

Table of Contents

| | |
|--|-----|
| Mechanisms of Intergranular Fracture S.P. Lynch | 1 |
| Grain Boundary Design for the Control of Intergranular Fracture T. Watanabe | 25 |
| Thermodynamics of Adsorbates at Grain Boundaries J.P. Hirth | 49 |
| Temper Embrittlement of Steels: Remaining Issues C.J. McMahon | 61 |
| Atomistic Concepts for Simulation of Grain Boundary Fracture S. Yip and D. Wolf | 77 |
| Grain Boundary Electronic Structure and Materials Design M.E. Eberhart and D.D. Vvedensky | 169 |
| Application of the Embedded Atom Method to Interfaces in Metals M.I. Baskes, S.M. Foiles and M.S. Daw | 187 |
| Molecular Dynamics Simulation of the Role of Grain Boundary Chemistry on Intergranular Fracture R.W. Smith and G.S. Was | 199 |
| Grain Boundary Structure and Intergranular Fracture in L1₂ Ordered Alloys V. Vitek, S.P. Chen, A.F. Voter, J.J. Kruisman and J.T.M. de Hosson | 237 |
| Grain Boundary Segregation in Iron and Its Alloys and Its Effect on Intergranular Fracture C.L. Briant and H.J. Grabke | 253 |
| Grain Boundary and Interfacial Chemistry and Structure in Ceramics and Ceramic Composites R.H. Jones, C.H. Schilling and L.H. Schoenlein | 277 |
| Grain Boundary Chemistry and Intergranular Failure of Austenitic Stainless Steels S.M. Bruemmer | 309 |
| Grain Boundary Chemistry and Intergranular Fracture in Austenitic Nickel-Base Alloys G.S. Was | 335 |
