stopel, M. Burak and D. Skibicki	244
Application of Vibration for Energy and Data Transfer in Mechanical Constructions; Energy Harvesting J. Kaleta, D. Lewandowski and P. Wiewiórski	249
Analysis of the Local Phenomena during Riveting Process J. Kaniowski, W. Wronicz and K. Pietrzak	255
Evaluation of the Riveted Joint Load-Carrying Capacity Based on the Formed Rived Head Dimension Z. Lis and A. Lipski	261
Determination of Dynamic Characteristics of Welded Joints Made of Steel S460NL W. Barnat and M. Kordys	267
Numerical and Experimental Examination of Ballistic System Subjected to IED Explosion P. Dybcio and W. Barnat	276
