

Table of Contents

Preface

Chapter 1: Composites

| | |
|---|----|
| Tensile Fractography of Artificially Aged Al6061-SiC+B₄C Hybrid Composites | |
| S. Sharma, M.C. Gowrishankar, P. Hiremath, M. Shettar and B.M. Gurumurthy | 3 |
| Post Solutionising Rolling Sway on the Precipitation Behaviour of Eutectoid Steel Powder Reinforced Al7075 Ternary Alloy Composites | |
| R. Bhat, S. Sharma, M.C. Gowrishankar, M. Shettar, P. Hiremath and A. Hegde | 9 |
| Thermal Conductivity Enhancement in Polymer-Clay Nanocomposite Using Casting Techniques | |
| I.A.C. Razonado, E.G.T. Suarnaba, L.V. Madriaga and L.J.L. Diaz | 15 |
| Research on Preparation and Properties of Nylon 66/MMT/MWCNT Nanocomposites by <i>In Situ</i> Polymerization | |
| X.C. Duan, Y.P. Wu, T.H. Yang, Y.C. Cheng, T. Huang and H. Yu | 21 |
| Modeling and Optimization of the Fabrication of Al₂O₃- Based Ceramocomposites Reinforced with Carbon Nanotubes | |
| E. Koltsova, N. Mamonova, A. Shaneva, M. Babkin, N. Popova and E. Zharikov | 27 |

Chapter 2: Polymer Composites

| | |
|---|----|
| Influence of the Developed Flame Retardant System Based on Renewable Raw Materials on Epoxy Resin Fire Behavior | |
| K. Salasinska, M. Celiński, P. Kozikowski, M.K. Leszczyński, M. Borucka and A. Gajek | 37 |
| Thermal Stability of Epoxy Resin Modified with Developed Flame Retardant System Based on Renewable Raw Materials | |
| K. Salasinska, A. Gajek, M. Celiński, K. Mizera, M. Borucka and K. Duszak | 43 |
| Characterization of a Composite Material Consisting of a Polyester Resin Matrix with Reinforcement of Horsemene in Flat Tissue | |
| C.G. Bautista, P.I. Mena, C.A. Paredes and M.A. Paredes | 49 |
| Thermal Conductivity and Crystallography of Polypropylene/Polycarbonate/Polypropylene-Graft-Maleic Anhydride Polymer Blend | |
| M.S. Mat Shayuti, R.W. Sharudin, T.A. Tengku Mohd, P.N.F.M. Khamaruddin, M.Z. Abdullah and P.S.M.M. Yusoff | 56 |
| Preparation and Characterisation of Metallorganic Precursors Derived Iron Oxides on Porous Silicon Layers | |
| S. Balakrishnan, Y.K. Gun'ko, G.F. Swiegers and T.S. Perova | 63 |

Chapter 3: Materials in Microelectronics, Energy Production and Storage

| | |
|--|----|
| The Viability of Organic Dyes in Luminescent Down-Shifting Layers for the Enhancement of Si Solar Cell Efficiency | |
| A. Glenn, C. Mc Loughlin, H. Ahmed, H. Akbari, S. Chandra and S. McCormack | 71 |
| Development of a Bioanod, Experimental Studies and Mathematical Modelling of Membraneless Microbial Fuel Cell | |
| E. Koltsova, V. Bogdanovskaya, V. Vasilenko, S. Kalenov, O. Korchagin and E. Fokina | 77 |
| Supercapacitors with Extended Operating Potential Window | |
| L. Kouchahcvili and E. Entchev | 84 |
| Surface Morphology Studies on Laser Irradiated Target and Bi(Pb)SrCaCuO Thin Films | |
| A.N. Jannah, S.A. Halim and H. Abdullah | 89 |

Chapter 4: Biomaterials

| | |
|---|-----|
| Efficiency Improvement of Gelatin-Based Wound Dressings by Silk Fibroin and Chitosan W. Wattanutchariya, K. Thunsiri and S. Puntawang | 97 |
| Effect of Polylactic Acid/Hydroxyapatite Coating on Dental Implant Using Finite Element Method H. Mas Ayu, M.M. Mustaqieem, R. Daud, A. Shah, A. Arifat and M.S. Dambatta | 103 |
| Protein Nanoparticles with Enzymatic and Antigen-Binding Activities Induce Th1 Cytokine Gene Expression O.V. Morozova, E.I. Isaeva and D.V. Klinov | 109 |

Chapter 5: Building Materials and Structures

| | |
|--|-----|
| Investigation on Effect of Varying Weight Percentage of Glass Fiber and Filler on the Properties of Glass Fiber-Cement-Polyester Composites P. Shettigar, M. Shettar, R.U. Sathish, C.S.S. Kowshik and M.C. Gowrishankar | 117 |
| Numerical Investigation on the CFRP Strengthened Steel Frame under Earthquake T. Tafsirojjaman, S. Fawzia and D. Thambiratnam | 123 |
| Analysis of the Effect of Fly Ash on Compressive Strength of Concrete Using Neural Network and Parameter Analysis X.Y. Wang | 130 |
| Experimental Study on Concrete-Filled Double Skin Circular Steel Tubular Beams under Bending Load S.J. Lee and J.M. Park | 136 |
| Validation of Micromechanical Model for Prediction of ITZ Thickness of High-Strength Concrete Containing Secondary Cementitious Materials P. Bílý, V. Nežerka, V. Hrbek and J. Fládr | 143 |
| Mechanical Characteristic of Surface Layer of Concrete with Recycled SiC R. Pernicová and T. Kolomazník | 149 |
| The Potential of Black Rice Husk Ash (BRHA) in Brick Productions N.H. Dahalan, M.H.A. Mutalib, H.M. Yee, M.H.R. Ooi and H.A. Hamid | 155 |
| Design of Nutrient Enriched Cement Paste with a Superabsorbent Polymer for the Bio-Based Self-Healing Concrete Development H. Schreiberová, J. Fládr, K. Šeps and A. Kohoutková | 161 |
| Homogenization Procedure Effect on Microscopical Performance of Concrete Containing Supplementary Cementitious Materials Z. Prošek, V. Hrbek, P. Bílý and L. Vráblík | 168 |
| Mechanical Property Association of Dual Phase and Austempered AISI 4140 Normalized Steel S. Sharma, B.M. Gurumurthy, U.A. Kini, M.C. Gowrishankar and Y.M. Shivaprakash | 174 |

Chapter 6: Materials and Technologies in Chemical Engineering

| | |
|--|-----|
| Kinetics and Isotherms of an Iron-Modified Montmorillonite/Polycaprolactone Composite Nanofiber Membrane for the Adsorption of Cu(II) Ions L.R. Somera, R. Cuazon, J.K. Cruz and L.J.L. Diaz | 183 |
| The Effect of the Presence of GdVO₃ and GdVO₄ in the Conversion of Propane E.B. Markova, A.S. Lyadov, V.V. Kurilkin, A.G. Cherednichenko, J.M. Serov and T.F. Sheshko | 189 |

Chapter 7: Computational Methods in Materials Science

| | |
|---|-----|
| Doping Concentration Tuning and Plasmonic Optical Properties Modelling of Metal Nano Particles Utilizing FDTD Method M. Rafiee, S. Chandra, H. Ahmed, A. Glenn, C. Mc Loughlin and S. McCormack | 197 |
|---|-----|

| | |
|---|-----|
| Towards Reducing Computational Costs of Finite Difference Time Domain Algorithm in Plasmonic Optical Properties Modelling of Metal Nanoparticles | |
| M. Rafiee, H. Ahmed, S. Chandra, C. Mc Loughlin, A. Glenn and S. McCormack | 203 |
| Failure Analysis of Composite Structures Using Multiscale Technique | |
| Y.W. Kwon | 209 |
| Efficient Modeling of the Thermal-Cracking of a Spherical Shell Encapsulating a Round Inclusion | |
| G.P. Zéhil | 214 |
| Membrane Structures with Half-Costa Surface in YZ-Plane | |
| H.M. Yee and A.M. Nurul Afiqah | 222 |
