

Table of Contents

Preface

Thermal Methods of Analyses and their Application to Clays and Ceramics J.G. Dunn and I.D. Sills	1
A Micromechanical Model for Crack Shielding and Crack Deflection in Heavy-Duty Ceramics W.H. Müller	7
Effect of Temperature and Testing on K_{Ic} Values of 3Y-TZP and Alumina Ceramics R.S. Shen, V. Zelizko and M.V. Swain	14
Characterisation of Zirconia-Alumina Ceramics by Rietveld Procedures with X-Ray and Neutron Diffraction Data A. van Riessen, B.H. O'Connor, L.D. Yu and R.J. Stead	20
Laboratory Testing of Pottery Sherds R.R. Hughan	27
Iran's Special Artistic Tiles A.A. Madani	32
Integrated Finite Element and Reliability Analysis in Ceramic Design and Science B. Ben-Nissan, J. Isles and A.J. Todhunter	36
Carbothermal Synthesis of β'-Sialon from a By-Product of Alumina Refining C.M. Cardile	47
R-Curve Effect on Statistical Fracture Behaviour of Ceramics K. Duan, Y.W. Mai and B. Cotterell	53
Phase Equilibrium Relationships in the System Al_2O_3-ZrO_2-SiO_2: An Update M.C. Greca, J.V. Emiliano and A.M. Segadães	58
The $Ba(Ti, Zr)O_3$-ZrO_2 Field in the Phase System BaO-TiO_2-ZrO_2 M.M. Hedges, M. Bannister and M.S.J. Gani	64
Formation of Energy Barrier and VDR Effect by Adsorbed Oxygen of $SrTiO_{3-x}$ Based Multi-Function Ceramics N. Ichinose, Y. Nakano and T. Takahashi	70
On Fracture Mechanics and Life-Time Predictions of Ceramic Roller Bearings W.H. Müller	76
Quaternary Phase Equilibria in the System Zr-N-B-C at 1500°C A.J. Ruys and C.C. Sorrell	83
Ternary Phase Equilibria in the System Zr-N-B-C at 1500°C A.J. Ruys and C.C. Sorrell	92
Crystal Structure and Electrical Property of Mn-Fe-Co-Ni Oxide for Thermistor Materials in the Manufacture Process T. Sasamoto, T. Meguro, T. Yokoyama, Y. Abe and M. Torikai	101
Finite Element Modelling of a Metal-Ceramic Interface A.J. Todhunter and B. Ben-Nissan	107
Phase Diagrams of Alumina - Alkali Oxide - Earth Alkaline Oxide Systems in Relation to Alkali Corrosion J.A.M. van Hoek, F.J.J. van Loo and R. Metselaar	111
Drug Elution form Porous Ceramic Components for Threshold Reduction in Pacemaker Applications N. Anderson, W.J. Buykx, E. Drabarek, R. Mathivanar, K.D. Reeve and M. Skalsky	120
Thermal Spraying of Hydroxyapatite for Bioceramic Applications K.A. Gross and C.C. Berndt	124
Mechanical Properties of a Sintered Al_2O_3/ZrO_2 Composite Y.W. Mai, M.V. Swain and B. Cotterell	130
Properties of Heat-Treated Reaction Sintered SiC and Fabrication of SiC/MoSi₂ Composite T. Iseki and C.B. Lim	138
A Comparison of Fibre Pullout and Pushout in Ceramic Fibre Composites M.G. Lau and Y.W. Mai	144

Spray Atomization and Deposition Processing of Particulate Reinforced Metal Matrix Composites	
E.J. Lavernia	153
The Use of Aluminium and Zirconium Precursors in the Synthesis of Zirconia Toughened Alumina Ceramics	
R.J. Stead, A. Kop and B.H. O'Connor	160
The Role of Interfacial Microstructure in the Mechanical Properties of SiC Whisker Reinforced Si₃N₄	
A.H. Swan and G. Dunlop	167
An Analysis of some Ceramic Floor Tiling Failures	
R. Bowman	173
Glaze Faults in Ceramic Floor Tiles	
A.L. Chamberlain, G. Ferguson and D. Phillips	179
Studies on the Moisture Expansion of Monocottura Floor Tiles of Australian Manufacture	
W.F. Cole and P.J. Banks	185
Colouring Ceramic Bodies	
R.H. Giller	191
Advances in Australian Tableware	
B. Stacey and R. Richards	197
The Moisture Expansion of Bricks and Walls	
S. Zsembery and T. McNeilly	202
Furthering Ceramic Training by the Distance Learning Approach	
M. Anderson	208
Engineered Ceramic Product Development Cycle	
R.C. Searle	214
An Overview of the ZTA Program at Curtin University of Technology	
R.J. Stead, J.E. Davies, B.H. O'Connor, J.R. Richards and C.N. Andrews	220
Present Status and Future Prospect of Fine Ceramics in Japan	
H. Suzuki	226
The Ionic Conductivity of Yttria-Zirconia Compositions	
S.P.S. Badwal and F.T. Ciacchi	235
Influence of Y-TZP Additions on the Conductivity of Yttria-Bismuth Oxide	
S.P.S. Badwal and F.T. Ciacchi	241
Electrodes for Fuel Cells and Oxygen Pumps: A Test Procedure	
S.P.S. Badwal and D.A. Graham	247
Reaction Mechanisms in the Formation of Lead Based Piezoelectric Ceramics	
P. Bryant and E. Daher	253
Development of a Multi Ceramic Sensor System for the Detection of Methane, Carbon Monoxide and Hydrogen in Mines	
D. Ghete, C. Mauchausse, M.P. Brungs and D.L. Trimm	258
Transient Response of a Low Temperature Zirconia Oxygen Sensor	
M.M. Hedges and M. Bannister	263
Memory Switching in Semiconducting Molybdenum-Phosphate Glasses	
M.H. Hekmat-Shoar, C.A. Hogarth and G.R. Moridi	268
The Effect of Lead Content, Sintering Temperature and Atmosphere Control on the Properties of Lead Zirconate Titanate	
R. Kingsland and P. Bryant	275
Effect of CO₂ on the Conductivity of Porous Zeolite Ceramics	
M. Nagai, Y. Hiraiwa, A. Hattori and T. Nishino	282
The Effect of Zirconia Powders on Properties of Lead Zirconate Titanate	
W. Wright and S.A. Prokopovich	288
The Airborne Particle Erosion Resistance of a Range of Engineering Materials	
J.E. Davies, R.J. Stead, C.J. Andrews and J.R. Richards	294
Characterisation of Liquid Metal-Ceramic Filters	
R.H.J. Hannink and D.G. Hay	301
Grinding of Engineering Ceramics with Diamond Wheels	
X.S. Li and I.M. Low	307

Machining with Ceramic Cutting Tools X.S. Li and I.M. Low	313
A Locally Produced High Alumina Wear Resistant Material N.W. Lim and A.L. McAtee	320
Development of a High Temperature Colouring Medium Using Spinel Based Compositions N. Miletich, A. Ray and D. Taylor	328
Utilisation of Ceramics in Slurry Pumps J.W. Mitchell, P.G. Huggett and C.I. Walker	332
Ti-Al-O-N Spinel Composite - A New Engineering Ceramic D.S. Perera, D.J. Cassidy and M.I. Ripley	338
Reliability Criteria for Engineering Ceramics V.J.A. Shevchenko and S.M. Barinov	344
The Benefits of Mg-PSZ in the Food Processing Industry S.W. Thompson and S.L. Bruce	351
Surface Resistance to Damage for Both Sides of Horizontally Toughened Float Glass S. Abdrahman, V.R. Howes and M.P. Brungs	357
Grouping Glass Artefacts by Specific Gravity and Refractive Index Measurements J. Boow, J. Smith and A. Ray	361
Effect of Li₂O Additions on the Crystallization of Soda-Lime Fluoro-Alumino Silicate Glasses R. Cooke-Yarborough and M.P. Brungs	366
Degradation of Commercial Window Glass R. Wuhrer and A. Ray	372
Powder Injection Molding as a Metal Forming Process - Effects of Powder Morphology, Size and Size Distribution Y. Arakida and R. Miura	377
Processing Effects on Properties and Performance of Injection-Molded Ceramics G. Bandyopadhyay and D.J. Sordelet	383
Aspects of Injection Moulding of Ceramics N.A. Stone, M.B. Berger, S. Hart and J.B. Surridge	389
Effects of Particle Size Distribution on the Properties and Processing of Ceramics by Injection Moulding N. Theilgaard	394
Benefits of Recuperation in Intermittent Kilns G.B. Anderson	402
Monitoring Product Temperatures in Tunnel Kilns New Developments in Hardware and Software M. Breeze and H. Wright	406
Development of a Locally Produced Kiln Furniture Body N.W. Lim and A.L. McAtee	411
Gradient Reduction Furnace M. Piippo and K. Asikkala	416
Firenests T. Riitta	421
Thin Film Ceramic Coatings via the Sol-Gel Process M. Anast, A. Wong, J.M. Bell, B. Ben-Nissan, J. Cullen, L. Spiccia, D. De Villiers, I. Watkins, B.O. West and G. Johnston	427
Cracking of Extruded Clay Products during Drying P.J. Banks	433
Structure of Powders Produced by Hydrolysis of Metal Alkoxides P.J. Bendeich and W.J. Buykx	439
Sol-Gel Precursor Chemistry L. Spiccia, B.O. West, J. Cullen, D. De Villiers, I. Watkins, J.M. Bell, B. Ben-Nissan, M. Anast and G. Johnston	445
Synthesis of Advanced Ceramics by High Energy Milling P. Matteazzi, G. Le Caër and E. Bauer-Grosse	451
Effects of Additives on the Behaviour of Cordierite Synthesis Components G.J. Piderit, P. Toro and E. Córdova	457

Fabrication of a Fine Grained Alumina Ceramic S. Rajendran and J.L. Woolfrey	462
Fabrication of High Strength Single and Two-Phase Oxide Ceramics S. Rajendran	469
Advanced Process for SiO₂ Film Deposition in Aqueous Solution Y. Sakai, T. Goda, A. Hishinuma and H. Kawahara	474
New Materials, Advanced Ceramics and Standards S. Schneider	480
Alternatives for Producing Advanced Ceramic Powders J.M. Schoenung	486
Relative Merits of Vacuum Pressing J. Spink and P. White	492
Particle/Substrate Interactions during Thermal Spraying D. Wang and C.C. Berndt	499
The Influence of Particle Composition on the Ceramic Behaviour of Flyash P. Barnes and M. Anderson	505
Use of Granite Dust for Making Aerated Concrete and Ceramics J. Beretka and A. Taylor	512
Plaster of Paris G. Hughes	518
Use of Industrial Process Wastes in the Heavy Clay Industry W.R. Lawson and D.G. Whitfield	525
The Pozollanic Activity of Calcined Diatomite as a Factor of Temperature and Time N.W. Lim and B.A. Sabaa	530
The Geology, Mineralogy and Ceramic Properties of Clays of the Pearl River Delta Area D. Mitchell, M.J. Stentiford and A. Vincent	536
Silica Soot as Raw Material for Ceramic Art Glazes M. Rajala and D. Falabu	543
Utilisation of Reverberatory Slag for Making Bricks and Tiles N.M. Sherman and J. Beretka	548
Quality Feldspars from Western Australia Going International C. Toyé	554
Design of Furnace Linings Using Advanced Refractories D.A. Bell	560
Alumino-Silicate Minerals Suitable for High Grade Refractories M.G. Lines	569
Silicon Carbide - The Forgotten Refractory J. Thomson	575
Fabrication of Silicon Nitride Ceramics A.S. Blicblau	579
Transient Liquid Phase Sintering of Silicon Nitride T. Ekström	586
Combustion Synthesis of Zirconium Boride Ceramics I.M. Low	592
Formation and Magnetic Properties of Fe-Nitrides by N₂⁺-Implantation into α-Fe Single Crystal Film S. Okamoto and K. Nakajima	598
Characteristics of Silicon Nitride Powder Synthesized from Western Australian Silicon C. Qitao, M.G. Zadnik, S. Gloggnier, L. Deyu and B.H. O'Connor	604
Fabrication of (Bi,Pb)-Sr-Ca-Cu-O Superconductors J. Argyriou, E.R. Vance, D.J. Cassidy, G. Triani, N. Savvides and S.X. Dou	610
Preparation of YBa₂Cu₃O_{7-x} Superconducting Powders by the Amorphous Citrate Process J. Cannell, M. Maric and S.A. Prokopovich	616
Microstructural Design and Processing of Cuprate Superconductors D.R. Clarke	621

Critical Current Density at 77K in Magnetic Field in Silver-Clad Superconducting Bi-Pb-Sr-Ca-Cu-O	
S.X. Dou, H.K. Liu, J. Wang, M.H. Apperley and C.C. Sorrell	626
Hot Isostatic Pressing of the Bi-Pb-Sr-Ca-Cu-O System	
S.X. Dou, H.K. Liu, K.H. Song, J. Wang, C.C. Sorrell and W.M. Bain	631
Superconducting Composites of Noble Metal/Bi-Pb-Sr-Ca-Cu-O	
H.K. Liu, S.X. Dou, K.H. Song and C.C. Sorrell	636
Effects of Processing Parameters on the Composition and Microstructure of BiSrCaCuO High T_c Superconductors	
M. Maric, M.H. Aslan, H. Jaeger, P. Majewski and K. Schulze	641
Preparation of YBCO and BSCCO High T_c Superconductors by Solution Methods	
M. Maric	647
Formation Process of High-T_c Superconducting YBa₂Cu₃O_{7-x}	
Z.B. Shao, H.Y. Jin, S.X. Dou, Y.L. Zhang and L.Q. Liu	653
Hot Pressing of the Bi-Pb-Sr-Ca-Cu-O System	
K.H. Song, S.X. Dou, H.K. Liu and C.C. Sorrell	656
Freeze Drying of (Bi,Pb)₂Sr₂Ca₂Cu₃O_{10+y}	
K.H. Song, H.K. Liu, S.X. Dou and C.C. Sorrell	662
Eutectic Alignment of YBa₂Cu₃O_{7-x} at 930°C	
J.P. Zhou, C.C. Sorrell, S.X. Dou and M.H. Apperley	666
Densification of YBa₂Cu₃O_{7-x}	
J.P. Zhou, C.C. Sorrell, S.X. Dou, H.K. Liu and A.J. Bourdillon	670
The Effect of Milling on Synroc Powder Characteristics	
P.J. Angel and W.J. Buykx	674
Surface Chemical Characterisation of Multicomponent Titanate Powders	
J.R. Bartlett and J.L. Woolfrey	679
Preparation and Characterisation of Synroc Precursor Powders	
J.L. Woolfrey and J.R. Bartlett	686
Intermediate Phase Development in Synroc Containing Sodium	
D.J. Cassidy and M.W.A. Stewart	693
Calcination of Synroc Powder	
D.J. Cassidy and J.L. Woolfrey	698
Pro-Formed Minerals as Synroc Precursors: A Technique for Mitigating Acid Attack during Processing	
M.W.A. Stewart, J.R. Bartlett and K.D. Reeve	704
Hot-Pressing Behaviour of Synroc Containing Sodium-Bearing Nuclear Wastes	
M.W.A. Stewart and W.J. Buykx	711
Crystal Chemistry and Phase Manipulation in Synroc	
E.R. Vance, S. Moricca, G.J. Thorogood and G.R. Lumpkin	717
The Surface Stability of Y-TZP Materials	
S.P.S. Badwal, F.T. Ciacchi and A.E. Hughes	722
The Control of Grain Boundary Phases in Zirconia Ceramics	
J. Drennan and R.H.J. Hannink	726
An Investigation of Ternary Zirconia Ceramics	
J.H. Hamlyn-Harris and I.D.R. Mackinnon	732
Subeutectoid Ageing of Secondary Precipitates in Mg-PSZ	
R.H.J. Hannink, O. Schmidt and J.R. Griffiths	738
Secondary Precipitate Growth in Mg-PSZ	
S. Hay, J.D. Nairn and D.H. StJohn	744
Time-Dependent Strength Behaviour of Mg-PSZ with R-Curve Characteristics	
W. Lentz, Y.W. Mai, M.V. Swain and B. Cotterell	750
Micromechanics of ZrO₂ Phase Transformation	
I.M. Low	759
Finite-Element Analysis of ZrO₂ Phase Transformation	
I.M. Low and K.K. Teh	766
Tetragonal Precipitate Growth in Mg-PSZ	
C.S. Montross	772

Wear and Friction Characteristics of PSZ and TZP Ceramics G.W. Stachowiak and G.B. Stachowiak	778
Compression Creep of 3Y-TZP Ceramics V. Zelizko and M.V. Swain	785
Wall and Floor Tiles G. Fregni	791
Heavy Clays G. Nasseti	794
Sanitary Ware A. Tenaglia	797
