

Table of Contents

Empirical Relations for Tetrahedrally Coordinated Semiconductors L. Hrivnak	1
Evidence for the Dislocation-Induced Deep Traps in GaAs T. Wosiński	9
X-Ray Diffractometry of Very Thin LPE InGaAsP and InP Layers	13
Low Temperature Photoluminescence Characterization of Acceptors in Vapour Phase Epitaxial GaAs B. Pödör, L. Andor, A. Nemcsics, K. Somogyi and I. Gyuro	17
Deep Levels in SI GaAs Crystals by Spectral Photoconductivity and Photoluminescence J. Pastrnak	21
Deep Levels in GaAs_{1-X}P_X under High Hydrostatic Pressure J. Zeman, V. Smid, J. Kristofik, P. Hubik, J.J. Mares, V.Y. Prinz and S.N. Rechkunov	29
Ion Beam Bombardment Induced Composition Changes at the GaAs Surface Investigated by AES M. Procop	33
Photoluminescence Study of Ge-Doped GaAs Grown by Liquid-Phase Epitaxy L. Andor, L. Csontos and J. Pfeifer	37
Dopant Influence on Structure Perfection of GaAs Single Crystals I.V. Stepanтова, V.B. Osvensky, A.V. Markov, S.S. Shifrin, U.A. Grigoriev and V.T. Bublik	41
Dislocation Density of Doped GaAs Single Crystals Grown by HB Method B. Stepanek, F. Moravec and Z.I. Mu	45
Peculiarities of Point Defects Structure in Single Crystals of InP: HALL Data A. Martinaitis, A. Sakalas and G. Steponkus	49
Dynamics of Avalanche-Like Electron Heating, Relaxation Oscillations and Chaotic Response Behaviour in Multilayer Heterostructures A.M. Belyantsev, A.L. Zheleznyak, A.A. Ignatov, V.I. Piskarev, V.I. Shashkin, M. Sinitsyn and B.S. Yavich	53
Hole Transport in GaSb with Isovalent Doping by In and N P. Doubrava, F. Moravec, V. Sestakova, V. Lescenko and E. Kucys	59
The Influence of Barrier Unintentional Impurities on Characteristics of Two Dimensional Electron Gas at GaAs/AlGaAs Heterojunction P.S. Kop'ev, S.V. Ivanov, N.N. Ledentsov, B.Y. Mel'tser, M.Y. Nadtochi and V.M. Ustinov	63
The Novel Nonquilibrium Electron-Hole System at GaAs-Electrolyte Interface V.M. Asnin, Y.V. Jilyev, T.R. Markaryan, A.A. Rogachev, A.Y. Silov, S.M. Starobinets and V.I. Stepanov	67
Transport Effects in Space Grown p-Type GaSb Crystals I. Gyuro, V.V. Popov, B. Pödör and R.V. Parfenev	71
Transport Coefficients for Non Polar Optical Phonon Scattering B. Pödör	75
X-Ray Topographic Investigation of Dislocations in Horizontal Bridgman Grown GaAs Crystals E. Dobrocka	79
Photoelastic Investigation of Czochralski-Grown [100] Oriented GaAs Crystals G. Adamkiewicz and A. Bajor	83
The X-Ray Investigation of Defects in Heavy Indium Doped GaAs Crystals W. Wierzchowski and K. Mazur	87
Photoluminescence Topography of GaAs:Si Single Crystal P. Edelman, J. Ornoch and W. Lewandowski	91
Bismuth-Related Band in LPE GaAs W. Lewandowski, P. Edelman and M. Ratuszek	95
EM Investigation of the Fine Defects Formation Processes in A³B⁵ Crystals A.A. Kalinin, A.V. Markov, M.G. Milvidsky, A.G. Milvidskaya and A.N. Shershakov	99
X-Ray Diffraction Study of A_{III}B_V Materials D. Korytár	103

Monte Carlo Study of Real-Space Electron Transfer: Energy Exchange between Heterostructure Layers M. Mosko and I. Novak	107
Hot-Electron Transport in Multilayer InP-InGaAsP Heterostructure Y.A. Akulova, V.G. Gruzlov, V.I. Korol'kov, S.I. Kokhanovskii and O.A. Mezrin	111
The Application of the Monte-Carlo Method to Physical Phenomena Modelling in Optoelectronic Devices (with LED as an Example) S. Pufal and W. Nakwaski	113
Miscibility GAPS in III-V Alloys: An Explanation F. Srobar	117
Observation of Immiscibility in InGaPAs on GaAs Substrates R. Kudela and M. Morvic	121
Effect of Exchange Interaction on the Features of Mn_{Ga} Center in GaAs N.S. Averkiev, A.A. Gutkin, O.G. Krasikova, E.B. Osipov and M.A. Reshchikov	125
GaAs MBE-Grown Delta-NIPI Superlattices: Observation of Quantum-Confined Optical Transitions in Photocurrent Spectra V.L. Alperovich, A.S. Jaroshevich, D.I. Lubyshev, V.P. Migal and B.R. Semjagin	129
Growth Mechanism of Thin AlGaAs and InGaAsP Layers J. Novotny and F. Srobar	137
Diffusion of Zinc into III-V Compounds in Open Gas-Flow System Y.S. Emelyanenko, E.V. Gushchinskaya, S.A. Malyshev, V.I. Privalov and I.I. Zaitsev	141
The Czochralski Growth of GaSb Single Crystals F. Moravec, V. Sestakova, V. Charvat and B. Stepanek	145
Rapid Thermal Annealing of Neutron Transmutation Doped GaAs F.P. Korshunov, N.A. Sobolev, E.A. Kudriavtseva, N.G. Kolin and T.A. Prokhorenko	149
GaAs Lift-Off Metallization by Electron Beam Evaporation U. Merkel and P. Müller	153
Features of GaAs Disorder by Nitrogen Ion Implantation I.P. Akimchenko, Y.A. Aleshchenko, N.N. Dymova, V.V. Krasnopevtsev and M. Zavetova	157
The Silicon Nitride Layers Prepared by PE CVD for GaAs IC Technology J. Huran, F. Szulenyi, T. Lalinski, J. Liday and L. Faspo	161
Short Time Annealing of GaAs Implanted with Si, Ge, Sn, Se, S, Te D. Panknin and Y.B. Fattachov	165
ECR-Silicon Nitride for Masking of GaAs Surface S.Y. Shapoval, O.E. Balvinskii, I.A. Maksimov and A.A. Chumakov	169
The Ion Implantation through Thin Dielectric Layer L. Duricek	173
Composition and Properties of Some Low Temperature Oxide Layers on GaAs (001) in MBE Technology M. Cukr, J. Zemek, L. Däweritz, R. Hey and J. Herzog	179
Passivating Films on the A^{III}B^V Substrate Surfaces L. Pramatarova and G.M. Minchev	183
Some Properties of the Isoelectronically Doped GaAs Crystals Grown by the Gradient Freeze Method K. Tomek, V. Laichter and V. Medlik	187
Microdefects in the Heavily Silicon Doped GaAs Crystals Grown by the Gradient Freeze Method V. Laichter, V. Medlik, K. Tomek and E. Dobrocka	191
Properties and Technology Features of Neutron Transmutation Doped Gallium Arsenide N.I. Akulovich, V.A. Bykov, V.A. Giriy, F.P. Korshunov and V.I. Utenko	195
Preparation and Properties of Reactively Sputtered TiN Films for Diffusion Barriers on GaAs J. Hotovy, D. Buc, R. Harman, M. Zeman and J. Liday	199
Rapid Thermal Annealing of Si-Implanted GaAs Using an Overpressure Proximity Method J. Grno	203
Contribution to Ion Implantation of Ge in GaAs P. Seidl and K. Kokesová	207

Influence of Nitrogen Ion Implantation on Electrical Properties of Si Implanted Layers in GaAs	
K. Kokesová and J. Merta	211
The Growth of High Purity GaAs by Liquid Phase Epitaxy	
D. van Thanh, L. Stourac, E. Hulicius, L. Roskovcova, J. Pangrac, J. Oswald and P. Doubrava	215
The Influence of Postimplantation Annealing on Stresses in GaAs Wafers	
J. Osvald and E. Dobrocka	219
MO CVD of GaAs	
P. Kubat, J. Pola, J. Stejskal and P. Klima	223
Preparation of Undoped InGaAs/InP LPE Layers	
M. Kuliffayova, J. Novák, S. Hasenöhrl and M. Morvic	227
The Application of Thermodynamics to CVD Processes of A(III)B(V) Semiconductors	
P. Vonka, J. Leitner, J. Stejskal, P. Klima and R. Hladina	231
Zn Diffusion in InGaAs	
S. Hasenöhrl, J. Novák, M. Morvic and M. Kuliffayova	235
The Influence of Dual Implantation on Electrical Parameters of GaAs for MMICs	
F. Deml, R. Hladina and M. Rothbauer	239
Photochemical Etching of n-GaAs	
V. Svorcik, V. Rybka, V. Myslík, D. Smidova and L. Hudec	243
Description of a Technological Laser Usable for Preparation of Ohmic Contacts to n-GaAs by Graded GAP Heterojunction Method	
V. Rybka, V. Myslík, V. Svorcik, J. Genzer and L. Hudec	247
Modeling of High-Speed GaAs Devices	
H. Elschner, R. Stenzel, R. Spallek, M. Passlack and A. Thiede	251
Technology and Characterization of a Submicrometer Gate Length GaAs MESFETs	
T. Lalinsky, J. Kuzmik, M. Porges, Z. Mozolova, D. Gregusová, P. Hudek and I. Kostič	259
Effect of Substrate on Physical Properties of GaAs MESFETs	
A. Zoul, R. Hladina and M. Vesely	263
Microwave Monolithic Integrated Circuits on GaAs	
M. Rothbauer	269
The Influence of Technological Parameters on the Microwave Properties of Low Noise GaAs-MESFETs	
C. Noack	279
Study of GaAs Vertical Buried-Gate Field-Effect Transistor	
P.G. Il'menkov, V.I. Korol'kov, T.S. Tabarov and B.S. Yavich	283
Self-Formation for High Speed MESFET Fabrication	
S. Janušonis, V. Janušonienė, S. Narkus and E. Zilinskas	287
Domination of the Thermionic-Field Emission in the Reverse I-V Characteristics of n-Type GaAs-Cr/Au Schottky Junctions	
Z.E. Horváth, M. Németh-Sallay and I. Gyuro	291
Schottky Barrier Height of Metal/(P)Ga_{0.47}In_{0.53}As Structures	
L. Malacký and J. Novák	295
The Effect of the Near-Interface Concentration Change on the C-V Characteristics of GaAs Schottki Contacts	
Z.E. Horváth, M. Németh-Sallay, B. Pécz and E. Jaroli	299
The Analysis of Parasitic Effects and their Influence on Performance of GaAs MESFETs	
L. Hulényi, R. Harman, R. Janota and M. Kis	303
A Model of GaAs MESFET	
R. Janota, L. Hulényi and M. Kis	307
Effect of Varactor Bonding and Package Parameters on the Performance of Gunn-Oscillators	
K. Kazi, B. Pödör, Z.E. Horváth, L. Tajti and A. Fogt	311
Preparation and Properties of GaAs Double-Schottky-Interdigitated Photodetectors	
J. Safránková, T. Lalinsky, J. Kuzmik, Z. Mozolova, M. Porges and D. Gregusová	315
Planar Photodetectors: Construction and Properties	
M. Morvic, J. Novák, R. Kudela and L. Malacký	319
GaAs - A Favourable Material for Optoelectronic Switches with Picosecond Response Time	
H. Bergner, V. Brückner, M. Lenzner and R. Strobel	323

Linear Photovoltaic Effect in Gallium Arsenide in Submillimeter Wavelength Region E.V. Beregunin, S.D. Ganichev, K.Y. Glookh, Y.B. Lyanda-Geller and I.D. Yaroshetskii	327
Electrical and Photoelectric Properties of GaAs Permeable-Base Transistor P.G. Il'menkov, V.I. Korol'kov, T.S. Tabarov and V.B. Smirnitskii	331
Reliability Diagnostics and Reliable Laser Design J. Misek and J. Kortán	335
1.3 and 1.55 μm Wavelength GaInAsP/InP DC PBH Lasers D. Nohavica, D. Berkova, J. Těminová, J. Zelinka, K. Starosta, J. Kortán, V. Malina and D. Machackova	345
Comparison of Basic Parameters of Some Available Pulsed Semiconductor Lasers E. Hulicius, A. Abraham, L. Roskovcova, T. Simecek, J. Pangrac, J. Oswald, P. Mihailovici, I. Petrescu-Prahova and J. Michalek	349
Sources and Detectors of Radiation Based on GaSb for 2 μm Range E. Hulicius, A. Abraham, J. Pangrac, K. Melichar, L. Roskovcova, A. Baranov, T.N. Danilova, A.N. Imenkov and J.P. Jakovlev	353
Temperature Stimulation of Degradation Processes in GaAs_{0.6}P_{0.4} LEDs A.S. Popov and R.K. Atanasova	357
TV Investigation of the Spontaneous Radiation in (Ga,Al)As Laser Diodes S. Püspöki and F. Koltai	361
Hall Generators on GaAs:Si(:Se,:Sn) M. Ratuszek, M. Panek and T. Ohly	365
