

# Table of Contents

## Preface and Committees

## Chapter 1: Remembrance Talks

### A Tribute to Piero Giorgio Bordoni

F.M. Mazzolai

3

### Arthur Stanley Nowick, an Intellectual Appreciation

D.N. Beshers

7

## Chapter 2: Invited Talks

### Studies of Condensed Matter at Low Temperatures by Ultrasonic and other Mechanical Spectroscopies

C. Elbaum

17

### Release of Tetrahydrofuran, Structural Phase Transitions and Dynamic Relaxation Processes in $\text{Ca}(\text{BH}_4)_2$

A. Paolone, O. Palumbo, P. Rispoli, R. Cantelli, E. Rönnebro, A. Luedtke and D. Chandra

24

### Recent Investigations on Grain Boundary Relaxation

Q.P. Kong, W.B. Jiang, P. Cui and Q.F. Fang

33

### Mechanical Spectroscopy of Nanocrystalline Metals and Nanometer-Thick Films: Characteristic Properties Originated in Nanostructures

H. Tanimoto

42

### Mechanical Relaxation Studies of Sub-Rouse Modes in Amorphous Polymers

X.B. Wu, H.G. Wang, C.S. Liu and Z.G. Zhu

52

## Chapter 3: Point Defect Relaxations and Diffusion

### *Ab Initio* Based O-O Investigation and the Snoek Relaxation in Nb-O

M.S. Blanter, V.V. Dmitriev and A.V. Ruban

63

### Application of Density Functional Theory to Point Defect Anelasticity of Carbon-Containing Austenitic Alloys

R. Gibala, W.A. Counts and C. Wolverton

69

### Effects of Alloying Elements on the Oxygen Snoek-Type Relaxation in Ti-Nb Alloys

H. Lu, C.X. Li, F.X. Yin, Q.F. Fang and O. Umezawa

75

### Internal Friction Study of Vacancy Hardening in B2 Fe Al Alloys

Y. Nishino, K. Ogawa and H. Tanaka

81

### Quantitative Analysis of Carbon in Ferrite in Dual-Phase Steels by Mechanical Loss Measurements

K. Honda, K. Nakano, H. Numakura, T. Yokoi, D. Maeda, N. Yoshinaga and K. Ushioda

87

### Anelastic Relaxation Measurements in Nb-46wt%Ti Alloys with Interstitial Solutes in Solid Solution

C.R. Grandini, O. Florêncio and W.J.B. Filho

92

### Oxygen Vacancy Relaxation in $\text{Ca}_3\text{Co}_4\text{O}_{9+\delta}$ Ceramics

G.C. Lin, H. Liu and J.X. Zhang

98

### High Temperature Mechanical Spectrum and Interstitial Oxygen in $\text{YBaCuFeO}_{5+\delta}$

Y.H. Yuan, X.N. Ying and J.S. Zhu

104

### $1-\text{Xre}_\text{X})_2\text{Mo}_2\text{O}_9$ (Re=Nd, Gd)

X.P. Wang, J. Hu, Z. Zhuang, T. Zhang and Q.F. Fang

110

### Relaxation Model of Lithium Ions in the Garnet-Like $\text{Li}_5\text{La}_3\text{Bi}_2\text{O}_{12}$ Lithium-Ion Conductor

Y.X. Gao, Z. Zhuang, H. Lu, X.P. Wang and Q.F. Fang

116

### Hydrogen-Induced Mechanical Losses in Oxygen-Free Copper

M. Ivanchenko, Y. Yagodzinskyy and H. Hänninen

122

## Chapter 4: Dislocation Dynamics

|                                                                                                                                                                                                         |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Interaction Potential between a Dislocation and a Pinning Atom in FCC Metals</b><br>T. Kosugi, Y. Kogure, Y. Nishino, N. Ide and I. Nakamichi                                                        | 131 |
| <b>Temperature Dependence of the Flow Stress of Body-Centered-Cubic Metals</b><br>M.J. Konstantinović                                                                                                   | 137 |
| <b>Influence of Strain Hardening 1% by Torsion on the Behavior of a Single Crystal Alloy (Cu-at.9% Al) in Internal Friction at High Temperature</b><br>C. Belamri, S. Belhas, S. Derdour and A. Rivière | 143 |
| <b>Low Frequency Relaxation Effect Observed in Al-Mg Alloy</b><br>N. Benyahia, M. Gerland, C. Belamri and A. Rivière                                                                                    | 149 |
| <b>Investigation of Defect Dynamics in Al-Si-Mg Polycrystals by Simultaneous Measurements of Internal Friction and Acoustoplastic Effect</b><br>K. Sapozhnikov, S. Golyandin and S. Kustov              | 155 |
| <b>Elasticity, Anelasticity and Yield Strength of Al-Si Alloys Obtained by Directional Crystallization</b><br>S.P. Nikanorov, B.K. Kardashev, B.N. Korchunov and V.N. Osipov                            | 161 |
| <b>Eutectoid Al-51at%Zn Alloy Studied by Isothermal Mechanical Spectroscopy</b><br>A. Rivière, V. Pelosin and M. Gerland                                                                                | 167 |
| <b>Mechanical Spectroscopic Study of Equal-Channel Angular Pressed Al-Ni Eutectic Alloy</b><br>Y. Watanabe, Z.G. Zhang, H. Sato, T. Inamura and H. Hosoda                                               | 173 |
| <b>Amplitude Dependent Internal Friction of Magnesium Alloy AZ31 at Room Temperature</b><br>D. Blažek, P. Palček, Z. Trojanová and J. Porubčan                                                          | 179 |
| <b>Fatigue Behavior of Magnesium Alloy AJ91 Studied by Amplitude Dependent Damping Measurements</b><br>W. Riehemann and Z. Trojanová                                                                    | 185 |
| <b>Ultrasonic Study of Elastic and Anelastic Properties of C/Mg-2wt.%Si Composite</b><br>S. Golyandin, K. Sapozhnikov and S. Kustov                                                                     | 191 |
| <b>Internal Friction in Extruded Aluminium Alloy</b><br>J. Porubčan, P. Palček, D. Blažek and Z. Trojanová                                                                                              | 197 |
| <b>Static Strain Aging in Fe-Mn-N Alloys Investigated by Impulse Excitation Internal Friction Analysis</b><br>J.H. Jung, E. Kozeschnik, S.H. Han and B.C. De Cooman                                     | 203 |
| <b>The IF Spectrum of Fe-C-N and Fe-17%Cr-C-N Alloys Measured by the Impulse Excitation Technique</b><br>I. Jung and B.C. De Cooman                                                                     | 209 |
| <b>Internal Friction and Magnetic After-Effect Study of Dislocation Dynamics in Thermally Aged Fe-1%Cu-C Alloys</b><br>B. Minov, L. Dupré and M.J. Konstantinović                                       | 215 |
| <b>Anelastic Effects on Martensitic Carbon Steels during First Stage of Tempering</b><br>J.J. Hoyos, A.A. Ghilarducchi, H.R. Salva and J.M. Vélez                                                       | 221 |
| <b>Hydrogen-Dislocation Interaction in Austenitic Stainless Steel Studied with Mechanical Loss Spectroscopy</b><br>Y. Yagodzinskyy, M. Ivanchenko and H. Hänninen                                       | 227 |
| <b>Characterization of Defects in Severely Deformed Iron by Mechanical Spectroscopy</b><br>T. Akaki, H. Morimoto, H. Numakura, D. Terada and N. Tsuji                                                   | 233 |
| <b>Internal Friction Study of the Influence of Deep Cryogenic Treatment on the Microstructure of a Bainitic Steel</b><br>N. Min, T.Y. Ji, L.J. Zhu, X.C. Wu and H.B. Wang                               | 239 |
| <b>Stress Relaxation Behavior of Cu-Ni-P Alloys Evaluated from Amplitude-Dependent Internal Friction</b><br>Y. Aruga, Y. Morikawa, S. Tamaoka and Y. Nishino                                            | 245 |
| <b>Isothermal Mechanical Spectroscopy in Equiatomic CuZr Alloy</b><br>D. Belamri, V. Pelosin, S. Belhas and A. Rivière                                                                                  | 251 |
| <b>Micro- and Macro-Plastic Properties of Be Polycrystals</b><br>B.K. Kardashev and I.B. Kupriyanov                                                                                                     | 257 |

## Chapter 5: Grain Boundaries, Nanocrystalline Structures and Thin Films

|                                                                                                                                                                                                     |     |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>High Temperature Mechanical Spectroscopy Study of 3 mol% Yttria Stabilized Tetragonal Zirconia Reinforced with Carbon Nanotubes</b><br>M. Mazaheri, D. Mari, R. Schaller and G. Fantozzi         | 265 |
| <b>High Temperature Internal Friction in Fine Grain and Nano-Crystalline Zirconia</b><br>P. Simas, M. Castillo-Rodriguez, M.L. Nó, S. De-Bernardi, D. Gómez, A. Domínguez-Rodríguez and J. San Juan | 271 |
| <b>Anelastic Effects of Phase Decomposition in 14-Carat AuAgCu Alloy</b><br>I. Tkalec, D. Mari and R. Schaller                                                                                      | 277 |
| <b>Grain Boundary Relaxation in 18-Carat Yellow Gold</b><br>A.K. Maier, I. Tkalec, D. Mari and R. Schaller                                                                                          | 283 |
| <b>The Effect of Annealing on the Internal Friction in ECAP-Modified Ultrafine Grained Copper</b><br>I.S. Golovin, P. Pal-Val, L.N. Pal-Val, E.N. Vatazhuk and Y. Estrin                            | 289 |
| <b>Mechanical Spectroscopy of Annealing Effects in Electrodeposited Nickel/Ceramic Nanocomposites</b><br>H.R. Sinning, G. Vidrich and W. Riehemann                                                  | 295 |
| <b>Simulation of Mechanical Response in Nanoparticles</b><br>Y. Kogure, T. Kosugi and T. Nozaki                                                                                                     | 301 |
| <b>Amplitude Dependent Damping of Aluminum-Matrix-Nanoparticle-Composites</b><br>A. Kazakewitsch and W. Riehemann                                                                                   | 307 |
| <b>Analysis of Microstructural Changes with Temperature of Thermally Sprayed WC-Co Coatings by Mechanical Spectroscopy</b><br>D. Mari, L.M. Berger and S. Stahr                                     | 313 |
| <b>Internal Friction and Shear Modulus of Graphene Films</b><br>X. Liu, T.H. Metcalf, J.T. Robinson, F.K. Perkins and B.H. Houston                                                                  | 319 |
| <b>An Ultra-High <math>Q</math> Silicon Cantilever Resonator for Thin Film Internal Friction and Young's Modulus Measurements</b><br>T.H. Metcalf and X. Liu                                        | 325 |

## Chapter 6: Phase Transformations

|                                                                                                                                                                                                                                                              |     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Rhombohedral and Monoclinic Phases of PZT near the Antiferroelectric and the Morphotropic Boundaries</b><br>F. Cordero, F. Trequattrini, F. Craciun and C. Galassi                                                                                        | 333 |
| <b>Phase Diagram of the Ferroelectric Perovskite <math>(\text{Na}_{0.5}\text{Bi}_{0.5})_{1-x}\text{Ba}_x\text{TiO}_3</math> by Anelastic and Dielectric Relaxation Measurements</b><br>F. Trequattrini, F. Cordero, F. Craciun, E. Mercadelli and C. Galassi | 339 |
| <b>Ultrasonic Relaxation in Phase Transition Region in Ferroelectric Semiconductors of <math>\text{Sn}_2\text{P}_2\text{S}_6</math> Family</b><br>V. Samulionis, J. Banys and Y. Vysochanskii                                                                | 345 |
| <b>Phase Transitions in Polymers for Lithium Batteries</b><br>A. Paolone, O. Palumbo, F. Teocoli, R. Cantelli and J. Hassoun                                                                                                                                 | 351 |
| <b>Mechanical Spectroscopy of Hyperstabilized Martensites</b><br>S. Kustov, R. Santamarta, E. Cesari, K. Sapozhnikov, V. Nikolaev, V. Fedorov, V. Krymov and J. Van Humbeeck                                                                                 | 355 |
| <b>A Strain-Glass Transition Observed in <math>\text{Au}_7\text{Cu}_5\text{Al}_4</math> Ternary Alloys</b><br>X.J. Jin, M.J. Jin, J.Y. Liu and G.L. Fan                                                                                                      | 361 |
| <b>Effects of Pinning and Atomic Ordering on Damping Properties and Martensitic Transformation of Copper-Based Shape Memory Alloys</b><br>S. Kustov, E. Cesari and J. Van Humbeeck                                                                           | 366 |
| <b>Magnetomechanical and Structural Internal Friction in Ni-Mn-In-Co Metamagnetic Shape Memory Alloy</b><br>D. Salas, E. Cesari, I. Golovin and S. Kustov                                                                                                    | 372 |

|                                                                                                                                                                                 |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>The Investigation of Internal Friction on Antiferromagnetic Transition and Martensitic Transformation in Mn-Fe(Cu) Alloys</b><br>Z.H. Guo, Y.H. Rong, S.Y. Gu and J.H. Zhang | 378 |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|

## Chapter 7: Amorphous Materials

|                                                                                                                                                                                                                                         |     |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Non-Affine Deformations at a Concentration Transition in Cross-Linked Elastomers in the Light of the 3D XY Spin Glass Model</b><br>L.V. Elnikova                                                                                     | 387 |
| <b>Mechanical Response of Bulk Metallic Glasses: Investigation by Mechanical Spectroscopy and Compression Tests - Elastic, Viscoelastic and Viscoplastic Components</b><br>J.M. Pelletier, C. Gauthier, J.J. Blandin and S. Gravier     | 393 |
| <b>Mechanical Spectroscopy, a Tool to Characterize Cement Latex Composites</b><br>G. Foray, S. Cardinal, A. Malchere and J.M. Pelletier                                                                                                 | 399 |
| <b>Alpha (Vitrea) Transition in Vulcanized Natural Rubber/Styrene Butadiene Rubber Blends Prepared by Mechanical and Solution Mixing</b><br>M.A. Mansilla, A.A. Ghilarducchi, H.R. Salva and A.J. Marzocca                              | 405 |
| <b>Investigation of Local Shear Transformation in a Metallic Glass by Means of High Amplitude Internal Friction Measurements</b><br>A. Nakamura, Y. Kamimura, K. Edagawa and S. Takeuchi                                                | 411 |
| <b>Mechanical Spectroscopy Study on the Light Soaking Effect on Hydrogenated Amorphous Silicon</b><br>H. Mizubayashi, I. Sakata and H. Tanimoto                                                                                         | 416 |
| <b>Fluidized States of Vibrated Granular Media Studied by Mechanical Spectroscopy</b><br>A.L. Sellerio, D. Mari and G. Gremaud                                                                                                          | 422 |
| <b>Nd<sub>60</sub>Fe<sub>30</sub>Al<sub>10</sub> Glass Forming Magnetic Alloys: A Mechanical Spectroscopy Study at the 300-560 K Temperature Range</b><br>H.R. Salva, A.A. Ghilarducchi, S.E. Urreta, L.M. Fabietti and J.M. Levingston | 428 |
| <b>Mechanical Spectroscopy Investigation of Liquid Pb-Bi Alloys</b><br>R. Montanari and A. Varone                                                                                                                                       | 434 |

## Chapter 8: Miscellanea, High and Low Damping, Techniques

|                                                                                                                                                                                                                                                 |     |
