

Table of Contents

Preface, Organizers, Committees and Sponsors

I. Plenary Lectures

Predicting Internal Oxidation: Building on the Wagner Model D.J. Young	1
Compatible Coating System to Provide Long-Life and High-Reliability T. Narita	12

II. Fundamentals

Ionic Transport under Chemical Potential Gradients - Kinetic Demixing and Decomposition in Metal Oxides and Scale Growth in High-Temperature Oxidation M. Martin	28
Void Formation at the Interface of the Duplex Scale Formed on Fe-5Cr Alloy at 773 K M. Ueda, K. Kawamura and T. Maruyama	34
The Reactive Element Effect – Past, Present and Future P.Y. Hou	39
Dissociative Adsorption of Carbonaceous Gases on Ni Containing Representative Elements Y. Nishiyama, K. Moriguchi and N. Otsuka	45
Discussions on some Properties of Alumina Scales and their Protectiveness S. Taniguchi	51
The Future of Alumina-Forming Alloys: Challenges and Applications for Power Generation B.A. Pint	57
<i>In Situ</i> Measurement of the Phase Transformation Behavior of Al₂O₃ Scale during High-Temperature Oxidation using Synchrotron Radiation S. Hayashi, I. Saeki, Y. Nishiyama, T. Doi, S. Kyo and M. Segawa	63
The early Stages of the Scale Growth on FeCrAl(+RE)-Type Alumina Formers J. Jedlinski, J.L. Grosseau-Poussard, M. Nocuń, G. Smoła, K. Kowalski, J. Dąbek, A. Rakowska and G. Bonnet	70
Thermodynamic Stability and Reaction Sequence for High Temperature Oxidation Processes in Steels M. Auinger, S. Borodin, S. Swaminathan and M. Rohwerder	76
Modeling Internal Oxidation of Binary Ni Alloys G. Zimbitas and W.G. Sloof	82
Calculation of Boundary Conditions between Internal and External Oxidation of Silicon or Chromium Containing Steels S. Nakakubo, M. Takeda and T. Onishi	88
Scale Surface and Scale/Alloy Interface for Alumina-Forming Alloys with Noble Metal and Yttrium T. Amano	94
Failure Characteristics of Scales Formed on Si-Containing Low Carbon Steels during Cooling - Influences of Cooling Rate and Water Vapor H. Nakata, A. Yamauchi, S. Taniguchi, I.R. Sohn, J.W. Choi and K. Kurokawa	101
High Temperature Oxidation of Advanced High Strength Steel: HT-XRD Method for Quantitative Evaluation T.K. Rout, J. Go, A.V. Gaikwad and S. Melzer	107
High-Temperature Oxidation of Low-Carbon Steel Coated by Solution-Spraying with Cerium and Aluminum Ions I. Saeki, E. Harada, K. Tsunekawa, K. Matsuoka, Y. Naramitate, Y. Sugiyama and T. Sato	114
High Temperature Service Experience and Failure Analysis of some Heat Resistant Stainless Steels P.S. Vangeli and B. Ivarsson	120
Effects of Si Content on the Oxidation Behavior of Fe–Si Alloys in Air T. Nishimoto, K. Honda, Y. Kondo and K. Uemura	126

Evolution of Al₂O₃ Scale Formed on Ni-Al-Pt Alloy in Atmospheres Containing Water Vapor	
M. Auchi, S. Hayashi, T. Narita and S. Ukai	132

III. Mechanical Properties

Prediction of Mechanical Scale Failure – Current Status and Perspectives	
M. Schütze and M. Rudolphi	138
Scale Deformation and Failure in Hot Rolling: Understanding and Simulation	
M. Krzyzanowski	144
Reproduction and Deformation Characteristics of Oxide Scale in Hot Rolling Using Vacuum Rolling Mill	
A. Segawa	150
Characterisation and Pickling Behaviour of Thermal Oxide Scale on Low Carbon Steel Produced from a Thin Slab	
S. Chandra-Ambhorn, T. Somphakdee and W. Chandra-Ambhorn	156
Evaluation of Mechanical Properties for Chromium Carbide Coatings at High Temperature	
Y.I. Oka and K. Goto	162
Mechanical Adhesion and Pickling Behaviour of Thermal Oxide Scales on Hot-Rolled Low Carbon Steel Strips Produced by Different Finishing Temperatures	
K. Ngamkham, S. Niltawach and S. Chandra-Ambhorn	170
Determination of the Epitaxial Strains of a Thermally Grown Oxide on a Metallic Substrate	
L. Kurpaska, J. Favergeon, L. Lahoche, G. Moulin and J.M. Roelandt	176
Suppression of Surface Hot Shortness Caused by Copper during Hot Rolling	
Y. Kondo	183
Effect of Oxidation Temperature to Descaling Properties of the Scale Formed on Silicon Containing Steel	
K. Yanagihara	189

IV. High-Temperature Corrosion in Aggressive Environment

Oxidation of Metallic Materials in Simulated CO₂/H₂O-Rich Service Environments Relevant to an Oxyfuel Plant	
W.J. Quadackers, T. Olszewski, J. Piron-Abellan, V. Shemet and L. Singheiser	194
Water Vapour Effects on the Oxidation of Chromia-Forming Alloys	
A. Galerie, J.P. Petit, Y. Wouters, J. Mougin, A. Srisrual and P.Y. Hou	200
Fireside Corrosion of Austenitic Tube Materials for Advanced USC Boilers	
N. Otsuka	206
Superheater Fireside Corrosion Mechanisms of SA192 and AISI 316L in WtE Environment: Lab-Scale and Industrial Results	
J.M. Brossard, X. Chaucherie, F. Nicol, C. Rapin and M. Vilasi	212
Detailed Studies on the High Temperature Corrosion Reactions between Potassium Chloride and Metallic Chromium	
J. Lehmusto, P. Yrjas, B.J. Skrifvars and M. Hupa	218
KCl-Induced High Temperature Corrosion of the Austenitic Stainless Steel 304L – The Influence of SO₂	
S. Karlsson, J. Pettersson, J.E. Svensson and L.G. Johansson	224
Technological Archives of R & D Activities about Corrosion-Resistant Materials and Protective Coating Systems at High Temperatures in Japan - Historical Retrospection and Future Prospect -	
M. Yoshiba	230
Development of Advanced Ultra Supercritical Fossil Power Plants in Japan: Materials and High Temperature Corrosion Properties	
Y. Fukuda	236
Improvement of the High-Temperature Erosion-Corrosion Resistance of Incoloy 800 by Cladding of 25.35.4CNB Reinforced by SiC	
P. Promdirek, S. Chandra-Ambhorn, S. Thongkasem, N. Kanchanasin and N. Walla	242

Influence of Gas Tungsten Arc Welding Parameters on the High-Temperature Erosion-Corrosion Resistance of Incoloy 800 Cladded by Stellite 12 for the Application as Thermowell	
P. Promdirek, S. Chandra-Ambhorn, R. Prasong, S. Rittirat and N. Pornpaisansakul	248
High Temperature Corrosion of M-40Cr-0.5Ce Alloys as Inert Anodes in Aluminium Electrolysis	
Y.P. Zhu, Y.D. He and D.R. Wang	254
Classification of Corrosion Behavior of Water Wall Tube Materials in Simulated Coal Combustion Atmospheres Including H₂S	
S. Najima, M. Morinaga and H. Shirai	260
High Temperature Corrosion Resistance of Siliconized Stainless Steel under Continuous Deposition of Salt	
N. Sato, T. Kaneta, M. Fukumoto and M. Hara	266
High Temperature Corrosion Behavior of Si-Containing Alloys in the Gas Phase of Air-(Na₂SO₄+25.7mass%NaCl)	
T. Sudiro, T. Sano, A. Yamauchi, S. Kyo, O. Ishibashi, M. Nakamori and K. Kurokawa	272

V. Protective Coatings (TBC, Diffusion Coating)

Enhanced Cyclic Oxidation Resistance of a Single Crystal Superalloy with an Electrodeposited Reactive Element Oxide Coating	
F. Pedraza-Diaz, B. Bouchaud, J. Balmain, G. Bonnet and J. Menuey	278
On the Development of a Protective Oxide System in Rare Earth Oxide Coated Nickel Superalloy under Isothermal Oxidation Conditions	
F. Pedraza-Diaz, B. Bouchaud, J. Balmain, G. Bonnet, V. Kolarik and J. Menuey	284
Oxidation of Micro-Sized Spherical Aluminium Particles	
V. Kolarik, M.d.M. Juez-Lorenzo and H. Fietzek	290
Thermal Cycle Properties of Plasma Sprayed Oxidation-Resistant Metallic Coatings	
S. Takahashi, M. Hatano, Y. Kojima, Y. Harada, A. Kawasaki and F. Ono	296
Advanced Coating Technologies for Aggressive Corrosion Environments in WTE and Power Plants	
Y. Kawahara and Y. Matsubara	302
Use of Silicon-Based Coating for High Temperature Protection of Metallic Alloys	
J. Xu, J. Favergeon, P.E. Mazeran, G. Moulin and C. Vu	308
Fe-Si Thermal Spray Coating for Fire Side Corrosion and Erosion Protection in Coal-Fired Boiler	
T. Okagaito, Y. Fukuda and Y. Kojima	314
Cross-Sectional TEM Characterization of Re-Based Diffusion Barrier on Nb Substrate	
S. Eni, Y. Wang, N. Hashimoto, S. Ohnuki and T. Narita	318
Characterization of Thermally Grown Oxide on Cold Sprayed CoNiCrAlY Bond Coat in Thermal Barrier Coating	
A. Manap, D. Seo and K. Ogawa	324
Improved Corrosion Resistance of Superheater Materials in H₂O Containing Environments Using Mn-Diffusion Coatings	
D. Schmidt and M. Schütze	330
Electrosynthesis of Rare Earth Oxide Coatings for High Temperature Applications	
F. Pedraza-Diaz, B. Bouchaud, J. Balmain, G. Bonnet and J. Menuey	336

VI. High-Temperature Corrosion of Intermetallics and Ceramics

Oxidation of SiC Fiber-Reinforced SiC Matrix Composites with a BN Interphase	
E.J. Opila and M.K. Boyd	342
Fabrication of Oxide Nano-Rod Array Structures via Internal Oxidation of Alloys	
M. Nanko	348
Oxidation Behavior of some Refractory Metals and Compounds	
B. Öney	354
Influence of Zr Addition on Oxidation Behavior of TiAl-Based Alloys	
M. Yoshihara	360

Oxidation Protection of Titanium Aluminides and Ni-Base Superalloys at High Temperatures by the Halogen Effect – Principles and Applications H.E. Zschau and M. Schütze	366
Formation of Ni Aluminide Coating Containing Reactive Elements by Simultaneous Electrodeposition and Cyclic Oxidation Resistance M. Fukumoto, T. Yokota, M. Hara and T. Narita	372
Crack Healing of Nano-Ni/Al₂O₃ Hybrid Materials via High-Temperature Oxidation D. Maruoka and M. Nanko	378
Internal Oxidation of Ni(Al) Solid Solution Zone Prepared by Pack Cementation of Pure Ni D.T.M. Do and M. Nanko	384
High Temperature Oxidation of TiAl and TiAl8Nb Alloys in Air J. Prazuchi, K. Przybylski, S. Chevalier and T. Brylewski	389
Oxidation Behavior of β-SiAlON in H₂O-Containing Atmosphere A. Yamauchi, X.M. Yi, T. Akiyama and K. Kurokawa	395

VII. Materials Issues in New Energy Conversion Solid Oxide Fuel Cell

Oxidation Properties of Metal/Ceramic Interconnectors for SOFC's in Air, Ar-H₂-H₂O and Ar-CH₄-H₂O Atmospheres K. Przybylski	400
Manganese-Cobalt Spinel Coating on Alloy Interconnects for SOFCs Y. Baba, H. Kameda, Y. Matsuzaki, S. Yamashita, N. Yasuda, T. Uehara, T. Horita, K. Yamaji and H. Yokokawa	406
Nanocoatings for SOFC Interconnects - Mitigating Chromium Volatilization and Improving Corrosion Properties J. Froitzheim and J.E. Svensson	412
Effect of Humidity on the Corrosion Kinetics of Ferritic Stainless Steels Subjected to Synthetic Biogas P. Promdirek, G. Lothongkum, Y. Wouters, S. Chandra-Ambhorn and A. Galerie	417
