

Table of Contents

Preface

I. Atomic Configuration

Atomic Structure of Grain Boundaries in Ordered and Disordered Binary Alloys V. Vitek, G.J. Ackland, M. Menyhard and M. Yan	3
Coincidence Site Lattices Revisited S. Ranganathan and B. Roy	21
Density Wave Theory of Freezing and of Interfaces T.V. Ramakrishnan and S. Sengupta	33

II: Interfaces in Materials

Interfaces in Electronic Materials S. Mahajan	53
Growth of Niobium Bicrystals with Specified Misorientations and Critical Current Resulting from Flux Pinning at Such Grain Boundaries A. DasGupta and Y.T. Chou	71
Progress Towards a Structure Property Relationship for Interfaces D.A. Smith	87
Crystalline Aggregates with Invariant Motif of Non-Crystallographic Symmetry, and its Implication for the Crystallography of Twinning and Grain Boundaries L.A. Bendersky	119

III: Phase Transformations

Studies of Faceting by High Voltage/High Resolution Microscopy K.H. Westmacott and U. Dahmen	133
Problems of Enclosed Crystal Interfaces U. Dahmen and K.H. Westmacott	147
Why Does the Phenomenological Theory of Martensite Crystallography sometimes Quantitatively Describe the Surface Relief Effect and the Transformation Crystallography of Precipitate Plates? H.I. Aaronson, T. Furuhara, J.M. Howe, W.T. Reynolds, J. Spanos and G. Spanos	169
The Physical Properties of Entropic Quasicrystals S. Ramaswamy	195
On the Diffraction Approach for the Characterization of Stacking Faults D. Pandey and V.K. Kabra	207

IV: Mechanical Behaviour

Role of Interfaces in Superplastic Flow K.A. Padmanabhan	219
The Role of Grain Boundary Processes in High Temperature Fatigue V. Raman and T.G. Langdon	241
Interfacial Segregation and Fracture R.D.K. Misra	257
Interfaces and the Nucleation of Solidification D.L. Zhang, W.T. Kim and B. Cantor	271

V: Migration and Transport

Zener Pinning in Concentrated Alloys

P.M. Hazzledine

297

Nucleation and Growth of Interfaces during Recrystallisation

B.B. Rath and R.A. Vandermeer

307

A Stochastic Theory of Grain Growth

C.S. Pande

325

Energy and Migration of Grain Boundaries in Polycrystals

C.A. Handwerker

339

Texture and Grain Growth in Iron-Silicon

S. Mishra

351

Role of Interfaces in Precipitation and Recrystallisation in Zirconium-Niobium Alloys

S. Banerjee, G.K. Dey and S.J. Vijayakar

375
