

Table of Contents

Preface

Effect of Rare Earth Ce on Casting Properties of Al-4.5Cu Alloy S. Xie, R.X. Yi, Z. Gao, X. Xia, C.G. Hu and X.Y. Guo	1
Simulation and Experimental Investigations of Fiber Diameter of Spunbonding Nonwovens by Means of the Air Jet Flow Field Model B. Zhao	5
Numerical Simulation of Accumulative Forming Bipolar Plates of Fuel Cell Z.Y. Xu, J.J. Wang, S. Ding, W. Wen, Y. Wang and B.F. Yin	10
Low Temperature Synthesis and Luminescent Properties of Ca_2SnO_4: Eu^3 Y.Z. Li and X.C. Zhou	14
Study on Load-Velocity Dynamic Property of Piston-Type Hydraulic Cylinder Based on SIMULINK X.S. Jin, S.Y. Ding, X.Z. Tang and Z.X. Hu	18
Study on Formability about ME20M Magnesium Alloy Sheet T.F. Zhang and S. Xie	23
Effect of Adding Er on Interfacial Reactions between Sn-3.0Ag-0.5Cu Solder and Cu Substrate H. Li and B. Lu	28
Ocular Aberrations Measurement Combined with Subjective Visual Compensation A.C. Xu, J.B. Chen, P.M. Zhang and J.J. Wu	33
Analysis of the Milling Distortion Due to Residual Stress Based on FEM Y.W. Liu	39
Research of Thermodynamics and Properties of Pb/WC-ZrO₂ Inert Electrodes Used in Zinc Electrodeposition R.D. Xu, J.L. Wang and J.F. Zhou	43
Study on Influence Scope of Shock Wave and Smoke Flow after Gas Explosion Z.M. Qu	48
Fabrication of Biodegradable Polymeric Micro-Analytical Devices Using a Laser Direct Writing Method W.W. Zhang, J.J. Zhu, W.K.C. Yung and S.S. Ang	53
Research on Fabricating Technology of Three Dimensional Integrated Braided Composite I Beam X.Y. Pei and J.L. Li	59
Simulated Annealing Genetic Algorithm and its Application in Mixed-Model Assembly Line Design Y. Jiang, X.F. Li, D.W. Zuo, G.M. Jiao and S.L. Xue	64
Construction of Marketing Management Information System of Travel Agency Based on Customer Relationship Management M. Wei	69
Research on the Application of Fuzzy Neural Network in the Automobile Reliability Y.Z. Men	77
A Multi Agent-Based Approach for Supply Chain Network R. Wang	82
Experiment Research of Cutter Edge and Cutting Parameters Influence on Machined Surface Roughness for High Speed Milling Hardened Steel W. Zhang, M.L. Zheng, M.M. Cheng and Q. Wan	86
Study on Laser Triangulation Measurement Principle of Three Dimensional Surface Roughness F.K. Cui, Z.B. Song, X.Q. Wang, F.S. Zhang and Y. Li	91
Estimation and Display of Triangular Mesh Curvature in Reverse Engineering H.C. Shen, J.J. Nie, W.S. Zong, J. Wang and B.G. Yang	95
The Optimization for Design of the Parameters of Spiral Baffle C.C. Lin and C.C. Kuo	103
Feature Analysis for Milling Force of Three-Edge End Mills C. Liu, G.Y. Tan, G.H. Li, J.S. Liang and D.R. Li	108

The Reliability Analysis of a Vacuum Forming Mold for IC Packing Bag W.S. Lin	114
A Non-Linear Flow Channel Implementation Method in Magnetic Gap Space of Magneto-Rheological Valve C.R. Tang and D.D. Liu	118
The Analysis of Key Influence Factors and Application Countermeasures on Quality of FDM Prototype Model Q.Q. Hou and C. Zhao	122
Calculation Method for the Profile Curves of Cycloidal Pump Y.F. Wu, C.L. Xia and Y.G. Shi	126
Effect of Alkaline Treatment of Wood Flour on Strength of Wood-Plastic Composites for Selective Laser Sintering K.Y. Jiang, Y.L. Guo, W.L. Zeng, Z.S. Xin and X. Liu	131
Application of Regression Analysis of Reliability Research in Off-Center Wearing on Well Tube and Rod of Oil Sucker P. Zhou, X.L. Liu, J. Yao and W. Lu	135
A Modified Wavelet Transform Profilometry C.Y. Liu, B. Zhou and X.M. Zhao	140
Simulation Study on Deep Hole Drilling Machine Hydraulic System Based on System Schematic Diagram H. Cao and W.H. Wu	144
Study on the Green Processing of Impeller M.J. Feng, C.T. Sun, X.F. Wang and H.J. Sun	148
Development of a Ring Permeability Test System Y.H. Du, X.M. Jiang and X.R. Li	153
The Variable Non-Linear Flow Channel Method and Device D.D. Liu and C.R. Tang	158
Research on Bearing Life Prediction Based on Three Parameters Weibull Distribution F.S. Zhang, T.T. Liu, J.T. Liu and F.K. Cui	162
The Study of Target Points Center Extracting and Matching in Calibration B. Zhou, D.P. Wang and J. Yang	167
The Prediction of Shot Peening's Surface Roughness with Premixed Water Jet Based on Neural Network R.H. Wang, C. Wang and X.M. Zhang	172
Research on Safety Protection Technology of Conventional Lathe CA6140 W.G. Du, H.Y. Zhong and Y.Y. Guo	176
Preparation and Properties of Waterborne Polyurethane with PDMS Side Chain R.F. Yue and S.C. Li	179
Investigation of the Drawing Process of a Square Rod from a Round Bar by Using 3-D Finite Element Analysis T.S. Yang and S.Y. Chang	184
Finite Element Numerical Simulation of EDM Surface Strengthening in Gas Medium of Stainless Steel 1Cr13 H.X. Wang, X. Zhang and W.S. Zhang	189
The Application and Development of Microbubble Column Flotation Technology in China Y.T. Wang	194
Effects of Isothermal Process Parameters on the Microstructure of Semisolid AlSi7Mg Alloy Produced by EPM W.T. Tian and G.A. Zhang	202
Study on Dynamic Fuzzy Classification of Design Proposal Based on Design Style Z. Gao and X.M. Ji	207
Analytical Study on Kinetic Characteristic of the Shell of Air-Powered Diving Pump G.X. Tang	212
Study on Variant Design and Improving Technology of Complex Mechanical Products Based on Knowledge Reuse W.D. Jin and H. Guo	216
Study of Modeling and Distortion Predicting for Multi-Frame Components J. Chen	221

The Development of Fault Diagnosis System of Reciprocating Compressor Based on LabVIEW	
J.F. Pei, S.X. Qi and W.Y. He	227
The Dynamic Finite Element Analysis of Table of VM1000 CNC Machining Center	
F.H. Yin	231
Integration Technology and Application Research on Management Information in Textile Industry	
Z.W. Chen, Z.F. Chen and Y. Xu	236
Flexible Wedge-Effect for Insect Flying and Fishtail-Effect for Fish Swimming	
X.Y. Jin, N. Lu, B. Zhang and J.P. Yan	242
Study on Cumulate Function of Cut-In Impacting Disrepair with Waved-Edge Milling Insert	
Z.G. Wang, H.G. Wei, Z.J. Li and D.S. Cai	247
Preparation of V-Doped Titanium-Bearing Blast Furnace Slag and its Antibacterial Activity to Mildew	
H. Wang, H. Yang and X.X. Xue	252
Study on Temperature Field of Different Substrate Shape in Preparing Diamond Film	
D.S. Li, D.W. Zuo, X.L. Zhou and X.Z. Hua	256
Research on Fatigue Behaviors of Nodular Cast Iron QT800 by Laser Shock Processing	
Z.P. Wang	260
Numerical Simulation of Thermal Deformation of High Speed and Exactitude Thermo Grip	
Z.G. Wang, L. Xu, H.G. Wei, L.D. Xu and H.H. Yu	264
FTA-BN Approach to Risk Assessment of Die Casting Die and Risk Mitigation Solution in 4Ps Development Framework	
J.J. Jiang, Y.Q. Zhou and M. Miao	269
Study on Atmospheric Corrosion Behaviour of Sicp/Al Composite	
X.L. Zhou, D.S. Li, A.H. Zou, X.Z. Hua, G.Z. Ye, Q.J. Chen, J.Y. Zhang and Y.J. Tang	275
Experiment Research on Grinding of Optical Glass with Indigenously Developed Monolayer Brazed Diamond Grinding Wheel	
B. Zhang, H.J. Xu, Y.C. Fu and H.H. Su	279
Open CNC System Based on Embedded Monitoring Unit	
T.Y. Wang, Z.F. Qiao, Q.J. Liu and M. Hu	284
Study on Adsorption Characteristics of Ni (II) by Palygorskite	
S.H. Lin, J.R. Li, Z. Wang and Z.Q. Jing	289
Experimental Study on Thermostatic Cutting Nickel-Base Superalloy GH4169	
Z.P. Hao, R.D. Han and D. Gao	293
Research on RFID and Vision-Based AGV Navigation	
Z.G. Man, W.H. Ye, P. Zhao, P.H. Lou and T.J. Wu	298
Study on Data Acquisition System for Cold Extrusion of Internal Threads Based on Virtual Instrument	
M. Zhang, X.F. Li, D.W. Zuo and H. Miao	303
The Influence of Surface Tension on Lubrication Film Thickness and Pressure	
J.P. Liu, X.Y. Zhang and Q.X. Jia	307
New Technology of Solospun and Prospect of its Application and Development	
B. Zhao	312
Study of Traction Properties of Three Space Lubricants Used for Rolling Bearing	
J.P. Liu, X.Y. Zhang and Q.X. Jia	316
