## Chapter 1: Structure of Glass

|                                                                                                                                                                                                                                                           |    |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| <b>Preparation and Characterization of <math>\text{SrFe}_{12}\text{O}_{19}</math> on Optical and Dielectric Properties of <math>\text{Na}_2\text{O-CaO-P}_2\text{O}_5</math> Glasses</b><br>P. Intawin and W. Leenakul                                    | 3  |
| <b>Morphological Studies on Microstructure of Thai Ancient Glass Beads</b><br>R. Buntem, B. McCarthy and C. Khaokhiew                                                                                                                                     | 8  |
| <b>Effect of <math>\text{Nd}^{3+}</math> Ion on Bismuth Borosilicate Glass Properties</b><br>S. Rakpanich, P. Meejitpaisan, S. Ravangvong and J. Kaewkhao                                                                                                 | 13 |
| <b>Effect of <math>\text{TeO}_2</math> Addition on the Mobility of Silver Ions in <math>\text{Ag}_2\text{O-B}_2\text{O}_3\text{-P}_2\text{O}_5\text{-TeO}_2</math> Glasses</b><br>A. Moguš-Milanković, K. Sklepić, M. Vorokhta, P. Mošner and L. Koudelka | 18 |
| <b>Effect of Heat Treatment Time on Properties of Mica-Based Glass-Ceramics for Restorative Dental Materials</b><br>T. Srichumpong, K. Suputtamongkol, W. Chinpanuwat, P. Nampachoke, J. Bai, S. Angkulpipat, S. Prasertwong and D. Chaysuwan             | 23 |
| <b>Preparation and Characterization of LAS Glass Based Materials for Dental Applications</b><br>S. Barbi, M. Montorsi, C. Mugoni and C. Siligardi                                                                                                         | 28 |
| <b>Temperature Dependencies of Inter-Diffusion Coefficient and Mass-Transfer Coefficient of Chemical Strengthening</b><br>M. Hatano, S. Kanasugi and M. Konishi                                                                                           | 32 |
| <b>Phase Change Properties of Chalcogenide Glasses - Some Interesting Observations</b><br>K. Ramesh, Pumlianmunga, R. Venkatesh, N. Naresh and E.S.R. Gopal                                                                                               | 37 |
| <b>Shift of Glass Transition Temperature under High Pressure for <math>\text{Ge}_{20}\text{Te}_{80}</math> Glass</b><br>K. Ramesh, N. Naresh, Pumlianmunga and E.S.R. Gopal                                                                               | 43 |

## Chapter 2: Physical and Optical Properties of Glass

|                                                                                                                                                                                                                       |    |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| <b>Optical and Luminescence Properties of <math>\text{Dy}^{3+}</math> Doped in Soda Lime Borate Glasses</b><br>S. Ruengsri, N. Srisittipokakun, F. Zaman, G. Rooh and J. Kaewkhao                                     | 51 |
| <b>Investigated on Photoluminescence Properties of <math>\text{Sm}^{3+}</math> Ions in Gadolinium Calcium Phosphate Glasses</b><br>P. Meejitpaisan, C. Kedkaew, Y. Ruangtawee and J. Kaewkhao                         | 57 |
| <b>Optical Properties and White Emission from <math>\text{Dy}^{3+}</math> Doped in <math>\text{Y}_2\text{O}_3\text{-CaO-SiO}_2\text{-B}_2\text{O}_3</math> Glasses</b><br>N. Chanthima, Y. Ruangtawee and J. Kaewkhao | 62 |
| <b>Visible Luminescence of <math>\text{Eu}^{3+}</math> Ions in Lithium Barium Borate Glass</b><br>K. Kirdsiri, B. Damdee and J. Kaewkhao                                                                              | 66 |
| <b>The Influence of Cu Content on the Mechanical Properties of Copper-Borate Glasses</b><br>Z.Y. Yao, P. Houizot, F. Célarié, D. Möncke, L. Wondraczek and T. Rouxel                                                  | 71 |
| <b>Radiation Shielding Properties of <math>\text{Bi}_2\text{O}_3\text{-Na}_2\text{O-B}_2\text{O}_3</math> of 662 keV</b><br>W. Cheewasukhanont, K. Boonin, P. Limkitjaroenporn and J. Kaewkhao                        | 77 |
| <b><i>In Vitro</i> Bioactivity and Physical-Mechanical Properties of HA Based 45S5 Bio-Composites</b><br>S. Prasad, V.K. Vyas, M. Ershad and R. Pyare                                                                 | 83 |
| <b>Investigation of Optical Properties in Sn, Sb, Pb and Bi Doped Silica Glasses Aiming Visible Fiber Laser</b><br>E.H. Sekiya and K. Saito                                                                           | 91 |
| <b>Development and Precision Molding of Optical Glasses with High Refractive Index for Optical Applications</b><br>N. Kitamura, K. Fukumi, K. Kintaka, H. Ofuchi, T. Honma and T. Akai                                | 96 |

## Chapter 3: Special Glass

|                                                                                                                                                                                                                        |     |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Composition of Kaew Angwa by X-Ray Fluorescence Spectroscopy (XRF)</b><br>S. Phanichphant and C. Khantha                                                                                                            | 103 |
| <b>Lithium-Cobalt Glass for Sapphire</b><br>N. Chomsaeng, S. Sukcharoen and E. Meechoowas                                                                                                                              | 108 |
| <b>Enhancement of Afterglow Luminescence of Long-Lasting Phosphor-Glass Composite by Using Refractive Index Matched Glass</b><br>M. Yamashita, T. Imamura, S. Matsumoto, M. Murakami, T. Hongo, T. Akai and Y. Iwamoto | 113 |

## **Chapter 4: Technologies of Processing and Production of Glass**

|                                                                                                                                                                  |     |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Redox Effects of Erbium Oxide Doped Industrial Soda-Lime Glasses by UV-VIS-NIR Study</b><br>J. Kumsap, A. Poowancum and A. Wannagon                           | 121 |
| <b>Mechanism of AZS Refractory Corrosion in Barium Soda Lime Potassium Silicate Glass Melt</b><br>P. Šimurka, J. Kraxner, P. Vrábel and T. Paučo                 | 125 |
| <b>The Decolorizing of High Iron Containing Soda-Lime Silicate Glass by Annealing Process</b><br>E. Meechoowas, P. Jampeerung, K. Tapasa and T. Jitwatcharakomol | 130 |
| <b>Evaluation of Furnaces Performance of Glass Factories in Thailand</b><br>K. Tapasa, E. Meechoowas, U. Naknikham and T. Jitwatcharakomol                       | 135 |
| <b>The Studies of Contamination from Glass Containers under Various Conditions</b><br>U. Naknikham, S. Khunhon, J. Inmeekul and T. Jitwatcharakomol              | 139 |
| <b>The Longitudinal Cutting on Hollow Glass Cylinders</b><br>Y. Aizawa, S. Tamura, A. Okamoto and A. Hashimoto                                                   | 145 |
| <b>Research and Development Project on the Domestic Raw Materials of Enamel for Jewelry Production</b><br>P. Prapitpongwanich                                    | 150 |
