

# Table of Contents

## Preface, Organization and Committee

## Chapter 1: Material Technologies and Testing

<b>Simulation Study on the Austenisation and Cooling Behaviors of the Medium-Mn Steel</b> S.L. Chen, Y.Z. Bao, H. Dong and W.Q. Cao	3
<b>Development of Niobium Alloyed Press Hardening Steel with Improved Properties for Crash Performance</b> B. Jian, L. Wang, H. Mohrbacher, H.Z. Lu and W.J. Wang	7
<b>The Development and Application Research of Light Weight Heat Treated C-Grade Bullet Proof Steel</b> M.T. Ma, G. Chen, Y.H. Ma, Z.G. Li and Y. Feng	21
<b>The Effect of Heating Process on Strength and the Original Austenite Grain Size of Hot Forming Parts</b> K.H. Hu, X.D. Liu, G.W. Feng and R.D. Han	28
<b>Solutions for Hydrogen-Induced Delayed Fracture in Hot Stamping</b> H.Z. Lu, S.Q. Zhang, B. Jian, H. Mohrbacher and A.M. Guo	32
<b>Martensitic Stainless Steel as Alternative for Hot Stamping Steel with High Product of Strength and Ductility</b> L.J. Wang and C.M. Liu	37
<b>Microstructure Development and Mechanical Properties of a Hot Stamped Low-Carbon Advanced High Strength Steel Treated by a Novel Dynamic Carbon Partitioning Process</b> F.B. Zhang, H.W. Song, M. Cheng, X. Li, S.H. Zhang and W.J. Liu	42
<b>Microstructure Evolution Behavior of 22MnB5 Pickling Plate during Double Cold Reduction and Rapid Heating Process</b> S.J. Yao, L. Sun, H.H. Zhu and G.D. Wang	47
<b>Microstructure and Mechanical Properties of 22MnB5 Steel with Different Heat Treatment</b> H.W. Liu, H.Y. Zhao and J.B. Yu	55
<b>A Study on High Speed Tension Property of C-Grade Bullet Proof Steel Plate</b> M.T. Ma, Y. Zhao, G. Fang and Y. Feng	59
<b>Microstructure and Mechanical Properties of 22MnB5 Hot Stamping Part</b> P. Zhang, G. Wang, C.C. Pan and X.Q. Ren	65
<b>Microstructure and Mechanical Properties of 0.15C-1.5Mn-0.3Si Steel Treated by Quenching and Partitioning Process</b> C.N. Jing, J.C. Fan, S.B. Xu and Y.S. Zhang	69
<b>Research on Elements Distribution in Hot Dip Aluminum Silicon Coating of Hot Stamping Steel</b> Z.L. Xiong, H.Q. Liu, X.H. Wang, Y. Cui, J. Xue and J.Y. Li	73
<b>A Study on the Relationship between Hardness and Magnetic Properties of Ultra-High Strength Steel</b> Y. Zhang, Z.J. Wang, Y.L. Wang, Z.J. Zhang and Y.S. Zhang	78
<b>Hot Formed Steel and its Properties Test</b> Y.B. Li, W.T. Huo and S.W. Xia	82
<b>Effects of Austenitizing Temperature on Microstructure and Properties of Hot-Formed Steel</b> H.L. Cai, P.J. Du, H.L. Yi and D. Wu	88
<b>The Comparative Study on Dynamic Flow Behaviors of Bullet-Proof Steel Using Various Constitutive Models</b> Y. Zhao, M.T. Ma and Q.S. Jin	93
<b>Effects of Initial Material Conditions on the High Temperature Surface Oxidation of Press-Hardening Steels</b> B. Deng and H.L. Yi	100

<b>Thermal and Mechanical Characteristics of a HSLA Steel as Joint Partner for Hot Stamping Tailor Welded Boron Steel</b> B.T. Tang, Q.L. Wang, W. Zheng and Z.J. Yuan	104
<b>Effect of Pre-Heating Temperature on Microstructure and Properties of 22MnB5 Steel Hot Stamping</b> P. Li, Y.S. Liu, T.Z. Gongzi and K.M. Xue	108
<b>Research on Resistance Spot Welding Process of Hot-Stamped Steel BTR165</b> Y.Z. Fang	112
<b>Research on Resistance Spot Welding Property of Hot-Stamping Quenched Steel Sheets</b> J.P. Zhang, Y. Feng, L.F. Song, G.Y. Wang and Q.S. Jin	120
<b>Hot Deformation of Al - 4.5 Mass % Mg Alloy Sheet</b> P.Z. Zhao, T. Sakai and T. Anami	126
<b>Martensitic Automotive Steel Sheet - Fundamentals and Metallurgical Optimization Strategies</b> H. Mohrbacher	130
<b>Investigation on Properties and Microstructure in Hot Stamping Operation of Rear Axle Beams</b> X.C. Jin, Y.S. Xue, Q.N. Ma, M. Zhang and L. Li	143

## **Chapter 2: Forming and Stamping Technologies and Investigations**

<b>Research and Progress of Hot Stamping in China</b> M.T. Ma, Y.S. Zhang, L.F. Song and Y.L. Wang	151
<b>Research Status of Advanced Hot Forming Technology</b> W.L. Xu, Z.B. Huang and Y.H. Wan	169
<b>Robustness of the Tailored Hot Stamping Process</b> B. Rolfe, A. Abdollahpoor, X.J. Chen, M. Pereira and N.M. Xiao	177
<b>Hot Stamping High Strength Steel Spot Welding Technology and Quality Evaluation of Welding Joint</b> S.F. Hao, Z.D. Shan, S.J. Chen and C. Jiang	181
<b>Investigation of Mechanical Property and Springback Behavior with Hot Stamping RCP Process</b> B. He, L. Ying, P. Hu, Y. Yu, X. Zhao and L.W. Zhang	186
<b>Localized Austenitizing of the Blank to Make Tailored-Properties by Induction Heating</b> P.X. Liu, H.L. Yi, Y. Xu, Y.L. Wang and Y.S. Zhang	190
<b>Influences of Austenitization Parameters on Properties of Martensitic Stainless Steel in Hot Stamping</b> K. Wang, Z.B. Wang, P.X. Liu and Y.S. Zhang	194
<b>Non-Uniform Contact and Friction Sensitivity on Formability of Boron Steel in Hot Stamping Process</b> Y. Liu, Z.X. Gui, Z.G. Huang, Y.L. Wang and Y.S. Zhang	198
<b>Valuation Method for Effects of Hot Stamping Parameters on Tailored Properties</b> Z.J. Wang, Y. Xu, M.L. Zhou, Y.L. Wang and Y.S. Zhang	202
<b>Development of Hot Stamping Front Pillar Reinforcement</b> B. Liu, P. Liu and Z.T. Zhu	207
<b>Blank Shape Sensitivity on Temperature Distribution of Hot Stamping Boron Steel through Conduction Heating</b> W.K. Liang, L. Wang, Y. Liu, Y.L. Wang and Y.S. Zhang	211
<b>The Formability and Hot Stamping of Magnesium Alloy Sheets</b> G.S. Huang, L.F. Wang, F.S. Pan and M.T. Ma	215
<b>Warm Stamping of the 3rd Generation Sheet Steel for Automobiles</b> H. Dong, C.Y. Wang, Y. Chen and W.Q. Cao	219
<b>New Process of Hot Stamping in Combination with Q-P-T Treatment for Higher Strength-Ductility Auto-Parts</b> G.Y. Li, M.T. Ma, X.P. Mao and C.X. Zhao	223
<b>Hot Stamping Technology Applied on Vehicles on EuroCarBody</b> J. Zhou and M.T. Ma	232

<b>Ultra-High Strength Steel Hot Stamping Technology and Devices</b> Z.D. Shan, Q.T. Yan, C. Jiang and W.J. Rong	237
<b>Innovations of Hot-Forming for Cost-Efficient Lightweight Solution in Car Body</b> X.L. Miao	244

### **Chapter 3: Modeling, Simulation and Calculation Methods**

<b>Investigation of Hot Stamping Process of 22MnB5 Based on Metallo-Thermo-Mechanical Theory</b> Y.G. Liu, Y. Zhang, W. Zhang, J.W. Li, H.B. Wang, H.R. Gu and J.C. Jin	251
<b>Numerical Analysis on Bullet Penetration Resistance of Heat Treated Lightweight C-Grade Bulletproof Steel Plates</b> M.T. Ma, J.W. Zhang and J.P. Zhang	257
<b>High-Strength Steel Door-Beam Design and Digital Simulation</b> Z.D. Shan, Q.T. Yan, C. Jiang and W.J. Rong	264
<b>Hot Stamping Simulation with PAM-STAMP of the B-Pillar of a Well-Known SUV</b> W. Wang and J.L. Ma	268
<b>Analysis of the Design and Mechanical Performance about Hot Stamping Power Fitting Products</b> M.L. Zhou, L. Wang, Z.J. Wang, Y.L. Wang and Y.S. Zhang	272
<b>The Parametric Design of Cooling System of Hot Stamping Die</b> X.D. Xian and Y.L. Wang	276
<b>Study on Three Dimensional Direct Coupling Simulation of Induction Heating for Hot Stamping</b> Y. Li, X. Liang, Z.D. Wang, J.D. Li and T.L. Fu	280
<b>Thermo-Mechanical Forming Analysis and Mapping of Material Properties in Press Hardened Components with Tailored Material Properties</b> G. Bergman, D. Berglund and K. Isaksson	290
<b>Local Design and Near Net Shape Optimization of Typical Ultra-High Strength Steel B-Pillar in Hot Stamping</b> Y. Xu, C. Wang, Y.L. Wang and Y.S. Zhang	297
<b>The Process Optimization to Prevent the Local Wrinkles of Hot Stamping Parts and the Design of Tools</b> S.L. Sun, Z.J. Wang, X.C. Yao, Y.L. Wang and Y.S. Zhang	301
<b>Spring-Back Control in Automotive Door Inner Panel Stamping</b> P. Zhang, C.Y. Wang, Z.B. Lu and S.Y. Wang	305
<b>Optimized Design and Numerical Simulation of B-Pillar Reinforcement Panel by Hot Stamping Steel</b> B. Yang, D. Zhang, Z.H. Chang, R. Ge, Z.J. Wang and Y.S. Zhang	309
<b>Prediction of Microstructure and Mechanical Properties in Hot Stamping</b> C. Wang, B. Zhu, Y.L. Wang and Y.S. Zhang	314
<b>Hot Stamping Technology for Door Impact Beam</b> C.H. Tseng, M.F. Li, K.Y. Su and K.M. Tang	318
<b>A Force Model for UHSS Hot-Formed Automobile Parts</b> W.H. Cai, Z.D. Shan, Y.S. Ye and B.L. Zhuang	322
<b>Simulation of Thermal Distortion in Hot Press Forming with Dissimilar Material TWB</b> H.H. Bok, J.W. Choi, M.G. Lee, F. Barlat and D.J. Kim	330
<b>Experimental Platforms and Finite Element Analysis on Hot Stamping Processes</b> T.H. Hung, H.K. Tsai, F.K. Chen and P.K. Lee	334
<b>Implementation of Wear Models for Stamping Tools under Press Hardening Conditions Based on Laboratory Tests</b> L. Deng, S. Mozgovoy, J. Hardell, B. Prakash and M. Oldenburg	339

### **Chapter 4: Equipments and its Application**

<b>Localization on Technologies and Equipments of Hot-Stamping</b> X.J. Yang, W.W. Wang, H.Y. Zhao and X.Q. Ren	345
--	-----

<b>Research on the Ultra High Strength Steel Thermoforming Protective Atmosphere Heating Furnace</b>	
Z.J. Wang, J.Q. Hou, W.L. Zhang, B. Hu, X.L. Wu and C.C. Wang	350
<b>Furnace Technologies in Hot Stamping Concepts and Experience from Production</b>	
T. Fuchs and F.J. Ebner	354
<b>The Application of Toggle Mechanical Press in Hot Forming of High Strength Steel</b>	
S. Fan, J.H. Mo and Z.Q. Wang	358
<b>Hand-Held Blue Light 3D Measurement Technology and its Application in Hot Stamping</b>	
G.M. Zhan, Z.W. Li, X.J. Liu and K. Zhong	362
<b>Application of Magnetic Barkhausen Noise Test System in Hot Stamping</b>	
X.Y. Luo, Y. Zhang, Y.L. Wang and Y.S. Zhang	367
