## Introduction

<b>Polyurethane Elastomers: The Ultimate in Multiphase Polymeric Materials</b> C. Hepburn	3
<b>Mechanical Properties and Stability of Recycled Post-Consumer Poly(Vinyl Chloride) Bottle Compounds</b> B. Maund, J.C. Arnold and D.H. Isaac	19
<b>Constrained Plastic Deformation of Pressure Sensitive Polymers</b> E.P. Busso and I. George	27
<b>Vibration in an Automobile Internal Rear-View Mirror</b> M. O'Grady, B. McCarthy, I. Donnellan, P.E. McHugh and P. Heslin	35
<b>Finite Element Modelling of a Tied Composite Sandwich Structure</b> C. McNamara and J.F. McNamara	43
<b>Structural Integrity after Impact of Composite Laminates</b> M. Buggy and J.F. McNamara	51
<b>Environmental Stress Cracking of Polycarbonate in Mixed Environments</b> J.E. Taylor and J.C. Arnold	59
<b>Some Comments Concerning the Chronic Problem of Reverse Temper Embrittlement (RTE) in Low Alloy Steels</b> J.H. Bulloch	69
<b>The Production of Cavities in Nickel Based Superalloys and Metal Matrix Composites Using Electro-Discharge Machining</b> J. Monaghan, D. Brazil and C. Sheridan	85
<b>The Heat Treatment of High Speed Steel Metal Matrix Composites</b> J.D. Bolton and A.J. Gant	93
<b>Interfacial Stress Singularities in a Bimaterial Wedge</b> M.R.H. Rudge and D.M. Tiernan	101
<b>Dynamical Behaviour of Thermoelastic Solids Undergoing Phase Transitions</b> J.C. Knowles	109
<b>The Effect of Inhomogeneity of Microstructure on Ductility in Superplasticity</b> A. Manonukul and F.P.E. Dunne	123
<b>An Analysis of the Stress Distribution within the Layers of Multi-Coated Forming and Cutting Tools</b> J. Monaghan and M.J. Murphy	131
<b>Structural and Defect Chemistry of Lithium Oxide Doped Nickel Oxide as Studied by Powder X-Ray Diffraction</b> A.F. Norman, C. Murphy and M.A. Morris	139
<b>Applications of High-Power Lasers in Electronic Assembly</b> A. Flanagan, A. Conneely and T.J. Glynn	147
<b>Temperature Dependence of the Luminescence from GaInAs/InP Quantum Wells</b> E. Daly, G. O'Connor, C. McDonagh, G.P. Morgan and T.J. Glynn	157
<b>The Effect of Coarse Second Phase Particles on the Creep Behaviour of Hard Metallic Alloys</b> H. Berns, C. Broeckmann and D. Weichert	163
<b>Finite Deformation FE Simulations in Metals Using Remeshing</b> T.L. O'Regan, D.F. Quinn and P.E. McHugh	171
<b>Elasticity and Flow Behaviour of a Metal Matrix Composite</b> D.W.A. Rees and M. Liddiard	179
<b>Thermomechanical Modelling of Aluminium Matrix Composites</b> N.P. O'Dowd, L.H. Lim and P.E. McHugh	187
<b>FE-Simulation of the Damage Evolution of Particle-Reinforced MMCs</b> A. Gross-Weege and D. Weichert	193
<b>Comparison of Simulated MMC's Elastic-Plastic Behaviour Using FEM and BEM with Experiment</b> D. Brazil and J. Monaghan	205

<b>Diamond Film Growth with Thermal Energy Hydrogen and Carbon Beams</b> C.M. Donnelly, A. Al-Jibouri, R.W. McCullough and J. Geddes	215
<b>The Use of Polycrystalline Diamond (PCD) for Machining Highly Abrasive Workpiece Materials</b> I.E. Clark	221
<b>Mechanisms that Control the Kinematics of Oxidation of Porous Bonded Silicon Carbide</b> G.E. Holling	233
<b>Glasses in the Rare-Earth Sialon System</b> L.M. Weldon, M.J. Pomeroy and S. Hampshire	241
<b>Emissions in the Heavy Clay Industry</b> J.E.M. Allan, J.E. Murphy and T.C. Kelly	249
<b>A Study of the Hot Salt Corrosion of Z = 3.0<math>\beta</math> Sialons</b> P. Byrne, R. Ramesh and M.J. Pomeroy	257
<b>Preparation and Properties of Ln-Si-Al-O-N Glasses</b> E. Nestor, R. Ramesh, P. Connolly and S. Hampshire	265
<b>Investigation of the Adhesion and Wear of Metal Containing Amorphous Carbon Coatings</b> A. O'Leary, D.P. Dowling, R. Rizza, K. Donnelly, P. Kola and T.C. Kelly	271
<b>Tensile Strength Measurement Using a Diametral Compression Test on a Small Disc with Central Hole</b> G.E. Holling and M. Lee	279
<b>Magnetic Field in a Commercial Sputter Magnetron</b> J. Monaghan, D.C. Cameron and M.S.J. Hashmi	287
<b>Magnetio-Optical Characterization of Thin Garnet Media</b> I.Z. Rahman, M.A. Rahman, M.A. Kenny, J.B. Albertini, B. Bechevet, J. Daval and J. Mouchot	295
<b>Stabilization of Anatase by Tungsten Introduced to the Titania Lattice by Sol-Gel and Impregnation Techniques</b> K. Kenevey, M.A. Morris, J. Cunningham and G. Ferrand	303
<b>The Dynamic Mechanical Behaviour of Selected Medical Grade Polyurethanes</b> F. Quigley, K. Bryan, M. Buggy and C. Birkinshaw	313
<b>The Use of Ceramic Materials for Femoral Head Replacement</b> B.J. Hulm, J.D. Parker and W.J. Evans	321
<b>Fracture Toughness of Tooth Acrylic</b> A.C. Murphy and R.G. Hill	329
<b>Development of Software for Thermomechanical Analysis and Design of Angiographic Catheters</b> D.P. O'Shaughnessy, R.A. Cunningham and C.M. O'Bradaigh	337
<b>Stress Analysis for Design of a Heterogeneous Acetabular Cup Containing Compliant Layers</b> K.J. Bryan, F. Quigley, M. Buggy and C. Birkinshaw	347
