

Table of Contents

Preface

Chapter 1: Special and Nonconventional Welding Technologies

Experimental Researches on Using Resistance Spot Welding for Built-Up Cold-Formed Beams Made of Corrugated Galvanized Steel Sheets	
B. Radu, V. Ungureanu, I. Both, M. Burcă, Ș. Benzar and D. Dubină	3
Preliminary Research for Development of MW-TIG Hybrid Welding System	
R.C. Marin, I. Ștefan, R.I. Iacobici and S.V. Savu	9
Eutectic Microbonding of Composite Materials Using Microwave Technology	
R.C. Marin, I. Ștefan, R.I. Iacobici and S.V. Savu	17
Influence Analysis of the Controllable Factors on the Objective Functions for Optimizing the Welding of PE 100 Pipelines for Natural Gas Distribution	
M. Cocard	25
Considerations about Hollow Polypropylene Balls Manufacturing by Ultrasonic Welding	
D.F. Teudea, N. SÎRBU, M. Vodă, A. Rou and R.I. Iacobici	35
Experimental Investigations on Capabilities of Resistance Spot Welding and MIG Brazing for Producing Corrugated Beams Using Galvanized Steel Sheets	
B. Radu, V. Ungureanu, I. Both, M. Burcă, Ș. Benzar and D. Dubină	47
Control of the Properties of Welded Joints in Wet Underwater Welding	
S.Y. Maksimov, O.A. Prilipko, A. Radzievskaya and J. Shepeliuk	55

Chapter 2: Materials Properties Assessment and Non-Destructive Testing

Comparative Study on Remaining Life Assessment of a Pressure Vessel, Working in Severe Conditions, Based on Results of Metallographic Replicas and Creep Tests	
I. Duma, A.C. Murariu, A.V. Bîrdeanu and R.N. Popescu	67
Estimating the Concrete Compressive Strength by Using the Concrete Ultrasonic Pulse Velocity and Moduli of Elasticity	
B. Bolborea, S. Dan, C. Matei, A. Gruin, C. Baeră and I.A. Perianu	77
Development of Green Cementitious Materials by Using the Abrasive Waterjet Garnet Wastes: Preliminary Studies	
C. Baeră, V. Vasile, C. Matei, A. Gruin, H. Szilagyi and I.A. Perianu	87
Computer Aided Design of Ultrasonic Test by Numerical Simulation	
R. Erdei, Z. Bézi and C. Takács	97
