

Table of Contents

Chapter 1: Modelling and Experimental Research of Heat and Mass Transfer Processes in Technical Systems

Thermophoretic and Suction/blowing Effects on MHD Mixed Convection Flow over an Inclined Plate Combined with Heat Generation, Chemical Reaction and Radiation B. Khemissat, A.M. Bouaziz and M.N. Bouaziz	3
Entropy Generation Minimization for Radiative Casson Fluid Flow through Permeable Walls and Convective Heating: A Comprehensive Numerical Investigation A.M. Obalalu, A.O. Ajala, A.O. Akindele, O.A. Areo, S.D. Ogundiran, K.A. Salaudeen and S. Alao	21
Temperature Distribution Comparison in Smooth and Stepped Functions R.S. Lebelo, W. Barros and S.O. Akindeinde	39
Effect of the Spacing Design of Two Alternate Baffles on the Performance of Heat Exchangers J. Salhi, K. Amghar, A. Filali and N. Salhi	53
Influence of Plaster Coating Thickness on the Thermal Behavior of Brick Masonry Walls P.I.B. Batista, J.H.A. Rocha, T.C.M. de França, F.P. Galarza and Y.V. Póvoas	73
Experimental Investigation of Air Bubble Curtain Effects on Water Wave Field D.R.C.B. Neves, M. Brito, A.A. Pires-Silva, C.J. Fortes and J. Matos	81

Chapter 2: Fatigue Failure Analysis of Structural Materials and Elements

Calculation and Experimental Method of Evaluation of Residual Working Resource of Reinforced Rods of Concrete Structures of Hydrotechnicalreinforced Structures V.V. Makarenko, S.Y. Maksimov and V. Khoruzhiy	103
Using the Simplified Concrete Damage Plasticity Model in Studying the Penetration Depth in Concrete X.B. Nguyen and T.T. Nguyen	109
Evaluation of Cyclic Tensile Stress Effect in Boiler Tube Failure A.D. Nugraha	115
Effect of External Load on Stress Distribution of a Pipeline Subjected to Indentation F.F. Risnawati and R. Sriwijaya	121
