## **Table of Contents**

## **Preface**

## **Chapter 1: Applied Materials and Processing Technologies**

| Application of New Important Materials V. Petrović, D. Gavanski, B. Savić and D. Mnerie  | 3                       |
|--|-------------------------|
| The Influence of Heat Treatment Applied to 100Cr6 Steel on Microstructure and Hardness S. Duma, D.M. Duma, I. Duma and D. Buzdugan   | 11                      |
| <b>Development of Magnetic Nanocomposites by Mechanical Grinding Technique</b> I. Ştefan, S.V. Savu, I. Baloin, A. Midan and N.A. Sîrbu  | 17                      |
| Influence of Temperature and Long-Term Operation on Metal Durability of Pipelines of Hydrotechnical Structures   |                         |
| S.Y. Maksimov, V. Makarenko, S. Tkachenko and O.S. Panchenko   | 25                      |
| Morphology Changes in the One-Step Synthesis of Cu <sub>2</sub> O/ CuO by Dealloying Amorphous Ribbons in Alkaline Solution M. Nicolaescu, V.A. Serban, C. Lazau, C. Bandas, C. Orha, M. Vajda and E.F. Binchiciu  | 35                      |
| CFD Simulation Study for Abrasive Waste Management Using Water Eductors for Abrasive Waterjet Cutting Collector Tanks  |                         |
| I.A. Perianu, M. Marin-Corciu, A.A. Geană, I. Duma and C. Baeră  | 43                      |
| Numerical Simulation of the Coating Process of some Metals by Electrical Discharge Deposition  |                         |
| D. Ghiculescu, A.C. Iuga and D. Mnerie   | 51                      |
| Examination of Three-Layered Clinch Joints P.Z. Kovács and S. Jónás  | 61                      |
| Experimental Study of Kerf Surface Finish of Abrasive Water-Jet Cutting of Kevlar Fiber-   | 01                      |
| Reinforced Polymers D.V. Gubencu, C. Opris, A. Han, C.O. Lazar and A. Perianu  | 69                      |
|  |                         |
| Chapter 2: Fire Safety Properties of Materials   |                         |
| Experimental Investigation of the Flammable Properties and Factors of Wooden Products Exposed to the Fire Impact   |                         |
| Experimental Investigation of the Flammable Properties and Factors of Wooden Products Exposed to the Fire Impact D. Dubinin, A. Lisniak, S. Shevchenko and Y. Gaponenko  | 83                      |
| Experimental Investigation of the Flammable Properties and Factors of Wooden Products Exposed to the Fire Impact D. Dubinin, A. Lisniak, S. Shevchenko and Y. Gaponenko Experimental Investigation of the Pyrolysis of Synthetic Materials Exposed to External and Internal Fires  | 83<br>95                |
| Experimental Investigation of the Flammable Properties and Factors of Wooden Products Exposed to the Fire Impact D. Dubinin, A. Lisniak, S. Shevchenko and Y. Gaponenko Experimental Investigation of the Pyrolysis of Synthetic Materials Exposed to External and   |                         |
| Experimental Investigation of the Flammable Properties and Factors of Wooden Products Exposed to the Fire Impact D. Dubinin, A. Lisniak, S. Shevchenko and Y. Gaponenko Experimental Investigation of the Pyrolysis of Synthetic Materials Exposed to External and Internal Fires D. Dubinin, I. Hrytsyna, S. Ragimov and N. Hrytsyna Modern Materials for Fire Protection of Reinforced Concrete Agro-Industrial Structures O. Petrova, T. Manushkina, N. Shevchuk and T. Kachanova Experimental Study of the Sleeve Material Mechanical Properties during the Sample Tensile Test  | 95<br>105               |
| Experimental Investigation of the Flammable Properties and Factors of Wooden Products Exposed to the Fire Impact D. Dubinin, A. Lisniak, S. Shevchenko and Y. Gaponenko Experimental Investigation of the Pyrolysis of Synthetic Materials Exposed to External and Internal Fires D. Dubinin, I. Hrytsyna, S. Ragimov and N. Hrytsyna Modern Materials for Fire Protection of Reinforced Concrete Agro-Industrial Structures O. Petrova, T. Manushkina, N. Shevchuk and T. Kachanova Experimental Study of the Sleeve Material Mechanical Properties during the Sample   | 95                      |
| Experimental Investigation of the Flammable Properties and Factors of Wooden Products Exposed to the Fire Impact D. Dubinin, A. Lisniak, S. Shevchenko and Y. Gaponenko Experimental Investigation of the Pyrolysis of Synthetic Materials Exposed to External and Internal Fires D. Dubinin, I. Hrytsyna, S. Ragimov and N. Hrytsyna Modern Materials for Fire Protection of Reinforced Concrete Agro-Industrial Structures O. Petrova, T. Manushkina, N. Shevchuk and T. Kachanova Experimental Study of the Sleeve Material Mechanical Properties during the Sample Tensile Test  | 95<br>105               |
| Experimental Investigation of the Flammable Properties and Factors of Wooden Products Exposed to the Fire Impact D. Dubinin, A. Lisniak, S. Shevchenko and Y. Gaponenko Experimental Investigation of the Pyrolysis of Synthetic Materials Exposed to External and Internal Fires D. Dubinin, I. Hrytsyna, S. Ragimov and N. Hrytsyna Modern Materials for Fire Protection of Reinforced Concrete Agro-Industrial Structures O. Petrova, T. Manushkina, N. Shevchuk and T. Kachanova Experimental Study of the Sleeve Material Mechanical Properties during the Sample Tensile Test S. Nazarenko, R. Kovalenko, A. Pobidash and A. Kalynovskiy  Chapter 3: Explosion Safety  Selection of Material and Thickness of the Protective Wall in the Conditions of a Hydrogen  | 95<br>105               |
| Experimental Investigation of the Flammable Properties and Factors of Wooden Products Exposed to the Fire Impact D. Dubinin, A. Lisniak, S. Shevchenko and Y. Gaponenko Experimental Investigation of the Pyrolysis of Synthetic Materials Exposed to External and Internal Fires D. Dubinin, I. Hrytsyna, S. Ragimov and N. Hrytsyna Modern Materials for Fire Protection of Reinforced Concrete Agro-Industrial Structures O. Petrova, T. Manushkina, N. Shevchuk and T. Kachanova Experimental Study of the Sleeve Material Mechanical Properties during the Sample Tensile Test S. Nazarenko, R. Kovalenko, A. Pobidash and A. Kalynovskiy  Chapter 3: Explosion Safety  | 95<br>105               |
| Experimental Investigation of the Flammable Properties and Factors of Wooden Products Exposed to the Fire Impact D. Dubinin, A. Lisniak, S. Shevchenko and Y. Gaponenko Experimental Investigation of the Pyrolysis of Synthetic Materials Exposed to External and Internal Fires D. Dubinin, I. Hrytsyna, S. Ragimov and N. Hrytsyna Modern Materials for Fire Protection of Reinforced Concrete Agro-Industrial Structures O. Petrova, T. Manushkina, N. Shevchuk and T. Kachanova Experimental Study of the Sleeve Material Mechanical Properties during the Sample Tensile Test S. Nazarenko, R. Kovalenko, A. Pobidash and A. Kalynovskiy  Chapter 3: Explosion Safety  Selection of Material and Thickness of the Protective Wall in the Conditions of a Hydrogen Explosion of Various Power   | 95<br>105<br>111        |
| Experimental Investigation of the Flammable Properties and Factors of Wooden Products Exposed to the Fire Impact D. Dubinin, A. Lisniak, S. Shevchenko and Y. Gaponenko Experimental Investigation of the Pyrolysis of Synthetic Materials Exposed to External and Internal Fires D. Dubinin, I. Hrytsyna, S. Ragimov and N. Hrytsyna Modern Materials for Fire Protection of Reinforced Concrete Agro-Industrial Structures O. Petrova, T. Manushkina, N. Shevchuk and T. Kachanova Experimental Study of the Sleeve Material Mechanical Properties during the Sample Tensile Test S. Nazarenko, R. Kovalenko, A. Pobidash and A. Kalynovskiy  Chapter 3: Explosion Safety  Selection of Material and Thickness of the Protective Wall in the Conditions of a Hydrogen Explosion of Various Power Y. Skob, Y. Dreval, A. Vasilchenko and R. Maiboroda Cluster Mechanism of the Explosive Processes Initiation in the Matter | 95<br>105<br>111<br>121 |

Regulations of the Influence of External Thermal Influences on Speed and Explosive Safe Combustion Modes of Pyrotechnic Nitrate-Metallized Mixtures with Metal Fluoride N. Koziar, O. Kyrychenko, K. Viktoriia and O. Diadiushenko
