

Table of Contents

Preface, Committees and Sponsors

Chapter 1: Materials Engineering, Processing of Materials and Chemical Technologies

Effect of Tempering Temperature on Mechanical Properties of 40CrMnSiB Steel H. Yang, S.Q. Yuan, F.T. Liu, J. Chen, C.H. Zhou, F. Wang and Z.X. Shen	3
Cooling-Performance Estimation of the Composite-Graphite Heat Sink with Annular Conductive Base for LED Lamp F. Li, T.M. Jeng, S.C. Tzeng and P.T. Cheng	9
Preparation and Characterization of SrAl_2O_4: Eu^{2+}, Dy^{3+} Luminescent Nanofibers J.L. Liu, K.Y. Zhang, J. Luo and Y.P. Chang	13
A Competitive Model Reaction for the Ribosomal Peptide Bond Formation Catalyzed by Peptidyl Transferase L. Cheng, N. Hong, X.Q. Xu, J. Yang and Y.Q. Zhong	17
A MD Study on the Temperature Influence on Ni/Al Interface at Initial Diffusion Time Y.M. Dai and Y.J. Dai	21
A One-Port Waveguide Method and its Application in Characterization of Radar Absorbing Materials F. Zhao, C.T. Sha, G. Zhao, K. Wang and J.S. Kan	26
Ag-Loaded Wool Spherical-Like Bi_2WO_6 Nanoarchitectures Photocatalyst Degrade Pigments J.H. Xia, G.C. Han, G.Y. Huang and R. Chen	30
All-Solid-States Thin Film Lithium-Ion Micro-Battery with SnO_x Films Doped with Cu as Negative Electrode J. Lin, C. Liu, Q. Liu and H. Guo	38
<i>Candida rugosa</i> Lipase Adsorption on Nylon-6: Optimization, Kinetic and Thermodynamic Analysis X.Y. Liu, H.Y. Zeng, P. He, D.H. Peng, B.F.C.A. Gohi, B. Fan, C. Yu and Y.Q. Li	42
[Omim][Pro] Amino Acid Ionic Liquids as a Corrosion Inhibitor for Copper in 3.5 % NaCl Solution X.D. Chen, M. Gong, Q.S. Fu, X.W. Zheng and X.S. Feng	47
Research on Spheroidizing Annealing Progress of 38CrMoAl Y.H. Yuan, Z.J. Liu, W.G. Zheng and S.J. Zhong	51
Environmental Impacts Assessment of Liquid Crystal Extraction From Wasted LCD Panels Y.L. Wang, H.J. Hu, S. Qi and G.F. Liu	55
Research and Application of Micro-Arc Oxidation Technology on Magnesium Alloy Motorcycle Key Parts X.D. Chen, Q.Z. Cai, Z.W. Deng and L.S. Yin	63
Modification of Epoxy Resin by Reactive Block Copolymer SEBSMB J.P. Zhou, H.R. Wu, W.L. Fu and S.J. Jia	71
Influence of Composition and Heat Process to Performance of End Forging with Flange R.G. Shi, Z.Y. Wang, X.P. Yan and J. Li	75
Based on the Gradient Source Representation of Functionally Gradient Materials Q. Li and M.Q. Wu	80
Hydroscopicity and Dielectric Properties of Polyimide Containing Biphenyl and Bis-Benzimidazole Rings Y.T. Chen, H.X. Lu and Q.H. Zhang	84
Sheet Polymeric Iron (III) Porphyrin Complexes Catalytic Oxidation of Styrene with Molecular Oxygen X.D. Li, X.F. Wang, Y.C. Zhu and M.M. An	88
Semi-Solid State Joining of Aluminum Alloys under Nitrogen Shielding Gas A. Geaowdee, P. Muangjunburee and J. Wannasin	92

Application of IR-Spectroscopy for Study of Aluminosilicate Raw Materials M.S. Lebedev, I.V. Zhernovsky, V.V. Strokova, E.V. Fomina and N.I. Kozhukhova	96
Production Technology and Key Equipments for Ceramsite Produced from Coal Fly Ash and Clay Z.B. Chen and Q. Xie	102
Study on the Structures and Surface Forces of Different Carbon Blacks by Atomic Force Microscopy Q.S. Fu, J. Chen, Z.X. Yu and R.S. Yang	106
Study on the Microstructure and Mechanical Properties of Welding Joints of 7A05 Aluminum Alloy by FSW D.G. Chen, J.H. Liu, Z.H. Ma and W.L. Yang	110
The Study on the Degreasing Technology of Silk Floss Treated with Leaching Method H.T. Lin, Y.L. Xu, L. Li, F. Jiang and W.E. Ning	114
The Effect of 0.3%La Adding into As-Casting LA141 Alloy and then Rolls to Thin Plates H. Zhao, Y.P. Lan and J.W. Zhang	118
Preparation of PVP/TEOS/Nitrates Composite Nanofibers Z. Chen, J. Luo, C. Liang and J.L. Liu	129
The Effect of Elastic Pre-Bending on the Laser Peen Forming of 2024-T351 Aluminum Alloy Plate L. Chen, Y.X. Hu, G. Fang, Z.Q. Yao and X.W. Zheng	133
Study on Safety of Model II Powdery Emulsion Explosive K.M. Zhang and O.Q. Ni	137
Analysis of Low-Cycle Fatigue Crack Growth for Stiffened Plate Based on Accumulative Plastic Strain J.L. Deng, P. Yang, Q. Dong and H. Wang	143
Research on Technology of High-Pressure Water Jet Incremental Sheet Metal Forming H. Li and X.P. Yang	148
Degradation of a Phenolic β-O-4 Lignin Model Dimer by Electrochemically Mediated Delignification System with Violuric Acid G. Tian, F.G. Kong, S.J. Wang and J.C. Chen	155
Novel Gas Diffusion Electrode System for Effective Production of Hydrogen Peroxide Y. Hou, F.G. Kong, S.J. Wang and G.H. Yang	159
Study on Active Compounds of <i>Apocynum venetum</i> L Y.Q. Zhong, X.Q. Xu, J. Yang and L. Cheng	163
Using PVA and PVA & Cationic Starch to Improve the Strength of High-Yield Pulp Y.Y. Sun, F.G. Kong, S.J. Wang and Q. Wu	167
Enhancement of Pulp Strength by Forming Polyelectrolyte Multilayers on APMP Fibers G. Tian, Y.Y. Sun, F.G. Kong, S.J. Wang and J.C. Chen	171
Enhanced Hydrolysis of Hemicellulose in Corn Stalk by Alkali Pretreatment Y.Q. Guo, W.B. Wang, F.G. Kong and S.J. Wang	175
Kinetics of Electrochemical Delignification Mediated with Violuric Acid Y.J. Zhong, F.G. Kong, S.J. Wang and H.L. Chen	179
Modification of Cellulosic Fibers and Adsorption of Chromium (VI) Ion from Dilute Aqueous Solution Z. Xu, W. Liu, F.G. Kong, S.J. Wang and H.L. Chen	183
Numerical Simulation on the Process of Al-Alloy Air Cushion Continuous Casting Y.L. Huang and Y.M. Zhang	187
Study on Synthesis of Epoxy Resin Modified with Polysiloxane J.L. Han, H.L. Li, K.C. Shao and W. Liu	193
Preparation and Photoluminescence of Fe-Doped In_2O_3 Nanowires P. Sun, X.K. Sun, Y.K. An and J.W. Liu	198
The Wearability Research of New Environmentally Friendly Acrylic Fiber S.X. Zhang, Y.N. Zheng, Y.Q. Li, H.B. Xu, H.X. Zhang and C.Y. Zhu	202
Effect of the Sols' Zinc Ions' Concentration on Structural and Optical Properties of (Cu, Al) Co-Doped ZnO Thin Film by Sol - Gel Method Y.X. Yang, H.L. Tan and Q.N. Shi	206

Influence of Temperature Rise in Penetration of W_p/Zr-Based Amorphous Matrix Composite Projectile on Target Material	
X.H. Ye, H.G. Shi, M.M. Zou, K.W. Tian, L.J. Zhu, J. Zhao and W.L. Shi	210
Study on Cashmere Fibers Shrink-Proofing by Potassium Permanganate Based on Fuzz Mathematics Method	
F. Jiang, H.T. Lin, X.X. Yue, J.W. Huang and X.L. Ling	216
Dynamic Analysis of Metal Circular Saw Blade	
X. Tan, H. Huang, L. Chen and Q.B. Zhang	222
Fabrication of Vanadium Oxide Film with Low Phase Transition Temperature by Magnetron Sputtering and Reduction Post-Anneal Method	
Y. Qiao, Y. Lu, H. Yang and Y.S. Ling	227
The Aging Characteristics of Composite Insulators under Salt Fog Conditions	
X.C. Chen, M.C. Zheng and J.H. Li	231
The Development and Application of Superfine Shaped Acrylic Fiber on Bedclothes	
X.D. Tian, C.H. Ge, J.W. Bi, R. He and H.X. Zhang	238
The Synthesized of Nano-SiO₂ and Silicon Modified Polyacrylate Emulsion	
F.Q. Hou, Y. Zhao, N. Qing and Y.J. Chen	242
Study on Thermal Degradation Characteristics of Pre-Treated Paraffin	
S.Q. Hu and G.J. Wu	246
Hexagonal Representative Volume Element for Modeling and Analysis of Mechanical Properties of Carbon Nanotube Reinforced Composites	
L.M. Tai and S.C. Huang	251
Influences of Thermal Gradient and Solidus Velocity on Porosity Content in A201 Aluminum Alloy Castings	
Y.S. Kuo	255
Removal of Cesium from Aqueous Solution Using PAN-Based Ferrocyanide Composite Spheres: Adsorption on a Fixed-Bed Column	
Z.H. Du, M.C. Jia and J.F. Men	259
Effect of NH₄HCO₃ Contents on the Microstructure of the Microwave Sintered Porous NiTi Alloys	
J.L. Xu, X.F. Jin, J.M. Luo and A.H. Liu	264
Discussion on Loading Moment of Forging Force in Aluminum Alloy Spot Welding	
W.Y. Zhang, S.Q. Guo, Y. Li, H. Liang, B.B. Sun and N. Li	268
Effect of Si on the Wettability of SiC/Al System	
S.B. Ren, H. Xu, X.B. He and X.H. Qu	275
Hot Isostatic Pressing of Ti6Al4V Alloys Monolithic Bladed Disks	
P.J. Xue, Y. Wu, Q.S. Wei and Y.S. Shi	279
Evolution of Material and Properties of CWRM-1700 Rolls	
O. Krivtsova, V. Talmazan, S. Lezhnev, E. Panin and A. Arbuz	284
Microstructures and Properties of Abrasion-Resistant Cobalt-Base Alloy K-C20WN Prepared by Centrifugal Casting	
S.B. Ren, J.K. Qi and X.H. Qu	288
Microstructure and Properties of Welding Joints of 7A52 Aluminium Alloy by the Friction Stir Welding	
D.G. Chen, J.H. Liu, Z.H. Ma, C. Ye and W. Liu	292
Photocatalytic Performance of BiOCl Nanosheets Composite with Graphene	
B.T. Liu, L.L. Tian and L.L. Peng	297
Synthesis and Optical Properties Study of ZnS Crystallitic Films	
Z. Liu, S.W. Xie, G.C. Han and Y.Z. Zhou	301
Comparison of Constitutive Laws on the Modeling of Thermo-Viscoplastic Behaviour of an Aluminum Alloy	
X.R. Chu, L. Leotoing, D. Guines and J. Gao	307
The Numerical Analysis and Simulation of Ni-Ti/Si Shape Memory Alloy Micro Valveless Pump	
D.H. Liu, L.W. Liu, G. Tang, H.M. Wen, M.X. Xie and Q.G. Lu	311
Effect of Compatibilizer and Flexibilizer on the Mechanical Properties of Acrylonitrile-Butadiene-Styrene/Poly(Methyl Methacrylate) Blends	
S.H. Wang, J. Gao, G.R. Fei, P. Zhang, J. Huang and L.L. Xu	317

Notch Sensitivity of Poly(Acrylonitrile-Butadiene-Styrene)/Poly(Methyl Methacrylate)/Ethylene Methacrylate Co-Polymer (EMA) Composites S.H. Wang, J. Gao, S.X. Lin, P. Zhang, J. Huang and L.L. Xu	322
Study on the Mechanical Properties and Surface Gloss of Acrylonitrile Butadiene-Styrene/Poly(Methyl Methacrylate)/Ethylene Methacrylate Copolymer (EMA) Composites S.H. Wang, J. Gao, S.X. Lin, P. Zhang, J. Huang and L.L. Xu	327
Atmospheric Corrosion of AZ80 Magnesium Alloy L.P. Zhu, Y.J. Zhu, C.L. Wang, C. Lu, X.Z. Fang and X.J. Cao	331
Effect of Sr Addition on Microstructure and Mechanical Properties of Semi-Solid 2024 Al Alloys N. Khunbanterng, S. Wisutmethangoon, T. Plookphol and J. Wannasin	336
Corrosion Behavior Study of 22MnB5 Steel and its Weld Using Electrochemical Method D. Liu, H.Y. Zhao, D.Y. Tang and Q. Ma	340
Gear Application Feasibility Study of Functionally Gradient Material Q. Li, C.B. Yang, X.G. Zhu, X.D. Gao and L. Gu	344
Preparation and Properties of (SiCp+Al₂O₃f)/7075Al Composites by Pressure Infiltration H. Xu, S.B. Ren, Q.N. Hong and X.H. Qu	348
Photoluminescence Property of ZnO:Eu Hollow Nanofibers Fabricated by Sputtering Using Electrospun PVP Nanofibers as Templates H.P. Wang	352
Refining Molten Steel with Argon Blowing by Metal Nozzle Mold Bottom R.G. Shi, Z.Y. Wang, S.G. Yang and X.P. Yan	357
Optical Properties of CuAlO₂ Synthesized by Sol-Gel Method Q.X. Lin, F. Miao and Y. Huang	362
Tensile Properties and Plasticity of Semi-Solid Cast 6061 Al Alloy at Elevated Temperatures S. Songkuea, P. Sripan, S. Wisutmethangoon, J. Wannasin and T. Plookphol	366
Investigation of Microstructure and Mechanical Properties of Semi-Solid State Joining of SSM Aluminum Alloys A. Petkhwan, P. Muangjunburee and J. Wannasin	371
Improvement of Performance of Traditional Photocatalysis and Development of New Photocatalysis Materials and Technologies W. You	376
Functional Polypropylene/High-Absorption Polyacrylate/Bletilla Striata Nonwoven Fabrics: Process and Characteristic Evaluations J.H. Lin, Z.H. Wu, C.Y. Chang, C.T. Lu and C.W. Lou	380
Preparation and Property Study of PTT/CAB Blend Fibers L.Y. Wang, G. Li and L.J. Yang	384
Numerical Characterization of the Effect of Coating Solid on Binder Distribution Y. Li, W.J. Gu and B.G. He	388
The Influence of Ti/N Ratio on the Effective Boron and Mechanical Properties of Low Carbon Boron Alloyed Bainitic Steel T. Zhang, H.X. Hou and J.P. Chen	392
The Micro Crack Nucleation Rule and Fracture Behavior of Titanium Aluminum Alloy X.B. Yi, Z.Y. Rui, R.C. Feng, C.F. Yan and Y.R. Zuo	396
Study on Step Type Vibration Tapping of Superalloy F.Q. Han, Z.Z. Li and D.Y. Zhang	401
Recovery of Copper from Copper Smelter Slag by Flotation X. Tong, B. Han, S.P. Ren and B. Yang	406
Research on Au-Bearing Copper Ore in Flotation from Yunnan X. Tong, X. Wang and Z.B. Deng	410
Matching Principle of Material Selection in Product Design J.A. Han, F. Li and H.C. Xia	414
Hot Working Manufacturing Process of Large Mine-Used Rotary KilnRolling Ring Forgings R.G. Shi, S.J. Jiang, Z.Y. Wang and X.P. Yan	418
Numerical Simulation of an U-Channel Component Tailored Tempering Process Considering the Effect of Stress on the Shift of TTT Curves B.T. Tang, Q.L. Wang and S. Bruschi	425

Structural Optimization of Composite Panel with Lamination Parameters and Equivalent Stiffness Laminate Method	
X.P. Zhong and P. Jin	429
Effect of Mechanical Refining Treatment on Fiber Grafting Modification	
W. Liu, F.G. Kong, S.J. Wang and Q. Wu	436
Mechanical Behaviors and Thermoforming Features of PMMA Used In-Mold Decoration	
S.M. Chen and S.J. Zhang	440
Microstructure and Mechanical Properties of Welding Joints of High Nitrogen Steel by Hybrid Laser-Arc Welding	
Z.H. Ma, D.G. Chen, H.W. Liu and W.L. Yang	444
Analysis and Test: Impregnated Diamond Cutters for Oil Drilling Bit	
H. Lan, Q. Xue and C.Y. Cui	448
Discussion on Finite Element Model for Three Dimensional Rolling Process Analysis	
C.C. Shen	452
Analysis of Press-Extrusion Forming for Embossment on the Stamping Part	
C.C. Lin, K.S. Wang, Y. Xu and L.H. Zhang	456
Manufacturing Technique and Property Evaluations of Degradable Sound-Absorption Plates	
J.H. Lin, Y.H. Shih, J.M. Chen and C.W. Lou	460
Effect of Fiber Fineness on Acoustic Absorption Property of Nylon 6/Low-Melting PET/Recycled PET Nonwoven	
C.W. Lou, Y.H. Hsu, T.T. Li and J.H. Lin	464
Manufacturing Technique and Property Evaluations of Conductive Nonwoven Fabrics	
C.W. Lou, C.M. Lin, Y.C. Yang, Y.T. Huang and J.H. Lin	468
Electromagnetic Shielding Effectiveness and Manufacturing Technique of Metal Complex Fabrics	
C.W. Lou, A.P. Chen, T.A. Lin, Y.Y. Chuang and J.H. Lin	472
Methods of Swanson Constitutive Model Establishment for Composite Solid Propellant	
C. Ning, H.F. Qiang and G. Wang	476
The Research on Surface Metamorphic Layer of Punch Matrix in WEDM	
C.Q. Lin	481
Discussion on Metal Heat Treatment in Nuclear Power Plant	
J.J. Zhang, J. Mei, J. Hu and L.X. Zheng	485
Research on Mechanical Properties and Appearance of Mulberry Silk Soaked with Clean Water	
J.W. Huang, J.W. Hong, L. Huang, B.Q. Lin, X.L. Ling, H.T. Lin, F. Jiang and X.X. Yue	493
An Improved Continuous Gas Lift Design Method with Variable Pressure Drop	
L. Wei, R.Q. Liao, Y. Li and R.D. Feng	497
Grinding Experiment Research of Face Gear with CNC Machine	
H. Guo and S.Y. Zhang	503
Research on the Effect of Distributor Aperture Ratio on Fluidization Quality of Vibrated Fluidized Bed	
B. Li, S.D. Chen, X.W. Kong and S.T. Zhang	507
Study on Improving of the Iron Concentrate Grade Index by Centrifuge	
Z.P. Cai, X. Wang and X. Tong	512
Machined Surface Quality Improvement Measures Affecting Factors and Research	
H.C. Yang and M.Q. Wu	516
Molecular Docking Studies on the Interaction of 2-Arylpropionate Esters with <i>Candida rugosa</i> Lipase	
X.Y. Liu, H.Y. Zeng, D.H. Peng, B.F.C.A. Gohi, Q.J. Huang, C. Yu and Y.Q. Li	520
Comparative Inspection of Terbufos in Blood from Head Skin by GC-MS	
J.P. Xu and D.Q. Tao	524
Rapid Detection of H₂S in Heart Blood by Chemical Method and GC / MS	
P. Xu, D.Q. Tao and W.W. Liu	528
Research Progresses and Development Trends of High-Efficacy Photocatalysts	
W. You	532

Optimization of Super-Long CNT Forests Growth on Conductive Substrate by Water Assisted CVD P.B. Wang, D.Y. Xu and L.N. Sun	536
---	-----

Chapter 2: Research and Design of Machinery, Equipment and Technological Processes in Mechanical Engineering

Design and Manufacture of a Unilateral Permanent Magnet Linear Motor for Assembly Q. Liu and Y. Fei	543
Impact of Structure Design of Artificial Upwelling Tube J.Y. Leng, J.W. Chen, H.C. Huang, S. Lin, M.Z. Liu and J.B. Liu	547
Calculation of the Effective Value of the Uplift Depth for the Tower Foundation in Sloping Ground L. Xu, Y. Wan and P.P. Jiang	551
The Research of Grouting Sandblasting Carrying Manipulator Based Wax Casting-Line Y.J. Li, F. Wang, Q. Zhang, C.C. Li and Y. He	557
A Damage Model for Low Cycle Fatigue Analysis of Stiffened Plates Q. Dong, P. Yang, J.L. Deng and H. Wang	561
Research on Ultimate Strength and Accumulated Plastic Deflection of Box Beam under Cyclic Loading H.W. Cui, P. Yang, C. Sen and L. Zhou	567
Analysis of Fatigue Life in High Temperature of W Pattern Sealing Rings Used in Aircraft Engine X. Chen and Y. Wang	571
The Improvement of Complex Structure of Single Cylinder Double Acting Piston Pump C. Dong and W.G. Zheng	575
The Review of Workpiece Loading and Unloading Robot in the Catenary Shot Blasting Y.J. Li, P.J. Sui, Q. Zhang, C.C. Li and Y. He	578
Optimizing Product Development Projects Based on the Clustered Product Design Structure Matrix (DSM) Q. Yang and E.L. Tang	582
Study on Hull Deformation at Supports of Propulsion Shaft of a Large Container Ship X.K. Ruan, P. Yang, X.P. Yan and Z. Huang	586
Research of Reinforce Stress on the Pressure Structure of Submersible Vehicle G.N. Chu, Q.Y. Zhang and G.C. Lu	590
A Numerical Simulation of Steady-State Temperature Field of Natural Gas Engine Piston D.Z. Jing and W.G. Zheng	594
Study on Structural Analysis for One-Cylinder Vertical Engine Assembly by FEA Method Y. Wang	597
Study on Modal Analysis for Motorcycle Frame by CAE Method J. Wang, Y. Wang and Y.H. Liao	601
Design and Test of Pico Crossflow Turbine for the Generation of Electricity for Use in the Rural Area Y. Keawsuntia	605
Dynamic Response of Elastic Beam to a Moving Pulse: A Theoretical Study on Critical Velocity C.Q. Qian, Z.J. Zheng and J.L. Yu	609
The Relationship between the Period of Spontaneous Combustion and the Wind Speed X.L. Sun, E.X. Gao, Q. Wang, S.S. Xu and C.Y. Li	613
Suspension Optimum Design Considering Tire and Vehicle Matching F. Bai, K.H. Guo and D. Lu	617
Structural Optimization Design of Body of Oil-Perforating Gun M.J. Zhao and G.Z. Zhu	621
Strength Analysis and Optimal Design on Flip Axis of Steel Roll Clamp F.H. Wang and W. Han	626
Design of Transient Electromagnetic Transmitter Based on FPGA L. Zhang, Q.M. Duan, H. Sun, T.Z. Huang, J.W. Shi, D. Wu and Y.J. Han	630

Study on the Influence of Gear Rattling on Pitting Fatigue Failure G. Shen, D. Xiang, N. Xie, P. Mou, W. Yang and Q. Zhao	634
Design of Impeller of Centrifugal Compressor for Water-Air Engine Y. Wang and W. Zhang	642
A New Method to Extract Substructures for the Multi-Shaft Transmission C. Tong, H. Li and J. Yao	646
Design and Validation of Sensor Balance for Propeller Experiment J. Jiao, B.F. Song and Y.G. Zhang	652
Lightweight Design for Coal Mine Rescue Robot's Swing Arm Brackets C.W. Wang and H.W. Ma	657
Crane Wheel-Rail Contact Stresses Research Based on Experimental Test and Finite Element Analysis F.Q. Wu, J. Zhang and W.Q. Yao	662
Effect of Welding Procedure on Main Girder Fatigue Property G. Shen, D. Xiang, N. Liu, P. Mou, Y. Yang, J.M. Jiang and X.L. Li	666
Suspension Parameter Design Based on Equivalent Linearization Method J. Li, X.P. Jia, K.L. Yu and L. Zhang	673
Design and Analysis of a Novel Mini-Type Centrifugal Friction Speed Limiter Z. Xie, G.Y. Liu, Y. Wang and Y.Q. Liu	677
Structure Design and Simulation of Lithium-Ion Battery Casing Machine Q.X. Xia, L.B. Ji, Y.X. Li, X.J. Liu, Z.W. Li, C.L. Huang and Y. Huang	683
The Optimization Design of Combination Sleeve Based on ANSYS Y.D. Gao, W. Li and H.Y. Wang	688
Study on the Performance of Water Lubricated Stern Tube Bearing Based on Fluent J. Liu, Z.L. Liu, X.K. Meng and X.X. Liang	692
The Profile Error Feedback Optimization for the Design of a Showerhead System Controlling Gas Flow Uniformity in a Thin-Film Reactor H.X. Xia, D. Xiang and P. Mou	697
Application of Sonic Nozzle in Unsteady Flow Rate Generating System for Compressible Fluid X.X. Wang, T. Wang and J.Z. Wang	703
Analysis of Structure Characteristics and Improvement of Turbo-Supercharger Bearing H. Gan, K.Y. Yang and X.L. Yang	707
Causes of Surge of Turbocharger for Marine Diesel Engine and Measures against Surge N. Liu and Y. Leng	711
A Novel Simplified Distributor Model of Fluidized Bed Based on the Porous Media Theory B. Li, W. Liu, X.W. Kong and S.T. Zhang	715
Optimal Design of a Four-Legged Walking Mechanism Based on Bionics W.G. Cai, Z.G. Shang and L.B. Wu	719
Effects of Fuel Supply Advance Angles on Performance of Engine Fueled with Butanol Diesel M.W. Xiao, J.H. Zhang and J.G. He	724
Surveillance Ship with Fuel Cell Performance Analysis and Design Y.D. Kuan, J.Y. Chang, M.S. Huang, Y.Y. Chu, Y.C. Chen, H.L. Huang and G.S. Huang	728
The Improved Structure of Swash Plate Axial Piston Pump C. Dong and W.G. Zheng	733
Analysis for Initial Status Parameters of Parachute Aircraft J. Zhao, J. Li, C. Liu and B. Li	736
Research on the Effects of Tires on the Vehicle Handling H.M. Chen and K.H. Guo	744
Study on Dynamical Simulation of Swing Movable Teeth Reducer Y.F. Wang and B. Yang	749
The Kinematics Modeling and Simulation of a Mechanical Arm in Nuclear Industry with Postpositional Drive R.F. Zhao, Z. Zhang and J.Q. Cui	754
Modeling and Simulation of a Certain Warship Diesel Engine Based on AMESim X.H. Quan, J.J. Quan and H. He	760

Mechanical Design and Analysis of a Tracked Mobile System for Patrol Robot J.Q. Cui, Z. Zhang and R.F. Zhao	764
Hemispherical Parts Numerical Simulation of Deep Drawing B.L. Su	769
Study on the Suck Rod Design and Evaluation M.L. Zhang, R.Q. Liao, Z. Qin, P.Y. Yao and Z.C. Dong	773
Analysis of Microstructure and Mechanical Properties of Bearing Inner Ring M.L. Qi, X.J. Zhao, Y.T. Wang and P.T. Liu	777
Design and Singularity Analysis for Nine-Bar Mechanism of Three Crank Hybrid Driven S.T. Song, R.Q. Li, Y. Gao and D.H. Li	781
An Optimal Design of Scrub Radius for Automobile Suspension Based on Adams Simulate Z.Y. Li, Z.R. Dong, S.F. Liang and C.W. Han	785
The Design & Calculation for Hydraulic Cylinder of a Special Machine for Heat Exchanger Tube Bundle Drawing and Assembling K. Yang, S.J. Guan and X.D. Wang	789
The Key Technologies in Designing of a Special Machine for Heat Exchanger Tube Bundle Drawing and Assembling K. Yang, S.J. Guan, J.B. Jia and C.Z. Wu	793
Optimization Design of Cable-Frame Antennas Based on Tension Compensation Method Y.L. Zong and H.J. Cao	797
Modeling and Computational Analysis of Diesel Engine Working Process in Plateau Environment X.C. Wang, R.T. Li, X. He and J.B. Hu	804
Process Analysis of Oblique Gibs X.P. Liu	808
CNC Lathe Drive System Design M.Q. Wu and Q. Li	812
Influence Analysis of Machine Tool's Turntable Angle Errors to the Roundness of Machined Hole Q. Cheng, H.W. Zhao, L.G. Cai and P.H. Gu	816
The Bottle Opener Stamping Mold Design Z. Wang	823
The Effect of the Pressure Drop Ratio on the Performance of a Novel Dynamic Hydrocyclone G.S. Li, J.W. Chen, C.Y. Xu, B.H. Zheng and Z.L. Yuan	827
Kinematic Analysis of a Spatial 6-Bar Linkage Mechanism L.X. Xie, Z.X. Tian, J.Y. Kong, G.Z. Jiang and G.F. Li	831
The Finite Element Analysis of Derrick Translation System in Vehicular Pressure Balance Workover Rig M.Y. Yan, C.Y. Li and J.Q. Jin	836
The Kinematics Simulation Analysis of a Spike-Picking Roller for a New Self-Propelled Maize Harvester Based on ADAMS Z. Ming	841
Study on Valve Train Analysis for One-Cylinder Vertical Engine J. Wang, Y. Wang and Y.H. Liao	845
Simulation Analysis and Studying of Die Casting Forming Process for Crankcase W.G. Zheng, Z.J. Liu, N. Yang, C.L. Li and X. Yang	849
Research on the Pulse Current Distribution of the Hollow Cylinder Surface T. Wang, B.H. Zhou, W. Li, Y.F. Ding, Y.X. Li, B. Yang and Y.P. Fu	853
The Mechanical System Structure Design and Kinematics Analysis of the Bipedal Humanoid Robot Leg D.Q. Cui, H.B. Xin, L. Liu, T. Wang and Y.F. Xin	857
The Design of Flexible Bearing Life Test Device L. Liu, H.B. Xin, D.Q. Cui, Y.F. Xin and T. Wang	861
Biaxial Stretching Technology and its Development Y.F. Xin, H.B. Xin, Z.Y. Xue, Q.L. Li, D.Q. Cui, L. Liu and T. Wang	865
The Design of a Small Composting System and Turning Device T. Wang, H.B. Xin, Z.Y. Xue, Q.L. Li, D.Q. Cui, L. Liu and Y.F. Xin	869

A Height Adjustable Tool Holder T.H. Ma	873
Analysis of Off-Design Flow Field and Prediction of Performance in Hydraulic Turbine F.X. Shi, J.H. Yang and X.H. Wang	877
Comparative Analysis of Hydraulic Energy-Dissipation Damper Performance Based on AMESim M. Zhang, H.K. Wang and X.S. Qian	881
Structure Improvement Analysis of Maize Root Stubble Harvester D.W. Shao, J.F. Wang, D.H. Jiang, X.H. Li, G.F. Wu, Y.J. Liu, D. Xue, J.Y. Luan, K. Zhao, F.X. Li and L.Y. Wang	887
Gas Storage Cavity Simulation Experiment Research and Application J.F. Wan, R.C. Shen, Z.Y. Ji and J.B. Xie	891
Identification of the Lumped Parameters for Hydraulic Bushing Based on FSI Finite Element Simulation L. Li, X.N. Liu and X.L. Feng	896
Structure Optimization Design of Vane Steering Pump L.F. Yang	904
Research for Breaking Explosives Green Safe Technology and Advanced F. He, F.J. Meng, L.G. Lai, Y.H. Zhang, R. Hong, J. Gao, H. Yang and H.J. Chao	908
Simulation of Gas-Solid Flow Characteristics in Three-Dimensional Rotational Spouted-Fluidized Bed X.F. Long, Y. Liu and B. Lou	913
Analysis of Stimulated Brillouin Scattering in a Single Mode Fiber Ring X.M. Zhang, Y.K. Ci and J.L. Yao	918
Studies on the Prediction of Landing Impact for Airborne Vehicle J.Y. Li, H.Y. Wang, Q. Rui and H.J. Hong	922
Simulation of Transmission Efficiency for Different Bending Radius of Aerosol Sampling Inlet B.Q. Wang, R.H. Chen, Z.B. Wang, Y.Y. Li, S. Yao and S. Yin	927
New Method of Fault Knowledge Acquisition of Electronic Equipment Z.C. Huo, Q.S. Sun, F.J. Qi and G.B. Ding	931
Simulation and Optimization on Dynamic Hydraulic Drawing for Spiral Bottom Shell Parts W.C. Zhou, W. Zhou, C.P. Liu and S.H. Xiao	935
Equipment Design for Supercritical Cleavage Technology C.H. Zhou, Y. Bai and M.F. Hu	939
Application of π Equivalent Circuit in Mathematic Modeling and Simulation of Gas Pipeline J.R. Wang, T. Wang and J.Z. Wang	943
Maintenance Study of a Pilot Biomass Pyrolysis Installation S. Honus and P. Bukowski	947
Research on Fault Diagnosis Method of Steam Turbine Unit Based on the Theory of Super Ball X.W. Deng, Y.P. Han, C.C. Wang and Y.J. Gu	953
Based on Maximo Preventive Maintenance of the Crane J.W. Leng and Y.M. Zhao	958
Analysis of Vibration Characteristics for Wind Turbine Gearbox G. Shen, D. Xiang, P. Mou, J.M. Jiang and L. Gao	962
Parameter Design and Simulation Research of Power System for Electric Vehicle W.L. Wang, W.Z. Liu, B.Q. Tao and J.W. Ma	969
Numerical Simulation Analysis for Influence of Lateral Inclination Angle on the Yacht Resistance F. Fu, Y.Q. Liu and X.X. Wu	974
Design of Pneumatic System in Warm Extrusion Forming Process Manipulator for Steel Connecting Sleeve X.J. Zhang, Z.M. Yang and S.L. Yang	978
Discussion Based on the Condition of Transformer Parallel Operation X.Q. Yan, Y.L. Ruan and F. Cao	982

Fluid Factors Research in High Pressure Abrasive Water Jet Z. Li and W.T. Di	986
Analysis of Mechanical Seal Leakage within Hydrostatic on Nuclear Reactor Coolant Pump H.Y. Zhang, W.B. Zhu and Z. Gang	990
Quantitative Assessment on Blast Effects of the Boiler BLEVE F. Qu, H. Tian, Q.Y. Zheng and Y.L. Zheng	995
State of Charge Estimation of Lithium-Ion Battery Using Extended Kalman Filter Based on a Comprehensive Model H. Li, S.Y. Liu and Y. Yu	999
Forecasting Algorithm of Heavy Vehicle Roll over Based on Road Collaborative D.Z. Jing and W.G. Zheng	1003
Design a Kind of Oblique-Cone-Sliding-Ring Assembly Seal Device J.H. Fang and W. Yan	1007
Study on Pneumatic Control of Shotcrete Machine Booster Manipulator R.F. Song, F. Yang, L. Zhao and Y.T. Yang	1012
Modal Testing and Analysis of Z-Axis Supporting Plate for High-Speed PCB NC Drilling Machine L. He, G. Huang, H.Y. Wu and Y.L. Lei	1016
Chilled Energy Storage for Air-Conditioning System of Buildings X.J. Shu	1020
Modeling and Simulation for the Feed System of CNC Machine Q. Wu, J.J. Yang and C.L. Lei	1024
Analysis of Pre-Tightening Strength of Ship Tail Shaft Coupling Based on Workbench Software X.X. Liang, Z.L. Liu and J. Liu	1028
Nissan Car Test Bench Research Production and Use of Teaching L.F. Yang and C.Q. Ma	1032
Simulation Research on Resistive Coupling of High-Speed Railway Y.D. Chi, T.H. Tan, K.Y. Yang, Y.H. Gao, H. Ke, H.L. Gu and J.Y. Zhao	1036
Analysis of the Improvement of the Drawing Die in Drawing Device W. Liu, D.M. Wang, G.H. Liu, Z.Y. Zheng and J.T. Jiang	1041
A Novel Design on Uniform Heating Wire Coil of Induction Cooker J.X. Zhu and Q. Tong	1044
Magnetic Levitation and Rotation for Feasibility of Free-Form Machining A.H. Shih and S.Y. Liang	1048
Elasto-Plastic Fracture Analysis of Finite-Width Cracked Stiffened Plate J.L. Deng, P. Yang, Q. Dong and X. Yan	1052
Study and Design on High Temperature Air Combustion of Hot Blast Stove F.M. Zhang, Z.R. Hu and S.S. Cheng	1058
The Influences of the Load Distribution Pattern and the Position of the Locomotive on Train Longitudinal Dynamics Y. Xu, S.Y. Zhao and N.N. Wang	1063
Mechanism Modeling and Analysis of a Small Unmanned Vehicles Using Vortex Lattice Method X.J. Zang, Z.D. Zhang and C. Liu	1068
Study on the Recovery Circuit Based on Multi-Module STRETCH Meat Grinder H. Liu, S.H. Bi, X.J. Yu, J. Li, Z. Li and P.Z. Liu	1073
An Improved VSVPWM Strategy of Considering Neutral-Point Potential Balancing in Three-Level NPC Converter S.W. Gui, L. Wang and S.H. Huang	1079
Research on Temperature Distribution for Tubing Liquid with Hot Natural Gas Injected Annulus Using Gas Lift L. Wei, R.Q. Liao, Y. Li and J. Wu	1084
Study on Dynamic Characters of Interaction Effect of Precision Machine Tool-Box Foundation-Soil D. Yi, Y. Ning, Y. Tian and Z. Liu	1088
Design Parameters Sensitivity Analysis of Lathe Saddle M.D. Duan, K.H. Liu, X.X. Ji and T.F. Zhang	1092

The Research of the New High Voltage Reactive Power Compensation Device Based on the Compound Switch Y.S. Wang and X.D. Qiao	1097
Discussion the Method of the Flocculation Flow Field Measurement by PIV J.F. Gao	1101
Preliminary Exploration of Electrohydrodynamic Wind Power S.F. Zhang and X.M. Zhang	1105
Design and Simulation of an Improved Doherty Power Amplifier Y. Liu and H.B. Xiao	1109
Design of NdFeB Permanent Magnet DC Generator Y.Y. Wu	1113
Research of Factors Affecting the Yarn Tension of a Winding Machine H.X. Zhao and D.G. Chang	1117
The Fault of Hydraulic System and Troubleshooting H. Wen and C.F. Yao	1121
A Solar Battery Structure for Consumer Electronic Devices C.X. Li, D.W. He, Y. Li, M. Sun, X. Chen, Z.H. Zhang and J.J. Shen	1125
Design of Vibration Isolation Device for Ship Power Equipment and Investigation on its Dynamic Properties Y.Y. Fang, G.H. Zhang, Y.F. Li and P.Z. Qi	1129
Research on Cushion Characteristics of Self-Inflating Buffering Airbag H.J. Hong, H.Y. Wang, Z.Y. Lv and J.Y. Li	1134
Vibration Testing System for Ventilator Based on Virtual Instrument Z.Y. He, X.F. Huang and Z.F. He	1139
Study of Frequency Conversion Energy-Saving Reconstruction for Central Air-Conditioning H.Y. Hua and Z. Zhang	1143
Research of Stress Assessment Based on Singularity Strength S. Gao, L. Xu, D.Z. Wang and F. Ma	1147
Structural Analysis and Optimization of Electric Scraper Drive Axle Housing under Multi-Load Y.J. Zhang, L.Q. Kong and J. Shi	1152
RF Coaxial Open Standard Calibration Technology Research C.T. Sha, F. Zhao, Y.Z. Yin and J.S. Kan	1157
Wavefront Aberration Detection: A New Perspective J.Q. Kang, X.M. Cheng and Q. Hao	1164
Finite Element Modeling of Optical Path Length Control Device for Laser Gyroscope X.D. Yu, Y.P. Xie, P.F. Zhang, G.F. Lu, Y.N. Xu and X.W. Long	1169
The Research of IC Test Based on LTX-77 Test System L. Tan and Y. Fang	1176
Researches of the Measurement Instrument in the Plastic Injection Machine Bore and Data Processing T.N. Yang, X.J. Wang and H.Y. Wu	1180
The Design of Ward Calling System Based on SCM M. Ji and J.F. He	1185
Study on Inner Cooling Grinding in a General Surface Grinding Machine Y.H. Liao, Y. Wang and L.D. Zhang	1189
Nonlinear Dynamic Analysis of Rigid - Loose Coupling Bidirectional Vibrating-Crushing System J.C. Zhang and L.C. Wang	1193
Research and Implementation of IVI-COM Driver for Digital Oscilloscope Z. Li and H.H. Wu	1197
The Design of Food Safety Rapid Detection Equipment F. Zhong, F. Wang, H. Yang and D.Z. Zheng	1202
Design of Multi-Channel Physiological Signal Monitor Based on Wireless Data Transmission Z. Zhang and F. Liu	1207

The Study on the High-Speed Electrified Railway Electromagnetic Interference Impact Y.D. Chi, Y.S. Mu, L.S. Yang and H.L. Gu	1211
Turning in Place of Grinding Application and Exploration in the Actual Processing T.H. Ma	1215

Chapter 3: Mechatronics, Control and Automation of Manufacturing Processes

Fuzzy PID Control System for Sludge Digestion Tank Temperature S.Q. Xue, W.Z. Yan and L. Ma	1221
Research on the Cooling Fan Speed Control Scheme of the Large Power Vehicular Diesel Engine in Altitude Environment X. He, X.C. Wang, J.B. Hu and Z.X. Sun	1226
Study on Co-Simulation and Experiment of a Series-Parallel Hybrid Electric Vehicle D.J. Huang	1231
Optimal Selecting Strategy for Tool Size of High Efficiency Milling of Complex Curved Surface H. Liu, Y. Zhang and L.L. Luo	1235
Typical Structure Parts Library Design and Research on Machine Tool Fixture X.F. Zhang and Y. Cao	1240
Fault Tolerant Permanent Magnet Motor 's SVPWM Control and Analysis of Fault-Tolerant Performance under Fault Conditions J. Yang, J.B. Guo, H.C. Dong and H.D. Zhang	1244
Research on Control System of Quasi-Homogeneous Lean-Burn Engine J.J. Wang, J.W. Tao, H.D. Zhang and J.B. Guo	1248
Air Thin-Walled Parts Machining Precision Control L. Li	1252
Virtual Prototyping Simulation of Flexible Multi-Point Auxiliary Support Fixture for Blade Machining Y. Cao, J. Li, J.H. Tian and Q.M. Fan	1256
Research on Torque Control of Brushless DC Motor for Electric Vehicle W.Z. Liu, W.L. Wang, B.Q. Tao and J.W. Ma	1260
Design of Soft-Switched Inverter L. Wang, Z.Z. Zhang, F. Liu and G.B. Ding	1265
Research on Static Stiffness Test System for BIW W. Liu, L.L. Wang and C.H. Wang	1269
Design of Electromagnetism Compatibility for Automatic Loading System G.B. Ding, F. Yao, G. Ren and J. Yu	1273
Research on the Influence of Load Disturbance on the Crystallizer PID Control System J.X. Gao	1277
The Design and Research of Active Clamp Forward Converter Based on IR1150 Y. Fang and L. Tan	1281
The Detection on Hydraulic of a Certain Type Equipment Based on C8051F020 K. Cheng, L.T. Li, L. Lei and J. Luo	1285
Design of High Accuracy Robot Welding Machine for a Cone Bottom D.H. Tang and D.Y. Luo	1289
Disturbed Chaotic Systems Synchronization via Robust Mixed Functional Projective Method T. Fan, N. Fang and F. Tan	1293
Defect Detection of the Segmental Spherical Shell Based on Ultrasonic Transducer Array X.P. Li, C.G. Xu, L.J. Wang and W. Dai	1298
Dry-Mixed Mortar Control System Based on Fieldbus and PLC H. Zhang, S.Q. Shang, L.N. Gong and C.H. Huang	1304
Intelligent Identification and Locating System of Steel Coil Based on Laser Technology Y.C. Wang, S.Y. Zhou and Z.P. Yuan	1308
Research on Open CNC System for Rolling Machine Based on PMAC S.P. Deng, C.C. Cao, H.C. Sun and X.B. Wang	1313

Research on the Shift Schedule of Dual Clutch Transmission for Pure Electric Vehicle P. Han, X.S. Cheng, Y. Huang, Q. Gu and H.B. Hu	1318
Research of Single-Device Test Based on Relay Protection Simulation and Training System T. Wang, G.H. Lin and D. Han	1322
Design and Implementation of the Airborne Laser Effector for Autonomous Pipeline Alignment H.F. Liu, R. Wang and S.S. Zhong	1327
The Application and Improve of Fuzzy Clustering in Classifying Control Targets C. Liu, J. Li, J. Zhao and Z.D. Zhang	1333
Simulation Analysis of Synchronization Control for Ultrahigh Pressure Sterilization Equipment Based on AMESim G.H. Fang and X.Y. Li	1340
Far-Field Energy Density of the Laser Detection System Q. Liu and G.Y. Zhang	1344
Small Module Involute Gear Precise Modeling and NC Machining H. Sun	1348
The Variable PWM Frequency Control Research for the Motor in Wheel C.X. Song, S.L. Peng, S.X. Song, J.H. Li and Z. Zheng	1352
The Timing Control Research for the Motor in Wheel C.X. Song, S.L. Peng, S.X. Song, J.H. Li and F. Xiao	1356
Parameter Matching and Performance Simulation for a Distributed Power Extended-Range Electric Vehicle D. Wang, C.X. Song and S.X. Song	1360
Research on Airline Operational Control Model Based on Analytic Hierarchy Process L.S. Li	1365
Introduction to Intelligent Transportation Vehicle Detector Y.D. Chi, D. Yuan and X.T. Yang	1369
Research on a Fiber Bragg Grating Strain Sensor for Tower Vibration J.F. Geng, H.S. Cai, Y.T. Wei, X.H. Shen and J.W. Dong	1373
Monitoring and Control System of Underground Coal Gasification Based on Industrial Ethernet and PLC G. Li, W.J. Li, Q.Q. Su, C.F. Sun and Z.Y. Ge	1376
Design of High-Power Diode Laser Power Source by Single Chip J.J. Li, D.P.G. Yang, G. Guo and Z.Y. Li	1381
Design and Development on Full Scope V&V Simulator of Nuclear Power Plant Q. Gao, K.F. Zhou, S.G. Yang, H. Mao and J. Zhu	1385
Design of High-Speed Communication on the Detection Equipment W.X. Zhang, W.B. Bai, L.T. Li, J.W. Hu and C. Feng	1390
Inter-Stator Synchronous Combined Method Based on SVM-DTC for Primary Winding Discontinuous PMLSM L. Chen, H. Zhu, S.G. Sun, Y.Y. Li and L.G. Zhu	1394
Design of Missile Longitudinal Control System Based on Backstepping Control M.H. Li, J. Yin, X.Y. Sun, J.X. Xu and M.M. Zhang	1401
Self-Adaptive PID Control of Hydraulic Quadruped Robot K. Chang, X.J. Han and Y. Yang	1407
Research Gravity Compensation for Master Manipulator with Time Delay H.M. Wang, Z.J. Du, Z.K. Zhao and R.Q. Liu	1413
Design of Control System of Brushless DC Motor Based on DSP L.N. Duan and J. Zhao	1417
The Visual Analysis of the Research Front in Robot Field Based on Keywords Co-Occurrence M.H. Yang, T.F. Wang and Z. Zhang	1422
Research Humanoid Robot Walking Based on Vision-Guided Z.L. Zhang, Y.Y. Song, W.D. Zhang and S. Yin	1426
PLC-Based Network Control System of Nitrogen Pressure Machine W.J. Teng	1430
A New Design of Laser Pulse Receiver in the Automatic Control System L. Wang, B. Mo and K. Gao	1434

Service-Oriented Framework for Oil Fields Automation E. Cardoso Moraes and H. Augusto Lepikson	1438
FPGA-Based High Precision and Low EMI Switching Power Supply Design S.R. Zhang, Z. Li and A.J. Zhu	1442
Design of Temperature Controllor in Diamond Synthetic Chamber Based on Multi-Objective Particle Swarm Optimization H.Y. Hua and C. Zhao	1448
Simulation Analysis of Vector Control of Fuzzy-PID System Based on Mine Fanner Load Y.X. Wu, C.Q. Zhou, C.J. Zhang and P. Sun	1452
Research on the Network Based Protection to Settle the Distribution Networks Three-Phase Short-Circuit Faults with Distributed Generators Y. Xu, Q.C. Yuan, X.Y. Huang and L. Jiang	1457
An Ultrasonic Micro Scalpel Based on Exponential Horn Silicon Chip T.T. Wang, J.Y. Wang, W.Q. Zhang and H. Guo	1464
Autonomous Control of Non-Silicon MEMS Flexible Micro-Assembly Line G.Y. Zhang, X. Jin and Z.J. Zhang	1468
Research on Dynamics Measurement of Piezoelectric Sensor Based on PVDF Films Q. Zhang, Y.J. Li, G.C. Wang, R.J. Ma and X.Y. Zhao	1473
High-Voltage Three-Phase Asynchronous Motor Soft-Starter via Hyristor for Water Cooling System of Steel Mill Y. Yang and M. Yang	1477
Ceramic Filter against the Regeneration Air Pressure and Flow Control System Design X.L. Diao	1481
The Effective Use in the Process of Numerical Control Technology in Mechanical Manufacturing L.F. Yang and H. Sun	1485
A Method for Measuring Weld Bead in Grinding and Polishing Process J. Zhao, J. Zhao, L. Zhang, C. Fan and F.F. Han	1489
Design of Intelligent Transmission System for Mining Belt-Conveyor Group S.P. Deng, X.Y. Wang, Y.M. Qi, C.M. Wang and K. Sun	1494
Visualized Modeling and Simulation of Manufacturing Execution System in Dynamic Job-Shop Scheduling Y. Cao, L.W. Jia, S. Cao and Y. Bai	1498
Design of Ship Anti-Collision Alarm System Based on Laser Range-Finding X. Qu and W.G. Zheng	1502
The Electromagnetic Control Air Pressure Brake Valve in the Research and Application of Vehicle Brake System H. Sun and Z.X. Guan	1506
Servo Motor Control System and Method of Auto-Detection of Types of Servo Motors H.M. Zhang, L.S. Peh and Y.H. Wang	1510
An Improvement Geometric Error Identification Method of CNC Machine Tool Based on Double Ball Bar Q. Cheng, Z. Qi, K. Li, L.G. Cai and D. Lu	1516
A New Type Fatigue Machine Design with High Frequency Large Stroke P. Xu, H.Y. Liu, Y.T. Men, B.S. Xu, J. Lu and C.Q. Zhang	1522
Intelligent Remote Monitoring and Fault Diagnosis of Engineering Machinery System Design H. Sun	1526
The Design of New Automatic Loading Control System G.B. Ding, Z.S. Huo, G.Y. Lu and R. Zhu	1531
Multi-Axis Spiral Tool Path Generation for Aviation Blade Numerical Control Machining Y. Cao, Z.J. Wang and Y. Bai	1535
Optimal Selection of Cutting Parameters in Blade NC Machining Based on BP Neural Network and Genetic Algorithm Y. Cao, X.J. Dong and J. Du	1539
The Design of Breeding Cotton Growth Management System Based on MMS G.X. Li, J.W. Lu and F.L. Yin	1543

Design and Implementation of the Airport Surface Surveillance System Based on GeoTools J. Li, G.Q. Wang and P. Zhu	1548
Research on the Technology of RFID Sliding Sleeve L. Shi, X.J. Zhong, J. Wu and B. Li	1552
Optimal Control of Time-Varying Systems with Multiple Delays for Servo Applications Z. Li and S.X. Ding	1556
Two Degree of Freedom Helmet Mounted Sight Testing System J.F. He and Y.N. Wang	1560
Study on the Characteristics of the Automatic Tracking of Multiple Target Tracking J.F. He, M. Ji, S. Cheng and Y.N. Wang	1564
Intrinsically Safe for Continuous Automated Production Safety Technology of Unitary Detonating Powder F.J. Meng, L.H. Liu, L.G. Lai, F. He, Y.H. Zhang, Y. He and H.J. Chao	1568
A Pearl Automatic Sorting System Based on Image Identification Z.L. Bai, Q.R. Wen and M. Yang	1574
Development of Control System for MRS Groundwater Exploration Instrument Based on Ethernet D. Wu, Q.M. Duan, T.Z. Huang, L. Zhang, Y.J. Han and J.W. Shi	1578
The Application of GA-RBF Neural Network Generalized Predictive Control Strategy in Circulating Fluidized Bed Unit Y.B. Liu, H.J. Ling, J.H. Li, C.Y. Su and Z.Y. Yuan	1582
FPGA Implementation for CCD Driving and Laser Spot Position Detection Q. Liu, X. Yang and Y.N. Mu	1587
Developing a Communication between Calibration Tool and Electronic Control Unit Based on CCP Protocol W.J. Wang, Y.M. Gong and Y. Ma	1591
The Design of Environmental Temperature and Humidity Remote Monitoring System Based on AT89S52 MCU H.X. Li and J.H. Zeng	1595
Remote Control Stepper Motor Based on the GPRS H.X. Li and J.H. Zeng	1603
Research and Design of Embedded Crane Video Transfer System J.W. Leng and S. Dai	1609
Design and Application of Energy Monitoring System Based on Serial Port Server and B/S Framework Configuration J.W. Leng and X.L. Fu	1613
A Design of Model and Algorithm of Intelligent Scheduling System in Enterprise Railway Shunting Plan B. Ge, J.H. Han, Z. Wei and L. Cheng	1617
The Research on Fault Diagnosis System of Shimmer Sight Based on Image Analysis Z.L. Yu, H.F. Wu and Q. Song	1622
Water Monitoring System Based on ZigBee Technology J. Ou, D.P. Yang and Y. Pei	1626
The MMVC for the Nth Order Linear Discrete-Time Systems under Prospective Strong Intervention Q.J. Wang and R.D. Gai	1630
Design and Application of Monitoring System of Remote Video and Environment to Smart Substations X.J. Li and Z.H. Chen	1634
Office Automation System Model on Workflow Design Q.X. Chen and Y.Q. Liu	1638
Synchronous Issue of IR-Based Large Scale Volume Localization System Y.F. Wu and G.Y. Li	1643
Intelligent Smoke Temperature Alarm System Design Y. Hong	1648
Research of the Misalignments Compensation in Optical Systems Alignment Y.J. Cao, J.Z. Shang, Z.R. Luo and T. Jiang	1652

Study on Space Tether Retrieval Theory and Technology of Tethered Combination L. Yi, Z. Guo and J.F. Guo	1659
Design of a Edubot-Micromouse Based on MCU+FPGA H.M. Zhang, L.S. Peh and Y.H. Wang	1664
Research on Simulation of Applying SVC and STATCOM to Power System in Enterprises S.Y. Li and J.D. Huang	1670
Two Axes Micromouse PWM Generator Based on FPGA H.M. Zhang, L.S. Peh and Y.H. Wang	1674
Milling Tool Wear Identification Using Information Fusion C.W. Xu	1681
Multi-Agent Based Active Noise Intelligent Control H.F. Cui and N. Chen	1685
Design of Library Lighting Energy Saving System Based on Internet of Things G.Y. Yao and L. Song	1690
Design and Implementation of Remote Environment Surveillance System Based on GPRS J. Zong and M. Wu	1694
Analyze a Feedback System with the R-H Stability Criterion Y. Sun and W. Yan	1698
Wireless Warning System of Positive Pressure SCBA Based on GPRS H.B. Hu, J.S. Wang, H. He, G.H. Lin and Y.M. Zhang	1702
Design and Application of Low Power Wireless Temperature-Measuring System about Wine Fermentation S.Y. Sun, Z.Y. Wang, Y.N. Zhang and B.G. Xu	1707
Research on the Security Monitoring and Early Warning System of Oil Depot Station S. Wang, Y. Liu and Q.Z. Zhou	1711
Research on Real-Time Monitoring and Data Management of Hydraulic Test System Based on LabVIEW X. Liu, Z.J. Zhang, S.Z. Li, X. Jin and G.Y. Zhang	1715
A Miniature Laser Processing System Based on xPC and Image Processing X.H. Zhang, H.D. Yu, Z.W. Sun, Z.J. Yu and B.Y. Chen	1720
The Power Optimization Control of Shearer Based on ANFIS Y.H. Zhou, H.W. Ma, H.Y. Wu and Y.J. Zhao	1727
Design of Optimized Controller for Fault Diagnosis of Three Phase Induction Motor Using Genetic Algorithm N. Rajeswaran, T. Madhu and M. Suryakalavathi	1732

Chapter 4: Information and Communication Technologies, Processing of Data and Signal

The Random Sampling Method for Gas Sensing Signal Based on Compressed Sensing Q. Luo, B.H. Yang and D.M. Li	1739
Comparative Study on Sweat Fingerprints Photographic Effects between Full-Band CCD and UV Observing Photograph Systems D.Q. Tao, T. Liu, Y. Dong, Y.J. He and B. Yang	1744
Research and Realization of ADO.NET Database Access Technology X. Zhou and Z.H. Zhuo	1748
The Development of Database System of Parameter and Coefficient for the Common Shafting Parts H.M. Fang and G. Zhao	1752
The Actual Fusion Technology Application in Automobile Service Teaching L.F. Yang	1757
Research on Improved Association Rules Algorithm for Web-Based Chinese Short Texts C.Y. Yu	1761
The Impact of Filter Function on Structural Topology Optimization Z. Shang and Y.K. Sui	1766

Application of C4.5 Algorithm in Evaluation of Railway Large Maintenance Machinery Construction	
W.Q. Zhu and T.Y. Shi	1770
Design of a Manual Calculation System of Drawing Quantity with "Read Schemata"	
X.J. Wang	1774
A Fast Approach for SLCA in Keyword Query over XML Document	
L.Y. Wan	1779
GSPN-Based Modeling of Virtual Teams Building in Collaborative Process Planning	
Y.Y. Su, D. Liang and H. Dong	1783
Constraint Programming Method for Crew Schedule Recovery	
B. Zhu, X.L. Cao, Y. Wang and Q. Gao	1788
Direction Finding Using Rotated Long Baseline Interferometer	
M. Zhang, F.C. Guo and Y.Y. Zhou	1792
A Prototype Hardware for Gas Sensor Arrays Data Acquisition	
H. Zhang, B.H. Yang and D.M. Li	1796
Identification of Tool Based on Decision Fusion of Multi Features	
J.J. Wang, S.S. Zhang and W.P. He	1801
Extensive Particle Swarm Artificial Bee Colony Algorithm for Function Optimization	
Z. Yuan, Y. Zhou, W.L. Zhong and L. Zhou	1808
Research of Cloud Storage and Improved Distributed Strategy of Data Storage	
H.X. Mao	1812
A Generalized BoVW Model for Content-Based Image Retrieval	
W.M. Xu, H. Yang, K.L. Fang and X.H. Liu	1817
Study on an Anti-Collision Algorithm of RFID Based on Binary Searching of Backtracking	
M.L. Xu, L.J. Yu, C.M. Chen and S.Q. Cao	1821
Low-Power On-The-Fly Reconfigurable Iterative MIMO Detection and LDPC Decoding Design	
E. Rohani, J.W. Xu, G. Choi and M. Lu	1825
Formation Model of Enterprise Information Capability Research Based on Information Behavior	
L. Xu and L. Zhou	1830
Near-Band IR Small Scene Star Image Segmentation Based on Partial Histogram Grey Level	
Z. Wang, Z. Yan and W. Tan	1834
The Design of Digital Library Platform from the Perspective of Knowledge Management	
C.X. Wang and N. Liu	1840
Research on XML Data Structural-Integrity in XML Signature	
H. Chen, N. Liu, B.L. Liu and M.T. Luo	1844
Communication Security on MASs - A Literature Review	
H. Chen, B. Sun and N. Liu	1849
Research on Horizon Detection Algorithm Based on Dark Channel Prior for Images Captured by UAV	
B.B. Xu, J. Li, Z.Y. Guan, H. Yang and H. Zhang	1853
The Research and Application of USB Interface in the Design of FPGA	
X.P. Yin, Y. Li, W. Cheng and C. Chen	1857
Research on Classification of Privacy Protection Based on Improved Particle Swarm Optimization Algorithm	
Y. Chen, Y.X. Tang and Z. Zhou	1861
Research on Recommendation Algorithm in Social Networks	
H.X. Tang and X. Qian	1865
Using Single Image Parallelepiped for Camera Calibration	
Y. Tian, Z.W. Wang and F. Chen	1869
An Automatic Target Recognition Algorithm Based on Support Vector Machine	
H. Zhang, J. Li and B.B. Xu	1873
A XML Document Coding Schema Based on Binary	
D.J. Gu and L.Y. Wan	1877
Design of FMCW Radar Data Acquisition and Signal Processing System Based on Labview	
J.W. Leng and C.B. Shan	1881

Realization of 1024 Points Fast Fourier Transform Based on FPGA IPCore J.W. Leng and Q.Q. Xu	1885
Research on E-Commerce Intelligence Based on IOT and Big Data Z.L. Peng and Y.L. Huang	1889
Multi-Objective Particle Swarm Optimization with Comparison Scheme and New Pareto-Optimal Search Strategy W. Wang, W. Shen, C.L. Ying and X.Y. Yang	1895
Research on Computing the Covers of a Given Concept C. Wang, X. Yu, C.M. Xu, D.D. He and L.J. Wang	1901
Research on Security and Reliability Technologies in Cloud Storage H.X. Mao	1905
Intrusion Response Mobile Firewall Design in Ad Hoc Networks and Based on SMP Performance Analysis X.Q. Di, H.M. Yang and J.Q. Li	1909
Bayesian MRF Modeling and Graph Cuts for Phase Unwrapping with Discontinuity Phase FlawsA Comparative Study F.G. Zeng, G.M. Wu, J.D. Mai and J.M. Chen	1915
Water Quality Data Analysis Based on Cluster Algorithm J. Ou and S.Q. Li	1919
Research on Water Monitoring System of Coal Mine Based on Ontology D.P. Yang, J. Ou and X.R. Guo	1923
LED Chip Electrode Positioning Based on Machine Vision X.Q. Yan	1927
Image Decomposition Based on a Modified Bidimensional Empirical Mode Decomposition Method C. Wang	1931
Design of Intelligent Search Engine with Multiple Agents H.Y. Jin	1937
Quantum Safety Control System C.H. Zhou and J.H. Guo	1941
Design of an Internet of Things Intelligent Basket System K.W. Huang	1944
Electronic Textbook: Concept, Functional Analysis and its Problem of Construction Y. Luo and X.Q. Zhang	1948
A Flexible and Scalable Approach of Application Deployment Y.X. Li, Y. Peng, Y. Zhang and Z.L. Shao	1952
The Construction of Pay-for-Performance E-Commerce Trading Platform C.P. Li	1956
Based Stochastic Particle Swarm Optimization and Random Simulation for Solving Stochastic Dependent-Chance Programming N. Xiao	1960
A Hybrid Approach for Cases Classification of Medical Data X.Y. Chen, B. Liu and X. Xia	1965
Research on P2P Streaming Media Service System Based on Cross Domain L.F. Wang, M. Yan and Z.H. Han	1971
Design of Identification System Based on BCI J.H. Yin, Z.D. Mu and J.F. Hu	1975
Tolerance Information Granules Used in EEG Classification Z.D. Mu, J.F. Hu and J.H. Yin	1979
Features Extraction Method of Motor Imagery EEG Based on Information Granules J.F. Hu, Z.D. Mu and J.H. Yin	1982
DCT-Based Digital Image Steganography J.M. Zhou, Y. Pan and R.E. Yang	1986
Research on Teaching Reform and Practice of University Computer Foundation Course Q.L. Yang, L. Miao and W.B. Jiang	1991
Recognition Analysis of Wood Flour Mesh Number Based on External Rectangle Fitting Algorithm H.E. Ren, M. Liu and M. Zhu	1995

Design of Secure Communication in SWSN L. Xu, J.Q. Zhou, Y. Qi, J. Hou and Q.M. Li	1999
Constructe a Hierarchical and Architecture of Cloud Computing Frameworks Y.Q. Shi and Y.L. Zhu	2003
A New Network Selection Procedure Using Access Networks Consent Z.Y. Liu	2007
A Schur-Type Factorization of Central Extended Matrix L. Yang and C.F. Xu	2011
The Application of BCI Technology in Android RPG Game J.H. Yin, Z.D. Mu and J.F. Hu	2015
Research on Wireless Sensor Network Transmission System Q.X. Wu and J. Ou	2019
EEG Feature Extraction Based on Wavelet Decomposition J.F. Hu, Z.D. Mu and J.H. Yin	2023
The Improvement and Evaluation of an Analog Digital Television System's Availability and Users Experience Z.J. Li, C. Yang and X.Y. Wu	2027
Searching Path for Delay Protection Services of Fiber Channel Based on Security and Risk Equalization H.S. Gao and H.F. Wang	2034
Real-Time Bidding Based on MooTools without Refreshing Page L. Sun, Y. Zeng and H.M. Xing	2038
Interactive Consultation Based on MooTools Long Polling Techniques L. Sun, H.M. Xing and Y. Zeng	2042
Research on Workflow Management Model Based on Ontology in Data Center G. Chen	2045
The Application and Analysis of Chroma Keying by Using Adobe Ultra Software L.H. Huang and B. Gui	2049
Another Kind of Crack on .NET Programs Q.E. Wu, W.S. Gao and W. Hu	2053
An Application Development Based on Android Platform The Design and Realization of the Mood Release System S.Z. Zhao, T. Zhang and X.N. Liu	2057
The Method of Calculate Exponential Function M. Ji and J.F. He	2061
Automatically Extracting University Scholar Names Information and Classification C. Su, W.Q. Jia and F.J. Shang	2065
Researches on Data Correctness and Completeness in Cloud Computing Based on Game Theory Y.H. Yu and L. Wu	2069
Automatic Target Segmentation and Tracking in Intelligent Video Surveillance D.H. Yang, Y. Zhang and Y.P. Wang	2073
Application of Flash in the Analysis of Making Webpages and Mechanical Motiones H. Li, A.X. Yang, Y.Q. Zhao and Q. Wang	2078
A Study on Constructing On-line Seminar Based on the Mind Map N. Liu and C.X. Wang	2082
A Survey of Watermarking Algorithm Based on Edge Detection S. Zhi, Y.N. Zhang, C. Yang and J.B. Liu	2086
The Design and Implementation of Infrared Communication System J.M. Zhou, R.E. Yang and X.Y. Ni	2091
Research on Delay-Tolerant Network and Increasing Probability of Opportunistic Communication H.Q. Liu, S.W. Zhao and J. Shang	2095
Sparse Line-Optical Flow Field Computing Method Based on Lines Matching Z.Y. Guan, J. Li and H. Yang	2099
Design and Research on Data Warehouse of Insurance Industry J.H. Zhang, L. Lei, X.Y. Cui, Y. Wu and L.T. Li	2108

The Research and Construction of National Grid ERP Knowledge Management System Q. Wang	2112
ITS Platform Research Based on Cloud Computing A. Wang and B. Gui	2117
The Application Study on Choosing Course System Based on JBoss Cache of Distributed Cache Technology H.W. Mo	2121
Based on the User's Network Management Software Research Y. Zhao	2127
Face Recognition Based on Semiconductor Neurocomputer Y. Huang	2130
Network Topology Discovery Algorithm Based on MIB H. He, C.X. Li and C.Y. Gong	2134
Research on China's Web Accessibility to the Visually Impaired Q. Huang, W. Luo and H.C. Xia	2138
UTSE: A Game Engine-Based Simulation Environemnt for Agent J.W. Hu, C. Feng, Y. Liu and R.Y. Zhu	2142
The Study of Intelligent Learning Website S.D. Li, Y.X. Li, J.W. Deng and K.Y. Deng	2146
Research of AForge.NET in Motion Video Detection C.Y. Gong and H. He	2150
Study on Measuring Methods of Self-Physical Simulation to Radar Performance Q. Sun, Y. Sun and G.A. Zhou	2154
The Application of Dyadic Wavelets Transform Modulus Maximum in the Seismic Signal De-Noising Y.Y. Wang and F.X. Wang	2158
Research of Computer Network Information Security and Protection Strategy Z. Lu, Z. Xiong and K.Q. Tu	2162
Research on the Location of Parallel Line Labeling Based on Water System of Line Landmarks X.Y. Yang	2166
Assessment Model and Method Research of Information Security Risk Z. Lu, Z. Xiong and K.Q. Tu	2170
Community Detection in Social Networks C. Su, Y.K. Wang and Y. Yu	2174
Discussion on Preprocessing Technique of Geophysical Logging Data H.P. Yu and H. Wu	2178
Research on Medical Information Cross-Regional Integration Scheme Y. Sun, J. Chen and J. Song	2182
Design and Implementation of Broadcasting and Television Program Monitoring System X. Qi and J.P. Chai	2188
The Development of WEB Platform-Based on New Rural Social Endowment Insurance of Management Information System H. Wang and P.J. Dai	2192
On the Application of Digital Video Watermarking Technology Y. Wang	2196
Rate Allocation Algorithm with Successive Refinement in Peer-to-Peer Networks Y. Su and M. Lu	2200
Hardware Design of UHF RFID Reader for the Internet of Things L. Zhang, L.B. Jin and J.B. Liu	2204
Current Status and Development Trend of Research of Computer Forensic Z.Y. Fu and Z.Z. Zhao	2208
Infinitely many Solutions of Semi-Linear Elliptic Equation with a Logarithmic Nonlinear Term Y. Li and J. Qin	2216
Operating Mechanism of Teaching Quality Information System P. Li	2220

Design of Polytechnic College Practice Training Base Management System Based on Internet of Things Z. Zhang and C. Cheng	2224
Using One-Dimensional Linear Interpolation Method to Check Over-Fitting in Neural Network with Multi-Dimensional Inputs B.L. Hung and H.A. Hung	2228
Schur Factorization for Unitary Extended Matrix L. Yang	2233
Image Tamper Blind Detection Based on CFA D.S. Ji, R.Y. Yang, T. Cao, Y.K. Yao and X.Y. Chen	2237
A New Automatic Seamless Image Stitching Algorithm Based on the Gray Value of Edges J.L. Cao, L. Xu, S.S. Guo and D.X. Ding	2241
A Simplified Integration for Heterogeneous Database Application System C.Q. Li, G. Zhao, W.Y. Chai and L.N. Chen	2246
Information Granule Reduction and Cluster Based Partial Least Squares Applied in EEG Signals Z.D. Mu, J.F. Hu and J.H. Yin	2256
Based on Data Mining Technology in Distance Education System Applied Research P. Li	2260
College Campus Network Management Information System Research and Implementation P. Li	2265
High-Speed Architectures for Parallel BCH Decoders W. Liu and L.F. Zhao	2269
The Research of Excel File Fragmentation Data Recovery Z.Z. Zhao and Z.Y. Fu	2274
Realization of Communication Control for Bill Acceptor Based on Java Technology Z.Y. He and Z.F. He	2279
Extension and Update for Meteorological Metadata Q.J. Yang, F. Li and X.Y. Chen	2283
On Ethernet Applications in the Field of Vehicle Network Y.D. Chi, D. Yuan and X.T. Yang	2287
Research on Advanced Algorithm of Angle Bisector Line Landmarks Labeling X.Y. Yang	2291
A XML Information Integration Model Based on Ontology D.J. Gu and L.Y. Wan	2295
Experimental Study of FPCA on its Generalization Performance in Image Classification K.W. Huang	2299
Decision on Function of One Simple Separable Relation for the Minimal Covering of P_K^* Y.Z. Liu, X.B. Liu and X.F. Zhang	2303
Optimization of SVM Method with RBF Kernel C. Wang	2306
The Study of the Workflow Process Model in OA System Q.X. Chen and Y.Q. Liu	2311
Integrated Process Planning Method for 3D Designing Environment H. Chen and X.T. Du	2316
Research of Active Knowledge Aided System in the Bearing Design X.A. Zhang, J.X. Li and H.F. Cui	2320
3D CAD Model Retrieval Based on Oriented Bounding Box and Normals Distribution Q. Chen and Y.M. Yu	2324
The Introduction to MooTools Architecture L. Sun, H.M. Xing and Y. Zeng	2328
Loss-and-Noise Tolerant Single-Shot Quantum Coin Flipping S.B. Huang, S. Zhang, J.B. Chen, D.Y. Ji, J. Liu and W. Ye	2332
Design of the Small World Model by NS2 J. Shang, H.Q. Liu, Q. Liu and Z.Q. Liu	2338
Research on Equipment Maintenance Support System Based on B/S Structure L. Lei, J.H. Zhang, L.T. Li, W. Peng and Y. Wu	2342

Study on Automatic Diagnosis of Remote Support for Equipment Fault X.D. Cheng, L. Lei, J.H. Zhang, S.C. Chen and W. Peng	2346
Research on CHAID Algorithm Application in Mobile Population Management Field W. Dong, S. Qiao and Q.R. Wu	2350
Construction and Enumeration of Steiner Triple Systems with Order V Z.D. Xu, X.Y. Li and W.X. Chou	2355
Research on the Architecture of Shaanxi IoT Industry Chain X.X. Yang and J.J. Li	2359
Methods of Constructing and Enumerating the Spanning Tree of a Connected Graph Z.D. Xu, X.Y. Li and W.X. Chou	2363

Chapter 5: Materials and Technologies in Construction

Mechanical Performances of Aluminum Cellular Metal with Kelvin and Cubic Structure X.B. Dang, K. He, J.H. Li, W. Feng and R. Du	2369
A Monitoring Method for Transmission Tower Vibration Based on Fiber Grating Sensor Technology X.Z. Zheng, F.Y. Meng, X.H. Shen, J.W. Dong and D.F. Ma	2375
A Resistance Model of Carbon Fiber Composite Materials Based on Interfacial Effect J. Wu and A.Q. Xu	2379
Cellular Concretes Based on Nanostructured Perlite Binder N.V. Pavlenko, V.V. Strokova, A.V. Cherevatova, D.D. Netsvet and E.V. Miroshnikov	2383
Unbonded Prestressed Concrete Design Characteristics and Construction Technology P. Pang	2387
Green-Wall Materials in New Rural Construction Projects J. Chen and T.B. Wei	2390
Test Research on Influence of Water and Mineral Composition on Physical and Mechanical Properties of Phyllite X.Z. Li, G.F. Wang and L. Cao	2398
Experimental Study on Mechanical Properties of Synthetic Macro-Fiber Reinforced Reactive Powder Concrete K. He, H. Yang, F.F. Jia, E.P. Wang, Z.B. Lu, J.Y. Liu, X.L. Liu and Q.X. Dong	2402
Research of Waste Recycling Natural Fiber Materials at Green Roof C.C. Chen and C.C. Lee	2407
Test Study on Interface Properties between Different Geogrids and Clay X.F. Zhu, J.Y. Wei, B.T. Wang and Y.L. Zhang	2411
Application of Wood-Plastic Composites in Exhibition Design Y. Lei and L. Li	2416
The Analysis of Prestressed Short FRP Confined Columns under the Action of Eccentric Load J.D. Zhan, Y.J. Wu, X.Y. Zhou and X.G. Chen	2421
The Influences of Different Temperature Histories on the Assessment of Cracking Resistance Based on the Concrete Thermal Stress Test X.F. Song, Y.F. Wang and C. Li	2426
Electromagnetic Wave Absorption Properties of Cement Filled with Carbon Black Y.F. Zhang, W.J. Hao, Y.P. Duan and S.H. Liu	2431
Based on the Urban Waterfront Landscape Image of the Waterfront Place Design F. Jiang and Y.N. Zheng	2435
Study on the Rutting Test Using Cylinder Specimen with Flexible Constraint C.H. Zhao, X.L. Zhu, Y.P. Li, Y. Pan and R. Gao	2439
Welding Residual Stress Evaluation of Complex Welded Joints by Brinell Hardness Method Q. Zeng, D.Q. Tao, Z. Zhou and X.Q. Li	2444
Greenway Construction in Shunde District Y.N. Zheng and F. Jiang	2452
Theoretical Calculation of the Strength of the Mass Concrete W. Li, D.C. Wu, X.G. Chen and J.T. Hou	2456

Seismic Performance Research of Viscous Dampers under Different Arrangement T.F. Zhong, B. Yu and G.Q. Wu	2461
Vibration Serviceability Assessment of a Residential Building J.Y. Lei, C. Lian and D.G. Luo	2465
Comparison of One-Way Shearing Test between Coarse-Grained Soils and Reinforced Earth G.D. Deng, J.S. Zhang, X. Shi, F. Meng, L.L. Song and X.F. Cao	2469
Secondary Moment Distribution of Prestressed Concrete Slab P. Pang	2474
Emergency Response and Control Technology for Landslides in Northern Fujian D.L. Zhu and H.G. Li	2478
Compressive Strength Tests of Recycled Green Concrete Containing Ground Granulated Blast-Furnace Slag J.G. Sun and Y.L. Gu	2486
Stability Analysis of Surrounding Rocks and Initial Support Structure in Phyllite Tunnel Construction Process X.Z. Li, G.F. Wang and Z.R. Zhu	2491
Investigation and Analysis of Seismic Safety of Farmhouses in the Tanlu Fault Zone J. Zhang, Y.H. Wang and R.Q. Xie	2495
Prestressed Concrete Beam Bridge Design and Main Parameters of Prestressed Steel Beam Calculations and Arrangement X.J. Yin	2501
Research on the Application of Radial Basis Function Neural Network to Structural Reliability Analysis of Gravity Dam Y. Ji, X.Q. Liu, T.C. Li and S. Li	2505
Analysis on Ground Vibration Induced by Subway under Three Track Structures D.M. Shen, L.D. Zhang, J.H. Xia and S.T. Xue	2511
Prestressed Concrete Continuous Beam Bridge Span Arrangement and Structure Size Proposed Analytical C.H. Dong	2516
Analysis of Factors Affecting Stability of Tunnel X.Z. Li, J. Liu and X.L. Li	2520
The Practical Application of Building Information Modeling in the Construction Phase of the Building Life Cycle Y.M. Su and C.Y. Lan	2523
Application Study of Green Building Technology of Townlet under Rural-Urban Integration Y.S. Huang and J.K. Tan	2529
Experimental Research on Physical and Mechanical Properties of High-Speed Railway Subgrade Filler X. Shi, J.S. Zhang, G.D. Deng and F. Meng	2533
The Relationship between Taiwan Green Buildings, Humanity and Aesthetics Y.M. Su and C.H. Lin	2538
The Importance of the Appearance Image and Cognition of Green Building Y.M. Su and Y.P. Tsai	2544
The Types of the Components of the Stores' Facades in City Centre - By Comparison between Nanjing City (China) and Fukuoka City (Japan) Q. Shen, Z.H. Liu and Z.L. Yang	2549
Economic Comparison for the Protection Scheme of Ancient Building Based on BIM R. Wang, X. Zhang and T.T. Han	2553
The Study on Digital Fabrication System in the Construction Process S. Liang, M. Gao, S.J. Wang and L.Z. Zhang	2557
Technical Analysis of Optimal Design for Building Structure Considering Cost Constraint of Project Y.E. Hao and Y.Q. Lan	2563
The Field Office Survey for Lighting Environment in Taiwan Y.S. Lin, T. Koga, K. Hirate and Y.C. Kuo	2569
All Steel Structure Portal Frame Light Building Structure Design S.J. Zhang	2575

Empirical Study on Highway Subgrade Construction Scheme Design X.Y. Zhang	2578
Study on the Design of SMA Mixture on Expressway J.P. Xu and F.M. Liu	2582

Chapter 6: Product Design and Engineering Management

Study the Structured Approach to Improve Manufacturing Configuration before Design Readiness H. Chen and J.J. Shi	2589
The Research on Rapid Design and Manufacture Method for Letters Product Based on RP Technology S. Zhao, D.Q. Zhang and N. Hu	2594
Application of Integrated Concept in Industries for Maximizing Energy Saving Potential Y.R. Dai and J. Wang	2598
Study on Design of Huxiang Smoked Bamboo Furniture J. Zhao, Z. Li, P. Zhao and Z.F. Zhang	2603
Fengxiang Clay Sculpture in the Design of the Product of Contemporary Opportunity Y. Zhang, L.L. Chen and M.C. Wang	2607
Key Technologies of Rapid Modeling for Additive Manufacturing Z.W. Liu and H.Y. Zhang	2611
Campus Souvenirs Design Research Based on Emotional Needs X.X. Liu, L. Gan and H.P. Zhao	2616
The New Model Research of Product Design Services Based on Cloud Computing X. Liu, S.H. Yu, M.L. Zhao and G.C. Liu	2621
Analysis of Apple's Design Management Policy H.N. Pei, S.H. Yu and B.Z. Tian	2626
A Study on Introduced Visual Design Elements Applied to the Product Packaging Design C.C. Shen	2630
Flow-Oriented Collaborative Process Planning System Y.Y. Su, D. Liang and H. Dong	2634
Intention Bionic Principle of Automotive Body Shape Design L.M. Fu and H.Y. Yu	2638
Virtual Prototype Modeling and Simulation of Remote Controlled Weapon Station J.H. Tang	2643
Customized CAD System Design Based on GMDH Method for Racing Bikes X.Q. Cheng, H.Y. Liu, C.L. Yang and J.H. Wang	2647
Bus Body Design and Calculation of Aerodynamic Drag Coefficient C.K. Liu and J. Wang	2655
Application Study of the Virtual Freeform in Product Development Design R.B. Hu, X.Y. Suo, K.Q. Wang, R.P. Xu and Z. Gao	2660
A Study of Application of Upholstered Furniture Design Z. Gao, X.Y. Suo and R.B. Hu	2665
Analysis on Site Design of Road Landscaping in GuangDong Y.N. Zheng and F. Jiang	2669
Adaptable Design Methodology of Heavy Duty Machine Tool for Green Remanufacturing L.G. Cai, K. Li, Q. Cheng, Z. Qi and P.H. Gu	2672
The Innovative Product Design of the Superhighway Speed Card R.L. Lin	2679
A Study of the Innovative Design of Picture Book Creation Using Mixed Media R.L. Lin	2683
The Effect of 3D Printing Technology on the Future Fashion Design and Manufacturing B.Z. Wang and Y. Chen	2687
Spreading the Culture of a Sustainable Manufacturing of Eco-Fashion Products. Focus on International Brands that make the Synergy between Fashion Design and Sustainability their Success C. Ceppa	2692

Research on Evaluation of Collaborative Development Organization for Complex Production System E.Q. Zhang and M. Li	2697
Based on the Multifunctional Treadmill Structure of Human Body Engineering Design M.H. Sun	2703
Proposal of Eco Design for Chinese Manufacturing M. Sun, Y. Ru, C.X. Li and Y.C. Sun	2707
Exploring Industrial Design with the View of Ecological Nature L. Chen, Y.F. Cao and X.S. Zhang	2711
Research on the Color of Anchor Handling Towing Supply Vessel X.X. Liu, W.S. Li, X. Li, C.M. Huang and Q.Y. Liu	2715
Wind, Thermal and Hydropower Joint Operation Benefit Analyzes Based on the Life Cycle Management Z.F. Tan, L. Sun, H.H. Li, L.W. Ju and Z.H. Chen	2720
Based on Reliability Importance Measures Method of Comprehensive Evaluation of Electric Power Communication Equipment H.S. Gao, X.P. Qiao and H.F. Wang	2725
Connector Structure-Based Modeling of Assembly Sequence Planning Y.Y. Su, D. Liang and H. Dong	2729
Risk Assessment of Cascading Failures in Power System Based on Fuzzy Theory F.C. Zhang and J.D. Huang	2733
A Non-Probabilistic Model for Structural Reliability Analysis X.Z. Qiao and Y.Y. Qiu	2737
Research on Brittle Source of Airline Network J. Du, J.F. Zhu, W.W. Wu and S.Z. Xu	2742
Individual Design of Mechanical and Electrical Products Based on Reverse Engineering Z.Q. Wu and T.J. Wu	2746
A Model of the Driving Fault Tolerance of Traffic Management and Control Facilities at Urban Intersections M.R. Chen, Y.L. Pei and L.W. Hu	2751
Consideration of Planning a Mobile Hybrid Operating Room X.G. Zhao, X.X. Xu, F. Niu, Z.G. Liu, H.J. Wang and X.D. Ren	2756
The Impact of Initial Allocation of Carbon Emission Rights on Power Generation Replacement Analysis Model Z.F. Tan, T. Lei, H.H. Li, L.W. Ju and Z.H. Chen	2760
A Study on Semantic Design of Speakers J. Han, P. Peng and X.W. Li	2764
Evaluation on Comprehensive Protective of Protective Engineering Based on Input-Output DEA Model of Two Goals J.Y. Liu, H.X. Wang, L. Li and C.Q. Fu	2768
A Model for Management of Large-Area Crop Rotation L. Sun and Z.S. Zhu	2775
Risk Analysis of Marine Riser Based on Improved Fuzzy AHP Method S.R. Yu and X. Liu	2779
Evolutionary Game Analysis of the Cooperation Motives of Mobile Operators and Financial Institutions in the Near Field Communication Mobile Payment Industry M.H. Wei and S.L. Tang	2784
Application of the Fuzzy-AHP Method in Bridge Crane Safety Evaluation G. Shen, D. Xiang, N. Liu, P. Mou and Y. Yang	2788
Shaanxi-Shehuo-Mashao-Mask-Based Office Supplies Design Studies M. Xiao, L.L. Chen and X.P. Wang	2795
A Study of the Design Aesthetics of Picture Book Creation Using Mixed Media R.L. Lin	2799
A Design Science Study of Picture Book Creation with Mixed Media R.L. Lin	2803
A System of Systems Approach to Supply Chain Design E. Mastrocinque, B. Yuce, A. Lambiase and M.S. Packianather	2807

Data Acquisition and Quality Assurance Integration Platform Based on DPM J. Wang, W.P. He, Y.L. He, X.S. Li and G.F. Guo	2815
Forecast on China's New Energy Vehicle Market Demand J. Shi, B. Liu, Y.H. Huang and H.L. Hou	2822
Study on Information Asymmetry and the Risks Initiated by it in the Supply Chain Finance G.F. Qiu, Y. Zhang and C. Wang	2827
A Study on the Future Development Trend of Virtual Clay Technology X.Y. Suo, R.B. Hu and R.P. Xu	2832
Application of BIM in Project Management K.W. Huang	2836
Postal Universal Service Fund Collection Study from the Express Industry in the Information Age J.T. Han and C.H. Yuan	2840
Power System Cascading Failure Risk Assessment Model Based on Graph Theory F.C. Zhang and J.D. Huang	2844
Enterprise's Brand and Products Shape-Designing DNA Y.S. Li	2848
The Solution of an Integer Problem Based on Geometric Method J.M. Zhou, J.R. Guo, R.E. Yang and W.H. Li	2852
A Research Review of Project Risk Assessment Methods Z.C. Chen, L. Yao and J.J. Yang	2857
Preliminary Hazard Analysis on Fire and Explosion Hazard of Stevedoring Process in LNG Terminal F. Qu, X. Wang and Z. Zuo	2863
Analyzing and Constructing the Operation Mechanism of Industry Technology Alliance H.B. Cong	2867
The Empirical Analysis of Small and Medium Sized Pharmaceutical Enterprises Operating Performance and Debt Source Structure J.J. Li	2872
Analysis of the Daily Management Classes Problems J. Li	2876
The Effective Management of Chinese Enterprise Procurement through Research M.L. Tian	2880
Evolution of Innovation Cooperation Networks in the Marine Industry F.X. Qiu	2884
Research of the Office Chair Coding Technology Based on PDM Z.H. Tang, W.J. Liu and G.Q. Zhang	2888

Chapter 7: Urban Planning, Transportation and Environment

The Study of the Relationship among Airline Network Profit, the Total Numbers of Node and Airline Passenger Flow S.Z. Xu, J.F. Zhu, Y.H. Wang and J. Du	2895
Research on the Terminal Aircraft Separations Based on the History Surveillance Data Z.H. Xia, W.J. Pan, R. Kang and X.L. Luo	2899
Study on the Construction of Yichang River Cruise Homeport J. Wang	2904
Landscape Ecology Design in Development Zone F. Jiang and Y.N. Zheng	2908
Optimizing Method of Express Delivery Network and Vehicle Routes Based on Automatic Parcel Machine Y.M. Qin, H.J. Mao and Y.H. Li	2912
Evaluating Public Perception for Environmental Attributes of the Zengcheng Greenway (Guangzhou) J.Y. Wu	2917
Research of Planting Different Species on Cooling Effectiveness C.C. Chen and C.C. Lee	2921

Study on Community Residential Space with Block Unit Mixed Community Theory in Rapid Urbanization Region: Taking Xi'an Changning Newtown Community Planning as an Example	
Q.H. Hou and C. Liu	2925
The Investigation and Analysis of Environmental Geological Problems in Coal Mines in Yulin City	
B. Tang and X.G. Zhao	2933
Flow Comparison of the Traffic Model Based on Safe Driving	
W.J. Pan and C.Y. Huang	2937
Research on Flight Delay Based on Adaptive Agent Digraph	
J. Du, J.F. Zhu, W.W. Wu and S.Z. Xu	2942
Design and Simulation of Improved One-Dimensional Cellular Automaton Model	
R. Kang and K. Yang	2946
Time-Space Research of the Two Safety Deceleration Models	
W.J. Pan and N. Lu	2950
Inactivation of Bioaerosol in Indoor Air by DC Corona Discharge	
Y. Kang, H.C. Ying, W.W. Shao and Z.C. Wu	2955
Risk-Based Approaches for the Remediation of a UST Site: A Case Study	
B.R. Lien, W.H. Huang, Y.T. Sheu, S.L. Lin and C.M. Kao	2959
The Influence of Airline Network Passenger Flow, Fares on Airline Network Profit	
S.Z. Xu, J.F. Zhu and J. Du	2963
Urban Forms is Changing from Transport and Land Use	
C.N. Li, K.C. Hsu, C.W. Lo and Y.K. Hsieh	2967
A Method to Create the Traffic Accident Scene Graphic Based on Electronic Maps and Information Acquisition Device	
W.J. Liu, S. Su, F.P. Wang, K. Li and Z.Y. Yin	2971
Computing Hybrid Rotation Period of Cotton-Rice and Cotton-Others	
L. Sun and Z.S. Zhu	2975
Analysis of Urban Greening Maintenance and Management in the Shunde District	
F. Jiang and Y.N. Zheng	2979
Research on Apparent Viscosity Behavior of Municipal Sludge	
S.H. Zhao, B. Lou, W. Qian and X.F. Long	2984
Research on Reliability of Urban Agglomeration Transport System after a Disaster	
Z.M. Wei, X.L. Zou, M. Li, W. Li and C.B. Li	2989
National Highway Video Surveillance Networking Platform	
P.Y. Gao, J. Wang and M.H. Zhu	2996
Study on Ecological Restoration of Abolished Strip Mine of Hulunbuir Grassland	
W.B. Guo, T.K. Liu and J.D. Wang	3000
Species Composition and Succession Discipline on Lava Flow of Different Periods Volcano, Wudalianchi China	
Q.Y. Huang, J.F. Wang, D.G. Zhu and H.W. Ni	3005
An Area Growth Model of Eichhornia Crassipes with Application to Lake Ecosystem Restoration	
L. Sun and Z.S. Zhu	3009
The Effects of Safety Deceleration Rule in Traffic System	
K. Yang	3013
Effect of Diagenesis on the Formation Effective Reservoirs in Volcanic Rocks of Xujiaweizi Faulted-Sag	
Z.J. Li, Y. Zhang and X.M. Wang	3017
Traffic Flow Turbulence Characteristics Research Based on the Cellular Automaton Model	
Z.P. Huang, L. Cheng and W.H. Zhang	3022
Crop Water Production Function of Processing Tomato (<i>Solanum lycopersicum</i>) under Regulated Deficit Irrigation	
H.J. Zhang, A.C. Wen and J.D. Zhang	3026
Comparison of Different Means to Determine Postcrash Velocity in a Real-World Vehicle-Pedestrian Accident	
S. Su, W.J. Liu, F.P. Wang, K. Li and Z.Y. Yin	3031
