Preface

I. Nanomaterials

The Intrinsic Frictional Property of Carbon Nanotubes

L.C. Zhang, K. Mylvaganam and K.Q. Xiao 1

Silver Nanoparticles, Cages and Flowers Growing on Carbon Nanosheets

X.S. Du, G.T. Wang, J. Ma, M.S. Mo and Y.W. Mai 5

Thermal Properties and Fire Performance of Woven Glass Fibre Reinforced Nylon 6 Nano-Composites with Carbon Nanotubes

S.Z. Shen, S. Bateman, Q. Yuan, M. Dell'Olio, J. Gotama and D.Y. Wu 9

Detonation Synthesis of TiO₂ Nanoparticles in Gas Phase

X.J. Li, X. Ouyang, H.H. Yan, G.L. Sun and F. Mo 13

Manufacture, Wet and Dry Corrosion, and Plasma Nitridation of Novel Nanocrystalline Ni-Cr Nanoparticle Nanocomposites: A Brief Review

X. Peng 17

Reduced Gravity Testing and Research Capabilities at Queensland University of Technology's New 2.0 Second Drop Tower

T. Steinberg 21

Physical Phenomena of Thermoplastic Articles in the Vicinity of Their Glass Transition Temperatures

S. Kharchenko and J. Huang 25

The Role of Al₂O₃ Buffer Layer in the Growth of Aligned CNTs

M.K. Lai, N.M. Mohamed and K.M. Begam 29

Improved Fabrication of PMMA/Ag Core-Shell Nanostructures with Two Steps

Z.H. Chen, Z. Wu, J.J. Bao, G.Q.M. Lu, Q.Q. Zhang, L.Z. Wang and X.F. Zhu 33

Simulation on Optical Properties of Gold and Silver Coated Nano Coreshell

X.Y. Chen, Q. Li, Z. Wu and X.F. Zhu 39

Effect of Iron Content on the Properties of FePt Nanoparticles in Water in Oil Microemulsions

K.M. Hyie and I.I. Yaacob 45

II. Thin Films and Coatings

Bovine Serum Albumin Adhesion Force Measurements Using an Atomic Force Microscopy

C.C. Lai, J.M. Bell and N. Motta 49

Prediction of Defects in PZT Thin Film Using Ab-Initio Method

Z. Zhang, L. Lu, P. Wu and C. Shu 53

Nonlinear Analysis of a Ball Grid Array Package under Thermal Cycles

R. Bai, H. Jiang and C. Yan 57

Deposition and Properties Studies of Superfine TiN Films with Magnetic Filter

L. Chen, D.C. Zeng, W.Q. Qiu, X.W. Shi and Z.Y. Liu 61

Environmental Response of Plasma Sprayed Nanostructured Coatings

Z. Ahmad and M. Ahsan 65

Residual Thermal Stresses in a Fe₃Al/Al₂O₃ Gradient Coating System

J.T. Wang, P. Hodgson, J.D. Zhang and C.H. Yang 71

Residual Stress Estimation of Tungsten Film by GIXRD

C.C.A. Chen, W.E. Fu and M.K. Chen 75

III. Metals and Alloys

Stress Corrosion Cracking of NiTi Orthodontic Wires in Sodium Fluoride Solution

X.J. Li, J.Q. Wang, E.H. Han and W. Ke 79

Analytic Prediction of Structural Stress-Strain Relations of Microstructured Metal C.H. Yang, I. Sabirov, J. Mullins and P. Hodgson	83
Experimental Research on Grain Orientation Evolution of Extruded Mg Alloy AZ31B Sheet during Uniaxial Tensile Deformation S.H. Zhang and Z.G. Li	87
Bonding of Aluminum Alloy by Hot-Dipping Tin Coating H. Diao, C.Q. Wang and L. Wang	93
Micro Impact Testing of Lead Free Solder Joints R. Rajoo, E.H. Kisi and D.J. O'Connor	99

IV. Composite Materials

Evaluating Multi-Delamination of Composite Laminates Using an Active Sensor Network Z.Q. Su, L. Cheng, X.M. Wang, L. Ye and Z.P. Chen	103
Optical and Piezoelectric Properties of ZnO Nanowires and Functional Polymer-Based Nanocomposites R. Pyrz	107
Tough Hypereutectic High Chromium White Iron – A Double <i>In Situ</i> Fibrous Composite G.L.F. Powell, I.H. Brown and G.D. Nelson	111
Microstructural Analysis on Ti-6Al-4V and 10 Vol.% (TiB+TiC)/Ti-6Al-4V Metal Matrix Composites J. Mak, R. Wuhrer, G. Heness, J. Qin, W. Lu, D. Zhang and W.Y. Yeung	115
Laminated Plate Elements Based on Higher-Order Shear Deformation Theories Y.X. Zhang and C.H. Yang	119
Shape Control in Composite Laminates Using Piezoelectric Actuators considering Thermal Deformation R. Bai, H.R. Chen, Q. Wang and C. Yan	125
Effect of Processing Method on Conductivity and Mechanical Properties of Glass Fibre Reinforced Carbon Black Filled Polyethylene Q. Yuan, D.Y. Wu, S. Bateman, S.Z. Shen, C. Gloria-Esparza and K. Xia	131
Simulations of Delamination Propagation in Composite Laminates under Static and Low-Velocity Impact Transverse Loads Using a New Cohesive Model N. Hu, Y. Zemba and H. Fukunaga	137
Manufacturing and Testing of High Performance Sheet Moulding Compound M. Hou and L. Ye	141
Effect of Vibrations on Void Content in Composite Materials J. Muric-Nesic, Z. Stachurski, P. Compston and N. Noble	145
High Performance Composites Using Nanotechnology M. Bauer, O. Kahle, S. Landeck, C. Uhlig and R. Wurzel	149

V. Materials Processing and Characterization

A Knowledge-Based System for Temperature Prediction in Hot Strip Mills H.B. Xie, Z.Y. Jiang, D.B. Wei, X. Liu and G.D. Wang	153
Surface Roughness and Wear of Work Roll Containing Ti in Cold Strip Rolling H.C. Li, Z.Y. Jiang, A.K. Tieu, W.H. Sun, H.J. Li and D.B. Wei	157
Rheology of Magnetorheological Shear Thickening Fluids W.H. Li and X.Z. Zhang	161
Investigation of Bimodal Particles Based Magnetorheological Elastomers X.Z. Zhang and W.H. Li	165
Analysis of Casting Roll Temperature Field during Twin-Roll Thin Strip Casting X.M. Zhang, Z.Y. Jiang, H.J. Li, Z. Fan, X. Liu and G.D. Wang	169
The Development of a New Image Acquisition & Analysis System for 3D Surface Measurements Using Confocal Laser Scanning Microscopy Z.X. Peng and S. Tomovich	173
Gate Location and its Effects on Product Quality in Injection Moulding H. Haddad, S.H. Masood and A.B.M. Saifullah	181
Effect of Surface Texture on Deformation Behavior of Asperity in Cold Metal Forming D.B. Wei, Z.Y. Jiang, C. Lu, Y.D. Tang and A.K. Tieu	185

VI. Biomaterials and Biomechanics

Effect of Fully Porous-Coated (FPC) Technique on Osseointegration of Dental Implants C. Rungsiyakull, Q. Li, W. Li, R. Appleyard and M. Swain	189
Finite Element Analysis of a New Custom Made Orthotropic Post Material for Dental Applications M. Khanal, Y. Zheng and Z.T. Chen	193
Finite Element Analysis of Plant Cell Wall Materials H. Kha, S. Tumble, S. Kalyanasundaram and R.E. Williamson	197
Numerical Prediction of Influence of Diamond Burs on Subsurface Damage in Intraoral Adjustments of Porcelain Prostheses X.F. Song and L. Yin	203
Magnesium and Magnesium Alloys as Degradable Metallic Biomaterials H. Wang, Z.M. Shi and K. Yang	207
Modification of Porous Alumina Ceramics with Bioinert and Bioactive Glass Coatings X. Miao	211
Novel Synthetic Bio-Mimic Polymers for Cell Delivery Y. Xiao, H. Peng, X. Mao, A.K. Whittaker and R. Crawford	215
In Search of a Parameter to Distinguish Viable from Non-Viable Articular Cartilage – Indentation and Ultrasound Studies C.P. Brown, R. Crawford and A. Oloyede	223
Evaluation of Dentinal Viscoelastic Properties Based on its Microstructural Characters X. Wang, Y.X. Zhang and Y.H. Cui	229
Endothelialisation and Cell Retention on Gelatin Chitosan-Coated Electrospun Polyurethane, Poly (Lactide-Co-Glycolide) and Collagen-Coated Pericardium S. Patel, C. Wong, Y.S. Morsi, X.M. Mo and C. Rui	233

VII. Computational Materials Science and Simulation

Simulation of Three-Point Bending Test of Titanium Foam for Biomedical Applications S. Kashef, S.A. Asgari, P. Hodgson and W.Y. Yan	237
A Multiscale Deformation Analysis for Mono-Crystalline Copper under Dynamic Uniaxial Tension Y.T. Gu and P.K.D.V. Yarlagadda	241
The Design of Functional Gradient Materials with Inverse Homogenization Method S.W. Zhou and Q. Li	245
Crystal Plasticity Finite Element Modelling of BCC Deformation Texture in Cold Rolling H.J. Li, J.T. Han, Z.Y. Jiang, H.C. Pi, D.B. Wei and A.K. Tieu	251
A Study on the Uniaxial Tension of FCC Metals at Nano Level Using MD B. Mortazavi and A.A. Khatibi	255
A Study on the Nanoindentation Behaviour of Single Crystal Silicon Using Hybrid MD-FE Method A.A. Khatibi and B. Mortazavi	259
Crack Analysis Using an Improved Meshless Technique with Irregular Nodes W.L. Wang, Y.T. Gu and L.C. Zhang	263
A Data-Constrained 3D Model for Material Compositional Microstructures S. Yang, S. Furman and A. Tulloh	267
Solidification Microstructure Modelling Using Cellular Automaton Method H. Wang and Q. Li	271
Characterization of Virtual Nano-Structures through the Use of Monte Carlo Integration L.F. Herrera, D.D. Do and G.R. Birkett	275
Design of Periodic Microstructural Materials by Using Evolutionary Structural Optimization Method S. Patil, S.W. Zhou and Q. Li	279
Multiscale Particle-In-Cell Modelling for Advanced High Strength Steels S.A. Asgari, P. Hodgson, V. Lemiale, C. Yang and B.F. Rolfe	285
Guided Wave Propagation and Interaction with Damage in Tubular Structures Y. Lu, L. Ye, D. Wang and G. Meng	289
