## Preface

## Chapter 1: Polymers and Composite Materials

|                                                                                                                                                                                                                                                                            |    |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| <b>Preparation of BTO@GO@PU Composite Membrane and its Application in Microwave Absorption Field</b><br>Y.J. Yan and Q.Q. Ni                                                                                                                                               | 3  |
| <b>Synthesis and Characterization of Aluminum Matrix Composites Reinforced with SiC-Graphene Core-Shell Nanoparticles</b><br>J.S. Zhang, Z.X. Chen, J.W. Zhao and Z.Y. Jiang                                                                                               | 8  |
| <b>Fire Condition Effects on the Mechanical Behaviour of Composite Structures</b><br>S. Saputo, A. Russo, A. Raimondo, B. Iodice and M. Zarrelli                                                                                                                           | 13 |
| <b>Comparative Damage Analysis of Impact Induced Traditional and Graded Filament Wound Glass Fiber/Epoxy Composite Pipes</b><br>S.S. Ahankari, A. Suryawanshi and U. Warerkar                                                                                              | 17 |
| <b>An Alteration of the Time-Temperature Superposition Principle to Account for Environmental Degradation in Fibre Reinforced Plastics</b><br>E.K. Ngoy                                                                                                                    | 22 |
| <b>Behaviour of Coir-Glass/Epoxy Double Lap Bolted Joint under Tensile Loading</b><br>A.A. Khalid                                                                                                                                                                          | 29 |
| <b>Effect of TiO<sub>2</sub> Incorporation on Separation Performance of Pure PES and PES/PVAc Blend Membranes</b><br>M.A. Abdullah, H. Mukhtar, Y.F. Yeong, M.S. Shaharun and H.A. Mannan                                                                                  | 35 |
| <b>Performance and Evaluation of Low Cost Sugarcane Bagasse - Polypropylene Biocomposites as Candidate Material for Automotive Parcel Tray</b><br>J. Anggono, S. Sugondo, R. Alim, H. Purwaningsih and A. Wibawa                                                           | 40 |
| <b>Production and Characterization of Whey Protein Concentrate (WPC) Based Nano-Fibers</b><br>F.N. Oktar, S. Su, B. Ozbek, S. Yücel, D. Kazan and O. Gunduz                                                                                                                | 47 |
| <b>Change in Crystalline Structure of Cellulose Caused by Wood Preservation</b><br>I.V. Stepina                                                                                                                                                                            | 51 |
| <b>Effect of Arenga Pinnata “Ijuk” Fiber as Nucleating Agent on Crystallization Kinetics of Impact Polypropylene Copolymer</b><br>M. Chalid, E. Yuanita, G. Ramahdita and J.F. Fatriansyah                                                                                 | 56 |
| <b>Influence of Compaction Pressure on Density, Bending Strength, and Microstructures of Al<sub>2</sub>O<sub>3</sub>-SiC-ZrO<sub>2</sub> Ceramic Matrix Composites with Nb<sub>2</sub>O<sub>5</sub> Additives</b><br>D.L. Natalia, R. Wijanarko, I. Angela and B.T. Sofyan | 61 |
| <b>AC Conduction in Polyaniline Emeraldine Salt-Graphite Pellets</b><br>K.V.S. Manding, J.E.S. Lopez and A.K.G. Tapia                                                                                                                                                      | 66 |
| <b>Conducting Properties of Polyaniline Emeraldine Salt on Paper in the Low-Frequency Region</b><br>P.N.G. Perez, P.A.L. Sino, M.U. Herrera and A.K.G. Tapia                                                                                                               | 72 |

## Chapter 2: Biomedical Materials

|                                                                                                                                                                                       |    |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| <b>3D Liquid Bioprinting of the PCL/β-TCP Scaffolds</b><br>M. Aydogdu, N. Ekren, O. Kilic, F.N. Oktar and O. Gunduz                                                                   | 79 |
| <b>Structure and Mechanical Properties of Retrograded Rice Starch and Cow Bone Powder Composite Sponge</b><br>S. Punyanitya, R. Koonawoot, A. Ruksanti, S. Thiensem and A. Raksujarit | 84 |
| <b>Microstructural and Mechanical Properties of Nano-Yttria-Oxide Doped Hydroxyapatite Composites</b><br>O. Gunduz, M. Yetmez, N. Ekren, O. Kilic, B. Ben-Nissan and F.N. Oktar       | 89 |
| <b>Electrohydrodynamic (EHD) Bioprinting of Polycaprolactone Scaffolds</b><br>E. Altun, S. Akyol, N. Ekren, O. Kilic and O. Gunduz                                                    | 93 |

|                                                                                                                                                                             |    |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| <b>Electrical Properties of Clinoptilolite/Aluminium Oxide/Bovine Hydroxyapatite Composites</b><br>C. Kalkandelen, Y. Moukbil, F.N. Oktar, N. Ekren, O. Kilic and O. Gunduz | 98 |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|

### **Chapter 3: Building Materials and Structures**

|                                                                                                                                                                                                |     |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>An Assessment of Characteristics of Densified High-Performance Concrete Incorporating High Volume Fly Ash</b><br>T.P. Huynh and C.L. Hwang                                                  | 105 |
| <b>Ecological Hydrophobizing Admixture in Special Purpose Concretes</b><br>M. Babiak, M. Ratajczak, P. Kulczewski and J. Kosno                                                                 | 110 |
| <b>Effect of Modern Air Entraining Admixtures on Physical Properties of Construction Mortars</b><br>M. Babiak, M. Ratajczak, P. Kulczewski and J. Kosno                                        | 115 |
| <b>Assessment of Resistance to Fragmentation of Crushed-Stone Aggregate for the Application in Road Engineering</b><br>M. Babiak, A. Ratajczak, M. Ratajczak and S. Węgliński                  | 120 |
| <b>Effectiveness of Polypropylene Fiber Reinforced Concrete in Enhancement of Long-Term Durability of Hydraulic Structures</b><br>A. Zia and M. Ali                                            | 125 |
| <b>Synthesis and Characterization of Red Mud and Sawdust Based Geopolymer Composites as Potential Construction Material</b><br>I. Kong, K.M. Khoo, O. Buddrick, A.A. Baharuddin and P. Khalili | 130 |
| <b>Analysis of Selected Rheological Properties and Ageing Processes of Bitumens Used in Waterproofing Products</b><br>M. Babiak, M. Ratajczak and J. Kosno                                     | 135 |

### **Chapter 4: Material Processing and Mechanical Manufacturing**

|                                                                                                                                                           |     |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Life Cycle Assessment on the Effects of Parameter Setting in Direct Recycling Hot Press Forging of Aluminum</b><br>M.A. Lajis, N.K. Yusuf and A. Ahmad | 143 |
| <b>Simulation and Experiment on Extrusion Molding of Five-Lumen Medical Catheter</b><br>Y. Wan, Z.H. Fu, J.X. Zhang, G.Z. Zang and L. Zhang               | 149 |
| <b>2D Geometrical Parameters Optimization Design Method of CMC/Metal Dovetail Joint</b><br>T.Y. Yang, D.Q. Shi and Z. Cheng                               | 156 |
