

Table of Contents

Preface

Chapter 1: Functional Materials

Effect of Different Melt Treatment Methods on Microstructure and Thermal Stability of Al-Si Alloy

X.S. Li, R. Liao and W.Y. Zhong 3

Photoluminescence of Silver-Doped ZnO Nanostructures

B.C.P. Millán, C.E.C. Montufar, F.M. Hernández and E.V. Hernández 11

Chapter 2: Materials for Biomedical Applications

Experimental Study on the Wear Characteristics of Textured Joint Surfaces under Bionic Lubrication

C.X. Zhu, X.Y. Wang and W. Ma 19

Recent Trends and Notable Advances of Alginate Based Nano-Particles for Effective Biomedical Materials: Wound Healing and Drug Delivery

S. Kim 27

Chapter 3: Materials and Technologies for Microelectronics

Reliability Test of Inkjet-Printable Silver Conductive Ink

A.S. Abd Aziz, S.Z. Rejal, N.A. Rashid, S. Sulaiman, S.M.H. Syed Mohd Jaafar and H.W. Lee 35

Stability and Power Analysis of Schmitt Trigger Based Low Power SRAM Bit-Cell Using CMOS and CNTFET Technology at 22nm Technology Node

U.R. Shirode, R.D. Kanphade and A.S. Gaadhe 41

Hybrid rGO-AgNPs Conductive Ink for Inkjet Printed Flexible Humidity Sensor

N.A. Rashid, N.H. Ismail, A.S. Abd Aziz, S.M.H. Syed Mohd Jaafar, S. Sulaiman and H.W. Lee 47

Chapter 4: Power Semiconductor Devices

A Modeling of 4H-SiC Super-Junction MOSFETs with Filtered High Energy Implantation

M. Lim, C. Csato, J. Förthner, O. Rusch, K. Ehrensberger, B. Kupfer, S. Beuer, S. Oertel, D.W. Byun, S.J. Kim, S.M. Koo, H.K. Shin and T. Erlbacher 55

Fabrication of Quasi-Vertical GaN-On-SiC Trench MOSFETs

J. Evans, J. Patel, A. Ben Khaial, N. Burridge, R. Hyndman, F. Monaghan, M. Jennings, H. Ashraf, R. Harper and M. Elwin 61

Optimized 750V SiC MOSFETs for Electric Vehicle Inverter Operation

A. Salemi, B. Zhu, P. Bui-Quang, Y. Ding, K. Chatty, A. Liu and D. Sheridan 67

Influence of Cell Design and Gate-to-Source Voltage on Avalanche Robustness of SiC MOSFET Integrated JBS Diode

C.Y. Jiang, H.Y. Xu, S.L. Yang, H.Y. Wang, N. Ren and K. Sheng 71

Enhanced Device Performance with Vertical SiC Gate-All-Around Nanowire Power MOSFETs

D. Yang, S. Wirths, L. Knoll, Y. Han, D.M. Buca and Q.T. Zhao 77

Suppression of Short Channel Effects for a SiC MOSFET Based on the S-MOS Cell Concept

M. Rahimo, I. Nistor and D. Green 83

Chapter 5: Eco-Friendly Building Materials and Technologies

Properties of Geopolymer Mortar Mixtures Containing Waste Glass Aggregates and River Sand	
N. Kozhageldi, C.S. Shon, G. Kareken, A. Tukaziban, M. Mardenov, D.C. Zhang and J.R. Kim	93
Development of a Novel Low-Energy Building: Effects of Room Orientation and Wall Materials	
A. Sedaghat, S.M. Soleimani, M.I. Al-Khiami, M. Sabati, M. Rasul, R. Narayanan and M.M.K. Khan	101
Properties of Pervious Concrete Made with Ferrochrome Slag as a Coarse Aggregate	
K. Al-Jabri and K.M.A. Abosohel	109
Effect of Glass Powder on High-Strength Self-Compacting Concrete Durability	
M. Amin, A.M. Zeyad, B.A. Tayeh and I.S. Agwa	117
Shear Behavior of Reinforced Fiber Concrete Beam Using Steel Lathe Scrap Waste and End Hooked Steel Fiber	
D.F. Arafa and M.S. Moawad	129
Characteristics of High-Strength Concrete Reinforced with Steel Fibers Recovered from Waste Tires	
A. Alrefaei, M.M. Alsaadawi and W. Wagdy	145
Development of Architectural Green Mortar Incorporating Waste Glass and its Impact on Energy Saving in Buildings	
M.G. Eisa, H. Sameh and M.M. Abd El-Razik	157
