

Table of Contents

Preface**Chapter 1: High Technology Ceramics**

S. Saito 1

Chapter 2: Ceramics in Modern Technology

R.M. Spriggs 7

Chapter 3: Explosive Processing of Ceramics

R.A. Graham and A.B. Sawaoka 17

Chapter 4: Explosive Processing Methods

R.A. Graham 29

Chapter 5: Explosive Shock Synthesis of Diamond

O.R. Bergmann and N.F. Bailey 65

Chapter 6: Dense Boron Nitride Synthesis

T. Akashi and A.B. Sawaoka 87

Chapter 7: Very High Pressure Sintering of Shock-Synthesized Wurtzite Type Boron Nitride Powers

A.B. Sawaoka and T. Akashi 119

Chapter 8: Shock-Activated Sintering

E.K. Beauchamp 139

Chapter 9: Hot Pressing of Shock-Modified Powders

E.K. Beauchamp and M.J. Carr 175

Chapter 10: Dynamic Consolidation of Aluminum Nitride Powder

W.H. Gourdin 207

Chapter 11: Explosive Compaction and Shock-Induced Reaction of Ceramics

K.I. Kondo 227

Chapter 12: X-Ray Diffraction Line Broadening of Shock-Modified Ceramic Powders

B. Morosin 283

Chapter 13: Deformation Microstructures in Shock-Modified Ceramic Powders

M.J. Carr 341

Chapter 14: Mechanism of Phase Changes under the Shock Process

Y. Syono 377
