

Table of Contents

Preface

Mass Transfer Modeling into Disk Spaces of Heat Turbomachines N. Lazarovski, P. Novakov and A. Yangyozov	1
Sensitivity Analysis of Temperature Field in Domain of Skin Tissue with Respect to Perturbations of Protective Clothing Parameters B. Mochnacki and E. Majchrzak	13
Molecular Dynamics Simulation of Lubricant Depletion Instability under Laser Heating B. Li and C.H. Wong	23
Diffusion Flame Stability of Low Calorific Fuels N.R. Caetano, T.Z. Stapasolla, F.B. Peng, P.S. Schneider, F.M. Pereira and H.A. Vielmo	29
Mine Gas Flow in the Porous Massif and CFD Tool P. Staša and O. Kodym	38
Experimental Study on Nanofluid Flow in a Porous Cylinder: Viscosity, Permeability and Inertial Factor A.F. Miguel	47
The Numerical Modeling of a Two Phase Flow under the Gravitation and Centrifuge Driving Forces J. Kačur, J. Minár and P. Kišon	58
Mixed Convection Flow of Viscoelastic Fluid over a Sphere under Convective Boundary Condition Embedded in Porous Medium A.R.M. Kasim, L.Y. Jiann, N.A. Rawi, A. Ali and S. Shafie	67
G-Jitter Induced MHD Mixed Convection Flow Past an Inclined Stretching Sheet N.A. Rawi, A.R.M. Kasim, M. Isa and S. Shafie	76
Experimental Study of Parameters Affecting the Temperature of an Absorption Tube of Parabolic Trough Collector A.K. Alfozan and S.N. Al-Awairdy	84
Analysis, Simulation and Application of SFIT in Microfluidic Systems B. Haddadi	92
Second Grade Fluid for Rotating MHD of an Unsteady Free Convection Flow in a Porous Medium Z. Ismail, I. Khan, A.Q. Mohamad and S. Shafie	100
Statistical Investigation of Maintenance Effects on Quality of Formed Glass Tube Dimensions A.E. Eladaw, H.T. Elmetwally and R.A. Ibrahim	108
Numerical Approach of the Main Physical Operational Principle of Several Wave Energy Converters: Oscillating Water Column, Overtopping and Submerged Plate M.d.N. Gomes, M.F. Espinel Lara, S.L.P. Iahnke, B. Neves Machado, M. Moraes Goulart, F. Medeiros Seibt, E.D. dos Santos, L.A. Isoldi and L.A.O. Rocha	115
Effective Permeability and Transfer Properties in Fractured Porous Media G. Rastiello, R. Bennacer, G. Nahas and M. Bogdan	172
Simulation of the Acoustic Loads Generated in the Intersection of a Main Steam Line and its Safety Relief Valve Branch of a BWR Plant under Extended Power Uprate Condition A. Ocampo-Ramirez, L.H. Hernández-Gómez, P. Ruiz-López, N. Moreno-Cuahquentzi, G. Urriolagoitia-Calderón, J.A. Beltrán-Fernández, G. Urriolagoitia-Sosa and D. Fernandez-Valdés	190
Modelling of Bubble Growth in Supersaturated Solution Using Computational Fluid Dynamics - Population Balance Model (CFD-PBM) Approach Z.H. Ban, K.K. Lau and M.S. Azmi	200
Sensitivity Analysis and Inverse Problems in Microscale Heat Transfer E. Majchrzak, J. Dziatkiewicz and Ł. Turchan	209
Prediction of Process-Induce Distortions and Residual Stresses of Ancomposite Suspension Blade R. Hein, T. Wille, K. Gabtni and J.P. Dias	224
