

Table of Contents

Preface

Chapter 1: Materials for Supercapacitor Electrodes

Preparation of High Specific Capacitance Material Based on Activated Carbon-Manganese Dioxide Composite Using Lemon Peel (<i>Citrus limon</i>) Extract for Supercapacitor Electrode M.H. Ramadhan, S. Sumari, H. Nur and N. Nazriati	3
Facile Synthesis of Activated Carbon-Polyaniline Composites as Electrode Material for Application in Supercapacitor V.L.H. Putri, N. Mufti, J.D.N. Fahreza, S.N. Husna and S.R. Wibowo	15
Electrochemical Performance of Activated Carbon-NiCo₂O₄ as Candidate for Supercapacitor Electrode Materials S.R. Wibowo, V.L.H. Putri, N. Mufti, A. Aripriharta, M. Diantoro and E.T. Sari	25

Chapter 2: Synthesis of Inorganic and Organic Materials

-Two-Stage Hydrothermal Synthesis of TiO₂ Nanotubes with Variations of TiO₂/NaOH Molar Ratio T. Haryati, D.F. Metiardo, A.N. Diana, S. Suwardiyanto, Y.A. Sulistiyo and N. Andarini	37
Crystal Structure, Hirshfeld Surface, and Antibacterial Properties of [Ni(4-AP)₄(NCS)₂] (AP = Aminopyridine) M.R. Choir, S. Dwija Laksmiana, H.W. Wijaya and I.W. Dasna	47
Synthesis and Characterization of Ni(II) Complex with Terephthalate and Pyrazine Mixed Ligands by Solvothermal Method Y.P. Prananto, Y. Finisia, R.T. Tjahjanto, M.M. Khunur and I.S.A. Alfath	59
Synthesis and Characterization of Hematite (α-Fe₂O₃) from Iron Sand Using Coprecipitation Method R. Ramlan, A.A. Bama, A. Johan, M. Naibaho and M. Ginting	69
Structure and Dynamics of Carbon Dioxide inside "Hot" Ice with Cylindrical Channels M.R. Novianto, Z. Ningsih and L. Hakim	77

Chapter 3: Pharmacology and Biomedicine

Binding Affinities of Hyptolide and its Derivatives onto HDAC Class IIa Protein from <i>In Silico</i> Analysis L.T.M. Rahayu, P. Siahaan and M. Suzery	89
Expression and Characterization of Recombinant Endo-β-1,4-D-xylanases XynBTN63D from Soil Termite Abdomen in <i>Escherichia coli</i> BL21 (DE3) A.A.I. Ratnadewi, S. Muyasyaroh, F. Harum, W. Handayani and S. Sudarko	99
Screening Multitarget Anticancer Compounds from Salicylic Acid Derivatives: (Without and with Amino Acid Linkage) by <i>In Silico</i> Docking W. Warsito, M. Masruri, S. Murlistyarini, D.P. Pangesti and A.Z. Azhar	109
Biotransformation of Isoeugenol Into Vanillin and its Derivatives Using <i>Pseudomonas aeruginosa</i> as an Enzyme Biocatalyst Agent: Effect of Substrate Concentration and Incubation Time M.H.F. Rahman, E.D. Iftitah, A. Roosdiana and S.E. Wulandari	119

Chapter 4: Wastewater Treatment and Waste Recycling

Preparation of Chitosan Film for Smart Packaging: The Effects of Base on Deacetylation Process D.A. Nastiti, A.T.K. Anwar, A. Sjaifullah, B. Busroni and M. Reza	131
--	-----

Potential of the Consortium Bacteria as A Domestic Waste Water Bioremediation Agent E.H. Sanjaya, A. Elchamida, D.A.E. Saputri, S. Prabaningtyas, A. Witjoro and E. Susanti	141
Fabrication and Characterization of Cellulose Acetat / N-Methyl Pyrollidon Membrane for Microplastics Separation in Water Y. Rahmawati, S. Nurkhamidah, A.A. Rahmah and M.A. Rifai	147
