

# Table of Contents

<b>Introduction: Early Results of Diffusion Investigations in Metals</b> G. Neumann and C. Tuijn	1
<b>Introduction: Experimental Techniques</b> G. Neumann and C. Tuijn	6
<b>Diffusion Mechanisms: The Vacancy Diffusion Coefficient</b> G. Neumann and C. Tuijn	19
<b>Diffusion Mechanisms: Two-Defect Models</b> G. Neumann and C. Tuijn	21
<b>Diffusion Mechanisms: One-defect models</b> G. Neumann and C. Tuijn	26
<b>Self-Diffusion: Self-Diffusion in FCC Metals</b> G. Neumann and C. Tuijn	31
<b>Self-Diffusion: Self-Diffusion in BCC Metals</b> G. Neumann and C. Tuijn	40
<b>Self-Diffusion: Point Defect Investigations</b> G. Neumann and C. Tuijn	51
<b>Self-Diffusion: Comparison of the results of diffusion and point defect investigations</b> G. Neumann and C. Tuijn	55
<b>Self-Diffusion: Concluding Remarks on Self-Diffusion</b> G. Neumann and C. Tuijn	60
<b>Impurity Diffusion: Empirical Correlations</b> G. Neumann and C. Tuijn	61
<b>Impurity Diffusion: Impurity Diffusion in Noble Metals</b> G. Neumann and C. Tuijn	66
<b>Impurity Diffusion: Impurity Diffusion in the 3d Metals of Group VIII</b> G. Neumann and C. Tuijn	111
<b>Impurity Diffusion: Impurity Diffusion in Hexagonal Metals</b> G. Neumann and C. Tuijn	121
<b>Impurity Diffusion: Impurity Diffusion in Aluminum</b> G. Neumann and C. Tuijn	129
<b>Impurity Diffusion: Impurity Diffusion in Lead</b> G. Neumann and C. Tuijn	138
<b>Impurity Diffusion: Impurity Diffusion in Refractory BCC Metals</b> G. Neumann and C. Tuijn	156
<b>Impurity Diffusion: Impurity Diffusion in the BCC <math>\beta</math>-Phase of Group IV Metals</b> G. Neumann and C. Tuijn	167
<b>Impurity Diffusion: Concluding Remarks on Impurity Diffusion</b> G. Neumann and C. Tuijn	177
