

Table of Contents

Preface

An Overview of the Delamination Problem in Structural Composites A.S.D. Wang	1
A Damage Mechanics Analysis of Interlaminar Cracking in Composites R. Talreja	21
Finite Element Application in the Fracture Analysis of Composite Materials – Delamination R.S. Barsoum	35
Interlaminar and in Plane Failure Prediction for Composites Subjected to Elastic Stress Waves J.C. Prucz and S. Fu	59
Interlaminar Fracture in Graphite/Epoxy Composites E.A. Armanios	85
Initiation of Free-Edge Delamination in Composite Laminates R.Y. Kim	103
Delamination Failures in Curved Composite Laminates R.F. Foral	137
Fracture Mechanics for Delamination Fatigue Crack Propagation of CFRP in Air and in Water M. Hojo, K. Tanaka, C. Gustafson and R. Hayashi	149
Understanding the Translation of Neat Resin Toughness into Delamination Toughness in Composites W.L. Bradley	161
Moisture and Temperature Effects on the Mode I and Mode II Interlaminar Fracture of Graphite/Epoxy Composites A.J. Russell and K.N. Street	199
Influence of Resin on Delamination and Debonding Mechanisms of Composite Materials under Fatigue Loading S. Mall	209
Aspects of Delamination Failure in Thermoplastic Composites P. Davies	225
Effect of Delamination on Buckling G.J. Simitses	237
Recent Analytical Results on Delamination Buckling and Growth W.L. Yin	253
Geometric Nonlinearities in the Postbuckling Behavior of Delaminated Composites G.A. Kardomateas	269
Edge Delamination Resistance by a Critical Ply Termination W.S. Chan and O.O. Ochoa	285
Experimental Evaluation of the Effects of Stitching on CFRP Laminate Specimens with Various Shapes and Loadings Y. Tada and T. Ishikawa	305
Improved Impact and Delamination Resistance through Interleafing J.E. Masters	317
