

Table of Contents

Committees and Preface

Chapter 1: Physics and Technology

Single-Photon Detector Based on MOSFET Electrometer with Single-Electron Sensitivity	3
H. Inokawa, W. Du, M. Kawai, H. Satoh, A. Ono and V. Singh	
CZTS Monograin Powders and Thin Films	8
E. Mellikov, D. Meissner, M. Altosaar, M. Kauk, J. Krustok, A. Öpik, O. Volobujeva, J. Iljina, K. Timmo, I. Klavina, J. Raudoja, M. Grossberg, T. Varema, K. Muska, M. Ganchev, S. Bereznev and M. Danilson	
Defect and Structure Engineering – Submicron Technology and Inverse Nanotechnology for Photo- and Ionizing Radiation Detectors	14
J.V. Vaitkus	
Self-Organization Processes of Nanostructure Formation by Laser Radiation in Metal	18
L. Fedorenko	
Application of Titanium Dioxide Nanorods in DSC Using Hydrothermal Method	24
M.K. Bin Ahmad and K. Murakami	
Laser-Induced Modification of the Surface State and Optical Properties of CdTe Crystals	28
L.V. Poperenko, D.V. Gnatyuk, V.A. Odarych, I.V. Yurgelevich, S.N. Levytskyi and T. Aoki	
Laser-Induced Doping of CdTe Crystals in Different Environments	32
V.A. Gnatyuk, S.N. Levytskyi, O.I. Vlasenko and T. Aoki	
The Electrodynamic Human Motion Energy Converter with Planar Structure	36
J. Blums, G. Terlecka and A. Vilumsone	
Investigation of Textile Materials for Laser Light Beam Scanning	40
I. Dabolina, A. Vilumsone and J. Blums	
“Black Silicon” Formation by Nd:YAG Laser Radiation	44
A. Medvid', P. Onufrijevs, E. Dauksta and V. Kyslyi	
High-Resolution X-Ray Computed Tomography for Materials Research	48
A. Egbert and O. Brunke	
Separation of Particles Employing Travelling-Wave Electrokinetic Phenomena and Inclined Gravity	52
M. Eguchi, T. Yamakawa and T. Yamakawa	
Band Bending of <i>n</i>-GaP(001) and <i>p</i>-InP(001) Surfaces with and without Sulfur Treatment Studied by Photoemission (PES) and Inverse Photoemission Spectroscopy (IPES)	56
K.Z. Liu, M. Shimomura and Y. Fukuda	
Applications of High-Precise Three-Dimensional Measurement System	62
T. Hashimoto, M. Kaneko, A. Rövid, H. Ohta, A. Fukuda, M. Aniya, N. Naito, H. Enomoto and P. Skvarca	
A Novel Refrigerator Device Using Single-Electron Pump Applicable to SOI Wafers	66
H. Ikeda and F. Salleh	
Analysis of Electron Spin-Spin Interaction in Coupled Quantum Well	70
T. Ito, W. Shichi, M. Ichida, H. Gotoh, H. Kamada and H. Ando	
A New System for Real Time Measurement of Nano- and Micro Particles in Flowing Gas. Design and Calibration.	74
R. Jabłoński and R. Nowak	
Laser Marking in Digital Encoding of Surfaces	78
K.D. Kanev, P.V. Gnatyuk and V.A. Gnatyuk	
Magnetization Peculiarities of Defects in Silicon Produced by Ni⁺, Co⁺, Fe⁺ Ion Implantation	82
A. Karabko, A. Dostanko, N. Lapchuk and P. Onufrijevs	
Optical Characterization of MBE-Grown ZnO Epilayers	86
M. Karaliunas, T. Serevicius, E. Kuokstis, S. Juršėnas, S.Y. Ting, J.J. Huang and C.C. Yang	
Modeling of Surface Structure Formation after Laser Irradiation	90
J. Kaupuzs, S.E. Guseynov, J.S. Rimshans and A. Medvid'	

Design of an Electrostatics Lens of the Micro-Column Microscopes Using a Multi-Gated FEA	94
A. Koike, Y. Takagi, T. Fujino, T. Aoki, Y. Neo, H. Mimura, T. Yoshida, M. Nagao, K. Sakai and H. Murata	
Color Calibration Method Based on Spectrally Reproduced Colors and its Application to XYZ-Type Digital Camera	98
M. Kretkowski, R. Jabłoński and Y. Shimodaira	
Point Defects Generation Kinetics in the Si-SiO₂ System and its Influence on the Interface Properties	102
D. Kropman, T. Kärner, S. Dolgov, I. Heinmaa and C.A. Londos	
Characterization of Resistivity of Sb₂S₃ Semiconductor Nanowires by Conductive AFM and <i>In Situ</i> Methods	106
J. Bukins, G. Kunakova, P. Birjukovs, J. Prikulis, J. Varghese, J.D. Holmes and D. Erts	
Stimulated Emission from Wide-Gap Semiconductors	110
E. Kuokstis	
Kelvin Probe Force Microscope Measurement Uncertainty	114
M. Ligowski, M. Tabe and R. Jabłoński	
Direct Laser Writing of Refractive Index Micro-Structures in Lithium Niobate	118
V. Mizeikis, V. Purlys, W. Inami and Y. Kawata	
Memory Effects Based on Dopant Atoms in Nano-FETs	122
D. Moraru, E. Hamid, J.C. Tarido, S. Miki, T. Mizuno and M. Tabe	
Nanostructural Control of Pt Layer on Counter Electrode for Application to Dye-Sensitized Solar Cells	126
K. Murakami, S. Fujiwara, D. Kobayashi, H. Ishihara and M. Shimomura	
Influence of Laser Radiation on Optical Properties and Surface Structure of CdZnTe Crystal	130
A. Mychko, A. Medvid', J. Barloti and Y. Naseka	
Surface Functionalization of Graphene Layer-Encapsulated Magnetic Nanoparticles by Inductively Coupled Plasma	134
M. Nagatsu, T.E. Saraswati and A. Ogino	
Stable Emission Characteristics of Low Work Function Amorphous Carbon Coated Transfer Mold Nickel Field Emitter Arrays in Harsh Environment	138
M. Nakamoto and J.H. Moon	
Fabrication and Performance of Photocatalytic GaN Powders	142
T. Nakano, M. Hamada and S. Fuke	
Thermal Neutron Detection by CdTe Detector	146
T. Nishioka, A. Miyake, S. Singh, H. Morii, H. Mimura and T. Aoki	
Process Analysis of Laser Welding Method with Polybutyleneterephthalate (PBT)	150
R. Okuzumi, S. Hirota, Y. Takagi, M. Sudoh and Y. Okano	
High-Efficiency SOI Photodetector Utilizing Surface Plasmon Resonance in Gold Corrugated Structure	154
A. Ono, H. Satoh and H. Inokawa	
Decrease of Point Defect Concentration at a Surface of ZnO/Si Heterostructure by Powerful Laser Radiation	158
P. Onufrijevs, A. Medvid', E. Dauksta and T. Trautnitz	
Integration of Optical Fibres into Textile Products	162
I. Parkova, A. Valishevskis, I. Ziemele and A. Vilumsone	
Dynamic Force Sensor for <i>In Situ</i> Studies of Nanometer Size Contacts with Controllable Gap Potential	166
R. Poplausks, P. Birjukovs, J. Prikulis, R. Lõhmus and D. Erts	
Relaxation of Resonant Excitons in CdSe Nanocrystals: Simple Variational Calculation	170
I. Pundyk, I. Dmitruk, M. Davydenko, V. Romanyuk and A. Kasuya	
Mechanisms of Strong Photoluminescence from Si Nanocrystals	175
T. Puritis, J. Kaupuzs and E. Dauksta	
Coulomb-Coupled, Protein-Based Computing Arrays	181
B. Rakos	
Detection of the Nanostructures in ZnO Thin Films by Using Optical Methods	185
M. Rakov, L.V. Poperenko and I.V. Yurgelevich	

Comparative Study of Photoluminescence in Silicon and Zinc Oxide Nanowires	189
G.Y. Rudko and A.I. Klimovskaya	
Development of Microclimate Regulatory Clothes	193
I. Šahta, I. Baltina and J. Blums	
Influence of Impurity Band on Seebeck Coefficient in Heavily-Doped Si	197
F. Salleh and H. Ikeda	
Investigation of Adhesion Materials for Gold Line-and-Space Surface Plasmon Antenna on SOI-MOS Photodiode	201
H. Satoh, Y. Matsuo, H. Inokawa and A. Ono	
Si-Based Single-Dopant Atom Devices	205
M. Tabe, D. Moraru, A. Udharto, S. Miki, M. Anwar, Y. Kawai and T. Mizuno	
Fabrication of the Field Emitter Array with a Built-in Suppressor Gate	209
Y. Takagi, A. Koike, T. Fujino, T. Aoki, Y. Neo, H. Mimura, T. Nishi, T. Yoshida, M. Nagao, K. Sakai and H. Murata	
Random Error in Intensity Spectrum Measured with THz-TDS - No Relation to the Intensity Fluctuation of Fs-Laser	213
M. Takeda, S.R. Tripathi, M. Aoki and N. Hiromoto	
Preparation and Evaluation of Novel Sugar Dendritic Gd-DTPA Complexes for MRI Contrast Agents and Phospha Sugars for Anti-Tumour Agents	217
K. Kiyofuji, K. Tsunekawa, M. Yamashita, J. Yamashita, M. Fujie, K. Asai, T. Suyama, S. Ito, V.K. Reddy, M. Yamada, K. Ogawa, N. Ozaki, M. Sugiyama, M. Yamaoka, R. Makita, S. Nakamura, T. Aoki, G. Yu, K. Aoshima, N. Kamikage, Y. Takehara, H. Sakahara, H. Takayanagi, S. Laurent, C. Burtea, L. Vander Elst and R.N. Muller	
Physics of Flexible Magnetic Filaments	221
I. Javaitis and V. Zilgalve	
P-N Junction Formation in ITO/p-Si Structure by Powerful Laser Radiation for Solar Cells Applications	225
A. Medvid', P. Onufrijevs, E. Dauksta, J. Barloti, A.G. Ulyashin, I. Dmytryuk and I. Pundyk	

Chapter 2: Chemistry

Optical Properties of CaYAlO₄: Eu³⁺ Phosphors	231
M. Bartic, H. Kominami, Y. Nakanishi and K. Hara	
Sol-Gel Derived Ferrites: Synthesis and Characterization	235
A. Gatelyte, D. Jasaitis, A. Beganskiene and A. Kareiva	
Setting Properties of Brushite and Hydroxyapatite Compound Cements	239
Z. Irbe, L. Vecbiskena and L. Berzina-Cimdina	
Recycling of Carbon Fiber Reinforced Plastics Using Subcritical Water	243
I. Okajima, M. Hiramatsu and T. Sako	
Numerical Investigation of the Limiting Sliding Condition of Polyoxymethylene with Various Sliding Geometry	247
Y. Takagi, A. Sone, K. Mizoguchi, Y. Okano, R. Okuizumi, M. Kada, S. Hirota and Y. Tajima	
3D Cone Beam Radiodensitometry in Evaluation of Hydroxyapatite (HAP)/Tissue Hybrid after Maxillary Sinus Floor Elevation	251
G. Salms, I. Salma, A. Skagers and J. Locs	
Comparison of Biphasic Calcium Phosphate Bioceramics Fabricated Using Different Techniques	255
K. Salma, Z. Irbe, D. Jakovlevs, N. Borodajenko and L. Berzina-Cimdina	
Phase Transition in Niobophosphate Glass-Ceramic	259
A. Stunda, N. Mironova-Ulmane, N. Borodajenko and L. Berzina-Cimdina	
Effect of Cooling Conditions on Nano-Sized NiFe₂O₄ Electrical Properties	263
A. Sutka, G. Mezinskis, S. Lagzdina and G. Bebris	
Synthesis and Properties of New Glassy Molecular and Oligomer Azocompounds Suitable for Holographic Recordings	267
K. Traskovskis, V. Kokars, A. Ozols and P. Augustovs	
Synthesis of Red Luminescent Non Symmetric Styryl-4H-Pyran-4-Ylidene Fragment Containing Derivatives for Organic Light-Emitting Diodes	271
E. Zarins, J. Jubels and V. Kokars	

Chapter 3: Biology and Medicine

Investigation of the Mechanism of Polar Excitations on Frog Sciatic Nerve by Optical Stimulation

Y. Hirayama, S. Ishizuka, Z.L. Grigorievich, T. Yamakawa and T. Yamakawa 281

Medical Image Region Extraction and 3D Modeling Based on Approximating Curves

K. Bolochko, A. Sisojevs, A. Glazs and A. Platkajis 285

Lidocaine Loaded Ca/P Scaffolds for Bone Regeneration and Local Drug Delivery

D. Loca, J. Locs, J. Gulbis, I. Salma and L. Berzina-Cimdina 289

Development of Combined Treatment of Electro-Coagulation and Flocculation for Various Types of Wastewater

S. Matsuda, T. Wada, A. Suzuki and T. Suzuki 293

Low Temperature Plasma Treatment for Immobilization of Biomaterials on Polymer Surface

A. Ogino, S. Noguchi and M. Nagatsu 297

***Staphylococcus Epidermidis* and *Pseudomonas Aeruginosa* Adhesion Intensity on a TiO₂ Ceramic in an *in Vitro* Study**

A. Pavlova, A. Reinis, L. Berzina-Cimdina, J. Kroica, A. Burlakova and K. Rubenis 301

Gasification and Hydrogen Production from Waste Biomass with High Pressure Superheated Steam

I. Okajima and T. Sako 305

Simultaneous Determination of Absorption Coefficients for Skin and Muscle Tissues Using Spatially Resolved Measurements

H. Suzuki, M. Niwayama, T. Yamakawa, M. Ohkubo, R. Kime and T. Katsumura 309

Subdural Electrocorticogram Measurement with a Minimally-Invasive Procedure Using an SMA-Manipulated Microelectrode Array

T. Yamakawa, T. Yamakawa, S. Aou, S. Ishizuka, M. Suzuki, M. Fujii and T. Aoki 313

Accurate and Fast Estimation of Optical Properties Using Optical Path Length and Spatially Resolved Reflectance Measurement

T. Yamashita, M. Niwayama and T. Yamakawa 318

PMMA Wettability Caused by Ultraviolet Radiation

Y. Dekhtyar, L. Lancere, N. Polyaka, A. Sudnikovich, F. Tyulkin and V. Valters 322

Chapter 4: Computer Science and Modeling

Multi-Camera Shooting Support System for Novices in a Compact Studio

N. Nishio, Y. Deguchi, T. Sugiyama and Y. Takebayashi 329

On-Line Monitoring of Random Stocks of Divisible Productions in Interrelated Warehouses

S.E. Guseynov 333

Teaching Assembler for Mechatronics Applications

H.J. Hawłas 337

Sensory Device for Virtual Graffiti Creation

R. Jabłoński and A. Borzym 341

Nodal Numerical 2D Helmholtz Equation: Truncation Analysis

P. Morevs, J.S. Rimshans and S.E. Guseynov 345

Alarm System Design Based on Cause-Effect Model

S. Onishi and K. Takeda 349

A Method of Conversion of some Coefficient Inverse Parabolic Problems to a Unified Type of Integral-Differential Equation

S.E. Guseynov, J.S. Rimshans, J. Kaupuzs, A. Medvid' and D. Zaime 353

Cog Framework - 3D Visualization for Mobile Robot Teleoperation

G. Sziebig, P. Zanaty, P. Korondi and B. Solvang 357

Telemanipulation without Physical Contact in the Intelligent Space

B. Takarics, G. Sziebig and P. Korondi 362

Multiple-Camera Optical Glyph Tracking	
T. Pallos, G. Sziebig, P. Korondi and B. Solvang	367
Suitable Truncation of Room Impulse Response for Inverse Filter Design of Sound Reproduction System	
Y. Tatekura, Y. Honda and T. Nakai	372
Anytime Fuzzy Modeling	
A.R. Várkonyi-Kóczy	376
Propagator Method for Numerical Solution of Convective Fisher Equation	
D. Zaime, J.S. Rimshans and S.E. Guseynov	387
