

# Table of Contents

## Preface, Committee, Sponsor

## Chapter 1: Physical Metallurgy

<b>Effect of Rare Earths on the Precipitation Behavior of High Temperature Deformation Inhibitors in the Ferrite Zone of Oriented Silicon Steel</b> S. Hu, Z.L. Jin, Z.W. Wu, T. Li, W. Li and Y.Q. Hu	3
<b>Numerical Modelling of Thermo-Mechanical Processes in Steels - An Overview and Recent Progress</b> A. Pohjonen, J. Ilmola, O. Seppälä and O. Leinonen	11
<b>Electronic Structure of the Non-Stoichiometric <math>L2_1</math>-Type <math>Mn_{1.75}Co_{1.25}Al</math> Heusler Alloy</b> A.V. Lukoyanov, E.I. Shreder and V.V. Marchenkov	19

## Chapter 2: Composites

<b>Mechanical Properties of Epoxy-Based Hybrid Composites Reinforced by Fabrics and Powder Fillers</b> K. Mizera, K. Sałasińska, E. Irzmańska, N. Litwicka, P. Kozikowski and A. Gajek	27
<b>Dynamic Compression Simulation of Magnetorheological Elastomer Using Bouc-Wen Hysteretic Model</b> M.F. Jaafar, F. Mustapha and M. Mustapha	33

## Chapter 3: Construction 3D Printing

<b>Soil-Cement Matrices for Additive Construction: 3D Printing System Validation and Printing Tests</b> G. Silva, V. Burgos, R. Ñañez, S. Kim, G. Ruiz, M.A. Pando, R. Aguilar and J. Nakamatsu	43
<b>Evaluation of Chitosan and Potato Starch as Stabilizers to Improve the Mechanical and Water Durability Properties of Printable Earth-Based Matrices Reinforced with Sisal Fibers</b> D. Zavaleta, R. Ñañez, G. Silva, S. Kim, G. Ruiz, M.A. Pando, J. Nakamatsu and R. Aguilar	51
<b>Preliminary Experimental Evaluation of Buildability Improvement Methods for Concrete for 3D Printing</b> J. Baldoceca, G. Silva, S. Kim, G. Ruiz, M.A. Pando, J. Nakamatsu and R. Aguilar	61

## Chapter 4: Equipment in Microelectronic Production

<b>The Study of Velocity Field in Front Opening Unified Pod by CAE</b> Y.T. Lin, S.S. Hwang and J.A. Zhu	71
-------------------------------------------------------------------------------------------------------------	----
