## Preface

## Chapter 1: Functional Materials

|                                                                                                                                                                                                                                                     |    |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| <b>White-Beam X-Ray Sectional Topography of Anthracene Single Crystals Grown by Physical Vapor Transport Technique</b><br>S. Jo, K. Kajiwara and H. Yoshikawa                                                                                       | 3  |
| <b>Nano-Titanium Dioxide Coatings for Enhanced Performance of Pantograph Support Insulators in Electric Railway Systems</b><br>N. Tonmitr, A. Suksri, W. Kampeerawat, N. Kano, M. Suwannaruang and S. Tanusilp                                      | 9  |
| <b>H-Adsorption by Alkali Metal Ions (Li, Na, K) Doped on SiO-SnO towards Battery Technologies and Clean Energy: A DFT Study</b><br>F. Mollaamin and M. Monajjemi                                                                                   | 15 |
| <b>Influence of the Aging Time in the Hot Swaged Ti-12Mo-13Nb Alloy: Microstructure and Properties</b><br>E.D. Vicente, C.M.F.A. Cossu, A.I.d.C. Santana, C.A. Nunes, A.R.V. Nunes, J. Dille, B.B. de Lima Kühn, L.H. de Almeida and S.G. Borborema | 29 |

## Chapter 2: Green Synthesis and Applied Biotechnologies

|                                                                                                                                                                                                                                                   |    |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| <b>Green Synthesis of Irregularly-Shaped Gold Nanoparticles and its Potential as a Photocatalyst against Methylene Blue Dye</b><br>G.F. Cabrera, D.H.R. Astrera and J.J. Monserate                                                                | 39 |
| <b>Characterisation of Fibres from Pandanus Atrocarpus Leaves: Morphology, Functional Structure, Thermal Stability, and Dielectric Properties</b><br>B.S. Yew, S.A. Hashim, F.H. Wee, I.Y.A. Fatah, N.H.M.Y. Ariffin, M.N.F. Pargi and M. Muhamad | 59 |
| <b>Morphological, Structural and Chemical Analysis of Bioleached Kaolin by <i>Bacillus</i> Species</b><br>M. Rajamohan, S. Chieng, S. Lim, K.K. Chong and S.H. Kuan                                                                               | 65 |

## Chapter 3: Waste Recycling

|                                                                                                                                                                                                   |    |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| <b>Characterization of New Rubber Compounds with Incorporation of Recycled Rubber Powders</b><br>N.S. Domingues and L.M. Gonçalves                                                                | 73 |
| <b>Characteristic of Surface Modification of Eco Processed Pozzolan (ePP) with n, n- Dimethyl Dodecyl Amine (oePP): Temperature Profile</b><br>M.A. Mohamad Rosli, C.H. Nur Syuhani and F. Hamzah | 79 |

## Chapter 4: Building Materials

|                                                                                                                                                                                  |     |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Strength and Deformation Properties of Concrete and Structures on Porous Aggregates of the South of Ukraine</b><br>I. Stolevich, O. Posternak, A.I. Kostiuk and N. Urazmanova | 87  |
| <b>Research of the Process of Microbiological Destruction of Wood - Polymer Composite</b><br>Y. Tsapko, I. Kasyanchuk, O. Bondarenko and O. Tsapko                               | 99  |
| <b>Modelling the Effect of Short-Term Repeated Loading with Plastic Deformations on Foam Materials</b><br>O. Mikulich, T. Kradinova, O. Huda and N. Komenda                      | 109 |
| <b>Non-Stationary Nonlinear Problem of Moisture Transport in Porous Building Materials</b><br>M. Riabchykov, O. Alexandrov, M. Alexandrov and Y. Sychov                          | 117 |
| <b>Experimental Research of Gypsum Concrete with Organic Filler</b><br>O. Horb, Y. Avramenko, K. Omelchenko and I. Mashkov                                                       | 127 |
