

# Table of Contents

## Preface

### Analytical Treatments of Normal Grain Growth

M. Hillert 3

### Statistical Theory of Grain Growth and Its Topological Foundations

K. Lücke, R. Brandt and W. Graupner 19

### Solute Effects on the Structural and Migration Behaviour of Grain Boundaries

K.T. Aust and G. Palumbo 33

### High Pressure Effects on Grain Boundary Migration and Mechanism of Grain Boundary Migration

L.S. Shvindlerman, U. Czubyko, G. Gottstein and D.A. Molodov 45

### Statistical Theory of Grain Growth: A General Approach

W. Graupner and K. Lücke 55

### Computer Simulation of Two-Dimensional Grain Growth with Anisotropic Grain Boundary Energy and Mobility by Vertex Model

M. Enomoto, M. Kamiya and T. Nagai 71

### Grain Growth and Texture Evolution in Thin Films

C.V. Thompson and R. Caryl 83

### In-Situ Observations of Grain Boundary Migration

G. Gottstein, U. Czubyko, D.A. Molodov, L.S. Shvindlerman and W. Wunderlich 99

### Grain Growth in Ceramics

T. Sakuma 109

### Texture in 3% Si-Fe Ribbon Cast Directly

R. Penelle, P. Paillard and T. Baudin 121

### Factors Affecting Grain Growth of Very Thin Silicon Steel Sheets

K.I. Arai and K. Ishiyama 133

### Recent Development of Technology of Grain Oriented Silicon Steel

N. Takahashi and J. Harase 143

### Modelling the Effects of Nucleation and Growth on Texture Formation in Commercial Steels

J.J. Jonas and L.A.I. Kestens 155

### Grain Growth Control by Solidification Technology

A. Ohno 169

### Orientation Imaging Microscopy: Bridging the Grain-Boundary Structure-Properties Linkage in Polycrystalline Materials

B.L. Adams 179

### Chemically Induced Interface Migration

D.Y. Yoon 193

### Grain Boundary Structure and Growth Sequence of Diamond Thin Film

Y.L. Zhang, H. Ichinose, K. Ito, Y. Ishida and M. Nakanose 207

### Phase Boundary Migration Due to Interdiffusion

M. Onishi, F. Furukawa and T. Shimozaeki 215

### Grain Boundary Migration in Fe-3%Si Bicrystal

S. Tsurekawa, T. Ueda, K. Ichikawa, H. Nakashima, Y. Yoshitomi and H. Yoshinaga 221

### Computer Simulation of Grain Boundary in BCC Fe by Embedded Atom Method

R. Watanabe, A. Nogami and T. Matsumiya 227

### Monte Carlo Simulation of Interactions between Grain Boundary Migration and Precipitation

Y. Tsuzuki and Y. Suzuki 233

### Correlation of Grain Boundary Energy with Boundary Dislocation Density

K. Morita, S. Tsurekawa, H. Nakashima and H. Yoshinaga 239

### Molecular Dynamics Simulations of the Melting of a Twist $\Sigma=5$ Grain Boundary

J. Lu and J.A. Szpunar 245

### Some Theoretical Considerations on Abnormal Grain Growth

P.R. Rios 247

<b>Physical Aspects of Grain Growth Phenomena</b> Y. Yamazaki and T. Watanabe	257
<b>Three-Dimensional Computer Modeling of Grain Growth: A Vertex model Approach</b> K. Fuchizaki and K. Kawasaki	267
<b>Quantitative Analysis of DIGM in Binary Sytems Using a Model of Driving Energy for Alloying</b> M. Kajihara and T. Mori	279
<b>Simulation of Normal Grain Growth by the 3-D Statistical Model</b> R. Brandt, W. Graupner and K. Lücke	289
<b>Normal and Abnormal Grain Growth and Particularly the Behaviour of Large and Small Grains as Predicted by Simulations on the Basis of the Statistical Model</b> R. Brandt, W. Graupner and K. Lücke	295
<b>A Study on Three Dimensional Monte Carlo Method for Grain Growth Simulation</b> A. Nogami, T. Matsumiya and Y. Fukuda	303
<b>The Influence of Anisotropy on the Recrystallization Kinetics</b> C.H. Wörner	309
<b>Computer Simulation of Grain Growth in Particle Dispersed Structure</b> I. Ohnuma, H. Ohtani, K. Ishida and T. Nishizawa	313
<b>Computer Simulation of Grain Growth Induced by Superplastic Deformation</b> Y. Takayama, T. Tozawa, H. Kato and N. Furushiro	319
<b>Scaling Behavior in Grain Growth</b> T. Nagai	325
<b>3-D Anisotropic Grain Growth First Simulation Results with a Laguerre Model</b> X. Xue, T.M. Liebling and A. Mocellin	331
<b>A Mathematical Model for the Solute Drag Effect on Recrystallization</b> M. Suehiro, Z.K. Liu and J. Ågren	337
<b>Modelling of the Texture Evolution during Electrodeposition</b> D.Y. Li and J.A. Szpunar	343
<b>Rate Equation for Grain Growth with Two-Sphere Model</b> H. Tanaka	349
<b>Grain Rotation and Microstructure Development in Thin Films of Gold</b> A.H. King and K.E. Harris	355
<b>The Role of Anisotropic Grain Boundary Parameters in Grain Growth</b> V. Randle	361
<b>Formation of (111) Recrystallization Texture in Al-Mg Alloys</b> T. Kamijo, Y. Iwasaki and H. Fukutomi	371
<b>Deformation, Recrystallization and Premelting in Bicrystals</b> F. Inoko and T. Yoshikawa	379
<b>Grain Growth and the Processing of Nanocrystalline Ceramics</b> M.J. Mayo	389
<b>Formation of Slip Traces during Grain Growth of Thin Metal Sheets</b> H. Lin and D.P. Pope	399
<b>Grain Size Control in Foil-Metallurgical Processing of Aluminium Alloy</b> H. Iwasaki, T. Mori, M. Mabuchi and K. Higashi	405
<b>Abnormal Growth of Facted Grains in Liquid Matrix</b> Y.J. Park, N.M. Hwang and D.Y. Yoon	411
<b>Change in Boundary Misorientation with Subgrain Growth in a Microduplex Stainless Steel</b> X. Huang, K. Tsuzaki and T. Maki	417
<b>The Influence of Texture and Grain Boundary Character Distribution on the Reliability of Aluminium Thin Films</b> K.T. Lee, J.A. Szpunar and D.B. Knorr	423
<b>Structural Evolution and Validity of Hall-Petch Relationship in an Al-3% Mg Alloy with Submicron Grain Size</b> M. Furukawa, Z. Horita, M. Nemoto, R. Valiev and T.G. Langdon	431
<b>High-Resolution Electron Microscopy Observations of Grain Boundary Structures in Submicrometer-Grained Al-Mg Alloys</b> Z. Horita, D.J. Smith, M. Furukawa, M. Nemoto, R. Valiev and T.G. Langdon	437

<b>The Role of Texture-Related Mobility in the Secondary Recrystallization of ODS Alloys</b> M.A. Miodownik, A.J. Wilkinson and J.W. Martin	443
<b>Computer-Aided Investigation of Isothermal Grain Growth in Copper and Brass</b> S. Vogel and P. Klimanek	449
<b>Grain Boundary Design for Electrical and Magnetic Properties of Thin Film through Abnormal Grain Growth</b> L.K. Fionova, Y. Lisovskii and T. Watanabe	455
<b>Grain Rotation during Grain Growth of Polycrystalline Aluminium</b> T. Yamasaki, Y. Demizu and Y. Ogino	461
<b>Microstructure Change and Precipitation Behavior during Hot Deformation in Al-5.5Mass%Mg Alloys</b> H. Tanaka, H. Yoshida and S. Tsuchida	467
<b>Grain Growth Process in Al-0.3Mass%Mg Alloy</b> K. Matsumoto, T. Shibayanagi and Y. Umakoshi	473
<b>Grain Size Dependence on the Dynamic Characteristics in a Mechanically Alloyed IN905XL Alloy</b> T. Mukai, I. Kunio, Y. Okanda and K. Higashi	479
<b>Abnormal Grain Growth in Alumina</b> I.J. Bae and S. Baik	485
<b>Abnormal Grain Growth of BaTiO<sub>3</sub> with Small Cation Nonstoichiometry</b> T. Yamamoto and T. Sakuma	491
<b>Texture Development in Oxides Modified with Reactive Element Addition</b> F. Czerwinski and J.A. Szpunar	497
<b>The Influence of Annealing on Grain Growth in Nanocrystalline CeO<sub>2</sub> Ceramics</b> F. Czerwinski and J.A. Szpunar	503
<b>Grain Growth and Texture of Chemical-Vapour-Deposited Refractory Metal and Ceramic</b> N. Yoshikawa and A. Kikuchi	509
<b>Grain Growth Behavior of Fine-Grained Silicon Nitride Ceramics</b> H. Hirotsuru, M. Mitomo and T. Nishimura	515
<b>Topological Relationships Valid in Grain Growth Microstructure of Fe3%Si</b> S. Cicale, W. Graupner and M. Baroni	521
<b>Texture Change during Primary Recrystallized Grain Growth in Fe-3%Si Alloy</b> Y. Yoshitomi, K. Kawasaki, J. Harase and N. Takahashi	527
<b>Grain Growth Behavior during Static Recrystallization of 3%-Silicon Steel Following High Temperature Deformation</b> M. Muraki, Y. Ozaki, M. Hisata, T. Obara and T. Kan	533
<b>Effect of Sn on Primary Recrystallization Texture of Fe-Si Alloy</b> T. Kubota, K. Kuroki, Y. Matsuo and N. Takahashi	539
<b>The Research on Fine-Grained Cube Texture; A Soft Magnetic Material for Use in High Frequency Electronic Fields</b> A. Sakakura	545
<b>A New Texture Control Process for Grain Oriented Si Steel</b> A. Okamoto and H. Yashiki	555
<b>Texture Selection by Secondary Recrystallization in Grain Oriented Silicon Iron: Competitive Texture Components for Goss Grains</b> S. Fortunati and W. Graupner	565
<b>Microstructures in Secondary Recrystallized {100}&lt;001&gt; Grains of 3%Si-Fe</b> S. Suzuki, Y. Ushigami, Y. Suga and N. Takahashi	575
<b>Secondary Recrystallization in Fe-3.3 Mass % Si Re-Rolled Foil</b> N. Abe, Y. Ushigami and N. Takahashi	581
<b>Effect of Hot-Band Annealing Condition on Secondary Recrystallization of Ultra-Low Carbon 2.3%Si-1.7%Mn Steel</b> T. Fukagawa and H. Yashiki	587
<b>Precipitation Behaviors of Injected Nitride Inhibitors during Secondary Recrystallization Annealing in Grain Oriented Silicon Steel</b> Y. Ushigami, F. Kurosawa, H. Masui, Y. Suga and N. Takahashi	593
<b>Influence of Inhibitor Intensity on Secondary Recrystallization in Fe-3%Si Alloy</b> Y. Ushigami, T. Nakayama, Y. Suga and N. Takahashi	599

<b>Influence of Secondary Recrystallization Temperature on Secondary Recrystallization Texture in Fe-3%Si Alloy</b>	
Y. Ushigami, T. Nakayama, Y. Suga and N. Takahashi	605
<b>Computer Simulation of the Influence of Inhibitor Intensity on Secondary Recrystallization in Fe-3%Si Alloy</b>	
T. Nakayama, Y. Ushigami, T. Nagashima, Y. Suga and N. Takahashi	611
<b>Effect of Cold Rolling Reduction on Secondary Recrystallization of 3%Si-Fe</b>	
S. Arai, Y. Ushigami and N. Takahashi	617
<b>Influence of primary Recrystallized Structure on Secondary Recrystallization in Fe-3%Si Alloy</b>	
Y. Ushigami, Y. Yoshitomi and N. Takahashi	623
<b>Prediction Method of Sharpness of {110}&lt;001&gt; Secondary Recrystallization Texture of Fe-3%Si Alloy</b>	
Y. Yoshitomi, Y. Ushigami, N. Takahashi, T. Nakayama, Y. Suga and J. Harase	629
<b>Relationship between Primary Recrystallized Structure with Texture and Secondary Recrystallization Kinetics of Fe-3%Si Alloys</b>	
Y. Yoshitomi, J. Harase and N. Takahashi	635
<b>Influences of Tin and Copper on the Inhibitor Intensities in High-Induction Grain-Oriented Silicon Steel</b>	
Y. Zhao, Z. He, Y. Weng and B. Wu	641
<b>Secondary Grain Growth Behavior of Refractory Metals</b>	
T. Fujii, K. Honda and K. Okamoto	647
<b>The Control of Grain Size Particles in Grain Boundary for Superplastic Aluminium Alloys</b>	
H. Yoshida	657
<b>Role of CSL Boundaries during the Recrystallization of a IF Steel</b>	
P. Gangli, L.A.I. Kestens and J.J. Jonas	667
<b>Influence of Precipitates on Behavior of Recrystallization and Grain Growth in Extra Low Carbon Ti-Bearing Cold-Rolled Steel Sheets</b>	
T. Suzuki, Y. Ishii, A. Itami, K. Ushioda, N. Yoshinaga and H. Tezuka	673
<b>A Study of the Relation between Distribution of Grain Diameters and Metallurgical Properties in Recrystallized Steel Sheet</b>	
H. Masui, H. Takechi, N. Takahashi and Y. Yoshitomi	679
<b>Abnormal Grain Growth in Ti- and Zr-Containing Hot Rolled Electrical Steels</b>	
K. Eloot, A. De Paepe, J. Dilewijns and C. Standaert	685
<b>The Effect of Nb on Texture Formation and Formability of Cold-Rolled Rephosphorized Sheet Steel</b>	
C. Huang, H. Zhang, G. Pang and B. Wu	691
<b>Relationship between Structural and Physical Properties in Hexagonal Boron Nitride Ceramics</b>	
M. Hubáček, M. Ueki, M. Novák and V. Brozek	697
<b>The Microstructural Evolutions during Growth of Zn-Fe Electrodeposits on Steel Substrate</b>	
H.S. Park, F. Czerwinski and J.A. Szpunar	703
<b>Fractal Dimension of Zirkonia Grain in Alumina/Zirconia Ceramic Composites</b>	
X. Meng, C. Shang and R. Zhi	709
<b>EBSP Studies of Growth Rates during Recrystallization</b>	
D. Juul Jensen	713
<b>Observation of the Growth of Secondary Recrystallization Grains in Grain-Oriented Electrical Steel by New Ultrasonic Wave Method</b>	
K. Sadahiro, H. Takada, F. Ichikawa, A. Honda and M. Komatsubara	723
<b>Atomic Force Microscopy Study of Grain Evolution during Growth of Thin Oxide Films</b>	
F. Czerwinski and J.A. Szpunar	729
<b>An Experimental Investigation of Grain Boundary Structure Effects on Grain Growth</b>	
D.P. Field, T.W. Nelson and D.J. Dingley	735
<b>X-Ray Diffraction Measurements of Grain Size as a Function of Orientation in Primary Recrystallized Silicon-Iron</b>	
S. Fortunati and W. Graupner	743
<b>In Situ Atomic Resolution Electron Microscopy of Metal-Mediated Crystallization of Semiconductors</b>	
T.J. Konno and R. Sinclair	749
