

Table of Contents

Preface	
Chapter 1: Introduction	1
Chapter 2: Crystal Structure, Energy Bands and Phonon Spectra	
M.A. Green	5
Chapter 3: Optical Properties of Silicon	
M.A. Green	15
Chapter 4: Generation, Recombination, Carrier Transport	
M.A. Green	41
Chapter 5: Light Trapping	
M.A. Green	69
Chapter 6: Fundamental Efficiency Limits	
M.A. Green	83
Chapter 7: Surface and Bulk Material Properties	
M.A. Green	111
Chapter 8: Evolution of Silicon Solar Cell Design	
M.A. Green	139
Chapter 9: Practical High Efficiency Terrestrial Cells	
M.A. Green	169
Chapter 10: High Performance Concentrator Solar Cells	
M.A. Green	179
Chapter 11: Polycrystalline and Ribbon Silicon	
M.A. Green	205
Chapter 12: Conclusion	221
