Preface

Chapter 1: Quasiatomic Nanoheterostructures: New Model Superatoms of Monograph "New Quasiatomic Nanoheterostructures: Artificial Atoms and Quasimolecules: Theory" S.I. Pokutnyi	1
Chapter 2: New Quasiatomic Nanoheterostructures: Artificial Atoms and Quasimolecules of Monograph "New Quasiatomic Nanoheterostructures: Artificial Atoms and Quasimolecules: Theory" S.I. Pokutnyi	7
Chapter 3: Optical Absorption of One-Particle Quantum-Confining States of Charge Carriers in Quasi-Zero-Dimensional Nanosystems: Theory of Monograph "New Quasiatomic Nanoheterostructures: Artificial Atoms and Quasimolecules: Theory" S.I. Pokutnyi	15
Chapter 4: Electron States in Ellipsoidal Nanosystems in Magnetic Field: Theory of Monograph "New Quasiatomic Nanoheterostructures: Artificial Atoms and Quasimolecules: Theory" S.I. Pokutnyi	23
Chapter 5: Size Quantization Stark Effect in Quasi-Zero-Dimensional Nanoheterostructures of Monograph "New Quasiatomic Nanoheterostructures: Artificial Atoms and Quasimolecules: Theory" S.I. Pokutnyi	33
Chapter 6: Excitonic Quasimolecules in Nanosystems: Theory of Monograph "New Quasiatomic Nanoheterostructures: Artificial Atoms and Quasimolecules: Theory" S.I. Pokutnyi	39
Chapter 7: Exciton Formed from Spatially Separated Electron and Hole in Dielectric Quantum Dots: Theory of Monograph "New Quasiatomic Nanoheterostructures: Artificial Atoms and Quasimolecules: Theory" S.I. Pokutnyi	45
