

Table of Contents

Preface, Introduction, List of Laboratories and Acknowledgement

CHAPTER 1 Influence of Water Vapor on High-Temperature Oxidation of Chromia-Forming Materials

| | |
|--|----|
| 1. Introduction | 2 |
| 2. Hydrogen-Induced Defects in Chromia | |
| 3. Electrical Conductivity of Scales Grown in H ₂ O | 5 |
| 4. Oxidation Kinetics in H ₂ O-Containing Atmospheres | 8 |
| 5. Chromium Volatilization | 10 |
| 6. Mechanical Properties of Scales Grown in H ₂ O | 15 |
| 7. Influence of Water Vapor in High Temperature Reactors | 16 |
| 8. Conclusions and Perspectives | 22 |

CHAPTER 2 Influence of Water Vapor on High-Temperature Oxidation of Alumina-Forming Materials

| | |
|--|----|
| 1. Introduction | 28 |
| 2. State of the Art | |
| 3. Effects of Water Vapor on FeCrAl Materials | 31 |
| 4. Effects of Water Vapor in Fe ₃ Al Materials | 34 |
| 5. Influence of Water Vapor in Aeronautical Engines (Coatings and Superalloys) | 37 |
| 6. Conclusions and Perspectives | 41 |

CHAPTER 3 Influence of Water Vapor on High-Temperature Oxidation of Steels and Cast Iron

| | |
|--|----|
| 1. Introduction | 48 |
| 2. Materials and Symbols | |
| 3. Effect of Water Vapor and Steam on P91 Oxidation | 49 |
| 4. Influence of Water Vapor on the Damage of Iron Oxide Scales Under | 61 |
| 5. Case Studies | 64 |

CHAPTER 4 Influence of Water Vapor on High-Temperature Oxidation of Titanium and Zirconium and their Alloys

| | |
|---|-----|
| 1. Introduction | 77 |
| 2. State of the Art | |
| 3. Influence of Water Vapor on Titanium Oxidation | 86 |
| 4. Effect of Steam Pressure on the Corrosion Resistance of Zirconium-Based Materials | 93 |
| 5. Effects of Wet-Air Radiolysis on Oxidized Zircaloy-4 | 110 |
| 6. Study of High-Temperature Oxidation of Zirconium in Water Vapor: Impact on Mechanical Properties | 112 |
| 7. Conclusion | 122 |

CHAPTER 5 Tools for Studying Water Vapor at High Temperatures

| | |
|---------------------------------------|-----|
| 1. Kinetics and Oxidation Mechanisms | 133 |
| 2. Characterization | 146 |
| 3. Modeling and Numerical Simulations | 175 |
